DECISIONS IN COMMERCIAL LAW.

GOLD MEDAL FURNITURE CO. v. LUMBERS.—A lease of part of a building contained a proviso that in the event of the lessor disposing of the building, the lessees should go out on notice; and shortly after the lease was made he notified them to vacate, as he had disposed of his interest in the building, which they did, under protest. The alleged disposal was by an agreement in writing between the lessor and another, whereby the latter was to have superintendence of the building, to obtain tenants at higher rents, and to collect the rents, the leases to be in the name of the former, the latter to have a sub-lease on the happening of certain events, and an option to purchase at any time before its expiration. It was held not to be a disposal of the building within the meaning of the proviso: but as the lessor had not intentionally, wilfully or maliciously misled the lessees, and was acting in good faith upon what he believed to be his rights, there was no actionable false representation. But the lessees were entitled to damages for breach of the short form covenant contained in the lease, for quiet enjoyment "without interruption or disturbance from the lessor;" the covenant being against the lessor's own acts, it was not material whether the act assigned as a breach was lawful or not, and the acts here done were in breach of the covenant, for there was no right to give the notice to quit, nor to complain that the lessees acted upon it without waiting for an action to be brought.

PERRAULT v. GAUTHIER.—This is a Quebec case tried before the Supreme Court deciding certain rights claimed by striking workmen. Men carrying out the regulations of a trade union, which prohibited them from working with non-union employees, without threats, violence, intimidation or other illegal means, took such action as prevented the non-union men from obtaining employment. It was held that the union men did not by this action incur liability to an action for damages, and an appeal in the matter was dismissed with costs.

CUNNINGTON v. PETERSON.—Several parties' names appeared as signatures to a promissory note. It was shown that the signature of one of the alleged makers had been added not by himself nor his authority, but was added to the note after others had signed it; although before the note came to Cunnington, a holder for value. Held, that the plaintiff being the holder of the note in due course, and the alteration not being apparent, he could avail himself of it as if it had not been altered under the proviso to s. 563 of the Bills of Exchange Act, 1890, 58 Vict., c. 33.

A BRITISH COLUMBIA letter of 7th inst. says that the sawmills on the inlet are very busy, mostly working overtime. The Royal City mills have extensive orders from adjoining territories, and its sash and door factory is busy on cannery and door orders. The Pacific Coast Lumber Company's mill runs night and day, double shifts being employed on cedar lumber by day and cedar shingles by night. The Brunette sawmills also work overtime, filling orders from the Northwest, and even Ontario.

THE bridge works of McNeil & Co. at New Glasgow, Nova Scotia, are busy turning out iron bridges. It has four now under construction, from 100 to 150 feet long, for Joggins Mines, Yarmouth, and elsewhere. It shipped one 90 foot bridge to King's county, and a larger one to Wilmot, in the Annapolis Valley. County and township, as well as town authorities, are perceiving the economy of bridges made of something more durable than wood.

RACE

STYLES
FOR GENTLEMEN

Next week will be race week. Being an afternoon function, the natural question for gentlemen to ask will be, what will constitute a correctly attired individual at such? Lord and Master Fashion is liberal in his dictates this season for such as the O. J. C. Meeting, and while the frock coat will be the absolutely correct dress, the three-button cutaway is permissible.

Of course the neat sack suit will be in evidence.

The Black Chesterfield overcoat of some fine soft goods will predominate. Other 'racey' styles are the Paletot and Paddock coats, and the gentleman who appears at the races with his field glass and attired in one or other of these latter will be following the letter of the law, as is considered 'quite English.' That the O. J. C. will be more than ever a dressy affair, HENRY A. TAYLOR, Draper, the Rossin Block, will testify, he having already placed a great many orders for these special race garments.

THE Dominion Cigar Manufacturers' Association is trying to get a rebate of ten cents per pound on all cuttings exported from cigar factories in which solely foreign leaf tobacco is used.

GALENA ore has been found on the shores of Loch Lomond, Richmond county, Nova Scotia. Specimens have been sent to assayists in Halifax, and the ore has been pronounced of good quality.

MR. JAMES H. ROGERS, of Toronto, has been visiting Winnipeg and arranging for improvements to his three-story block on Main street in that city. It has been decided to convert the structure into a modern office building, with an attractive front.

WE observe that the City Bank of Buffalo sends circulars to its customers announcing its arrangement to issue drafts direct on the Canadian Bank of Commerce, Dawson City, Klondyke, the centre of the Yukon gold-bearing district, and to furnish credits available in that distant country.

IT has been computed by the New York Times, from data obtained from Appleton's and its own files, that during the past five years $165,800,000 has been contributed in the United States from private fortunes for libraries, colleges, museums, and other public educational institutions. More than $45,000,000 was donated in 1897.

IN the month of April a shipment of some 55 tons of tallow was made from Halifax to a British port. This may develop into a permanent trade. It used to be the case that the largest Nova Scotia producer disposed of the product to the Intercolonial Railway Company, but this year the railway has adopted a mineral oil for lubricating, instead of tallow, on the ground of economy.

RECENT incorporations in Ontario include the William C. Wilson Company, limited, with a capital of $20,000, to deal in oils, paints, mill supplies and ship chandlery; the parties are from Toronto and Lawrence, Mass. The Parnell-Dean Steam Baking Company, London, capital $15,000; the Cornwall Milling Company, capital $40,000.

FOR more than fifty years Mr. Alexander Milloy has been traffic manager of the Richelieu and Ontario Navigation Company, and he is among the oldest veterans of this continent in that capacity We have just learned of his superannuation, and are glad to know that he will receive a reasonable pension for his long and faithful services. His successor is Mr. G. A. Browne.

LAST Saturday was the day set for opening the delightful hotel of the C.P.R. at Banff in the Rocky Mountains. Mr. W. L. Matthews, the manager, passed through Winnipeg a few days before that date with 45 servants for the hotel. A party of 12 had previously gone out. Some improvements have been made during the winter to the house, and the place is likely to be filled with tourists from June to October.

NEWS of Saturday and Sunday last from Northwestern Ontario was that spring activity is being interfered with by low water in the lakes and streams. It was so low in the Lake of the Woods and tributary streams that navigation was suspended. "It is impossible to get up the Rainy River, and steamers have been compelled to return to Rat Portage with large cargoes of freight." The people up there are grumbling at the Government for delay in improvements to navigation that have been often asked for.

Monthly. $1 a year. Ten cents a copy.
ACCOUNTICS ASSOCIATION, Publishers,
262 West Broadway, New York.

Mercantile Summary.

A voluntary assignment is made by J. M. A. Blanchette, of Ste. Louise, Que., who began storekeeping in 1895 on borrowed capital. He owes $3,400, nearly altogether in Quebec, and has assets of about $2,400 only.

An order-in-council has been issued at Ottawa cancelling the one of 1895, which established the boundaries of the Territories. Legislation will be asked to authorize the divisions of the portions of Canada not comprised within any province, into nine provisional districts, the present four and Ungava, Keewatin, McKenzie, Yukon and Franklin. The boundaries of these latter five will be slightly changed.

Duncan McGregor, of Westville, N.S., doing a leading general store business, under the style of McGregor & Co., has notified creditors that he has decided to close out business, and has made assignment to James H. Marshall for the general benefit and without preference. The concern was in trouble four years ago, when they compromised liabilities of some $20,000 at 40 cents in the dollar.

An assignment has been made to the Court by Josiah Boydell, general merchant, at Bury, Que. Mr. B. was previously a clerk of limited means, and in buying out the $10,500 stock of J. W. Morrow, in 1895, assumed a pretty heavy load. He has shown signs of distress for a year or so past, and is said to owe about $11,000, with apparent assets of about $12,000. —— P. & H. Gobeille, tailors, Waterloo, Que., have succeeded in arranging a compromise at 50 cents, spread over nine months.——H. Dufour & Co., Murray Bay, Que., have now assigned to the Court. They owe $9,229, with nominal assets of $6,045. —— H. O. Viau, furniture, Three Rivers, has arranged a composition, on liabilities of $2,000, at 25 per cent., cash.

From Montreal the following failures are reported since last issue: Langlois & Co., who began business as flour and produce merchants in 1896, with somewhat of a splurge, have fyled consent to assign, after being frequently sued. The principal partner had been previously unsuccessful in the plumbing business. Liabilities are put at $8,641, with assets of $2,383. – Miss Ryan, an uptown milliner, has assigned, owing about $4,000.——H. W. Bode, saloon keeper, has consented to assign. He is said to owe $5,400.——A demand of assignment has been made upon Damase Leclair, a prominent builder in the north-eastern suburbs. He became involved through accommodation given Lefebvre & Co., vinegar manufacturers, who failed.—— W. A. Thouin, a grocery retailer, has assigned, and is trying to effect a compromise on liabilities of $2,750.

CORPORATION OF THE
Town of Midland.

Sealed tenders will be received at the office of the undersigned until 6 o'clock p.m. on Monday, the Thirtieth (30) Day of May next for the purchase of Debentures of the said town, endorsed by the County Council of Simcoe, to the amount of twenty-five thousand dollars ($25,000), said debentures redeemable in thirty (30) years from the 20th day of December, 1897, and bearing interest at the rate of five per cent. (5%) per annum, payable annually.

S. A. MILLIGAN,
Mayor.

Midland, May 12, 1898.

TOWN OF TRURO LOAN,
$39,200

Sealed Tenders endorsed "Town of Truro Loan, and addressed Town Clerk, Truro, will be received till 12 o'clock noon on Saturday, 21st May instant, from persons wishing to loan money to the Town of Truro. $39,200 is required at once. This loan has been authorized by a regularly called meeting of the ratepayers of the Town of Truro, and debentures will be issued as soon as the Nova Scotia Legislature passes the act, which will probably be in April next.

These debentures will run twenty years and will bear interest at 4 per cent. half-yearly.

Offers will be received for the whole amount in one sum or for sums of $500 and upwards. From the time money is received till the debentures are delivered the interest at 4 per cent. will be paid for the principal.

Persons offering will state what premium they are prepared to give

The Town Council do not bind themselves to accept the highest or any tender.

By order,
W. D. McCALLUM,
Town Clerk and Treasurer

Truro, 4th May, 898.

Mercantile Summarv.

STEAMERS from Chicago bringing grain to Midland, Ont., for shipment eastward by Grand Trunk, carry good-sized cargoes. Two of the boats brought 232,000 and 211,000 bushels respectively. Another one carried 146,000 bushels.

SEVERAL columns of correspondence and interviews appear in the Montreal papers, giving the Montreal Water and Power Company's side of the much beclouded dispute with the city. The recent decisions of the courts served to show that there were two sides to the case, and, in the opinion of the Gazette, did not leave the city much choice for action.

ANNOUNCEMENT is made of the arrival from Liverpool at Quebec on Tuesday night, of the new Dominion line steamer "Dominion," of 6,500 net tons, and a handsome ship she is. Her dimensions are 445 feet length, 50½ feet breadth, 27 feet draft. She has twin screws, and made 325 and 326 miles per day on two days of her stormy trip. She brings, we are glad to see, 95 cabin, 77 intermediate, and 167 steerage passengers.

A CURIOUS mishap befell, on Tuesday morning last, the United States revenue cutter "Gresham." That steamer had been cut in two and pontooned for passage through the Canadian canals to Montreal, where it was to be reunited and sent to join the American navy on the Atlantic or Gulf coast. The bow section suddenly careened and sank to the bottom of the St. Lawrence, near Ogdensburg, in 25 feet water. The accident was caused by the deck being overloaded.

THERE are this week two failures in Toronto of some importance. One of these is that of W. J. Guinane, who succeeded to Guinane Bros., shoe dealers, nearly two years ago. When the firm dissolved W. J. had stock and book debts which he said amounted to $40,000. These, with the addition of real estate, gave him nominal assets of $60,000. At that time he owed $25,000. Besides conducting the Yonge street store he had branch shops on King and Queen streets. For some time past he has bought but few goods in this city. His principal liabilities are now due in Quebec and in American cities, and they will no doubt be large. A few days ago he was sued by two creditors and this led to his assignment.

WHEN, in 1897, the wholesale grocery firm of J. W. Lang & Co., Toronto, became involved, F. J. Lumsden, who had been bookkeeper for the firm, bought the stock of his employers. This purchase amounted to $22,688, being obtained at a discount of 15 per cent. The money for the transaction was advanced by T. H. Steele, of Barrie, who secured himself by a chattel mortgage covering the stock. This mortgage is now being foreclosed, and a bailiff is in possession of the premises.

AFTER making a living by shoemaking, at Algoma Mills, for five years, F. D. Pepin makes an assignment.——Owing to some difficulty apprehended by Chas. White, he turned over his drug business, at Elmvale, to his wife about 1893. Since then the store has continued to do a fair trade. The other day she suddenly assigned; we have not heard the cause of her assignment.——A bailiff has taken possession of the grocery store of Jos. M. Parker, at Picton. Mr. Parker's wife managed the business, while he attended to his duties in a mill where he was employed; an economical but unsuccessful commercial arrangement.——An assignment has been made by C. Lamarche & Co., hotelkeepers at Mattawa. Their chattels were mortgaged for $700, and outside creditors need not expect very much.

ALLEN & GINTER.
RICHMOND, VA.

FREEHOLD LOAN & SAVINGS CO.

DIVIDEND NO. 77.

Notice is hereby given that a dividend at the rate of 6 per cent. per annum on the capital stock of the company has been declared for the current half-year, payable on and after the First Day of June next at the office of the company, corner of Victoria and Adelaide streets, Toronto.

The Transfer Books will be closed from the 17th to the 31st May, both days inclusive.

Notice is hereby given that the General Annual Meeting of the Shareholders of the company will be held at 2 p.m., Tuesday, June the 7th, 1898, at the office of the company, for the purpose of receiving the annual report, the election of directors, etc., and that at such meeting there will be submitted for the approval of the shareholders by-laws changing the date of the annual meeting of the shareholders of the company from the first Tuesday of June to such day in the month of February in each year as the directors may appoint, and to provide that the fiscal year of the company shall terminate on the 31st December in each year as required by the loan corporations' act of the Province of Ontario Revised Statutes of Ontario, 1897, chapter 205.

By order of the board.

S. C. WOOD, Managing Director.

Toronto, 27th April, 1898.

Mercantile Summary.

Wm. Blair, a Victoria, B.C., grocer, effected a sale of his business, and paid his two principal creditors 50 per cent. of their claims.

The thirty-foot channel in Lake St. Peter is not a misnomer. The depth of water at Sorel on Monday last was 30 feet 6 inches; in the Montreal harbor channel on Tuesday it was 30 feet.

Determining to dissolve partnership and place their affairs in liquidation, the Montreal firm of Letang, Letang & Co., dealers in hardware at wholesale, on Wednesday made a voluntary assignment to Messrs. J. A. Painchaud and C. A. Sylvestre, who will wind up the business of the house. The firm has liabilities of about $100,000, but it is claimed that the assets are $200,000. The firm has given a mortgage of $65,000 upon real estate to a bank on behalf of the creditors.

M. C. DICKSON, D.P.A., Toronto

Adolphe Dombroski, wholesale dealer in pork and hardware, Quebec, has failed, according to a special to the Star, owing $22,556 and showing assets of $15,000.——W. A. Tozer of that city has made an assignment.

There has been a strike of journeymen plumbers in Winnipeg. They had been getting 25 cents an hour and wanted 35, and stayed "out" two weeks. Now they have compromised at 30 cents per hour, poor down-trodden fellows, and go back to work.

A dozen lumbermen of Michigan and other States held a conference at the Russell House, Detroit, on Tuesday, to consider what steps they would take to get their logs out of Canada after this season. They say they will put up a vigorous campaign for relief, either by contesting the law in the courts or by working to secure remedial legislation.

On Wednesday last the Beaver Line steamer "Lake Huron" took out of the port of Montreal a general cargo for Liverpool, including 61,000 bushels of grain; 30 cars box meats; 300 standards of lumber; 17 cars of flour; 428 head of cattle and 20 horses. The steamer "Montezuma" of the Dominion Line took out a full general cargo, including 230,000 bushels of grain, 500 head of cattle and 150 horses.

A live lot are the St. John business men. They believe in advertising. The Board of Trade and the City Council are uniting to publish and circulate thousands of copies of a book describing St. John harbor and its facilities for trade. Why does not Halifax do something of the kind instead of maintaining a sort of splendid isolation, and proudly demanding that Government shall do everything for her?

It is scarcely more than a year since Wesley Brownlee started a fancy goods store in Galt. There does not seem to have been room for him. Owing to strong competition he could not make any progress and already is obliged to assign.——Geo. Hutchinson has been in the stove and tinware trade in Peterboro for over twenty years. Although industrious and capable, he has found it necessary to assign. Granting credit too freely is one of the causes of his trouble.——Another assignment is that of Matthew Berry, a hotel keeper of ten years' standing in Kincardine.

We hear of the dissolution of the city of Quebec firm Campbell & Brodie, shoes and rubbers. Mr. Amos Campbell is to continue, and proposes to manufacture for the wholesale trade only.

It will be gratifying intelligence to many who admire unselfish fulfilment of duty under hard conditions, to know that the Dominion Government has placed in the supplementary estimates $5,000 gratuity to William Ogilvie, D.L.S., in recognition of his services to Canada in the remote Yukon District of our North-West.

It has been stated that quantities of sulphur, which is now contraband of war, because entering into the manufacture of explosives, are being shipped through Canada into the United States, ostensibly for the use of paper manufacturers who use it largely. In that connection the Collector of Montreal will not interfere with its shipment. The American manufacturers are afraid to import it via American ports, and thus have to get it by way of Canada. One Montreal house has contracted to supply ten thousand tons.

Nearly a year ago Young Bros. opened a bicycle factory in Paris and put into it about $300 worth of machinery. This they had to mortgage in February last, so that their assignment at this early date should be no surprise.——An offer of 40 per cent. cash is made to the creditors of J. H. Morrison, dealer in stoves and tinware at Alvinston. It is stated that if this is not accepted an assignment will follow. Last January he was burnt out, with a loss of $1,500; against this he had insurance of $750. He has not unnaturally "felt poor" ever since.——A hotel keeper at Mount Albert, Henry Woodcock by name, has assigned.

The Americans take the war curiously; they appear to be as mercurial here and there as French or Italian people, and do some very childish acts. We have heard of their going about in one city yelling profane things about Spain and firing off revolvers in the street; in another city we have seen dozens of them marching two and two on the sidewalk, carrying small flags and cheering in the intervals of drinks. In Boston we of course expect people to behave seemly, and we presume they do, but in New York there is much rampant jingoism. A private letter received on Monday from Keokuk, Iowa, speaking of the war excitement there, says: "When we get any exciting news every whistle in town is blown, fire bells ring and all the church bells chime in, so that everyone knows what has happened."

Fifteen tons per day is the capacity of the new mills of the Royal Paper Mills Company at East Angus, near Sherbrooke, Quebec. This company, we understand, makes the middle grades of book and writing papers, but does not make news printing paper. In addition to its main building, full of modern machinery, it has across the river a sawmill with water power, and a pulp mill with steam power. The authorized capital is $800,000, and $92,500 is said to be paid up. But the capital account shows $596,505 expended, so the company has issued $400,000 first mortgage bonds, covering the mills, dam, booms, pier, and 65,000 acres timber land which the company owns on the River St. Francis. F. P. Buck is president, Hon. W. B. Ives, general manager, F. W. Thompson, secretary. There are Boston and Portsmouth people on the directorate.

Why is the GENDRON the Best Wheel on Earth?

BECAUSE

It has good common-sense up-to-date talking points.
It has new, distinct and attractive features.
It is unexcelled in beauty, style and finish.
It has the best in material and workmanship.
It is the most perfect in its lines and bearings.
It is the easiest and smoothest running wheel in the world.

Gendron Bicycle

It has no discarded experiments.
It does not cause ridicule by having about it abandoned devices.
For utility, speed, safety and comfort the Gendron Bicycle is pre-eminent.
The capacity, long experience and methods of the manufacturers insure a product of the highest standard.
It is fitted with the fast, lively and durable Buckeye Tire that can be easily repaired if punctured and is fully guaranteed.
Secure the delightful feeling of confidence and safety by using the celebrated Waters Brake.

The GENDRON MFG. CO., Limited
TORONTO

A VISITOR to Parry Sound during the present week found extraordinary activity and progress there, as a consequence of the opening of Booth's road. The elevator at that point, which holds 1,200,000 bushels, was found to be two-thirds full, while the shed, 600 feet long by 80 feet wide, was crowded with freight awaiting shipment east and west. On Thursday last, 1,500 cars were required at Parry Sound to move the grain eastward.

—To the 1,500 employees of his Philadelphia store, Mr. Wanamaker gave notice that in the event of war with Spain, the salaries of all men who enter the military service of the government, will be paid to their families during the period of their absence, and that their places will be held open until they return. In addition to this, the firm will place an insurance of $1,000 on each employee who gives his service to his country, payable to his family if his life is lost while engaged in military duty.

WE are much pleased to hear of the progress being made by Rhodes, Curry & Co., the well known contracters, of Amherst, N.S,, who suffered so severely by fire in March last. The new buildings of the firm are almost completed, and are even better than the ones they replace. The wood-working shop is 175 feet long by 77 wide, two stories high, the bottom flat will be used for heavy car work machinery, and the upper part for the carpentry work of cars. They expect to employ 175 to 200 hands in their car works alone.

SOME good orders have been secured by the Londonderry Iron and Steel Company, limited, for cast iron pipes, and its pipe shop is expected to start this week on full time. The works are turning out quantities of iron culvert pipes, which are coming into use not only for railroads, but for ordinary road purposes. They are durable, and hold their position better than earthenware pipes. The Londonderry company has a contract with J. H. Townshend & Co., contractors for the Coast Railway Co., for two car loads of 12 and 20-inch pipe, and is negotiating with the Midland Railway for a considerable lot.

IT was something very unexpected by the business community of Montreal to learn on Wednesday last that Mr. Thomas Harling, the Canadian representative of the Elder-Dempster line, had resigned his position. That gentleman, since he came to Canada, has taken a prominent part in shipping matters. Especially has he given time and trouble to the improvement of the harbor of Montreal, partly no doubt, in order to secure facilities for the steamers of his line. Mr. Harling is a member of the council of the Board of Trade. What his future movements or arrangements are we have not learned.

A STAMP TAX IN THE STATES.

The United States Bill to provide ways and means for carrying on war with Spain contains the following provisions imposing a stamp tax on bank cheques, drafts or deposit certificates (not drawing interest) over $20, two cents each; on every bill of exchange, inland draft or deposit certificate (drawing interest), or any promissory note for over $100, five cents;

Over $100 and not over $200, ten cents.
Over $200 and not over $350, fifteen cents.
Over $350 and not over $500, twenty cents.
Over $500 and not over $750, thirty cents.
Over $750 and not over $1,000, forty cents.
Over $1,000 and not over $2,500, one dollar.
Over $2,500 and not over $5,000, one dollar and fifty cents.

And for every $2,500 in excess of $5,000, one dollar.

Foreign bills of exchange or letters of credit, if drawn singly, including express money orders, (and we presume telegraph money orders), to pay the same rate of tax as promissory notes.

Bills of exchange drawn in sets of three or more; for every bill of each set, for not exceeding $150, three cents.

Above $150 and not above $250, five cents.
From $250 to $500, ten cents.
" $500 to $1,000, fifteen cents.
" $1,000 to $1,500, twenty cents.
" $1,500 to $2,250, thirty "
" $2.250 to $3,500, fifty "
" $3,500 to $5,000, seventy "
" $5,000 to $7,500, one dollar.

And for every two thousand five hundred dollars, or part thereof, in excess of seven thousand five hundred dollars, thirty cents.

An authority of the New York clearing house has declared that the banks will make no protest against this tax on checks, not only from patriotic motives, but also as a result of economic considerations. Such a tax would, it is believed, exercise a material influence in the direction of decreasing the current tendency toward the indiscriminate drawing of small checks. It is said that the number of checks passing through the New York clearing house daily is not far from 300,000. This does not include the checks paid over the counter at the banks, and it is estimated that the number of checks issued daily, including all large centres of the country, is not less in number than 500,000. This number, at two cents per check, would yield the United States Government a daily revenue of $10,000, or at the rate of $3,000,000 a year.

A BOOKKEEPER'S TRIALS.

A bookkeeper in a local wholesale house had been spending sleepless nights for three weeks in fruitless efforts to make his books balance. There was an apparent shortage of $900 that could not be accounted for. He added up columns and struck balances until he was almost insane. He finally worked himself into that frame of mind that usually lands a man in Canada, the insane asylum, or a suicide's grave, when the manager of the house invited his confidence. Then they went over the books together, but the $900 shortage was still there.

The head of the house was called in and the work of overhauling accounts commenced again. They had not gone far till they came to an entry of $1,900.

"Why, that should be $1,000," declared the employer. "How did it happen to be entered $1,900?"

A careful examination showed that a fly had been smashed between the pages of the cash book, and one leg of the dead fly made a tail of the first cipher of the $1,000 entry, converting it into a 9.—San Francisco Post.

—Disgruntled Cyclist (trundling his machine over country highway)—This is what you call roadmaking here, is it? Scraping loose dirt up over the centre and leaving it there for the heavy waggons to cut up into ruts!

Sturdy Farmer—Young feller, I've been Highway Commissioner fur this township twenty-seven year, and I learned roadmakin' from my father. He had the office 'fore I did. Do you reckon you kin teach me anything about it, mister?—Chicago Tribune.

—The Yarmouth News makes the following not very comforting suggestion, as the result of a conversation with a gentleman familiar with the New England fishing business: This gentleman said the report of the presence of a Spanish cruiser off Newfoundland would cause very great uneasiness. While it is true many of the vessels are held at home in consequence of the war, there must be from Maine and Massachusetts fully a hundred sail of fishermen on the banks. These vessels will average $10,000 a piece in value and would be all together, so they might easily be seized and destroyed. Thus at one swoop Spain might deprive the United States of a million dollars' worth of property and make prisoners of 1,600 to 1,800 men, who would make the best of recruits for the United States navy.

Debentures.

Municipal Debentures **bought and sold,** also Government and Railway Bonds. Securities suitable for Investment by Trustees and Insurance Companies and for Deposit with the Government, always on hand.

THE SITUATION.

Mr. James Meldrum, an eminent English engineer, before a committee of the Senate at Ottawa, stated that the cost of the projected Ottawa and Georgian Bay Canal would be from $14,000,000 to $25,000,000, according to the depth of water required. Unless the depth be settled, all sorts of suppositions come in. The Government of Canada might, we are told, be required to pay $550,000 a year as a guarantee to the shareholders of a work, which would be built in opposition to the present canals, and which could succeed only by rendering unproductive, both directly and indirectly, public works on which $50,000,000 of public money has been expended. Mr. Meldrum is enthusiastic enough to assume that, if a guarantee were given, the guarantor would never be called upon to pay. No one at all familiar with the history of the Welland and the Rideau Canals will be likely to accept this sanguine estimate. Rival canals are now free, and those canals, with everything theoretically against them, manage to confound all calculations. Build the proposed canal to-day, and to-morrow you will see an agitation, set on foot by just such persons as the present promoters, for a free canal, through Government purchase. Only a small percentage of the products of the Western States is exported; and experience shows that while our internal carriage may be lower than that of the United States, the whole cost of freight from the place of production to Europe may be higher. This has happened for many years in succession, at some periods of our commercial history.

Mr. Meldrum, with all the authority of his name, contends that railways cannot compete with canals, and cites Holland in proof. If we admit this fact to have had universal application, we must remember that the guarantee for its continuance is but slander, in the presence of heavy steel rails, produced at one-sixteenth their former cost, and steel trucks carrying 60,000 lbs each. The future railways may beat the canal, if the canal be costly. In counting the cost of the Georgian Bay Canal, we must reckon the waste of the $50,000,000 of public works which, to succeed, it must make valueless. And does any one believe that a canal which cost $70,000,000 or $80,000,000 directly and indirectly—directly by actual outlay, and indirectly by destroying the St. Lawrence rivals—could pay dividends, in the face of free canals in the State of New York, and the modern railway which the vast traffic of the United States in bulky materials has developed?

Now that the whole facts connected with the railway aid to be granted by British Columbia are before us in the proceedings before the Provincial legislature, it is evident that the Province has made a relatively good bargain, far better than that disclosed in the now rejected contract made with the same men by the Dominion Government. The contractors are to be paid a subsidy of $4,000 a mile, and in return they are to pay to the Government four per cent. on the gross earnings of the land, in addition to $2,000 a mile, which Hon. Mr. Turner calls a tax and the agent of Mackenzie & Mann calls an assessment. A limit is put to the subsidy, at the figure of $1,600,000, so that if the mileage be more or less than the estimated distance the subsidy will exceed or fall short of $4,000, though neither the excess nor the deficiency would be likely to be much. The cost of the subsidy to the Province is estimated at $64,000 a year; the railway tax and the four per cent. on the gross earning are expected to yield $50,000 a year, leaving an actual deficiency to measure the Provincial contribution of $14,000. And the Government estimates that, in three years, the railway, by opening up a new district, will add twice this sum to the revenue, in what way is not stated. There are two possible sources of revenue: mining licenses and the sale of lands. License fees would properly be revenue; money received from the alienation of lands, if called revenue, too, in contradistinction to capital, would be only a temporary resource, unless the revenue were capitalized. We notice that the point of departure on the Pacific is to be selected, the joint action of the Province and the Dominion. Does this look to Dominion aid? The Dominion only can make a port of entry, and therefore its consent is necessary.

Before agreeing to grant aid in the form of a subsidy, in return for a share in the revenue, the Provincial Government of British Columbia, if we may judge from Mr. Turner's speech on the railway question, considered various other forms of proceeding to attain the object desired. Government ownership was discarded as unsuitable to the limited financial capacity of a province; a guarantee of bonds was rejected on account of the uncertainty it involved; a stated subsidy was deemed preferable. And, considering the advantage obtained in return, in the form of a participation in the revenue of the road to the extent of four per cent. of the gross earnings, the conclusion is sound. On the whole, the province is to be congratulated on the bargain it has made. This bargain probably marks a new departure, in which naked gift subsidies will disappear and an element of reciprocity will henceforth be infused into this sort of transaction. The change was bound to come and it does not come one minute too soon.

Whether the income from the four per cent. of the gross receipts of the Yukon railway will net the British Columbia Government the amount they estimate seems reasonably open to doubt. To realize their estimate the mileage receipts of the road would have to exceed those of the Canadian Pacific, is the contention of some critics. When it is borne in mind that the bulk of freight to come out of the Klondyke, whatever may go in, will be diminutive, the reasonable conclusion is that this is an over estimate. The amount receivable from the taxation of the road, based on an assessment of $2,000 per mile, can be more accurately estimated. The opening up of the country through which the Pacific section of the road will run will be of inestimable benefit, whether or not it realize the expectations of profit in the first three years. This is not probable, seeing that it will take two and a half years to complete this section. This section contains some mountainous spaces in which construction will be costly. And this raises the question whether a subsidy of $4,000 a mile will afford a sufficient basis on which to finance the undertaking. There is a lurking suspicion of some conditional promise on the Ottawa Government to give aid in some way. One member of the British Columbia House expressed his belief that the Dominion will reimburse the Province for its outlay on this road. Members of the Provincial Government, however, speak as if the undertaking were exclusively British Columbian, and certainly it is that Province which will benefit by the opening up of the country through which the Pacific section will run. They also state, in no doubtful terms, that no contribution towards the road is to be expected from Ottawa this year, implying that something may come thence at a future time. But it looks as if the Dominion Government were looking for some opportunity to present a new scheme of aid.

Mr. Chamberlain has produced a profound impression, both in Europe and America, by advocating an alliance between England and the United States. Continental Europe is adverse; a conviction that their civilizing mission must draw the two branches of Anglo-Saxons together is uppermost both in England and the United States. This is visible everywhere. For the first time, a municipal corporation on the American side of the Niagara River proclaims a half-holiday to enable its official representatives to cross the line and take part in the celebration of the Queen's Birthday. This is only an indication of a general feeling, to which a sense of common danger in the near future has given birth. Where right feeling exists, suitable action will follow on a proper occasion. The statement has been repeated, in various forms, during the week, that if England had not put her foot down firmly, in the way of objection, the European powers would, ere now, have served notice on the United States that she would not be permitted to retain the Philippines. The representatives of three of the powers, not including England, at Washington, have reminded President McKinley, through Secretary Day, that the President's message made the liberation of Cuba the sole object of the war, and that the bombardment of Cuban coast towns can only add to the distress of the natives, without furthering the avowed object of the war. The rights of European residents, it was added, must be respected; and there is a story that Germany is prepared to make an extravagant demand. Russia, Austria and Germany are said to be drawing close together; Russia is to raise a loan of $60,000,000 in Germany. The interests of the United States in China are identical with those of England, and the possession of the Philippines will enable the Republic the better to bear her share in safeguarding those interests.

AMERICAN WAR FINANCE.

The Finance Committee of the United States Senate cannot be congratulated on its proposals for meeting the cost of the war. The remnant of the greenback system, as it survives to-day under specie payment, is not specially burthensome to anybody. The real objection to it, apart from that made by interested parties, who hoped to profit by a change in the form of currency, is that it would be felt as a practical inconvenience when war should put a new strain on to the national finances. To add $150,000,000 to the present amount of greenbacks, as is now proposed, would put a greater strain on convertibility, and if it should hereafter be followed by further issues, the Government might have to confront the question of a suspension of specie payment. Supposing that to happen, the loss in the depreciation of the greenback would more than balance the saving of interest by refusing to issue bonds. The coinage of silver now in the Treasury of the nominal value of $42,000,000, but of a real value of less than half that amount, is not the best way to conserve the gold standard.

On the question of war taxes, there is no doubt that, even in war, a rich nation should, as far as possible, pay the expenses of the year out of the year's taxes. Fall where they will, the extra taxes will give rise to complaint. The Supreme Court having made an income tax impossible, the burthen must fall elsewhere. But there is one source of taxation, related to this, on which the Supreme Court has pronounced a different judgment. Taxes on legacies, called a tribute, are legal, and so a tax or tribute on legacies there is to be. If the war were long-continued, there is no saying to what extent this tax might eat up the wealth which millionaires may leave behind. There is, according to the doctrine accepted by the Court, scarcely any limit to the amount of a dead man's estate the State may take. During the trial, which arose under the inheritance tax law of Illinois, the Court was reminded that it had declared the income tax unconstitutional for the reason that it was a direct tax upon property; and the question was whether the Illinois inheritance tax law did not similarly offend. The ingenuity of counsel found a way out of the difficulty—a perilous way it may prove to be—and the court consented to walk therein. Counsel for the State invented the fiction that the so-called tax is not a tax at all, but a tribute exacted by the State for conceding to her citizens a right which they did not naturally possess, of transmitting their property by will. The denial of the theoretical right of bequest is not altogether new, but it has never before received so startling a recognition. The Supreme Court has accepted and judicially propounded a doctrine which, while it does not go as far as the Socialist, who denies the right of the workman to bequeath his tools to anyone after his death, would permit the State to take practically what it likes, as tribute for granting the right of bequest. Death tributes may be expected to flourish in future.

The other new taxes strike public carriers, including expresses, telegraphs, telephones, corporations, building and loan associations, life insurance companies. There are a new tobacco schedule and stamp duties. Though all interests ought to be willing to bear their fair share of public burthens, some of these taxes will be a good deal more objectionable than an income tax. Taxing gross receipts is blind work, assuming as it does what is not necessarily true, that receipts represent gains. The general rate is made one-fourth of one per cent. of receipts, which must of necessity vary in its intensity, and will be most felt where the ability to bear it is feeblest. The scheme may undergo wide alterations before it becomes law.

EFFECTS OF THE WAR.

As to the effect the Spanish-American war is having, and will have upon the trade of our Eastern Provinces, the general impression seems to be that it must prove the reverse of favorable. We have letters from St. John, dated 13th May, one of which says: "Trade with the

West Indies is somewhat brisk just now, owing largely we think, to Cuban and Porto Rican markets being closed, which forces agricultural products to other West India Islands, as well as fish." But that from Halifax, of date 11th inst., says: "whatever other effect it [the war] may have, it is going to be unquestionably hard on our export trade to the Spanish West Indies, which it already disturbs. It is also troubling the export lumber trade, coastwise."

We notice further that, in a three-page review, entitled "The Probable Effect of War," the Maritime Merchant has been sounding the merchants of Halifax on the subject, and gives the replies of a number. One man points out that while commercially the farmers, manufacturers and shipowners are reaping large benefits from advance in prices and freights, our West India and fishing business is suffering considerable loss through the closing of the large consuming markets of Cuba and Porto Rico. The average import of 3,000 hogsheads of sugar from Porto Rico is this year reduced to 400; and the import of molasses from 6,000 puncheons to 2,400. Porto Rico is a large consumer of dry fish. "The average shipments from Halifax alone are about 60,000 quintals dry fish and 6,000 bbls. pickled fish annually, with a larger additional quantity from Lunenburg and other outports, besides which a large quantity of lumber, potatoes, etc., is also shipped." Five-sixths of the codfish trade of Lunenburg, it is said, is with Porto Rico, and Lunenburg has a bank fleet of some 200 sail.

Next as to lumber. The American market for Maritime Province lumber is demoralized by the war. The industrial conditions in the New England States are unsettled, building operations are largely delayed or suspended, while freights and insurance have advanced. While this state of things may be only temporary, it must be reckoned with at the moment. Then the lumber trade with England is also dull, because old country stocks are heavy, and transatlantic freights have gone up with a bound.

Shipping is affected curiously. While the small sailing craft, or many of them, find their occupation meanwhile gone by reason of what has been said above, larger steamers are in demand at good freights. Mr. Black, of the shipping firm Pickford & Black, considers that some extra trade is almost certain to come to Canada, "and if the war should continue beyond a year Canada will no doubt benefit largely, especially in an increased demand for agricultural products and some lines of manufactured goods. All the sailing tonnage flying the American flag has been withdrawn from this trade, consequently a brisk demand exists for Canadian vessels at higher prices." Meantime, he adds, West India freights are higher, though they have not advanced nearly in the same ratio as European freights.

While, therefore, all is not gloomy in the anticipated effects of the war, in our Atlantic provinces, the outlook is distinctly unfavorable in some important directions. There are signs that the tourist travel from the States to Nova Scotia and New Brunswick, Cape Breton and Prince Edward Island, will this year be larger than usual. There is certain to be less transatlantic travel by reason of the war; and another factor which Mr. Chipman notices as likely to increase the traffic in this direction, is the fear of a bombardment of the seaside resorts between Baltimore and Eastport by the Spanish fleet, "I am told that there will be thousands of summer cottages along the coast line remain vacant during the entire season unless hostilities cease."

Late advices from Naples state that the cost of making macaroni has greatly increased, owing to the large advance in wheat. Some of the makers, it was reported, had withdrawn from the market.

MONTREAL HARBOR.

In the annual report of the Harbor Commissioners of Montreal for 1897, stress is laid upon two points; one the urgent necessity of increased accommodation, the other the memorial to Government, submitted under date 24th March last, asking state aid for the harbor as a national work. The sum required for the proposed improvements will increase the debt of the Harbor Commission to the total amount of $6,500,000. On this total debt the Commission propose to pay interest at the rate of two and a half per cent. per annum, making the annual payment of interest $162,500. This is the utmost sum that body feels justified in imposing as a tax on the import and export trade of the port. All that it requires of the Government is that the Government take over the payment of the interest on the present debt of the Commission.

The statement of the president refers to the Plan No. 6 for harbor improvement, endorsed by all the commercial bodies of the city, but rejected by the authorities at Ottawa. Also to the subsequent Plan 12A, which the commission forwarded for the approval of the Minister of Public Works, on the understanding: "That no portion of the cost of carrying out the said Plan will be borne by the Harbor Commissioners; that is, that the cost be borne by the Government, and that the Plan be on the high level." Although no formal approval has yet been given of the said Plan, No. 12A, there is good reason to believe, says Mr. Mackay, that it is acceptable to the Government. Since we received the president's statement, the Minister of Public Works has, we are glad to see, given in the House of Commons, on Tuesday, some definite information that makes Montreal people hopeful, though it is not as definite as one could wish. It is well known that Mr. Tarte has long and obstinately clung to the Hochelaga scheme of developing Montreal Harbor eastward, and antagonized the commercial bodies by so doing. Now he states, in answer to an enquiry by Mr Monk, that "the differences of opinion as to the plans to be adopted have been settled: we have agreed as to the plans to be carried out," which is so far so good, but he could not, or at least did not, say anything as to the policy of the Government about the memorial. He further said, replying to Mr. Bergeron, that the Hochelaga scheme lies over. "The works under the plans agreed to will be carried out in the centre of the city, leaving the other works in abeyance." This, at any rate, is something.

The revenue of the harbor of Montreal during the season of 1897 was $255,416, which is almost the same as it was in 1896. Cost of maintenance and management was $81,463, apart from capital expenditure, and the interest was $140,738, showing a surplus, as between revenue and ordinary expenditure, of $33,319. There was expended on capital account $156,751, which included Windmill Point basin and wharf, the guard pier, additional railway sidings, also wharves and dredging. The sum of $90,000 was received by way of Government loan, and the total bonded debt is $3,412,000, the average rate of interest on which is 4 1-5 per cent.

The year was a busy one, in the exports especially. The harbor master's returns show 796 sea-going vessels during the season, with a total tonnage of 1,379,002 tons, being 87 more vessels of 162,534 tons more than in 1896. The tonnage of the inland vessels was 1,134,346 tons, being an increase of 130,229 tons over the previous year. Particulars of imports and exports are given, which we here condense and compare with those of the previous navigable season:

IMPORTS.

Coal.—We received from Great Britain 48,754 tons, showing an increase of 6,156 tons; from the United States 277,256 tons, an increase of 71,277 tons; from the Maritime Provinces 698,740 tons, an increase of 29,354 tons; and a total increase of 106,787 tons during 1897. Of this coal 737,610 tons was discharged in the harbor and 287,140 tons in the canal.

Cement.—We had from all sources 302,204 barrels, an increase of 148,813 barrels.

Scrap Iron.—We had 14,191 tons, showing a decrease of 183,099 tons as compared with 1896.

EXPORTS.

Lumber—There was shipped during the season of lumber, square and wane timber, to the United Kingdom and continental ports 320,802,733 feet, board measure, showing an increase over 1896 of 101,770,555 feet, and to the River Plate 417,505 feet, a decrease of 7,372,661 feet.

Grain—There was shipped during the season:
9,899,308 bushels of wheat,
9,210,222 " corn,
1,779,777 " peas,
5,122,074 " oats,
179,044 " barley,
855,135 " rye,
making a grand total of 27,045,560 bushels, and an increase of 8,143,513 bushels as compared with 1896.

Flour—There was shipped 585,813 barrels, a decrease of 186,313 barrels from the previous year.

Meal—There was shipped during the season 37,350 barrels, a decrease of 2,671 barrels in 1897.

Eggs—Exportation of eggs is still increasing. There were shipped 167,120 cases, an increase of 25,267 cases over the previous year.

Cheese—This year cheese shows a large increase; the shipments were 2,078.719 boxes, an increase of 356,668 boxes.

Butter—There were shipped 222,923 packages, being an increase of 65,281 packages compared with 1896.

Apples—There was a large falling off in shipments of apples; the quantity shipped was 170,784 barrels, being a decrease of 554,232 barrels in 1897.

Cattle—Exports from Montreal were 117,247 head of cattle, showing an increase of 20,799 head over 1896.

Sheep—There were shipped from Montreal 60,638 sheep, a decrease of 13,000 as compared with 1896.

Horses—The shipments from Montreal aggregated 10,051 horses, showing a decrease of 370 as compared with 1896.

Hay—36,325 tons, showing a very large increase.

The activity of the port is shown by a comparative statement on page 84, showing that the number of inland vessels, steam and sail, arriving in 1897 was 6,384 of 1,134,346 tons. This surpassed any previous year in number though not in tonnage. The greatest number in port at one time was on 30th July, namely, 200, which beats the record of 1889 in this respect. Sea-going vessels and steamers in 1897 numbered 796, of an aggregate tonnage of 1,379,002. Of these 739 were British; 39 Norwegian; 10 German; 2 Scandinavian and 6 American—one of these last being, doubtless, the naval cutter "Yantic."

THE WOOL TRADE.

There has been no material change in the wool situation during the week. Sheep washing is limited to a few districts in Eastern Ontario, and has not yet commenced in the northern or western parts of the province. The continued absence of very warm weather, with the low range of values, makes a tardy opening of the season. An interesting feature of the situation is the likelihood that all the wool of British Columbia, the Northwest Territories and Manitoba will be shipped to Eastern Canada this year, instead of being exported to the United States. There is practically no consumption of wool in Canada west of Ontario, and the million or a million and a half pounds grown in this territory is all available for export. For some years the British Columbia wools have been purchased by merchants in Portland, Oregon, and sent to Boston by vessel. The wool merchants of Minnesota have been strong competitors for the wool of the Territories and Manitoba, and last year secured nearly the entire yield. These trade connections, however, can scarcely continue in face of the tariff provisions of the Dingley Act. Imported wools, and more especially Cape, will be affected in Eastern Canada by this change in the channels of trade.

Extreme depression continues to characterize the United States wool markets. Previous to the destruction of the "Maine," the consumption of wool by American machinery was progressing at a rate estimated by many at 25 per cent. over any previous record, but this has since been materially checked by war influences, thus through a decrease in the use of wool practically increasing the available supply as well as postponing the time for domestic wool prices to reach the importing point. Low values in the United States have not only prevented any immediate shipments of Canadian wool to the United States; but have diverted to Canada foreign wools which were primarily intended for the United States. A quantity of Chilian wool shipped to New York, on Liverpool account, was offered in Canada recently at ten cents per pound. The shipment had been made in bond, and in the present depression of values, it was impossible to realize anything but a nominal price for the wool after the twelve cents a pound American duty had been paid, so the owners had the option of shipping the wool back to the United Kingdom, or sacrificing it in the nearest available market, Canada. Merchants in the United States report, that although prices remain without change, there is an improved demand for fleece wools in ½ and ⅜ blood, with sales of unwashed reported at 23 cents per pound.

The present series of London wool sales, which, by the way, close on the 21st inst., gives evidence that Australian stock is showing up better than last year, at prices ruling about on a par with those of the last sale, which in view of the improved condition of the stock would seem to indicate that values have not been maintained. During last week 121,700 bales of wool were sold, while the offerings of the present week amounted to 48,600 bales.

CANADA'S PLACE IN THE WORLD'S COAL TRADE.

An interesting document, recently issued from the British Board of Trade, contains a return of the production and consumption of coal in the principal countries of the world over a series of years. The figures come down only to 1896, so that they do not show the large increases which occurred during last year in the United Kingdom and in the United States; but, for purposes of comparison, they are instructive, and the statistics relating to foreign countries are stated to be the latest obtainable. The United Kingdom is the largest producer of coal in the world, while the United States stands a good second. These two countries are in a class by themselves, and distance all other competitors. In addition to these two great producers, there are eight countries which exceed Canada in the annual production of coal. The totals of the principal coal-producing countries of the world, with the estimated average price at the pit, is shown in the following table:

Coal—Output of	Tons.	Average cost. s.	d.
United Kingdom	195,361,000	5	10¼
Russian Empire	9,229,000	....	
German Empire	85,690,000	6	11
Belgium	21,252,000	7	7¼
France	28,650,000	8	8¼
Spain	1,853,000	6	0¾
Austria	9,900,000	5	11¼
Hungary	1,133,000	8	7¼
Japan (1895)	4,849,000	5	0¼
United States	171,416,000	4	9¼
British India	3,848,000	3	8¼
Canada	3,743,234	8	9
New South Wales	3,909,517	5	9

From the Canadian standpoint the most noticeable feature of this table is that in the Dominion the cost of production is evidently greater than in any of the other large producing countries, while the United States producers have a considerable advantage over those of all other countries. There may be, it is true, a partial explanation in the fact that the Canadian coal shows a better average quality than that of the United States, but the main causes of the difference in cost are the lower wages paid in the United States and the more efficient machinery employed there in mining. Only seven countries, the United Kingdom, Germany, Belgium, the United States, Japan, New South Wales and Natal have an excess production of coal for export. But both Canada and British India export as well as import coal, which trade is essential from their immense territories and the nature of the distribution of their coal deposits.

In the matter of consumption, as calculated from the production less the exports, and on the basis of the last returns of population, the figures are curious. They work out per head of population thus: United Kingdom, 3.82 tons; Russia, 0.09 (in 1894); Sweden, 0.46; German Empire, 1.51; Belgium, 2.65; France, 0.98; Spain, 0.19; Italy, 0.13; Austria-Hungary, 0.35; Japan, 0.07; United States, 2.37; British India, 0.01; Canada, 1.26; New South Wales, 1.11; Victoria, 0.62; New Zealand, 1.13; Cape Colony, 0.16, and Natal, 0.21. Here we naturally find the consumption per head largest where steam traction and steam machinery are mostly in use. But the figures are not absolutely indicative of the comparative industrial aspects, for in France there is a large consumption of wood, turf, etc., and in both the United States and Canada not only is wood largely employed for industrial purposes, but water power is also extensively used.

THE COST OF LIFE INSURANCE.

In the last number of the Independent Forester, a journal published monthly in the interest of the I.O.F., in this city, it is stated that during 1897 no less than 7,658 members allowed their certificates to lapse. That number is more than the entire number of new members obtained by the Order in the whole of Canada the previous year. The new certificates issued in Canada, in 1896, numbered 7,120. And during 1897, though 10,107 new members were obtained in Canada, the increase of members was only 6,762. The 7,658 acknowledged to have forfeited their membership belong not to Canada alone, but were from the whole membership, home and foreign. The foreign element in that Order is now getting to be the dominant one. The Blue-book shows 57,680 home certificates in force, as against 67,005 foreign ones. And of the new members for 1897 there came from abroad 20,030, and from Canadian territory only 10,107. But while these 10,107 were nominally for insurance of $10,937,500, there were lapses and deaths to call off $3,790,500, so that the increase in Canada was only $7,147,000 of supposed insurance, against an enormous increased foreign liability of $18,572,000.

With the foreign business increasing at such a rate, and so much good money being expended in pushing for it, no wonder that lapses increase at home, and that so many thousands of old members are throwing up their certificates as being worthless. The new Blue-book abstract, just to hand from Ottawa, gives the amount thus forfeited in Canada during 1897 as $3,405,000. This sum added to the $3,692,546 thrown up the previous year, makes a total of $7,097,546 discarded in two short years, apart from the $791,854 terminated by death. In other words, the lapses of the two years, on Canadian business alone, amount to almost the entire gains of 1897 upon that business, considered by itself. And little wonder that it should be so, if the members take the trouble to look up the NINETY-FIVE SECTIONS of their constitution and by-laws, to find out what chance there is of getting a return for their money.

Lapses in life insurance involve a serious cost to all companies and associations, because they mean the withdrawal of the healthiest and best members. Sickly people, and old people, and otherwise uninsurable people, hold on as long as they can. And when their own means of paying run out, their friends come to their aid, or they pledge their certificates to keep the payments up. They are there "to the death," and the death is not far off in many cases. Sometimes it is the death of the society that is not far off, when the lapses get large and the sickly, the intemperate, and the old people thus get hived together. They then hug a society rapidly to its end, as was shown in the cases of the Canadian Mutual Aid, the Canadian Relief Society, the Mutual Relief Society of N.S., the Massachusetts Mutual Benefit, the Provincial Provident, and hundreds of others less known in this country.

It is said that Nero fiddled while Rome burned. Just so, the Forester plays with its readers when it informs them that "it does not cost the Order anything when a member allows himself to be suspended; all that has been paid in is so much gain."

Verily, whom the gods destroy they first make mad. Just such teaching as the above is what the I.O.F. is built upon, from the foundation stone upward. Dr. Oronhyatekha has strenuously taught two absurdities, viz., that death losses do not necessarily increase with the increased age of a society's members, and that the gains from lapses will pay a large share of the death losses, even if they should increase in some years to a small extent. Some hard-headed statistics on this subject are given in the Government reports of companies doing business in Canada. We will quote the figures, which show the income from the full level premiums collected by eight regular companies, and the losses they have met with the past two years. Some of them are still doing new business, but most of them are only attending to the receiving of renewal premiums and payment of claims in this country, while going on with new business in England:—

Company.	Years.	Premiums.	Become claims.	Deficiency.
Commercial Union..........	1896	$15,562	$12,761	
"	1897	16,018	23,428	$4,607
Edinburgh Life	1896	6,729	15,879	
"	1897	6,013	8,511	11,648
Life Association, Scotland ..	1896	39,793	89,240	
"	1897	34,814	62,405	77,038
North British and Mercantile	1896	32,856	91,762	
"	1897	33,985	45,100	70,021
Reliance Mutual	1896	6,123	4,048	
"	1897	6,313	14,284	5,896
Royal Insurance Company ..	1896	20,071	43,535	
"	1897	16,654	53,436	60,246
Scottish Amicable	1896	5,349	4,867	
"	1897	5,160	15,130	9,488
Scottish Provident	1896	1,903	4,096	
"	1897	1,765	2,919	3,347
Totals for two years		$249,108	$491,401	$242,293

The amount of life insurance now in force on the books of those eight companies in Canada is $4,997,518; the claims in two years called for $491,401.

The cost for two years was therefore very nearly $100 per $1,000 of insurance carried, and per year nearly $50 per $1,000. Look again at the footings and it will be seen that the premiums received ($249,108), were but a trifle more than one-half of the $491,401 of claims, and no account taken of the necessary expenses in conducting the business. Therefore, for every $1,000 of risk now being carried by those eight companies, taken as a whole, the cost is about $50 a year, and the income from premiums is almost $25 a year. How long would they be able to stand this enormous drain if they had not a proper reserve fund' from which to draw the interest income that now fully provides for the annual deficiency? And how many good lives would remain and contribute next year, if they were built upon the assessment system, and had to assess for $50 per $1,000 plus $3 or $4 more for the year's expenses?

Besides the above eight British companies there are four American companies with large investments at Ottawa, which do not now push for new business in Canada, and whose outgo for claims is very much larger than their income from premiums, large as some people think level premiums to be. The following is a similar statement respecting them:

Company.	Years.	Premiums	Become Claims.	Deficiency.
Conn. Mutual,	1896	$41,832	$ 88,200	
of Hartford..	1897	33,767	103,250	$115,851
Phœnix Mutual,	1896	20,240	33,630	
of Hartford..	1897	20,039	35,311	28,662
Northwestern Mutual,	1896	13,858	12,285	
Milwaukee	1897	13,436	21,268	6,259
National Life,	1896	2,048	14,960	
of Chicago...	1897	1,583	None.	11,329
Totals, for two years		$146,803	$308,904	$162,101

The amount of life insurance now in force in Canada on the books of these four companies on December 31st, 1897, was $2,914,780. The claims in two years called for $308,904.

The cost was, therefore, a little more than a hundred dollars for each $1,000 carried two years, making a rate of a little over $50 per $1,000 per annum.

Now if half the remaining policy-holders in these twelve companies are in good health, and that half were to drop out in 1898, could it be said that it had cost the companies nothing to carry the insurance upon their lives during the past two years? The cost has been double their contributions during that time. But apart from this comes the loss to the companies of so many healthy lives and their future contributions, leaving only uninsurable ones and rapid growth of claims against increased shortage of income. Everybody knows that it costs money to a fire insurance company to carry a million or a thousand dollars of risk for three years in any town, even though no fire occurs in that particular town for that three years. And no fire or life company deems "all that has been paid in so much gain," nor counts it an addition to its assets to have $7,097,546 of its best business go off its books.

CENTRAL AMERICAN TRADE.

Several years ago The Monetary Times was able to furnish its readers with particulars of the trade of Central and South America, derived in large part from the reports of William Eleroy Curtis, special commissioner from the United States to various Southern republics. This gentleman, by virtue of his repeated visits to those countries, and his exhaustive study of South and Central American affairs, is recognized as an authority thereupon. It is of interest, therefore, to find, in the May Forum, an article from his pen upon the "Resources and Commerce of Central America.

The chief reason, he says, for the failure of the Central American republics to keep pace with the progress of the rest of the world lies in the ambition and avarice of their political leaders. "Misgovernment is the great obstacle to their development and prosperity." The people are patient, patriotic and long-suffering; too apt to submit to any form of government. And this latter peculiarity keeps them poor, preventing the development of their natural resources, keeping immigrants away and frightening capital from making investments.

While glancing at Mexico, Costa Rica and Nicaragua, the article deals especially with Guatemala and Salvador. In Mr. Curtis' opinion Guatemala is further advanced in modern improvements than any other, which is largely due to the progressive ideas of the late Justo Barrios, President from 1874 to 1886, when he was shot from an ambush. To-day, it appears, nine-tenths of its commerce is on the Pacific Coast, and the private railways, owned by New York people, furnish outlets for the coffee crop on the Pacific slope of the country. Coffee is the chief staple; the mineral wealth of the country is supposed to be great, but it is only slightly developed. Sugar, tobacco, and other tropical plants are readily raised, but the sugar mills are idle since the enactment of the Wilson-Gorman tariff law in the United States. Bananas form an easily grown and prolific crop.

The foreign commerce of Guatemala varies with the volume and the value of the coffee crop. The exports from her have reached $26,000,000 in silver, and they average $15,000,000. Imports vary from say $7,000,000 to $10,000,000 in silver, according to the purchasing power of the people. Although the United States is so near, it has but a small share of the commerce of Guatemala. The greater part of the coffee grown in the country goes to Europe, and is there exchanged for manufactured goods of every variety. The largest item of imports is wearing apparel, consisting mostly of cotton fabrics; but nearly every article known to the wants of men is mentioned in the invoices. There is room for business between our Maritime Province ports and a country that buys ten millions worth a year.

Very interesting is the sketch given of Salvador, which, though the smallest in area of the Central American republics, is "by far the richest, most prosperous, most enterprising and most densely populated. It is about the size of New Jersey, has 800,000 inhabitants, of whom only 20,000 are white, and almost every acre is under cultivation." In one respect nature was unkind to Salvador, *i.e.*, in furnishing her facilities for foreign commerce, for "although the little republic stretches like a ribbon along the shores of the Pacific, there is not a harbor upon its coast.' All freight and passengers are transferred between the shore and the ships by lighters, which are moored to iron piers.

The products of Salvador are among the most profitable of the world. The soil is rich, deep, and easily cultivated. The chief staples are sugar, coffee, indigo, tobacco and balsam, with several by-products which obtain high prices in foreign markets. In 1895 they reached the sum of $13,-847,625 in silver, of which the greater part came to the United States. The imports usually average $2,000,000, and comprise cotton goods, silks, woolens, boots, shoes, wearing apparel, wines, fancy food products, hardware, railway supplies and other manufactures of iron, furniture, jewelry and other articles required by the luxurious tastes of the white inhabitants.

The mining industry has been carried on in Salvador with profit ever since the conquest of the country; and, although there have never been any rich strikes, some of the mines have paid dividends for centuries. Silver, gold, iron, copper and quicksilver are found in abundance, and the stone quarries are the best in Central America. There are several short railways connecting the coffee districts with the sea. The highways are better than those of the neighboring countries; every town and settlement is connected by telegraph, and there are telephones in all the offices, counting houses and principal residences.

THE BANK OF MONTREAL STATEMENT.

The statement of the Bank of Montreal for the year ended with April last was issued on the 13th inst. The net profits were $1,265,300, which is the largest net earning for four years. The improvement in some degree reflects the more active conditions of trade during most of the twelvemonth. But, perhaps, the profits have not been proportioned to the increased activity, since the present competition in banking is not favorable to unusual profits by any one banking concern. It is noticeable that the current loans and discounts of the Bank of Montreal increased to $39,318,000 from $36,725,000 at the corresponding date a year before; also that its circulation increased by a million dollars. It is agreeable also to observe a reduction in the already small proportion of debts secured by mortgage and overdue debts unsecured. Increased transactions with the United States are indicated by the swelling of the amount due from that country to $9,405,000. Altogether, the statement is one tending to produce lively satisfaction. When a Canadian institution with sixty-five millions of assets can earn ten and a half per cent. profit on twelve millions of its shareholders' capital, earn it, too, in part by doing business in Europe and lending money to United States merchants, Canadians have a perfect right to feel proud of that institution.

DEATH OF R. R. GRINDLEY.

Many in Canada, both in banking circles and in other walks of life, will hear with great regret of the death, on Friday morning last, of Mr. R. R. Grindley, for many years general manager of the Bank of British North America. Mr. Grindley had retired from the service of the bank, which had pensioned him handsomely, and was living in Montreal. He had suffered some time from renal calculi, and as the result of a consultation went to New York a month ago for expert advice. An operation to remove the calculi was advised, and this he underwent with apparent success in April. Nevertheless, he did not rally as expected, and died in hospital on the 13th inst. At the time of the deceased gentlemen's retirement from the bank, a sketch of his career as a banker appeared in THE MONETARY TIMES. Mr. Grindley came to Canada from England, in 1854, and entered the service of the Bank of British North America as a clerk. He soon proved his worth, and his promotion was rapid. In 1863 he was made manager at St. John; in 1870, manager at Montreal, and in 1877 general manager of the bank. Mr. Grindley left the services of the British Bank on December 31st, 1894, and has resided in Montreal ever since, with the exception of a brief visit to Europe in 1895. He was in his sixty-eighth year.

CANADIAN TIMBER IN THE LIVERPOOL MARKET.

While the shipments of timber and deals to Liverpool from Canada last month were less than in May, 1897 or 1896, the stocks of several leading kinds at that port are large, and but for the Spanish-American war and the consequent advance in freights and firmer timber market, would be regarded as too heavy. The following memo of stocks on hand, taken from Farnworth & Jardine's Liverpool circular of May 2nd, show the quantities held there in different years at close of April:

	1898.	1897.	1896.
Quebec square pine..	92,000 ft.	35,000 ft.	39,000 ft.
" waney " ..	126,000 "	112,000 "	52,000 "
Oak, Can. and Amer..	128,000 "	86,000 "	115,000 "
" planks	178,000 "	153,000 "	94,000 "
Quebec pine deals....	9,640 std.	4,549 std.	4,351 std.
" spruce do....	1,612 "	335 "	458 "
N.B. and N.S. spruce and pine deals	13,235 "	4,634 "	2,565 "

These increased stocks are all of Canadian goods, for Dantzic fir, United States pitch pine, Swedish and Norway fir all show smaller stocks, as do Baltic red deals and Norway flooring boards. Oregon pine logs and planks, however, show a greatly increased stock.

The import of Canadian wood has been smaller at Liverpool last month than in 1896, more activity has been shown and values have advanced, that of pitch pine especially. Rather more Canadian pine has been selling, both square and waney; red pine is neglected, pine deals are dull of sale and oak difficult to move; elm doing fairly well. Birch logs have improved in value. The stock of Oregon and British Columbia pine is very large, but values show improvement.

HAYTI ADOPTS THE GOLD STANDARD.

The gold standard is to be adopted by the Republic of Hayti. The legislature of that island at its last session made this resolve, as a preventive of currency depreciation. In order to unify the money system on the basis of the gold standard, and withdraw the paper money from circulation, a law is passed authorizing the Government to negotiate in the United States a gold loan of $3,500,000. We learn from the Bankers' Monthly that the entire sum borrowed is to be paid at the National Bank of Hayti in gold coin of the United States. This loan will serve to effect the withdrawal of $3,798,134 in paper money now in circulation, $1,000,000 of silver coins of 1 gourde ($0.965) and smaller coins amounting to 1,046,961 gourdes. Three senators, three deputies and three merchants of the island have been appointed a commission to control this loan. The paper money withdrawn will be publicly destroyed and the one-gourde and half-gourde silver pieces are to be sent to the United States and changed into coins of 50, 25 and 10 cents. These coins will be of the standard of 0.835 of pure silver and 0.135 of alloy, with the same weights, allowance, and diameter as the silver coins of the United States. On the obverse will appear the coat-of-arms of Hayti, with the words "Liberte, Egalite, Fraternite, Republique d'Haiti" below, and the value, and on the reverse a figure of the goddess of liberty, with the name of the coin and the date. The total of the coinage will be 2,000,000 gourdes—$300,000 in 50-cent pieces, $700,000 in 25-cent pieces, and $1,000,000 in 10-cent pieces. No foreign silver money will be permitted to circulate, but United States gold coin will be legal tender.

NATURAL GAS HOLDING OUT IN THE STATES.

The supply of natural gas in the United States is holding out unexpectedly well. It was thought several years ago, when the supply of natural gas showed such a decided drop, that the new fuel would before long be a thing of the past. But the American Manufacturer says: "The latest report of the Philadelphia company, which has been the most extensive operator in natural gas, indicates that the supply is holding out unexpectedly well. This report is the thirteenth annual statement made by this company, and shows that during the past year it drilled 51 wells, 31 being productive of gas, 11 of oil, and 10 dry. The company is now operating 924.41 miles of pipe, has 68 telephone stations, and 380.3 miles of telephone wire. The amount of natural gas sold during the past year was 10,857,956,000 cubic feet, all of which was sold by meter."

This great quantity indicates that the supply of natural gas, which has become so important as a fuel to Pittsburg and other places in Pennsylvania, was in the first place larger than even the U. S. Government authorities ventured to hope. They considered, according to the geological reports of former years, that the enormous rush to use the gas in stoves, furnaces, manufactories, and for lighting, must soon exhaust it.

FIRE AND FOLLY.

A fire, which is supposed to have broken out in the chapel, where lamps are kept burning all night, destroyed on Sunday night last La Metaire Auxiliary of the General Hospital of St. Hyacinthe, situated in the village of La Providence, across the Yamaska River, opposite that city. Six or seven persons were burned to death, four are still missing, and supposed to have been suffocated; one body has been found, unrecognizable—many persons were injured—all are women, many of them nuns. So grievous a calamity as this impels one to make some plain remarks upon the circumstances of the fire. It is stated, with apparent pride, by one of the local journals that "the commodious building, 60 feet by 120, had every modern improvement, and accommodated 400 patients; loss by the fire $30,000; no insurance." Does "every modern improvement," then, not include fire appliances? Was it a reasonable thing to erect a fine building—a *hospital* of all buildings in the world—in a spot where there was no water supply? There may have been plenty of Christian feeling in the hearts, but there was little common sense in the heads of those who had the planning and administration of La Metaire Auxiliary. Then, again, on this fine $30,000 property there was no insurance! Whose fault was that? Did the good sisters believe themselves and their helpless charges immune from fire? If they did, they have had a sad awakening.

A GOOD IDEA.

Capital is not money alone, but may consist of many other things. This idea is well brought out by a racy writer in this month's Insurance Monitor. We condense the story as below:—

"Use your capital, young man, use your capital," I said to my agent at Blankville. He was a capable-looking fellow—able-bodied, good address—but he hadn't made a success of his agency, contrary to everybody's expectations.

"That's just the trouble," he answered; "I have no capital. Jones & Brown have capital—they can give credit—take premiums in trade—I can't do either, because I have no capital."

"You mean you have no money?"

"Yes, that's what I said."

"Well, money is handy to have, of course, and makes business go easier; but you have other capital that I refer to. You have time, you have health, you have the faculty of making acquaintances. These are what I mean—bunch them together. Are you using them or wasting them? Aren't you running your agency just a little too much on the all-things-come-to-those-who-wait theory, instead of the how-doth-the-little-busy-bee style? Now if you will put in your time in systematic daily canvassing of your town—residence streets and all—letting every one know that you are in the business; making your old acquaintances of use in getting new ones; that's what I call using your capital. Try the plan—see everybody—then see them again—keep yourself in evidence. I won't change the agency now, because I want you to have a chance."

Well, the young man who was talked to in this style started out to try it for a week. He canvassed every acquaintance round, everybody in the building, every firm in the block—and he never got a risk. Then he was disappointed, sick, mad. But he went at it again, enlarging his round, making more acquaintances; and although he got nothing the second week except promises, and he was on the point of giving up his job, he felt, as he said himself, that more people knew he was in business, and that he was making friends. At the end of three weeks a man sent him in a $3,500 risk; then another came in to consult him, and so until in three months, as a result of his persistence, his good manners and the acquaintances he had made, business began to flow in, and he kept his job. Thus, having no money, he yet proved that he had capital, and he found out a way to use it.

THE USE OF THE TELEPHONE.

England and France, forward as they are in the invention and use of electrical apparatus generally, are singularly behind Germany and the United States in the use of the telephone. While Germany has 140,000 telephones in use and the United States something like 900,000, England has only 75,000 and France 35,000. Government control of the telephone in England hampers its use. Electrical Engineering, of Chicago, publishes the following list of the number of telephones in use in various countries. It is compiled, that paper says, from the latest statistics:—

Angola, Province of ..	200	Hungary	10,000
Austria	20,000	Italy	14,000
Australia	2,000	Japan	3,500
Bavaria	15,000	Luxumburg	2,000
Belgium	11,000	Norway	16,000
British India........	2,000	Portugal..........	2,000
Bulgaria	300	Roumania	400
Cape of Good Hope..	600	Russia............	18,000
Cochin China	200	Senegal	100
Cuba	2,500	Spain	12,000
Denmark............	15,000	Sweden	50,000
England	75,000	Switzerland	30,000
Finland	6 000	Tunis	300
France	35,000	United States	900,000
Germany............	140,000	Wurtemberg......	7,000
Holland	12,000		

It will be observed that Sweden is well up in the list, and Switzerland also. The total number of subscribers represented in this list is 1,402,100. But it is not complete. The journal which publishes this is scarcely, we think, the compiler thereof, else it would hardly have omitted Canada, a country situated on the North American continent, and one of which, we should think, the editor must have heard. The Bell Telephone Company of Canada has more than 30,000 telephones in use, mainly in Ontario and Quebec provinces, as we learned recently by official enquiry. Then there are the Nova Scotia Telephone Company and the New Brunswick Telephone Company operating in those provinces respectively, and a company having wires in Prince Edward Island. The North American Telephone Company has a network of wires and 'phones in the Hastings country back of Belleville, and there are besides the telephones in use in our North-West and Pacific provinces. Altogether we feel safe in saying that Canada has 40,000 telephones in use, surpassing in this respect not only France, but any European country, except Germany and Sweden. Perhaps the Chicago journalist will add Canada to his list of telephone countries.

LONDON BOARD OF TRADE.

A lengthy report was submitted to the annual meeting of the London Board of Trade the other day by the president, Mr. A. B. Greer. In the first place, he lectures the merchants roundly for neglecting their responsibilities as members, a fault in which, we are sorry to say, the members of the London Board are not alone. Subjects considered by the board during the year were: Port Stanley harbor, Customs and Post Office changes, freight rates, insolvency legislation, trade excursions, the Klondyke, the Pacific cable. Mr. Greer, in his address, made feeling reference to the recently dead members of the board, Messrs. John Bland and B. J. Nash, whose experience and public spirit had been of decided value. Memorials of these two were ordered to be made upon the minutes.

Mr. Greer was re-elected to the presidency; Mr. W. A. Gunn was chosen vice-president—also a re-election—and Mr. J. A. Nelles appears to be, as we have no doubt he is, a capable secretary, for he was appointed again.

The members of the council and various committees were chosen by ballot, as follows:

Council—Messrs. John Bowman, P. W. D. Brodrick, John Campbell, Wm. Gartshore, W. R. Hobbs, J. W. Little, C. W. Leonard, John McClary, J. S. Pearce, W. J. Reid, T. H. Smallman and A. M. Smart.

Arbitration Committee—D. W. Blackwell, C. H. Elliot, John H. Ginge, L. H. Ingram, Robert Inglis, J. A. Kennedy, James A. Kennedy, John Mattinson, A. St. L. McIntosh, D. S. Perrin, P. Pococke, J. D. Saunby and S. Stevely.

Board of Examiners—Messrs. C. B. Hunt, E. B. Plewes, J. S. Pearce, J. D. Saunby and John Sutherland.

Western Fair Committee—Messrs. John Bowman, J. M. Dillon, J. W. Little, A. St. L. McIntosh, W. J. Reid and T. H. Smallman.

Mr. John Cameron moved that the new officers place themselves in communication with the promoters of the retailers' association and an attempt be made to bring about affiliation. Mr. D. W. Blackwell seconded the motion, which was carried.

LONDON AND LANCASHIRE FIRE INSURANCE COMPANY

Australia, South America, South Africa, Canada, India, the United States, are in the list of branches of this company's foreign business, and the directors acknowledge, "with much appreciation," the assistance afforded by the boards of these foreign branches towards the financial results of the year 1897 in the company's books. These results are net premiums of £839,970, an increase over 1896, and a credit balance of £122,006 on the year's working, besides interest earnings of £37,104. Out of this there was distributed to shareholders £51,060 in the shape of a dividend at 12 shillings per share, where the dividend in the previous year was 10 shillings. This was considered, we should think, by the annual meeting on May 6th, a satisfactory result.

There is paid up of the capital of this company ten per cent.; that is to say, of the £2,127,500 subscribed, the amount paid up is £212,750. The reserve and re-insurance fund is £600,000, and the balance carried forward £370,000. A very favorable ratio of fire loss, 49.83 per cent., is shown for the year, while the working expenses and other outgoes were 35.64, leaving something over 14 per cent. to be added to reserve or paid out in dividend. Of the company's total assets, amounting to £1,366,070, there is invested in the United States £481,000; in Canada and other colonies, $76,808; in foreign bonds and securities, £78,300; in British railway preference or guaranteed stocks, and other bonds or debentures, £259,860; in premises at home office, in the colonies and the United States, £181,254, and in cash £122,826. The affairs of the company are thus in good shape, and its clients may look upon their policies with confidence.

FOR GROCERS AND PROVISION DEALERS.

Of a lot of lobsters cleared at Musquash for Eastport this week, says the St. John Sun, 1,000 were entered at a valuation of 9c. each, and 1,000 at 2c. each. This illustrates the relative value of large and small lobsters.

Ninety-one tons of lobsters means 182,000 pounds. This is the quantity of lobsters sent alive in one shipment from Halifax to Boston, Mass., by steamer last Saturday. They were in 1,300 crates, and we imagine must have produced in the aforesaid steamer "a most ancient and fish-like smell." This is termed the largest shipment of live lobsters ever made from Halifax, and we can quite believe it. Each fish, it seems, was at least 10½ inches long. The prices realized, however, were not altogether satisfactory, being distinctly lower than those of April.

A serious problem confronted Agent Coram on Friday last with the arrival of the big steamer "Linn" from Chicago with a cargo of 232,000 bushels of corn, and advices of another vessel to arrive that evening with a cargo of over 70,000 bushels. The elevator space was limited to 60,000 bushels, and there was not sufficient cars on hand to relieve the congested state of affairs. On vigorous representations being made to Superintendent Leonard, that gentleman started the carrying capacity and power this way in short order, and train after train of empty cars were soon coming in. Saturday the grain began moving out. On Sunday and Monday the record was broken in the number carloads which left this point in so short a period.—Owen Sound Times, 12th inst.

A suggestion that is well worthy the notice of grocers in particular, is made in the course of a shrewd advertisement of a new American scale. It says: "If they save you what you give away in down weight alone, it is an investment that will pay you several hundred per cent. per annum." This remark hits the spot with respect to the uneconomic habit of many country and city merchants or their clerks of pleasing their more ignorant customers by giving "down weight" of the scales in weighing groceries. The same sort of thing is done by the dry goods dealer who gives "a bit over the yard" in measuring textile fabrics. The merchant who does either of these things cheats himself, and no man is under any obligation of either good will or generosity to do wrong to himself in order to please a neighbor or a customer. The advertisement in question goes on to say, "your scales measure your profits. Accurate weight and correct calculation mean good profits, good profits mean success." This statement is only partly true. Good scales do help a merchant to realize profits by preventing waste; and good profits (which are hard to get now-a-days) often mean success. But we should like to have it demonstrated that accurate weight and correct figuring mean good profits. We have known men who could weigh a bee's wing, and who sat up nights calculating with much skill how to save the ultimate fraction of the steenth part of a cent. But they did not get good profits and did not reach success.

LIFE ASSURANCE PARAGRAPHS.

A concern with the attractive title of the Canadian Widows' and Orphans' Life Assurance Company has been organized in Montreal. There is something in a name, and the name of this new Canadian venture resembles, as its methods are we believe intended to resemble, the Scottish Widows' Fund Life, which has been long established and very successful.

The Metropolitan Life Company has given notice to its policy-holders that they may fight all they please, and that the company will pay for their funerals. Upon which the Insurance Times remarks: "If the Metropolitan could place all of its policy-holders in the field, and make them capable of bearing arms, instead of being born in arms, they would settle a war inside of ten days."

Hamilton was visited by fire yesterday morning, and the old Spectator building (happily not the new one) on James street south is gutted. The Great North Western Telegraph Company loses all its plant and fittings; the American Express Company is also burned out. The stone building, which was owned by John Proctor, is a wreck. Loss placed at $25,000; insurance not ascertained.

We learn from Montreal that there were in our correspondent's letter some inaccuracies respecting the intention of the London and Lancashire Life in their new building. They have purchased a portion of the Barron block property, viz., 40 feet on St. James street by 80 on St. John street, upon which the company are about to erect an office building for themselves. The Bank of Nova Scotia will occupy the ground floor, the company the second floor, and the other stories will be let out for public offices.

FIRE INSURANCE HINTS.

In Berlin the firemen wear water jackets, with a double skin, which they are able to fill with water from the hose. If the space between the two layers becomes overfilled, the water escapes through a valve at the top of the helmet.

The fire at the Gold Fields Development Co.'s works in the Marmora district of Ontario the other day resulted in a loss of at least $30,000. The fire broke out in the drying room, and there will be some salvage, perhaps 25 per cent., on machinery, etc. The insurance amounts to $40,000; it was taken by the Norwich Union, and has been re-insured in the North British, the Western, and six or eight other companies.

In spite of the negligence and recklessness shown by the average merchant, and the average councilman in Canadian towns and villages about fire appliances, an awakening comes to them at times. Now, it may be a devastating fire in the next village; or again, it may be the voice of a conscientious newspaper man. Here is a little warning given to its readers by the Bras d'or Gazette, of St. Peter's, Cape Breton, a lively place of some 600 people: "Our citizens should try and devise some means of protection in the case of fire. Something should be done at once. Now is the time, not when several heaps of ashes will be the only mementoes of our thriving town. At present, if one building took fire and escaped notice until advanced, it would mean a general conflagration. Ladders, buckets and water kept where they would be easy of access would be to a certain extent safeguards."

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, May 19th, 1898, compared with those of the previous week:

CLEARINGS.	May 19th, 1898.	May 12th, 1898
Montreal	$12,799,403	$13,659,793
Toronto	7,824,958	8,672,004
Winnipeg	2,123,809	2,268,965
Halifax	1,221,680	1,186,805
Hamilton	693,835	752,433
St. John	615,681	633,541
	$25,277,366	$27,173,541

Aggregate balances this week, $3,196,933; last week, $3,856,845.

—The supplementary estimates were brought down by the Government this week. They amount to $1,460,000. Among the items provided we observe a sum of $14,000 for examination of the river Stikine, etc. Also a sum of $25,000 for a line of steamers to run between St. John, Halifax and London, and $15,000 for line of steamers to run during the winter season of 1897-98 between St. John and London, Liverpool or Manchester. We notice a revote of $15,000 for steamer service between Halifax, St. John's, Newfoundland and Liverpool, for the year ended June 30th, 1897. The largest item is $500,000 for the maintenance of the Mounted Police of the North-West. It may be that this is for the extra force for the Klondyke, otherwise it would hardly be put into a supplementary vote. Then there is $50,000, salaries and expenses connected with administration of Yukon provisional district, of which $45,000 is Governor-General's warrant. For commercial (or is it immigration) agents in foreign countries, $5,000 is put down. An item which many will welcome, and hope that practical use will be made of the money, is the $60,000 for general immigration expenses.

—That business, already brisk, is going to be brisker, may be readily inferred from the policy of our big railways with respect to rolling stock. The Grand Trunk has given orders to have 250 refrigerator cars built for immediate use. Business is increasing so fast that the company cannot attend to it with the present equipment. Similarly, the Canadian Pacific, expecting an increase in freight traffic, have rushed through their shops at Perth, the 250 new flat cars which will be in use almost immediately. The capacity of each car will be 60,000 pounds.

—It appears that the Legislature of British Columbia do things on a liberal scale. If the telegrams of Saturday last from Victoria are accurate—and there are no newspapers of that date yet to hand—the supplementary estimates laid before the Legislature provide for a total of $102,389 for the next year, $404,402 for the present year, and $441,248 for the year ended 30th June last; a pretty handsome aggregate. Among the chief items for the coming year are $3,000 for the exhibition at Westminster, in addition to $10,000 already voted.

—Our American friends are very jubilant over the active condition of business, and especially over the great extent of their foreign commerce as exemplified in the Washington statistics up to the close of April. These show that for the ten months then ended the exports of the United States were $1,025,426,000, and the imports $511,181,000. This makes a foreign trade of $1,536,607,000 in ten months. At this rate the fiscal year ended with June, 1898, will "break the record" to foreign correspondence.

—We hear that the general manager of the Molsons Bank, Mr. F. Wolferstan Thomas, has arranged for a trip across the Atlantic for a holiday, and sails to-morrow. We congratulate him, and applaud the good sense of the directors, who have pressed this recreative trip upon him. Mr. Thomas has been a busy man, often a very hard-worked man, since about twenty-nine years ago he took the helm of Molsons Bank. He has not had too many holiday trips, and assuredly deserves this one.

—As supplementary of what we learned a week or two ago about the satisfactory prospect for wheat seeding and growth in Manitoba, it is agreeable to learn further, by means of crop reports from Manitoba and Northwestern Railway agents up to 17th instant, that wheat seeding is now complete in all save two or three districts. The weather has been generally favorable, but rain is wanted at a number of points.

Meetings.

COMMERCIAL BANK OF MANITOBA
(IN LIQUIDATION).

REPORT TO THE SHAREHOLDERS OF THE COMMERCIAL BANK OF MANITOBA.

As the creditors of the bank who have proved their claims have been paid in full, and as I am declaring the first dividend to the shareholders who have met all calls, it would seem proper that I should enclose a short statement showing the present position of the estate. On 30th April, 1898, this was as follows:

ASSETS.

Cash on hand		$22,025 61
Sundry debtors, as per ledger	$650,275 56	
Real estate and mortgage account......	25,947 72	
Agreements of sale ..	30,418 27	
Debentures, etc.	4,733 97	
		$711,375 52
		$733,401 13

LIABILITIES TO THE PUBLIC.

Unclaimed balances and sundry disbursements to be provided for (estimated)	$ 5,000 00	
		$ 5,000 00

SECURITIES.

Collateral to sundry debtors and for real estate and mortgage accounts the bank holds title to:—

5,560 acres of farm lands, sold under agreement of sale ..	$22,299 00	
Town properties sold under agreement of sale	12,326 00	
16,600 acres farm lands unsold	38,000 00	
City properties unsold..	10,000 00	
		$82,625 00
Debts otherwise secured and unsecured, estimated collectible		45,000 00
		$127,625,00

PRESENT POSITION OF ESTATE.

Cash on hand..........	$22,025 61	
Less 1st dividend to shareholders at $6 per share	20,910 00	
		$ 1,115 61
Securities estimated collectible (see above		127,625 00
		$128,740 61
Less liabilities due to the public as above		5,000 00
Estimated gross result		$123,740 61

In my last report to the shareholders I estimated that the estate would pay at least $25 per share to those shareholders who are entitled to participate in the assets. As the stock on which the calls have been fully met amounts, so far as settled by the court, to $348,500, and as the estimated surplus assets are over $120,000 after payment of $6 per share, it would appear that my previous estimate was a safe one.

Since the issue of last report I am pleased to say that the suit of Delap v. Charlebois has been settled, the bank receiving $25,000 in cash. This amount might have been increased had the settlement not been complicated by an agreement entered into without my knowledge by the trustee appointed prior to the bank's failure by the bank and Messrs. Macdonald & Schiller, its debtors. The bank was, however, owing to prompt action taken by the solicitors, besides receiving the money some time in advance of others interested, enabled to obtain a larger percentage on its claim than I believe will be paid to any of the other creditors.

As the value of the bank's assets decreases, it should be the aim to reduce the expense of the liquidation. Anticipating the wishes of the shareholders in this respect, I have, with the approval of the Court, succeeded in introducing economies which effect a saving of over $1,300 per annum. As this has been done at the earliest possible moment and without, in my opinion, affecting the efficiency of the management, it will, I hope, meet with the general support and approval of those interested.

The interests of the shareholders in this respect will be constantly before me in the future as in the past, and whenever in my opinion practicable, further curtailments will be made. For the present, however, I believe the cost of management has been reduced to the lowest possible point.

WM. HESPELER,
Liquidator.

Winnipeg, Man., May 12th, 1898.

TREES IN QUEER PLACES.

Some remarkable instances of Nature thriving under difficulties in the shape of trees growing upon church towers appear in The Rambler. Among the several instances given, the following may be cited:—A curious old yew tree, which is computed to be at least 200 years old, flourishes on the south side of the tower, just below the battlements, at the junction of the tower and tower-turret of the parish church of Culmstock, in Devonshire. The trunk is more than a foot in circumference, and it springs right out of the building. On the tower and steeple of the fine old parish church of Crick, in Northamptonshire, are two trees which grew out of the masonry some 50 feet from the ground. A fine Virginia creeper may be seen growing in the belfry of the beautiful octagonal tower of Grosmont Church, wreathing itself around the window mullions. A sycamore sprouts from the old tower of St. Petrock's Church, Clannaborough, North Devon, and a yew tree, 5 feet high, may be seen in a similar position on Bicknoller Church, Somerset. A very flourishing tree grows from one of the openings in the curious round tower of St. Benedict's, Norwich.

A PHASE OF THE HARDWOOD TRADE.

All last year a pronounced feature of the demand for hardwood lumber was that for agricultural implement manufacture and the making of wagons. These requirements and the call from the railways and car factories were the stimuli of the hardwood trade that rendered it relatively more prosperous than any other branch, except the yellow pine trade, which rose to large proportions in the last half of the season. But if the implement, machine and wagon industries were active last year, what may we not expect of them from now forward? Since the first impetus given to them last year the price of wheat has advanced from 60 cents a bushel to over a dollar a bushel, a large amount of cash wheat having recently changed hands at $1.40 or more in the Western markets. The price of corn has risen from 18 cents a bushel to as high as 35 cents in Chicago, in some instances. The price of oats has risen from 15 cents a bushel last year to around 30 cents now. Rye and barley have also made good advances. The prospects for prices throughout the year are now brilliant on account of the war, and the shortage in Europe and other parts of the world. Horses and mules are higher than they were, and considering the higher prices of grain it seems as nearly certain as can be that beef, pork, mutton and poultry must advance.

Last year the farmers of the west paid off a great amount of debt and cancelled thousands of mortgages. Now, with good prices for what they have to sell, and excellent prospects for the growing crops, the tendency will be toward the buying of a large amount of farm machinery, tools and wagons. The manufacturers in those lines will consequently have all they can do to meeet the demand. Every factory will be full of work. This will necessitate the use of a vast amount of hardwood lumber. As compared to the requirement last year, great as it was, it seems certain that the demand this year will greatly exceed it. Taking this view of the matter it can be safely concluded that there is to be no serious or long continued abatement in the demand for the kinds of lumber used in the industries named. There will be a call for all the implement and wagon oak, ash and hickory that can be turned out. There will also be a demand for cottonwood, basswood, poplar, yellow pine and white pine for box boards, some parts of machine work, wagon and machine tongues, etc., and coarse box lumber for packing for shipment.

Prosperity among the farmers means much to the trade in lumber which enters into farm equipments, and there was never a better outlook for demand in the lines named than just now.—Northwestern Lumberman.

THE GREAT SIBERIAN RAILWAY.

The great Siberian Railway is the chief work the Russians have now on hand. It will, when completed, measure 4,950 miles in length, and cost about seventy-five million dollars. It will open to population and cultivation a grand empire with rich resources. This tremendous railway is now in operation, and more or less finished, to Krasnoyarsk, on the Yenisei, more than two thousand miles eastward. And there is also finished a division from Vladivostok, on the Pacific, westward to Khabarovka, on the Usuri, 250 miles. Equipped with sleeping and dining cars, this railway even carries a church-car on its through trains. Of the land in Western Siberia, which the Government has mapped and set aside for distribution, more than 7,000,000 acres were parcelled out to colonists up to the close of 1895. It comprised a very great part of the rich soil not encumbered by forests. During 1896 nearly a quarter of a million peasants crossed the Urals to these new fields. The greater part of the land remaining in the chartered districts needs capital to work it, or is too far from the railway and the principal routes.—Century Mag.

HARD LINES FOR LIARS.

The following is the text of a bill just signed by Governor Black of New York:

"Any person, firm or partnership of persons, or any employee of a firm, person or partnership of persons, who, either in the newspapers or other periodicals of this State, or in public advertisements, or in communications intended for a large number of persons, knowingly make or disseminate any statement or assertions of facts with respect to his or her or their business affairs, especially concerning the quantity, the quality, the value, the price, the method of production or manufacture or the fixing of the price of his, her or their merchandise or professional work; or the manner or source of purchase of such merchandise; or the possession of awards, distinctions; or the motive or purpose of a sale, intended to have the appearance of a particularly advantageous offer, which are untrue or calculated to mislead, shall be guilty of a misdemeanor."

—Antwerp in a century has risen from 53,000 to 257,000, an increase of 383 per cent. Liege has advanced from 46,000 to 160,000; Ghent from 55,000 to 155,000; Brussels from 66,000 to 187,000.

—Russia has ordered a 10,000 horse-power ice breaker from the Armstrongs, the English iron men, to cost $800,000. It will be ready in October, and will be used to keep open navigation to St. Petersburg throughout the winter.

—Cuba is known in history under several names. The first was Antilla; next, Juana, after a Spanish prince. Fernandina came third, followed by Santiago, and the Isle of Ave Maria. The original Indian name, Cubanacan, signifying "where gold is found," was finally adopted, and usage shortened it to the first two syllables.

—Waterloo station in London boasts one of the largest railway signal boxes in the world. To control the number of trains which pass in and out of the station 18,000 distinct lever motions, and 20,000 electrical signals are required. The shuntings alone in the course of four hours number 173, the actual cause and time of each shunt being duly reported.

—It has been held in the Superior Court that a municipal assessor is a public officer, and that his pay is, therefore, not seizable for his debts. Some of the laws appear to be made to favor the wrong people. A reformer to agitate an abolition of class privileges has still some work to do in this country.—Montreal Gazette.

—The American comic journals and funny men of the dailies have not been slow to satirize the disposition of the frothy people of the United States to boast and threaten and predict "the greatest success on earth" in the Spanish war. One journal says: "A very slight tax on talk would produce all the revenue the Government could possibly need." And the Detroit News says: "If the President had called for 125,000 colonels it wouldn't have taken a day to fill the quota."

TOBACCO IN FLORIDA.

Some compensations may be in store for Florida, and they are needed to make up for the frightful frost that utterly devastated so many of her orange groves, and sent their proprietors out of business, ruined. The Cuban war has done one big thing for this country, says the Cincinnati Enquirer. It has compelled recognition, indirectly, of the value of Florida lands for the production of the finest tobacco in the world. In the course of his recent trip to the south, Secretary of Agriculture Wilson was astonished to discover that 160,000,000 Havana cigars were actually grown and manufactured at present on the Florida peninsula. Already great areas in the western part of the State are planted with this crop, and extensive arrangements have been made for its introduction into the central region.

Thus, it may be expected that before long Florida will rival Cuba as a tobacco producer, in respect to the quantity of yield, while the quality of the cigar leaf seems to be quite equal to that of the famous Vuelta Abajo. All the conditions of climate in Florida favor the production of the highest grade of tobacco. The soil is much like that of Cuba, and, by the aid of the system of spraying that imitates natural rainfall, the plants are ripened in forty-five days after they are put out. Tobacco can be grown almost all the year, and crops can be set out in every month nearly.

RISING FROM THE RANKS.

A correspondent endorses the position taken in the editorial "Coming up from the Ranks," in our last issue—that holding up proprietorship as a goal has been somewhat overdone. He adds:

"It used to be a favorite saying of the self-satisfied, that it was 'possible for any boy to rise to be President of the United States.' This, of course, can be shown to be mathematically impossible. The proprietor of the thread mill bearing his name, rose from a machinist, who everybody thought was an idle dreamer, because he claimed he could do certain things in thread-making which he finally did do. He says it is possible for any one to rise to the same position that he occupies. Now his position positively involves a large number of other people in inferior positions, and the whole proposition is absurd as well as mathematically impossible. It is not conceivable to the human mind that everybody should live on 'custard pie and soda water.'"

There can be no controversy, however, on the proposition that every man by industry, a studious habit and a determination to conquer difficulties can greatly increase his skill and efficiency. We are not sure that the current preaching on the possibilities of employees becoming employers may not be overdone even to the extent of creating discontent because of the small number who reach the goal. We are disposed to consider this preachment of the self-made employer as quite as much a mistake on one side, as the effort of the trade union to create an artificial dead-level condition of fit and unfit, on the other. Let emphasis be put upon merit and achievement, in whatever rank or file it is found, for less and less will proprietorship be possible, though the standard for subordinate places is incomparably beyond that of three decades ago. —Iron Review.

A HURRYING-UP

The new Insolvent law, which comes into operation on the 1st of July precludes bills of sale or confessions of judgment (in business concerns), being legally given within 60 days of assignment. It also abolishes "preferences;" as the term has been understood and acted on. The occupation of the "sisters, and the cousins, and the aunts" of insolvency methods hitherto will be largely gone as practical receivers of what is left of an estate.

Commercial agencies note that there have been a most unusual number of bills of sale registered within a fortnight, dating back to before the 1st of May, the 60 days' limit. Some are rather in the nature of a revelation, presumably of course that the bills of sale were previously there; there are probably a good many more to come, made or registered in anticipation of the operation of the new law. —Acadian Recorder, Halifax.

COKE FOR KOOTENAY SMELTERS.

Robert Jaffray, of Toronto, one of the directors of the Crow's Nest Pass Coal Company, and William Blakemore, general manager of the company, spent a couple of days in the city recently, on their return from a visit to Rossland and Spokane. The company has a capital stock of $2,000,000, and Col. Baker, provincial secretary of British Columbia, is president. To a Miner reporter Mr. Blakemore stated that the company is rapidly getting its mines into shape for delivering coal and coke to every part of the Kootenay country. They have at present sixty men at work opening up two seams of coking coal. The best and most expensive machinery has been ordered for the mines, and fifty coking ovens will be in operation before the line of railway is completed to Nelson. The coal has been thoroughly tested and the coke produced has been found to be superior to that produced in Swansea, Wales, or Pennsylvania. It is of the bituminous coking variety and contains 95 per cent. fixed carbon and 4 per cent. ash.

It is the intention of the company to supply the smelters of Kootenay at the very best price possible, which will be about half the price now paid for the Welsh and Cannelsville coke. It is estimated that one ton of coke is used in smelting five tons of ore, and the reduction in price made by the Crow's Nest Pass Coal Company will reduce the cost of smelting ore about $1.50 per ton. The present consumption of coke at the smelters in this section, when all are running, is as follows: Hall Mines, 40 tons daily; Trail smelter, 60 tons; Northport, 40 tons.

The product of the 50 coking ovens to be installed at an early date will be 200 tons per day, and the company expect, as soon as transportation facilities are available, to supply the smelters above named. Besides supplying the Kootenay market, Mr. Blakemore is in negotiation to supply a number of large smelters across the line.

At the Everett smelter the daily consumption of coke is 60 tons; Tacoma, 40 tons; Great Falls, 150 tons; Helena, 50 tons; Butte and Anaconda, 400 tons. Owing to the advantages of quality and geographical position, and the cheapness with which the company will be able to manufacture coke, he expects to be able to supply most of the coke used at all the points mentioned.—Nelson Miner.

THE LEAD PROBLEM.

The agitation for the imposition of a heavy import duty on lead products is everywhere throughout the Dominion meeting with hearty approval. Those who have given the matter any attention realize that so long as the lead smelters of the United States continue to control the lead market of Canada, silver-lead mining, silver-lead smelting and kindred industries will remain non-existent in this country.

It is a foregone conclusion that legislation will ultimately be enacted for the fostering and protection of the Canadian lead industry. The only question is, How long shall we have to wait until the required revision of the tariff is made? From present indications it would seem that at least a year will elapse before anything is done. The boards of trade of Southern British Columbia have taken the matter to Ottawa, having sent delegates there to put the facts of the case before parliament. The efforts of these deputations are mainly directed to obtaining the appointment of a parliamentary commission to inquire into the matter, and it is generally believed that an investigation will be made on these lines. There is, however, the probability that nothing further than the appointment of a commission will be done until the next session of parliament. Should this be the case, the lead smelting and kindred industries of Kootenay will continue to suffer greatly for another year.

The Miner fails to see why so much delay should be occasioned. If the proposed commission finds that the contentions of the lead miners of Kootenay are worth favorable consideration and recommend the increase of the present import duty on lead products, it will be an unnecessary and disastrous delay to let the matter rest there until parliament meets again.—Rossland Miner.

NOT SO GREEN AS HE LOOKED.

The travelling man who had been royally entertained by the prosperous farmer, in the outskirts of the little town, where the only hotel had burned down a few days before, was a little uncertain, when about to depart, whether he should simply return his thanks or risk offending his host by offering pay.

"You have placed me under great obligations, Mr. Millsaps," he said. "When I come in from a trip of this kind I am accustomed to turning in an expense account, and it seems to me I ought to have put down in it something pretty handsome for the excellent entertainment I have had at your house."

"You can turn in what you durn please," replied Mr. Millsaps. "My bill will be $16."—Chicago Tribune.

Commercial.

TORONTO MARKETS.

Toronto, May 19th, 1898.

DAIRY PRODUCE.—Deliveries of dairy butter continue to come forward freely and holders in the country evidently prefer to take a low price for their fodder butter rather than pack it. Large rolls are worth 12 to 12½c. per lb. and the few tubs offered bring 13c. per lb. Deliveries of creamery are heavy, and the market, not having recovered from the deliveries of winter creamery prices, are low at 17 to 18c. per lb. Old cheese is practically out of the market, and the few cheese held from last season bring a premium of ¼ to ½c. per lb. over new goods selling in a local way at 9c. per lb. Deliveries of eggs are heavy, and dealers quote 10c. per doz. Prices have been too high for picklers' purposes, and merchants say that about 8c. must be the standard price in the country markets during the coming week.

Dry Goods.—Although for some time the wholesale houses have not been pressed with trade, the movement has not been quite as slow as during the present and past weeks. In the city retail circles a fair amount of business has been done, but in the country trade is a little slack and must remain so until the pressure of farm work is over. The manufacturers' agents are finishing up their fall campaign in woolens, and have received the initial orders from clothiers for the spring of 1899 for tweeds. It is now more than a rumor that the Klondyke supply business is very flat. In blankets there has been a wonderful increase in production for this trade within the past several months, and we are told North-West Canadian houses are over-stocked with these goods. Values of staple goods remain without alteration.

Grain.—The wheat market has shown a strong element of uncertainty and prices of Ontario wheat are 1 to 2c. per bushel lower, while Manitoba has declined 5c. per bushel. The bear element is more in the prospects of larger crops in the coming season than any falling off in consumption. In most cases in Ontario, the crop came out in the spring in about the same condition as it entered the winter. Little harm appears to have been done by insects, wire worm being reported in a few cases. The first two weeks of April were far more favorable for the crop, and although rains later helped the plant, it is hardly in as forward a position as usual. Where sown early on summer fallow, fall wheat has never been more promising. In several of the western and central counties some ploughing up has been done, but not to any considerable extent. The present acreage of the crop, therefore, may be set down as quite up to the average, and the average condition in May is fair. The monthly statement of the United States Government shows the world's wheat crop of 1897 smaller than since 1890, and the crop of the United States larger than since 1891, and the average price the highest since 1883, except in 1888, 1890, and 1891, while the average rail rate freight from Chicago to New York has fallen in same period from 16 5-10c. to 12-32c. It estimates wheat in farmers' hands, United States, March 1st, 1898, 121,000,000 bushels, against 88 millions last year and 75 millions in 1895. The barley trade is dull. Oats are firm and unchanged. Peas are weaker, having declined 1 to 2c. per bushel. Rye and corn remain nominal.

Green Fruits.—The weather has been rather colder than the fruit trade desired for this week, but in spite of the unfavorable conditions a fair amount of business has been done. The demand from the country, in preparation for the Queen's Birthday celebration, on May 24th, has been unusually large this year. The Wednesday auctions of the Toronto Fruit Auction Company were very successful this week and well attended. For oranges there was good demand but small sizes were not wanted. We quote: Mediterranean sweets, fancy, 126s, 150s, 176s, 200s, 216s, $3 to $3.25 per box; ditto 250s, 300s, $2.50 to $2.75 per box; California seedlings, 126s, 150s, 176s, 200s, 216s, $2.50 to $2.75 per box; ditto, 250s, 228s, 300s, 360s, $2 to $2.25 per box. The quality of the lemons sold here on Wednesday was good and consisted, in the main, of Fremona stock. We quote: New Messina, fancy, 300s, 360s, November cuts, $3 to $3.50; ditto, choice, 300s, 360s, $2.50 to $2.75. The last large import fruit sale of the season was held by the Montreal Fruit Auction Co. last Saturday. The fruit offered was ex-steamships "Truma" and "Bellona" and consisted of 14,000 boxes of lemons and oranges. The attendance of buyers was large and the bidding throughout was brisk. The condition of the fruit was good, and considering the large quantity put up by auction this season here, the prices realized all round were satisfactory, they being in many cases higher than those ruling the American markets. Lemons sold at from 90c. to $2.65 per box, as to quality and condition. Oranges in boxes brought $2 to $2.60 and in half boxes 90c. to $2.30. Bananas are selling well and the consumption is increasing, but warm weather is badly needed. Pineapples are in rather scarce supply but prices are low. Strawberries are coming forward more freely and show improved quality.

Groceries.—There is no activity in trade, and reports from country merchants show that the only commodity in request is seed. The influence of the war on imported commodities is shown in stiffer values, and all such articles are firm in value if not held at higher prices. Dried fruits, other than table varieties, are scarce, and prices are firm. We quote: California prunes, 50—60, per lb., 7c.; 40—50, per lb., 7½c. The Greek currant market, by recent advices, advanced on Continental buying; and as the Continental markets are carrying extremely light stocks, they will probably have to buy heavily during the next few months, and stocks in Greece being so light, and that market very sensitive, it would no doubt advance further should any more orders be put forward from the principal consuming countries. It is probable that the remaining stock in Greece will finally be taken by the Continental countries and England, as statistically America has just about enough to last her until the new crop. Cables from Malaga state there is nothing there in the way of Jordan shelled almonds to offer for prompt shipment. The local sugar market has shown no change in values but holds firm at former quotations. There is nothing new in teas and the situation is rather uninteresting. Manufacturers of starch say that the trade need not be surprised if another advance in price lists is made soon, but nothing definite is announced. The same may be said of tobaccos, which some houses report to be about to advance in price.

Hides and Skins.—The hide market is firm. Merchants are paying 8c. to butchers, and asking 8¾ to 9c. for No. 1 Toronto inspected cured cow hides. We have heard of no sales at the latter figure but believe that choice hides would bring that figure. In Chicago, according to recent report, dated May 18th, the tendency of prices in the market for packer hides continued to be towards a higher basis. The demand for hides was moderately active, although the purchases made were generally of small lots, as tanners were confining their takings to only such supplies as were needed to meet current wants, the extreme figures now ruling serving to hold the demand in check. There were rumors of sales of native steers, late April take off, at 12¼c. and do. May take off at 12½c., but particulars could not be obtained. The close was firm, with native steers at 12 to 12½c.; Texas at 11¾ to 12c.; butt brands at 10¾ to 11c.; branded cows at 10¼ to 10½c.; Colorados at 9¾ to 10c.; heavy native cows at 11¼ to 11½c., and light do. at 11¾ to 12c.

Provisions.—Goods are firm and merchants are asking ¼ to ½c. per lb. over last week's quotations. Long clear bacon is strong at 8¾c. per lb., and all other meats show a decided improvement. The war markets of the United States are responsible for a part of the strength and the advance in quotations there has prevented American packers from competing strongly in Canadian North-west markets.

Wool.—A few lots of new fleece wool, washed and unwashed, are coming into this market, but deliveries are limited and prices continue unchanged. We elsewhere review the situation at length. Advices of the London auction, dated 16th inst., contain the following: "A good selection of greasy, which was eagerly competed for, the Continental buyers securing the bulk at top prices. Heavy New South Wales and Melbourne ruled easier. Punta Arenas of good quality was firm, while inferior ruled irregular at a farthing decline."

MONTREAL MARKETS.

Montreal, May 18th, 1898.

Ashes. — The ashes market shows neither improvement in demand, nor increase of receipts, and local trading is of a very light character. Quotations are more or less nominal at $3.40 to $3.50 for first quality of pots, seconds $3.15 to $3.20 and pearls about $4.75 per cental.

Cements and Firebricks.—Receipts of cement since last writing have been large, the figures being 1,900 brls. of English, and 30,512 brls. of Belgian, the latter being largely on account of the large government contracts, for use on the Soulanges canal, and which were reported on in these columns some weeks ago. The demand continues good, and prices steady at $1.80 to $1.95 for Belgian, and $2.20 to $2.30 for English. Receipts of firebricks, 5,000; prices range from $16 to $21.

Dairy Products.—Receipts of cheese here are increasing a little, but the make so far, it appears, is considerably behind this time a year ago. It is said that the cows are later than usual in coming in this spring. The small receipts of French country cheese on Monday, realized about 7¾c.; the general idea as regards the price of Western is from 8 to 8¼c. In the butter market there is rather an easier feeling, though receipts are not particularly large. For creamery the quotation is 16½ to 17c. Township's dairy 15 to 15½c., dairy rolls 13 to 15c. as to quality.

Dry Goods.—Up to to-day the weather has been somewhat cool, and quite a few city retailers report finding their sales of summer goods affected, more or less, in consequence. There are now indications, however, of a more seasonable temperature. Moderate sorting business, from the country, is reported, though some dealers are deferring orders to secure fall dating, which goes into effect June 1st. Collections are well kept up. With regard to values of textiles nothing new is heard from either home or foreign sources.

METALLIC ROOFING CO., LIMITED,
1178 King St. West, Toronto

Furs.—Some moderate lots of raw furs are still coming in, with reports that there are still some fair supplies to be forwarded from interior points. Advices just to hand, regarding the Leipzig fair, state that though prices opened fairly strong, there were some indications of weakening towards the close, and it is hardly expected that the prices of January and March will be fully maintained at the London June sales, which open on the 12th prox. We quote: Mink, large dark, $1.50; small, do., $1 to $1.25; marten, $1.75 to $2.25; fisher, $4.50 to $7; lynx, $1 to $2; otter, $1 to $12 for dark; pale, $5 to $7; red fox, large, $1.30 to $1.50; small, $1; cross fox, $3 to $6; bear, cubs, $3 to $7; medium, $7 to $10; large, $12 to $15; skunk, 15 to 70c., as to color and stripe; coon, 20 to 75c.; rats, fall, 7 to 10c.; kits, 2 to 5c. Beaver, not quoted, killing being forbidden by law.

Buckwheat	108,102	113,932

Groceries.—Jobbers report a steady country distribution, with payments from dealers of a generally satisfactory character. Rice has scored another advance of 25 to 30c. a cental, and jobbers' prices for standard B. are $3.75 for single bags, $3.70 five to 10 bags, and $3.65 for 10 bags and upwards. Tapioca is also firmer, and 3½c. is now asked between houses. There is a strong demand at present for Japan teas of medium grade, ranging from 15 to 16½c., which are scarcer than ever, and holders demand and get a full half cent advance on these lines. The sugar market remains at the level of last week, refinery quotations being for standard granulated, 4½c.; Austrian granulated, 4 3-16c.; and Dutch ditto, 4¼c.; yellows, 3 11-16 to 4⅛c. A moderate lot of regular Dutch refined is unloading from the "Nordkyn" now in the harbor, and cable quotations are reported for this grade at 13s. per cwt., which equals cost in bond here of about $2.85 per hundred lbs., or a shade under $4 duty paid. No recent cable advices are to hand regarding molasses, for which article prices are fully as firm as last noted. There is not much doing in canned goods, but canned vegetables continue pretty steady in price. There seems to be a disposition to ease up a little on gallon apples, and they could probably be bought in fair lots at about $2.30. Quotations for new pack of lobsters have not been received here yet, but prices are expected to rule high. Dried fruits are not in much demand, but are firm in price; a couple of carloads of California raisins are to hand, said to be desirable goods, for which the agents quote on the basis of 6¼c. for 3 crown to jobbers. Tarragona and shelled almonds are dearer, also Sicily filberts.

Hides.—Prices remain exactly as quoted last week, with receipts of beef hides a little larger, and tanners buying pretty freely all that are offering. Dealers are buying hides at 8, 7, and 6c. per lb. for Nos. 1, 2, and 3 respectively; calfskins 10 and 8c. per lb.; lambskins 15c. and sheepskins $1 to $1.10 each.

Leather.—Some further moderate sales of pebble and glove grain leathers are reported to a few of the larger shoe manufacturing houses, but buying of fall stock is not very general as yet. The manifesto of out-going steamers show very considerable exports of splits and glove in black leathers, as well as large lots of sole, and Western tanners are inclined to be firmer in their views, and they are comparatively indifferent to offers coming from this market. We quote: Spanish sole, B.A., No. 1, 24 to 25c.; do. No. 2, 22½ to 23½c.; No. 1 ordinary Spanish, 23 to 24c.; No. 2, 20 to 21c.; No. 1 slaughter, 26 to 28c.; No. 2, do., 24 to 25c; common, 20 to 21c; waxed upper, light and medium, 30 to 35c.; do. heavy, 27 to 30c.; grained, 32 to 35c.; Scotch grained, 30 to 35c.; western splits, 22 to 25c.; Quebec do., 18 to 20c.; juniors, 18 to 20c.; calf-splits, 30 to 35c.; calfskins (35 to 40 lbs.), 60 to 65c.; imitation French calfskins, 65 to 75c.; colored calf, American, 25 to 28c.; Canadian, 20 to 24c.; colored pebble cow, 13 to 15c.; russet sheepskin linings, 30 to 40c.; colored, 6 to 7½c.; harness, 24 to 27c.; buffed cow, 13 to 15c.; extra heavy buff. 15c.; pebble cow, 13 to 13½c.; polished buff, 12 to 13c.; glove-grain, 12 to 13c.; rough, 22 to 23c.; russet and bridle, 35 to 45c.

TENDERS FOR

ST. JOHN CITY DEBENTURES.

Sealed Tenders, marked "Tenders for Debentures," will be received at the office of the Chamberlain of the City of Saint John, up to 13th June, 1898, for the purchase of Saint John City Debentures for the whole or any part of the sum of

One Hundred and Forty-Seven Thousand (147,000) Dollars

to be issued in sums of $1,000 each, under the provisions of Act of Asesmbly, 52 Vic., Cap. 27, Sec. 29, payable in 40 years, with interest at the rate of Four per cent. per annum, payable half-yearly.

The said debentures are issued by orders from Common Council of the City of Saint John under authority of Act of Assembly, which provides for creating necessary Sinking Fund for redemption at maturity.

The proceeds of said Debentures are to meet expenditures for Public Services such as the extension of water and sewerage service in several places and districts as adopted by Common Council under date of 2nd September, 1897, in the sum of $12,000. Also the extension of water supply service on western side of the harbor and the laying of a new main from Spruce Lake to that part of the city, on the said western side of the harbor, in the sum of $135,000.

First Interest Coupons payable 1st November, 1898.

If desirable these Debentures may be issued in sums of $500 each.

Not bound to accept the highest or any tender.

FRED SANDALL, Chamberlain,
City of St. John, N.B.

Chamberlain's Office, 13th May, 1898.

Trent Canal

NOTICE TO CONTRACTORS

Hydraulic Lift Lock at Peterborough

Sealed Tenders addressed to the undersigned, and endorsed "Tenders for Hydraulic Lift Lock," at Peterborough, will be received at this office up to noon on Tuesday, May 31st, 1898, for the construction of this Hydraulic Lift Lock.

Plans and specifications of the work can be seen at the office of the Chief Engineer of Railways and Canals, Ottawa, on and after 5th May, 1898, where forms of tender can be obtained by the parties tendering.

In the case of firms there must be attached the actual signature of the full name, the nature of the occupation and place of residence of each member of the same, and further, an accepted bank cheque for the sum of $18,000 must accompany the tender; this accepted cheque must be endorsed over to the Minister of Railways and Canals, and will be forfeited if the party tendering declines entering into contract for the work at the rates and on the terms stated in the offer submitted.

The accepted cheque thus sent in will be returned to the respective parties whose tenders are not accepted.

This department does not, however, bind itself to accept the lowest or any tender.

By order,
L. K. JONES, Secretary.

Department of Railways and Canals,
Ottawa, 2nd May, 1898.

Newspapers inserting this advertisement without authority from the Department will not be paid for it.

Tenders for Coal

1898

The undersigned will receive tenders, to be addressed to them at their office, in the Parliament Buildings, Toronto, and marked "Tenders for Coal," up to noon on

WEDNESDAY, 25TH MAY, 1898

for the delivery of coal in the sheds of the institutions named below, on or before the 15th day of July next, except as regards the coal for the London and Hamilton Asylums and Central Prison, as noted:—

Asylum for Insane, Toronto

Hard coal, 1,050 tons large egg size, 200 tons stove size, 80 tons nut size; soft coal, 450 tons lump, 100 tons hard screenings, 150 tons soft screenings.

Asylum for Insane, London

Hard coal, 2,300 tons small egg size. 300 tons egg size (Scranton coal), 265 tons stove size, 70 tons chestnut size; soft coal, 40 tons for grates. Of the 2,300 tons, 1,700 may not be required till January, 1899; also 50 tons Scranton egg.

Asylum for Insane, Kingston

Hard coal, 1 300 tons large egg size, 225 tons small egg size, 20 tons chestnut size, 350 tons hard screenings, 350 tons soft screenings, 25 tons stove size (hard).

Asylum for Insane, Hamilton

Hard coal, 1,950 tons small egg size, 173 tons stove size, 113 tons chestnut size; Straitsville, for grates, 30 tons; for pump-house, 150 tons soft screenings, 75 tons hard screenings. Of the above quantity 1,563 tons may not be required until January, 1899.

Asylum for Insane, Mimico

Hard coal, 1,850 tons large egg size, 175 tons stove size, 10 tons channel coal, 75 tons soft screenings; 50 cords hardwood.

Asylum for Idiots, Orillia

Reynoldsville screenings, 1,000 tons, 75 tons stove size, 10 tons Briar Hill coal.

Asylum for Insane, Brockville

Hard coal, 1,700 tons large egg size, 125 tons stove size, 25 tons small egg.

Central Prison, Toronto

Hard coal, 25 tons nut size, 60 tons small egg size; soft coal, 1,800 tons Reynoldsville screenings. The soft coal to be delivered in lots of 160 tons monthly.

Institution for Deaf and Dumb, Belleville

Hard coal, 650 tons large egg size, 90 tons small egg size, 15 tons stove size, 22 tons No. 4 size; soft coal for grates, 4 tons.

Institution for Blind, Brantford

Hard coal, 400 tons egg size, 175 tons stove size, 20 tons chestnut size.

Mercer Reformatory, Toronto

Reynoldsville screenings, 600 tons; stove coal, 75 tons.

Tenderers are to name the mine or mines from which they propose to supply the coal, and to designate the quality of same, and if required will have to furnish satisfactory evidence that the coal delivered is true to name.

Delivery is to be effected satisfactory to the authorities of the respective institutions.

Tenders will be received for the whole quantity above specified or for the quantities required in each institution.

An accepted cheque for $500, payable to the order of the Hon. the Provincial Treasurer, must be furnished by each tenderer as a guarantee of his bona fides, and two sufficient sureties will be required for the due fulfilment of each contract.

Specifications and forms and conditions of tenders are to be obtained from the Bursars of the respective Institutions. The lowest or any tender not necessarily accepted.

Newspapers inserting this advertisement without authority from the Department will not be paid for it.

R. CHRISTIE,
T. F. CHAMBERLAIN,
JAMES NOXON,
Inspectors of Asylums, Prisons, and Public Charities, Parliament Buildings.

Toronto, May 9th, 1898.

Metals and Hardware.—Pig iron is not specially active at the moment, but we hear of a 100 ton sale of Hamilton No. 2 at $14.50, and several other good-sized orders are reported under consideration. Business is reported in domestic bars at $1.40 in round lots, and hoops and bands at $1.65. Scotch warrants are cabled stiffer than before reported, viz., 47s. 8d. We quote: Summerlee pig iron, $17.50 to $18; Carron, No. 1, $18; No. 3, $17.25; Ayrsome, No. 1, $17.50; No. 3, $16.50; Shotts, $17.25 to $17.50; Carnbroe, $16, ex-store; Ferrona, No. 1, $15; Hamilton No. 1, $15 to $15.50; No. 2, ditto, $14 to $14.50; machinery scrap, $14 to $15; common ditto, $12 to $13; bar iron, Canadian, $1.40 to $1.50; British, $2 to $2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.10 to $2.15; 52 sheets to box; 60 sheets, $2.25; 75 sheets, $2.35; all polished Canadas, $2.40; Terne roofing plate, 20x28, $5.75 to $5.90; Black sheet iron, No 28, $2.25; No 26, $2.15; No. 24, $2.05; No. 17, $2; No. 16 and heavier, $2.15; tin plates—Bradley charcoal, $5.60 to $5.70; charcoal, I.C., Alloway, $3.15 to $3.25; do., I.X., $3.90 to $4; P.D. Crown, I.C., $3.60 to $3.75; do., I.X. $4.50; Coke I.C., $2.90 to $2.95; do., standard, $2.75 to $2.80 for 100 lbs.; coke, wasters, $2.70; galvanized sheets, No. 28, ordinary brands, $4; No. 26, $3.75; No. 24, $3.50 in case lots; Morewood, $5 to $5.10; tinned sheets, coke, No. 24, 5½c.; No. 26, etc., the usual extra for large sizes. Canadian bands, per 100 lbs., $1.65 to $1.75; English hoops $2 to $2.15. Steel boiler plate, ¼-inch and upwards, $1.85 to $1.90 for Dalzell, and equal; do., three-sixteenths inch, $2.50; tank iron, ¼-inch, $1.50; three-sixteenths do., $2; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to $2.50; Russian sheet iron, 9c.; lead, per 100 lbs., $3.85 to $3.90; sheet, $4 to $4.25; shot, $6 to $6.50; best cast-steel, 8 to 10c.; toe calk, $2.25; spring, $2.50; sleigh shoe, $1.85; tire, $1.90; round machinery steel, $2.25; ingot tin, 16½c. for L. & F.; Straits, 16 to 16¼c.; bar tin 17c.; ingot copper, 13 to 13½c.; sheet zinc, $5 to $5.25; Silesian spelter, $4.75; Veille Montagne spelter, $4.75 to $5; American spelter, $4.50; antimony, 9½ to 10c.

Oils, Paints and Glass.—There have been large receipts of glass by Hamburg steamers, but the demand has been good, and, indeed in all lines the movement is being well sustained. With regard to prices there have been no changes within the week, but all the recent advances are firmly held. We quote: Turpentine, one to four barrels, 48c.; five to nine barrels, 47c.; net thirty days. Linseed oil, raw, one to four barrels, 49c.; five to nine barrels, 48c.; boiled, one to four barrels, 52c.; five to nine barrels, 51c., net 30 days; olive oil, machinery, 90c; Nfld. cod, 37 to 40c. per gal.; Gaspe oil, 33 to 35c. per gal.; steam refined seal, 45 to 47½c. per gallon in small lots. Castor oil, 9 to 9½c. as to quantity. Leads (chemically pure and first-class brands only), $5.62½; No. 1, $5.25; No. 2, $4.92½; No. 3, $4.50; No. 4, $4.12½; dry white lead 5c.; genuine red do., 4¼c. to 4½c; No. 1 red lead, 4c. to 4¼c.; Putty in bulk, bbls., $1.65; kegs, $1.80; bladder putty, in bbls., $1.80; smaller quantities, $1.95; 25 lb. tins, $2.05, 12½ lbs., tins, $2.30. London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to $1.75; yellow ochre $1.25 to $1.50; spruce ochre, $1.75 to $2. Paris Green, 50 and 100 lbs. drums 17c. 25 lb drums, 17½c.; 1 lb. cartoons, 18c.; pound tins, 18½c.; window glass, $1.40 per 50 feet for first break; $1.50 for second break; third break, $3.10.

Wool.—A rather better enquiry is reported from Canadian manufacturers, with a fair number of moderate sales at very steady prices. Cable advices on Monday, regarding the London wool sales, were to the effect that prices were showing increasing firmness, and that Americans were becoming more liberal buyers. We quote Cape, 14½ to 16½c.; Natal's, 16½ to 18c,; B,A, scoured, 27 to 35c. per lb,

BRITISH TIMBER MARKETS.

The wood circular of Messrs. Farnworth & Jardine, dated Liverpool, 2nd May, 1898, says: The arrivals from British North America during the past month have been 4,893 tons register, against 1,733 tons register during the corresponding month last year, and the aggregate tonnage to this date from all places during the years 1896, 1897, and 1898 has been 82,114, 75,213 and 73,450 tons respectively.

The import during the past month has been moderate, more activity has been shown owing to the rapid advance in ocean freights, partly on account of the war between the United States and Spain, and values of most articles, especially of pitch pine, have advanced. Stocks, which under ordinary conditions would be considered large, are now being more firmly held.

Canadian Woods.—Pine Timber. — Of waney and square the deliveries have been slightly in excess of the corresponding month of the previous two years; values, however, are unchanged, and the stocks of both are ample. Red pine has been neglected, and the stock, though moderate, is sufficient for the probable demand. Oak continues difficult of sale; there is no change in value, and the stock is too heavy. Elm has moved off fairly well, and the stock is now moderate. Pine Deals, Boards, etc.—The demand has slightly improved, but the stock is still heavy and values unsatisfactory.

New Brunswick and Nova Scotia Spruce and Pine Deals.—The import has been in excess of the corresponding month last year, a large steamer cargo having arrived during the past few days; the deliveries have been more satisfactory, and owing to the advance in freight and great difficulty in securing tonnage values have somewhat improved and the stock, although too heavy, is more firmly held. Pine deals are dull of sale.

Birch.—Of logs the import has been small and the stock is moderate; values have slightly improved. Of planks the import has been sufficient; however, there is more enquiry and prices are firm.

Pitch Pine.—The arrivals during the past month have been two vessels, 2,047 tons, against six vessels, 6,004 tons, during a like period last year. Of hewn the import consists of about 10,000 feet from Mobile; there has been a good consumption, and stocks are moderate. Of sawn the import consists of a cargo from Sapelo and a part cargo from Mobile, being less than half that of last year for the same month, owing chiefly to the recent sharp advance in freights there has been a corresponding advance in prices. Deals and boards are still too heavy in stock.

Oregon and British Columbia Pine.—There has been no import; the consumption has been fair, but the stock is very large; values are firmer.

Millers' & Manuf'rs Ins. Co

Established 1885.

HEAD OFFICE:
Queen City Chambers, Church St., Toronto.

DIRECTORS:
JAS. GOLDIE, Pres. J. L. SPINK, Vice-Pres.
Thos. Walmsley, Treas. Hugh Scott, Mgr. and Sec.
Adam Austin, Inspector.

This Company was organized in 1885, specially for the purpose of insuring manufacturing industries, warehouses and contents.

The primary object being to give protection against loss by fire at a minimum cost consistent with absolute security.

The system adopted has been to inspect all risk before acceptance and fix the rate to be exacted equitably in accordance with the hazard assumed.

Assurers with this company have made a saving, upwards of $108,000.00 on the current rates charged, in addition to which, on the rates exacted by us, dividends have been declared to policy-holders amounting to over $24,000.00, together, making the very substantial sum of over $132,000.00 that our policy-holders have saved during the eleven years we have been in operation.

As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please address

Millers' and Manufacturers' Insurance Co.,
32 Church Street, Toronto, Ont.

The DOMINION Life
ASSURANCE COMPANY
HEAD OFFICE, ... WATERLOO, ONT.

Authorised Capital $1,000,000
Gov't Deposit at Ottawa 50,000
Subscribed Capital 257,600

A MACHINERY SALESMAN'S "METHOD."

"Scrutator" tells the readers of the Iron Trade Review something of his shrewd methods of thinking and acting:

"I was in an Ohio town recently, trying to sell machinery (they do the sort of thing about to be described, as well as some others, very neatly in Ohio, anyhow); and one man took a great interest in my story and sent for samples of all his work, to see what could be done with them on my machinery. At least that was the inference; but the conversation was soon switched around to methods of doing the work, in a general way. My machine was mentioned often enough to make matters interesting, and the man kept me there over an hour, getting the benefit of what I happened to know about the detail of manufacturing his kind of goods.

He didn't say he wanted any of my machinery, and he didn't say he didn't, either. I suppose he was afraid that if he said he didn't want any, I would go out, and then he wouldn't find out anything more of what I knew about his work; but if he had known, he needn't have been in the least alarmed, as I meant to stay and answer questions as long as he wished.

In the first place I was so struck with the clever way in which he conducted the conversation, that I would have stayed and told him all I knew out of pure admiration for his diplomacy. I knew that he didn't want any of my machinery, and still I enjoyed giving him free information.

Now, why did I give so much of my time, or, more strictly speaking, the time of the concern by which I am employed, to this man, particularly when there were several other concerns that I wanted to call on that afternoon, and get out of town by evening?

I said above that I enjoyed it, which is true; but, being employed by a manufacturing company, I should not have felt justified in squandering any time simply for my own pleasure. But here is the point: A man who is sharp enough to get out of me for nothing what he would need to pay good wages to a man for otherwise, is also sharp enough to know a good thing when he sees it. My machinery is a good thing; and if I can give him some good ideas regarding his work in a general way, he is more apt to believe what I tell him about my machinery. He is also, to a certain extent, under obligations to me for the information given, and no one likes to be under obligations to another (the exceptions to this are not worth considering).

This man will "get even" with me somehow and some time, even if he does it unconsciously. Some time, when he wants some new machinery, he will say to himself (perhaps still unconsciously): "Now, there is 'Scrutator;' he seems to understand this business pretty well. I have never seen any of his machinery, it is true, but I will take my chances on it sooner than on some that is sold by that other fellow, who doesn't seem to know anything about manufacturing, anyhow, or if he does, he won't tell." Or, if some one should chance to ask him what he knows about "Scrutator's" machinery, wouldn't he be likely to say something like this:

"I never saw any of his machinery; but I have seen him, and he seems to know his business, and isn't afraid to tell what he knows. So I guess you will be safe in dealing with him."

This is not mere theory; I have had it work just like this before, and I am not sorry that I gave the man the time and the information.—Scrutator.

—"Sometimes," said Uncle Eben, "er young man dat hab a lot o' push makes de mistake ob applyin' it all ter de bicycle ob pleasure 'stid o' savin' some foh de wheel-barrow ob necessity."—Washington Star.

AN ATTEMPTED WRONG.

Some parties got a deserved rebuke from the bench at Hull, last Saturday, in a case where a man sued an insurance company.

Judgment was rendered in the Superior Court by Judge Gill, dismissing with costs, the action taken by George Johnston against the Imperial Insurance Co. The plaintiff claimed the sum of $1,800 as the amount of a policy upon his stock of boots and shoes, which was destroyed by fire at Maniwaki on the night of the eighth of December last. The company pleaded false representations on the part of the plaintiff as to the quantity and value of the goods insured, and also a fraudulent and exaggerated claim for the loss. The learned judge, in commenting upon the case, was particularly severe in his references to the plaintiff and his brother-in-law and associate, Mark Faulkner. These people, he said, made affidavits that Johnston had purchased stock to the value of $2,400; but when they came to be cross-examined their evidence was most unsatisfactory. Faulkner could not tell how much he had sold to Johnston, and Johnston pretended that the money to make these payments had been furnished to him by his wife from funds which she had had in her possession for an indefinite length of time, and he could not tell where it had been kept. Parties could not deceive the courts of justice with such a manifest fabrication.

Moreover, the evidence showed clearly that the plaintiff, at the time he effected the insurance, had not goods there to the value of $1,000. This was established in a rather peculiar manner, it was true, by the evidence of Mr. Logan, the company's adjuster; but his evidence was corroborated by that of other witnesses. In the absence of any other data, Mr. Logan had obtained the weight of the goods taken to Maniwaki from the shipping bills of the railway, and had shown what was the average value of such a weight of goods fresh from the warehouse. This estimate agreed very closely with that of parties at the store and elsewhere, who had seen and examined plaintiff's stock. The law was clear and the terms of the policy were equally explicit that fraudulent over-estimate of the goods insured, or of the extent of the loss, voided the policy and the action was accordingly dismissed.

RETAILING AT CUT PRICES.

A contrast between the results of the respective methods of credit sales and cash sales is given in a recent issue of an American journal, the Grocery World. It publishes an interview with a Philadelphia cut-rate grocer, who tells very frankly of his methods and experience. Prior to adopting the "new system" this grocer had been doing business on the old style, that is, giving credit, delivering goods, etc. He made a living, but was not satisfied with the results. Now he sells only for cash, at cut-rates and delivers nothing, and is making more money than he ever did in his life. In following up the new system he insists strongly upon the necessity of purchasing also strictly for cash, and taking advantage of all drives and special terms that may be offered. Cash discounts are in some cases as much as 4 per cent., and he finds it more advantageous to buy from jobbers than from manufacturers, as the former often sell goods for less than cost, while the manufacturers, as a rule, do not offer him special terms.

Although this grocer sells several leading articles at or under cost, yet he calculates his average profits to be 20 per cent., which pays well on the increased sales due to his getting a reputation for cheapness, and in consequence of the reduced expenses he is under from not giving credit or delivery. He will advertise, for instance, a whole line of staple goods at a cent a piece, that cost that price or more; first-class creamery butter he sells at 25 cents per pound all the year round and calculates to lose by it; on soap he never makes anything; but it does not worry him to see people buying a lot of these goods and nothing else, as he feels confident he will get it back from them some time soon. He finds that people who bought goods at the "special drive" prices come back and buy just as much of them afterwards at the regular prices, when the cause of the difference is explained to them.

The cutting business he conceives to consist largely in taking advantage of the public ignorance. People want to buy some things at cost, but are willing to pay 100 per cent. profit or more on others, Thus this man keeps one grade of rice, but sells it at two prices, 6 cents, and 9 cents to those that want "the very best." The same with prunes. He keeps but one grade that cost him 4¼ cents, which he charges 5 cents and 8 cents a pound for, as the case may be. Vinegar that cost him 5 cents and 8 cents a gallon he sells uniformly for 20 cents. Teas, coffees and spices, even when sold at cut rates, he makes to yield splendid profits; and so on with other articles on both sides of the game. An important point in this style of trading is to be quite independent with everybody; and he believes that profits are, on the whole, better than under the old style of doing business.

HOW ACCIDENTS MEET US.

Accidents meet us on every hand. Not only do we encounter daily the new perils of an ever advancing civilization, but even the most trivial domestic incident is apt to be attended with danger. Does a man tug at his shoes with extra vigor in an attempt to catch the 7.45 train, he slips and fractures a limb; does an unaccountable noise in the basement or a not-to-be-disregarded cry from the baby's cot necessitate the finding of a match, then, as everybody knows, the furniture has a horrible way of being where it ought not to be and the match of being nowhere at all. Under such circumstances the accident varies from broken shins to a broken neck. A short time since a man lost an eye by the explosion of a bottle of nothing stronger than Apollinaris, and another died through stumbling over a puppy. There are also the perils of the gasoline stove and the folding bed. Even shoveling coal is not unattended with danger, and chopping kindling is to be avoided as risky. Picture hanging is distinctly hazardous. Nevertheless the philosopher will continue to pursue the even tenor of his way undismayed by any of these things, for he is protected by accident insurance with reputable companies.—Investigator.

COST OF CABLEGRAMS.

Sixteen thousand dollars is said to be the record price paid for a cablegram, that price having been paid for a message sent by Mr. Henniker Heaton to Australia, in behalf of the British Parliament. Reuter's account of the murderer Deeming's trial, 4,000 words, cost $8,000. A 1,800-word despatch from London to Argentina cost $7,500. The most expensive private message so far, is that sent by the King of Italy to the Duke of Abruzzi at Rio Janerio, informing him of the death of his father, the late Duke of Aosta, which cost $2,670. The New York Times' cable despatch of the proposed Spanish treaty, some years ago, cost $7,000. One day last week the Chicago Record paid $1,760 for about three columns of cable news about the Spanish-American war.

—Mrs. Bargain-Friend—I wonder how those little one-cent shops ever came to be invented?

Her Husband—I suppose to use up what's left of the dollar after the 99-cent stores get through with it.—Toronto News.

For further information or for copy of the company's last annual report (illustrated) apply to the head office, or to any of the company's agents.

WM. McCABE,
Managing Director.

L. GOLDMAN, Secretary.

British Empire Mutual Life Office

The Fifty-first Annual Report has just been issued. During 1897 the premium income reached $1,354,061, and the interest income $495,086.

The total business in force was $43,486,000 under 25,688 policies.

The cash bonus distributed last year amounted to $135,709; and besides this handsome sum there was a bonus reduction of premiums.

The next division of profits in this strong mutual company will take place in 1900.

DECISIONS IN COMMERCIAL LAW.

Nichol v. Goches.—The plaintiff was employed as the servant of the defendant, a married woman, and his claim was for wages, for money lent to and paid for her at her request for money collected by her for him, and for the price of animals sold to her. The point of interest in the case is the defence of coverture, the defendant claiming, as against the plaintiff's allegation, that she did not carry on the business separately from her husband, and therefore was not liable. It was shown that the negotiations for the employment of the plaintiff were conducted by the husband, although in the presence of the defendant. The husband gave the defendant the benefit of his advice and assistance, and also acted as bookkeeper for her in a banking business carried on in her name at the same time, but it did not appear that he had any fixed salary, nor did it appear what was the arrangement, if any, between him and defendant. It was held that such participation by the husband would not in the case of an outsider contracting with the wife absolutely prevent the finding that the business was conducted solely by the wife. In the event of the wife attempting to hold the property, as against her husband's creditors, a different decision would have been given. Each particular case must depend upon its circumstances to decide what degree of participation in business by the husband prevents the finding of a separate business.

Perry v. London, Liverpool and Globe Insurance Co.—The defendant company resisted payment on the grounds that plaintiff in the application on which the policy was issued represented that there was no other insurance and no encumbrance on the property, whereas in fact there was other insurance and also a mortgage thereon. The plaintiff claimed, and the jury found, that the answer to the questions contained in the application as to there being no mortgage on the property, was written by the agent of the defendant company without the latter asking plaintiff the question, and the plaintiff signed the application without knowing that it contained the question and answer referred to. As to other insurance the jury found that the plaintiff at the time of the application bona fide believed that there was no other insurance on the property. Also that the facts of the mortgage and other insurance on the property were not facts material to the risks. On these findings, that trial judge directed a verdict for the plaintiff. It was held, on motion for a reversal of the verdict that the misrepresentation complained of, and contained in the application signed by the plaintiff, discharged the company of liability regardless of the findings of the jury, and that the defendant was entitled to the verdict.

A tailor at Huntingdon, Que., named John Findlay, writes his Montreal creditors that he finds himself unable to pay in full, and makes an offer of 25 per cent. on liabilities of about $2,000. He has been in business about three years under light expense, but a lack of proper attention to his business has been evident.

The Montreal lumber firm of N. & A. C. Gray, dealing principally in hard woods, has become involved, through accommodation paper given to A. D. Taylor, a leading lawyer, who recently left the city owing to stress of financial trouble. They are said to be involved to the extent of $7,000 or $8,000. They are putting a statement of their affairs before creditors, and will likely offer 30 cents in the dollar.

Fashion and Comfort

With so many events, social and otherwise, during June month, the question of correct dress demands more than ordinary attention. This may particularly be said of gentlemen's garments—to those at the point of deciding it is just in place to mention that the frock coat is and may always expect to be popular. This season's plates are putting forward the three-button morning shape, which make up very handsomely in nice soft Vicunas.

To complete the suit one will wear a double breasted vest of same goods, or of fancy linen, and for trousers neat worsted pattern of just sufficiently lighter shade than the coating to make a pleasing contrast. HENRY A. TAYLOR, the Rossin Block, is showing a great range of fine woolens for such suits, and has also a splendid assortment of the fancy linen vestings, and there's that individuality about his designs that at once stamps them as gentlemen's garments.

R. CUNNINGHAM Guelph—Fire Insurance and Real Estate. Properties valued. Counties of Wellington, Halton, Dufferin, Grey, Bruce, and Huron covered monthly. Telephone 195.

Lands valued and sold; Notices served; Fire, Life and Plate Glass Insurance; several factory and mill sites in good locations to dispose of; Loans effected. Best of references.

FREEHOLD LOAN & SAVINGS CO.

DIVIDEND NO. 77.

Notice is hereby given that a dividend at the rate of 6 per cent. per annum on the capital stock of the company has been declared for the current half-year, payable on and after the First Day of June next at the office of the company, corner of Victoria and Adelaide streets, Toronto.

The Transfer Books will be closed from the 17th to the 31st May, both days inclusive.

Notice is hereby given that the General Annual Meeting of the Shareholders of the company will be held at 2 p.m., Tuesday, June the 7th, 1898, at the office of the company, for the purpose of receiving the annual report, the election of directors, etc., and that at such meeting there will be submitted for the approval of the shareholders by-laws changing the date of the annual meeting of the shareholders of the company from the first Tuesday of June to such day in the month of February in each year as the directors may appoint, and to provide that the fiscal year of the company shall terminate on the 31st December in each year as required by the loan corporations' act of the Province of Ontario Revised Statutes of Ontario, 1897, chapter 205.

By order of the board.

S. C. WOOD, Managing Director.

Toronto, 27th April, 1898.

Mercantile Summary.

MESSRS. SHIPE & AVERY, of Toronto, were in Sarnia last week looking at sites for a factory of bicyle rims, which they propose to establish.

THE county of Grey is furnishing maple wood, which is specially cut for export to England for the manufacture of mangle rollers. Another line of hardwood, which is specially cut in the same locality, south from Owen Sound, is rock elm. It is used for making hames for saddlers' use. A car load was shipped to the United States last week.

A HALIFAX exchange understands that Mr. C. Ochiltree Macdonald, of Port Morien, C.B., who has been in England, is instructed by the Newcastle Coal syndicate, which he represents, to call for tenders for sinking shafts and putting up mining works on the mining property which the syndicate has acquired at Port Morien.

THE vice-president of the Canadian Pacific Railway told the railway committee of the House last month, that his road would extend from Rossland to the rich boundary district this year. We are now told that tenders for the construction of the Columbia and Western Railway from Robson to Midway, a distance of 100 miles, will be opened on the 15th June. The C.P.R. smelter is at Trail.

CANADIAN creditors who have to submit, once in a while, to the oppression of a dividend of nothing in the dollar, may learn that merchants in the model communities of New England, even, are subject to the same indignity. It is related that in Boston a newspaper failed and the estate went into the hands of a receiver. The liabilities were $84,000. The receiver collected $7,000 and—out of the assets, the nature of which is not explained—last week filed his report, which shows $3,000 paid to himself, $1,000 to his clerks, and $1,600 to his lawyers. Other disbursements so far eat up the $1,400 balance that only $1.05 remains for distribution among the creditors.

PETER COOPER, of New York, was in his lifetime a man of excellent sense and long business experience. He said, with respect to newspapers: "In all the towns where a newspaper is published every man should advertise in one, if nothing more than a card stating his name and the business he is in. It does not only pay the advertiser, but it lets people at a distance know the town in which you reside is a prosperous community of business men. The most costly circular a business man sends out dies in less than a day; but the enterprising newspaper, containing the news as well as the business announcements of manufacturer and merchant, is a daily or weekly reminder that ought not to be neglected."

HEAVY as the expense is, the authorities of the Winnipeg Exhibition of 1898 are likely, we are told, to secure Dan Godfrey's celebrated Coldstreams band to play for them. This is said to be one of the causes of Manager Heubach's present trip to the east. There is something that excites admiration in the way our western brothers throw themselves into things. This Winnipeg Fair has grown to be an important annual event, which draws spectators from points as far apart as Calgary, Prince Albert and Port Arthur. And it does not disappoint them either. This year we are assured that "American Day" will bring thousands, where last year it brought hundreds, into Winnipeg from the States of Dakota, Minnesota and Wisconsin, to see "Canaday"—and to learn from her.

Mercantile Summary.

MR. KIRKWOOD, of Sudbury, proposes to put a steamer on the route from Sault Ste. Marie to Quebec, calling at all lake and river ports for freight. She will carry downward lumber, shingles, etc.

A WRITER in San Francisco, in a letter to the Montreal Gazette, says that in the States a Labor Union regulation allows only one apprentice to every sixteen men. "This debars our young men from learning a trade. Hence, they hang on the ragged edge of politics, and the consequent misery and degradation which follows. When one of our large shipbuilders wants skilled labor to erect a new battleship, the American boy is hanging around a corner grocery store, talking politics, while the boy from Glasgow, Belfast, Bradford or Montreal comes here with a master-mechanic's certificate, and is immediately employed at a man's wages. The American boy goes from bad to worse, because of that hydra-headed autocrat, 'Labor Federation.'"

IN the matter of the Portland, N.B., Rolling Mills, more than half the unsecured debts being represented before him, Judge Tuck last week acceded to the general view of those present that the company might recover from its difficulties, as there was much stock on hand, which, when worked up, would yield a profit. But some advances must be made for running expenses, as the difficulty had been caused by the want of working capital. It was thought that the works should be continued for a while. So the court appointed George F. Baird provisional liquidator, with power to carry on the business in the usual way. He fixed the security at $10,000 for Mr. Baird personally and two sureties of $5,000 each. On 20th June, creditors will meet to appoint a permanent one.

THE embarrassment of Letang, Letang & Co., wholesale hardware merchants, Montreal, noted in last issue, is largely due to real estate speculations. They have bought property of late years to the extent of over $100,000 for speculative purposes, which they have not been able to turn over as expected, but have had to carry under a considerable load of expense for interest, etc. They recently gave their bankers a mortgage for some $65,000, which alarmed some of their larger creditors, with the result that the firm was induced to place their affairs in the hands of trustees, who shall carry on the business for the general benefit of creditors, until all are paid off, when the estate will be re-transferred to the firm. The merchandise liabilities are believed not to exceed $30,000, and the assets, it is claimed, show a surplus of over $100,000.

We make a clasp Envelope in different sizes, suitable for mailing samples.

Mercantile Summary.

ARTHUR LANGLOIS was a storeman in a Quebec flour warehouse, but having an ambition to become a merchant on his own account he went to St. Alban, Que., just about a year ago, and opened a general store on a small capital, which has already been all sunk, and he has made a voluntary assignment. He owes $1,800, and shows assets of about a round $1,000. He says business is not as simple as it looked.

IN Eastern Ontario there are the following failures to be noted: Miss A. L. Earl, milliner, at Brockville, Ont., has assigned, owing between $1,500 and $2,000.——Lindsay & Jones, of the same town, a young firm dealing in paints, etc., have also assigned.——An assignment has been made by W. N. Rogers, who has done quite an extensive business at Gananoque in carriages, pianos, etc., for some years. He has been in uncertain shape for several years past, being quite frequently sued. He failed some ten or twelve years ago, when his estate panned out poorly.——H. R. Lloyd, grocer, at Pembroke, is reported as having made a settlement with creditors, at 33 cents in the dollar, the money being advanced by family connections, who have taken a bill of sale on the stock.

WE hear from Quebec of two cases which seem clearly to indicate overtrading. One the embarrassment of Joseph Poirier, manufacturer of boots and shoes, as a result of the failure of W. J. Guinane, Toronto, and P. is reported to be offering his creditors 25 cents in the dollar. His merchandise liabilities are figured at about $15,000, and La Banque Nationale is interested as an indirect creditor for some $18,000. Mr. P. was in trouble before, about 1890, when, it is said, his estate turned out poorly.——Another boot and shoe failure in the same city is that of the Commonwealth Shoe Co., a year or more in the jobbing trade, the business having been started in the spring of 1897 by Messrs. James Adair and E. A. Ramsay, as an ordinary partnership. The concern has made recent considerable losses by the failures of F. Cloutier, Winnipeg, and W. J. Guinane, Toronto, and have suspended payment. Direct liabilities are stated at $16,000. Mr. Adair was of the firm of Adair Bros., Toronto, some years ago.

THIS week the failures in the Province of Ontario are the smallest in number and amount for many years, and there are none in the Western provinces. Dauncey & Brown have been in business about five years as grain dealers at Exeter, and now make an assignment. They always have been cramped for money.——In 1889 Stanley Nix opened a tailoring shop in Tiverton. About three years later he disposed of his stock and moved to Preston, where he opened business in the name of his wife, her mother advancing the money for him to do so. She now finds that they cannot meet their bills and proposes a compromise.——Louis Kieffer, general storekeeper, Elmira, has assigned. He commenced business at Winterbourne, and in May, 1884, moved to West Montrose, where he continued until 1891, when he came to his present location. At that time he was supposed to be worth $4,000 or $5,000. He bought a large stock of goods and generally extended his business, but for several years he has gradually lost ground, and the result is as above stated.——S. Forget, grocer, Sudbury, has assigned.——Another assignment is that of Robt. Walker, jeweler at Comber.——H. A. Richardson, coal dealer, of London, is reported in difficulty and will probably assign.——Gerrie Bros., bakers, Toronto, in business seven years, have failed. The estate is not a large one.

Mercantile Summary.

So far, this year, there has been a falling off in the imports of Spanish iron ore into France, the total for the first three months having only amounted to 93,523 tons, as against 138,920 tons in the same period of last year.

There has been a firm tone in the Dutch tin market during the past week. The Iron and Steel Trades Journal says that on May 12 business has been done in Banca tin at 39½ fl. for prompt, and in Billiton at 39⅜ fl. for prompt and 39¼ fl. for forward.

The Coleraine Mining Company is reorganized, and the Gazette says the new directorate have employed Mr. A. Davis as their consulting engineer to put in a complete new plant for mining at Black Lake, Megantic, Que. The company have orders for their entire output for three years.

Respecting A. L. Dombrowski, hardware dealer, Quebec, whom we mentioned last week, his creditors met on Monday last before Judge Routhier. After hearing counsel the Judge named Messrs. Lefaivre and Taschereau joint curators, and Messrs. C. McCuaig, C. A. Parent, J. Trotter, C. S. Powell and P. B. Dumoulin, inspectors.

Word came yesterday from Bracebridge, too late for us to obtain full particulars, that the private bank of Alfred Hunt in that town is closed. It is the case, we understand, that Mr. Hunt is financially embarrassed, having a large amount of assets, but in locked-up shape, so that while able to show a considerable surplus, he cannot command ready money enough to carry on his business. He has expressed an intention to assign.

Shipbuilding continues active in Old Country yards. In April seven vessels of 28,870 tons were launched from shipyards on the Wear, against six vessels of 14,800 tons during April of last year, an increase this month of 14,000 tons. During the first four months of last year 17 vessels of 48,945 tons were launched, while during the same period this year 24 vessels of 77,210 tons have been put off the stocks. During April Scotch shipbuilders launched 33 vessels of 46,206 tons, 26 steamers of 44,446 tons, and 7 sailing vessels of 1,760 tons, as compared with 40 vessels of 38,968 tons in March, and 28 vessels of 26,923 tons in the corresponding month of last year. To the total the Clyde contributed 42,599 tons, the Forth 2,597 tons, the Tay 620 tons, and the Dee 390 tons. The new contracts announced during the month represent about 15,000 tons.

The annual report of Chief Swenie, of the Chicago fire department for 1897, has been published. There were 5,326 fires, an increase of 912 over the previous year. The average loss per fire was $425. There were fourteen fires in which the loss exceeded $30,000 each, and 802 fires were caused by the use of gasoline and kerosene. The latter fires caused the injury of sixty persons, fourteen of the injuries being fatal. The department apparatus now consists of four fireboats, two water towers, eighty-seven steam, four hand and twenty-five chemical engines. There are forty-five hose wagons, thirty-two hook and ladder trucks, nine chemical extinguishers and ninety-four portable pumps, and the department has 204,953 feet of hose. The roster of the department numbers 1,143 men, and the property of the department is valued at $2,536,990. There are now 17,833 fire hydrants in use. The total loss by fire was $2,272,900 as compared with $1,979,300 in 1896.

An assignment has been made by W. J. C. Allan, of Kingston, Ont., engaged in the manufacture of door knobs, under the style of McDonald & Allan. The figures of assets and liabilities are not yet ascertained.

More than 30,000,000 pounds, or about $1,000,000 worth, of gambier is imported by the United States each year. This valuable tanning agent grows in the West Indies and on the Malay peninsula. If that country is to own the Philippine Islands, American enterprise should be directed to increasing the production of gambier.

The crop prospects in Canada are unusually good. In Ontario generally the fall wheat is looking well. While the spring opened very early, the weather of May has been cool. In the Eastern Townships there is promise of an exceptionally heavy hay crop. Fruits promise well everywhere, so far as we can gather. In Manitoba, as has been already noted, the farmers are in great spirits.

The annual meeting of the Canadian Colored Cotton Mills Company was held on Wednesday last, in Montreal. Officers were elected for the ensuing year, and the affairs and business prospects of the company discussed. The outlook was regarded as satisfactory. Mr. D. Morrice was elected to fill the office of president, in succession to Mr. A. F. Gault, Mr. C. D. Owen was re-elected vice-president. The other directors are D. Morrice, jr., T. King and W. J. Morrice.

A letter from a Trinidad house was received this week by the Secretary of the Montreal Board of Trade. It refers to recent shipments from Canada, and says that the war has led West Indian merchants and importers to look to Canada for their supply of foodstuffs. "We believe that Canada can and will supply all our foodstuffs," say Messrs. Rust, Trowbridge & Co. The prices received for Canadian flour so far exported to the West Indies has been all that could be expected, leaving quite a handsome margin of profit to the exporters.

TOWN OF
FORT WILLIAM DEBENTURES
FOR SALE

Sealed Tenders will be received by the Council of the Town of Fort William, addressed to the undersigned, and marked "Tender for Debentures," up to 6 o'clock p.m., Tuesday, May 31st, 1898, for the purchase of

$75,000

of **Waterworks Debentures.** The said debentures are payable in thirty years, and bear interest at the rate of 5%, payable half-yearly.

The highest or any tender not necessarily accepted.

Why is the GENDRON the Best Wheel on Earth?

BECAUSE

It has good common-sense up-to-date talking points.
It has new, distinct and attractive features.
It is unexcelled in beauty, style and finish.
It has the best in material and workmanship.
It is the most perfect in its lines and bearings.
It is the easiest and smoothest running wheel in the world.

Gendron Bicycle

It has no discarded experiments.
It does not cause ridicule by having about it abandoned devices.
For utility, speed, safety and comfort the Gendron Bicycle is pre-eminent.
The capacity, long experience and methods of the manufacturers insure a product of the highest standard.
It is fitted with the fast, lively and durable Buckeye Tire that can be easily repaired if punctured and is fully guaranteed.
Secure the delightful feeling of confidence and safety by using the celebrated Waters Brake.

The GENDRON MFG. CO., Limited
TORONTO

THE strides being made in electric development in the United States are very remarkable We hear that the largest power transmission contract yet negotiated in Mexico has just been awarded to the Westinghouse Electric Company. The San Ildefonso and Flanepantla rivers in that country are to be harnessed, and electric current delivered for general lighting and power purposes in the City of Mexico by twenty 300 horse-power Westinghouse poliphase generators. These works have under way contracts aggregating over 75,000 horse-power of poliphase generators alone.

$5,000 Debentures

TENDERS

are invited for the purchase of $5,000 5 per cent. debentures of the

School District of Minnedosa, Man.

Full particulars on application. Tenders to reach my office not later than Thursday, the 16th June next.

Highest or any tender not necessarily accepted.

ERNEST W. PEARSON,
Secretary-Treasurer.

Minnedosa, Man., May 20, '98.

CORPORATION OF THE
Town of Midland.

Sealed tenders will be received at the office of the undersigned until 6 o'clock p.m. on Monday, the Thirtieth (30) Day of May next for the purchase of Debentures of the said town, endorsed by the County Council of Simcoe, to the amount of twenty-five thousand dollars ($25,000), said debentures redeemable in thirty (30) years from the 20th day of December, 1897, and bearing interest at the rate of five per cent. (5%) per annum, payable annually.

S. A. MILLIGAN,
Mayor.

Midland, May 12, 1898.

TENDERS FOR
ST. JOHN CITY DEBENTURES.

Sealed Tenders, marked "Tenders for Debentures," will be received at the office of the Chamberlain of the City of Saint John, up to 13th June, 1898, for the purchase of Saint John City Debentures for the whole or any part of the sum of

One Hundred and Forty-Seven Thousand (147,000) Dollars

to be issued in sums of $1,000 each, under the provisions of Act of Asesmbly, 52 Vic., Cap. 27, Sec. 29, payable in 40 years, with interest at the rate of Four per cent. per annum, payable half-yearly.

The said debentures are issued by orders from Common Council of the City of Saint John under authority of Act of Assembly, which provides for creating necessary Sinking Fund for redemption at maturity.

The proceeds of said Debentures are to meet expenditures for Public Services such as the extension of water and sewerage service in several places and districts as adopted by Common Council under date of 2nd September, 1897, in the sum of $12,000. Also the extension of water supply service on western side of the harbor and the laying of a new main from Spruce Lake to that part of the city, on the said western side of the harbor, in the sum of $135,000.

First Interest Coupons payable 1st November, 1898.

If desirable these Debentures may be issued in sums of $500 each.

Not bound to accept the highest or any tender.

FRED SANDALL, Chamberlain,
City of St. John, N.B.

Chamberlain's Office, 13th May, 1898.

THE bankrupt general stock of S. A. Adams, of Belle River, was sold in London, at auction, to Learoyd Bros., of Windsor, for 75 cents on the dollar; and the dry goods stock of Peck & Belleperch, of Chatham, valued at $12,422, was also sold. John Northway & Son, of Toronto, were the purchasers, and the price paid was 50 cents on the dollar.

THE Textile Record learns that a new double-bed Gessner press has recently been put into the mill of the Montreal Weaving Company, at Mile End, and that one of these machines is being made for A. W. Brodie, Hespeler, Ont. The Forbes Manufacturing Company, of Hespeler, and the Waterloo Woolen Company, of Waterloo, Ont., have already got them, it seems.

IT was the giving of accommodation paper, according to the Chronicle, that brought about the assignment last week of W. A. Tozer, butcher, etc., of Quebec. These notes amount to $30,000, whereas his own business liabilities are under $15,000. His assets are: Vehicles and horses, $2,590; book debts, $4,607; real estate on Lorette Road and at Rittle River, perhaps $18,000, mortgaged for $10,300.

ABOUT the St. Hyacinthe hospital fire, to which we referred last week, the Montreal Gazette has this to say: "The unfortunate affair at St. Hyacinthe, like that which caused so sad a sensation when the Roberval Convent was burned, carries a lesson for the managers of all institutions where considerable numbers of persons live and sleep. This province [Quebec] has an unusual number of these, many of them unprovided with means of suppressing a fire, and almost all of them, outside of the cities especially, without means of escape, in case of imminent danger, save the ordinary staircase and the windows."

IN an editorial on the state of business in the States, the Chicago S. & L. Review says: "In our own trade there are signs of animation. The United States Leather Company sold 75,000 sides of union sole leather this week at 29c. for No. 1, and the packers have withdrawn their leather from the market. There is a feeling that all kinds of leather and leather goods are good property, that they cannot be replaced at anything like present prices, and that in all human probability the quotations will advance considerably in the near future. The packers have obtained 12½c. for May native steers, and light native cows and heavy Texas steers rule at 12c."

—Adversity is sometimes hard upon a man; but for one man who can stand prosperity there are a hundred who will stand adversity.—Carlyle.

—The peach orchards in Gosfield, Essex, are now in full bloom and the country looks like a monster flower garden. As far as one can see in every direction, there is nothing but peach blossoms. A Kingsville correspondent of the Windsor Record says that the canning factory will open this fall once more and the managers purpose canning up carloads of peaches.

Debentures.

Municipal Debentures **bought and sold,** also Government and Railway Bonds. Securities suitable for Investment by Trustees and Insurance Companies and for Deposit with the Government, always on hand.

NOTICE TO CONTRACTORS

Hydraulic Lift Lock at Peterborough

Sealed Tenders addressed to the undersigned, and endorsed "Tenders for Hydraulic Lift Lock," at Peterborough, will be received at this office up to noon on Tuesday, May 31st, 1898, for the construction of this Hydraulic Lift Lock.

Plans and specifications of the work can be seen at the office of the Chief Engineer of Railways and Canals, Ottawa, on and after 5th May, 1898, where forms of tender can be obtained by the parties tendering.

In the case of firms there must be attached the actual signature of the full name, the nature of the occupation and place of residence of each member of the same, and further, an accepted bank cheque for the sum of $18,000 must accompany the tender; this accepted cheque must be endorsed over to the Minister of Railways and Canals, and will be forfeited if the party tendering declines entering into contract for the work at the rates and on the terms stated in the offer submitted.

The accepted cheque thus sent in will be returned to the respective parties whose tenders are not accepted.

This department does not, however, bind itself to accept the lowest or any tender.

By order,
L. K. JONES, Secretary.

Department of Railways and Canals,
Ottawa, 2nd May, 1898.

THE SITUATION.

On Monday night Sir Louis Davies, a member of the Canadian Government, arrived in Washington to confer with the State Department and two gentlemen appointed for the purpose, to make preliminary arrangements looking to the settling of the differences between Canada and the United States. The object is stated to be to lead the way to the appointment of a joint commission. Fur seals, bonding privileges, the North American fisheries, and the right of way in Alaska, are mentioned as among the questions to be dealt with. That this last question is among those requiring settlement goes to show that any arrangement which may have been made regarding it, as recently announced, must have been provisional only and requires confirmation to make it permanent. The two men to whom the preliminary work has been assigned, outside the officials of the State Department at Washington, are Mr. Foster, former Secretary of State, and Mr. John A. Kasson, the latter being a later appointment, and apparently intended to represent the latest phase of American opinion. Whether the general question of reciprocity will be included in the subjects that may come under review, appears at present to be uncertain. The more pronounced protectionists in Congress fight shy of the question of reciprocity with Canada, being dubious of the policy of dealing with it by a Commission. At an earlier stage of the present session of Congress, a bill making provision for some machinery for settling outstanding questions with Canada underwent considerable discussion, in both Houses, with the final result that a provision arranging for a joint commission for this purpose was struck out. But things have so changed since then, short as the time is, that we seem to have lived a whole generation; opinions held in the early part of the session will not necessarily present themselves as obstacles now. In this lies the whole point of the negotiations and what they may result in.

With the settlement of reasonable terms for trans-shipment of Canadian goods at Fort Wrangel, the crossing of the American frontier at this point assimilates it to the crossings with which we are familiar in many other places, east and west. One result is greatly to change the aspect of the question of communication between other parts of Canada and the Klondyke region, and to make of less importance an all-Canadian route, though this would still, in a less degree, be desirable. The section of the road bonused by the British Columbia Government, which is to connect with the ocean, loses much of its national character, though its value for local purposes remains undiminished. Of two roads by which the Klondyke may be reached, passing in the way over the American frontal strip, the better is the one accessible by water at all seasons, and which is besides the shorter. These considerations must go far to put the Stikine-Lake Teslin route out of the race.

In view of the concessions reported to have been made by the American Government, in the way of facilities for Canadians crossing the frontier on the road to the Klondyke, it results that the bonus to the all-Canadian route was granted by the Legislature of British Columbia under a misapprehension. Members of the Government, when the question was under debate, laid emphasis on the assumed fact that reasonable facilities for trans-shipment at the frontier would be denied. When these statements were made it is only fair to conclude they must have been believed; but the fact that they were made under a misapprehension destroys the value of the argument built on the foundation which has already crumbled away. The Pacific section of the road bonused must still retain its value for local purposes. The bargain with the contractors did not appear to be dependent upon supplementary aid being granted to the undertaking by the Dominion; no word to create the belief that such aid was expected was let drop by the local Government. The bargain made was not only a good one, as such things go, but in some respects a model for other governments and municipalities to build upon, if bonuses are to be granted at all. Bonuses will probably come to an end in time, but meanwhile the people who supply any part of the capital ought to get whatever chance there may be of obtaining some direct return upon it.

The statement made by Sir Wilfrid Laurier, in Parliament, that no more important measures will be brought in this session, is taken to indicate, beyond an early prorogation, that there will be no new Yukon railway bill. What, if any, money, have the contractors spent on the wagon road, and what is to be done about reimbursing the unauthorized expenditure? It would perhaps be reasonable to repay actual expenditure, if any had been usefully made, and if the true amount could be ascertained; but this information would be difficult to get in a shape that would guarantee its accuracy. Of course Parliament is not bound to pay a sum for the expenditure of which there was no legal authorization; but even the Senate would probably not be likely to throw out a supply bill on account of one item, as an Australian Legislative Council once stretched its authority to do. A denial has been made by persons on the spot that any portion of the wagon road had been made. If there was nothing but preparation to build a railway, the difficulty of granting indemnity would be almost if not entirely insuperable. The case may, it is said, be tried in the Exchequer Court. Hamilton Smith's Yukon railway bill has passed the Senate but it has no chance in the House, the Government having declared its intention to oppose all bills authorizing railways to cross the frontier. Meanwhile the British Yukon Company is solving the railroad question by actual construction, by way of Lake Bennett, with the prospect of having fifty miles completed by the 1st September. Since the question of trans-shipment in bond at the frontier has been arranged, and we are likely to get railway communication with the Yukon without the cost of an acre of land or a dollar of money; the public will be well content that the burthen of Stikine-Lake Teslin route contract was not imposed by the consent of Parliament. The United States has applied for permission to carry Alaska mail over Canadian territory, through the agency of the British Yukon Company, said to be composed wholly of British subjects.

Lord Herschell has brought a bill into the Imperial Parliament by which the author of an original literary or artistic work, published in any part of Her Majesty's dominions, or simultaneously therein and elsewhere, will be entitled to copyright throughout the Empire. This is no doubt in exchange for the privilege practically enjoyed by British authors in the United States. Some Canadian printers, who wish to obtain the right to reproduce British and other publications on terms prescribed by themselves and without the right of consent on the part of the authors, will of course object, and they and the politicans they may be able to influence are practically the only people who will object. The Canadian people, as a whole, have no sympathy with anything that at all savors of literary piracy. It does not follow that this bill, if it becomes law, will be made to apply to Canada, if constitutional objection should be made, since power is given to Her Majesty in Council to bring it into harmony with colonial legislation.

A TENDENCY IN MANUFACTURES.

The appeal of the Dominion Cotton Mills Company, to the municipality of Kingston, where one of their mills is situated, for a bonus of $50,000, as a condition of their replacing by new machinery a plant that has been eighteen years in use and has become unprofitable to run, and to increase the force of hands employed from two hundred to three hundred and fifty, comes as a surprise to the Kingston public. The alternative is to pull up stakes and go to the Province of Quebec, where valuable water power is available on reasonable terms. A somewhat similar proposal was made by the company to the town of Brantford, where they own another mill which they do not operate. If bonuses are not granted the company threatens to sell "most of the mills for what they will bring and concentrate the business at one point." It is not alleged, but rather denied, that Quebec offers any superior advantage on the point of cheap labor. Mr. Whitehead, the manager, holding the opinion, now common, that so-called cheap labor is really dear labor; and it is certain that the dear races have more than held their own, in the industrial sphere, the world over.

In the action of the Canada Cotton Mills Co. is seen the tendency of manufactures to concentration. The desire to avail themselves of the forces of nature as a source of power is the propelling motive. In England, where coal was cheap, concentration depended on the proximity of coal measures, the use of water power there having served only in the infancy of manufactures. In Canada, this natural force has greater volume and a wider range of utility. Where, as in the Kingston case, the alternative of concentration elsewhere, is a bonus, it would surely be better to follow the natural law than to bolster up a business by artificial means, which do not, like water power, go on for ever. The violent wrench in the social economy of the workers implied in a wholesale removal must ever be matter of deep regret; but it ought to be better even for them in the long run, that the best conditions of production should be availed of. In Ontario and Quebec, water power in one form or another, is the only available substitute for steam coal, though it is but a partial one. In the infancy of manufactures, diffusion occurs; with their maturity, and as a sign of it, comes concentration. So far as this change depends on the forces of nature, it is vain to resist it. If concentration implied a lowering of the standard of comfort of the workers, through a lowering of wages, the movement now presented by the Canada Cotton Mills Co. as the alternative of local bonuses, would be matter of deep regret. This result can only be prevented by paying different kinds of labor according to their efficiency, a thing which the laborers themselves sometimes make difficult or impossible.

FINANCIAL REVIEW.

We give below a condensation of the figures of the statement of Canadian banks for the month of April, 1898. It is compared with the bank statement for the previous month, and shows capital, reserve, assets and liabilities, average holdings of specie and Dominion notes, &c.

CANADIAN BANK STATEMENT.

	April, 1898.	Mar., 1898.
LIABILITIES.		
Capital authorized	$74,758,684	$74,258,684

Average amount of specie held during the month	9,002,440	8,926,759
Average Dominion notes held during the month	14,599,907	14,092,500
Greatest amount notes in circulation during month	37,515,074	36,939,264
Loans to directors or their firms	8,060,214	8,122,579

The bank statement shows a continued expansion of discounts, and a continued decrease of available resources. From the 1st of January to the 30th of April, the increase in discounts was no less than $17,000,000, besides an increase of about $8,000,000 in investments. During the same time deposits have decreased nearly $6,000,000, and circulation has been redeemed to the extent of $2,000,000.

Thus, then, the resources of the banks, which up till Christmas were redundant, have now been very largely depleted. This process will not need to go on much longer before making itself felt in an actually tight money market, a state of things which has not been experienced for some years in Canada. There can be little doubt that the extraordinary advance in the price of wheat has had something to do with the additional demand for money. When every million bushels of wheat requires some three hundred or four hundred thousand dollars of additional money to handle it, and considering the amount of western grain business that is done by our banks, it can be seen that a good many millions of additional discount may be accounted for in this way.

There is also a larger quantity of timber and lumber being carried over than usual; and undoubtedly the great development of mining in British Columbia, with all the vast expenditure connected with the Klondyke, are represented in this increase of advances. All this, of course, ought to make itself felt in a better ratio of banking profits. But it is a questiont if his increased business has not been more than offset by the decreased rate at which so much mercantile business has been done and a steady and constant increase in the expense of doing it. All business in fact seems to be undergoing this process of developing a narrower, and still narrowing, margin between the profits which can be made in the handling of business and the expenses necessary for carrying it on. Of course there are occasional exceptions to this in the waves of rising markets which sometimes bring large accessions of net profits to certain houses, and on certain lines of goods, but all such accessions are almost certainly followed by a move in the other direction, and the one in a course of years quite balances the other.

Statements of the Canadian banks for 1897-8 are now beginning to appear, and it is gratifying to find that in the case of the leading bank of the Dominion, a considerable improvement is shown over the statements presented during the last few years. The balance-sheet of the bank shows that the management is thoroughly alive to the importance of keeping well abreast with advancing developments, and the figures it exhibits are certainly gratifying.

The profits of the Bank of Montreal look to be very large when simply stated in plain figures as $1,265,000 in the course of a single year. But although this sum amounts to about 10½ per cent. on the capital, it only amounts to 6¾ per cent. on the capital and subsidiary funds of rest and surplus profits. Now, if any man thinks that 6¾ per cent. is too much to be made by an institution which turns over as much money as the Bank of Montreal, and passes through its books such a tremendous amount of risks in the course of a single year, he must be a veritable crank in financial matters.

There are those who refer to what are supposed to be the large profits of the banks in considering whether or not the rate of discount is or is not too high. A consideration of the above fact may perhaps modify such unreasonable views.

The increased profits of the Bank of Montreal are sometimes (perhaps too hastily) taken as an index to the improvement in business, which in some quarters is undoubtedly going on. This cannot be safely assumed by any means, because the Bank of Montreal has such large and important interests outside of Canada that it is quite possible that to these resources, rather than to any increased profits from its Canadian business, the excess of this year's profits over last year's is due.

The Dominion Bank, whose dividend is the largest of any of our banks, is apparently not finding it easy to keep up the rate that was established when profits were more easily earned than they are at present. However, since there is no need for making any further additions to the rest of this bank, it may be considered reasonable that all the profits that are now made may be safely divided amongst the shareholders.

The statement of La Banque Nationale is also a good one.

It must be borne in mind that the improvement in the times works only slowly at first in connection with banking profits, and that its effect is felt rather in the diminution in the number and amount of failures than otherwise. So far during the present year this diminution has not been very striking, and stockholders and the public will do well not to expect too much until such a reduction becomes more or less permanent for a few years. This was the case in 1880 and 1881, but we have seen nothing like the heavy falling off in bankruptcies which occurred during those years.

It seems very hard for us to realize that a neighboring nation so closely contiguous to ourselves, and with whose interests we are so closely bound up, should actually be in the throes of war. But so it is, yet no one would suspect it from a casual visit to the great business centres of the States, nor even from the course of the money market in New York. The contrast between the present state of things and that which supervened after the breaking out of the American Civil War is striking indeed. At that time specie payments were suspended. Gold instantly began to rise to a premium. Enormous drafts of money were made upon financial institutions, and heavy loans abroad began to be negotiated almost immediately. Now, however, very little disturbance has taken place except in the wheat market, which has taken an extraordinary bound upward, and in spite of occasional recessions seems likely to remain high. But the high price (as has been pointed out) is not wholly due to the war; wheat would have moved steadily upwards if there had been no war at all. The supplies of the world are short, and the demands of the people are certainly not less than normal.

In connection with insolvency legislation, the very welcome announcement is made that the Nova Scotia Legislature is taking up the matter in earnest, and that a bill, with the view of abolishing the iniquitous preferences by which such injustice has been done during many years, especially to creditors in Ontario and Quebec, will shortly become law. In the absence of the enactment of a general insolvency law, which seems to recede further and further into the distance, this measure will be welcomed by traders and manufacturers doing business in Nova Scotia. It is to be hoped that the measure will be so carefully drawn and safeguarded that it will prove effective in its working, and not be one of those Acts of Parliament that can be so easily evaded as to become absolutely nugatory in practice.

A bill for the establishment of a bank called the "Klondyke Bank," introduced into the legislature, apparently has some chance of passing. One very important amendment has been made to it in its passage through the Commons, viz., that its head office shall be in Montreal and not in London. This provision will probably prevent the establishment of any institution but one that is sound and substantial. Of course, all new charters are subject to the provisions of the present Banking Act, but even with this safeguard a scheme in the hands of clever and unscrupulous parties might be made to work incalculable mischief, considering that it would have the power of circulating notes.

ABSTRACT OF BANK RETURNS.

30th April, 1897. [In thousands.]

IS COLD STORAGE A FAILURE?

Great things were expected of cold storage. By an improved system of cold storage facilities for meats, fruit and eggs, we have been told that Canada and the countries at a considerable distance from Great Britain would be able to compete on equal terms in her perishable goods markets with the continental producers. After some experience with cold storage, it becomes apparent that the expectations of merchants have not in all branches of the trade been realized. At considerable expense a steamship service has been fitted out with refrigeration plant. A Glasgow importing house refers to this as follows: "As for putting eggs in cold storage on board these steamers we think it is the worst thing for the eggs, because they run the refrigerators at such a low temperature, with the results that the shell of the egg often gets very brittle, and the least knock breaks them and causes a lot of damage to the eggs." This firm has instructed all their packers "not to ship a single egg under refrigerators, as our experience this season is that eggs coming in under ordinary freight have been more satisfactory, and there is no doubt that *when eggs are shipped fresh*, for the short time they are on the voyage they should be in perfect condition when they arrive here." Unfortunately all the consignments of eggs sent across the Atlantic are not fresh when they leave the forwarder's hands. There is nothing that will make amends for delay in marketing eggs.

It has been found that when eggs are taken from cold storage into a warmer temperature a moisture gathers on the shells, which passing into the pasteboard cells used to pack them, causes an objectionable mustiness and mould to form on both eggs and package. This must prove a great hindrance in the way of the sale of the eggs, and leads merchants to prefer the domestic eggs or those that have been imported without the assistance of refrigeration.

The value of cold storage as a medium of keeping fruit remains at this moment undecided. Several considerable shipments made to the British markets last month did not give satisfactory results. On being taken from the warehouse and repacked, the loss often amounted to 15 per cent., or more than that of the ordinary stored apples. When the apples arrived at the docks in Great Britain, they were found to be covered with a sweat which in a few days resulted in a discoloration of the apples. A number of traders affirm that although cold stored apples can be kept in good condition for a week or ten days after having been removed to the ordinary temperature, after that time they show waste and begin to wither up. A Glasgow importer is of the opinion that "the carriage of apples in cold storage seems to me utterly useless, in fact, more harmful than otherwise. When pears are carried in this process they should simply be kept cool. The temperature is too low during the voyage. The fruit on arrival, after being exposed to a normal temperature, becomes black, and as a natural result depreciates in value."

That the cold storage facilities afforded in Canada have been of assistance to butter-makers and traders is beyond question. The substantial increase in Canadian exports of butter is, in part, due to the establishment of these arrangements, and the cold storage warehousemen and carriers have been indispensable allies of the creamerymen in competing for a share of the British trade. And yet, there is something still to be desired in the butter industry. When butter is taken from the refrigerators at port in Great Britain, it is in excellent condition; but when put into a warehouse, at a higher temperature, a reaction takes place and the quality of the butter suffers injury. This loss would not occur if the British markets were well supplied with cold storage arrangements, but unfortunately, such is not the case.

The lessons to be learned from the experiences of exporters are that not all perishable commodities can with advantage be kept in refrigeration, that the cold storage must be skillfully operated, and extend in a complete chain from producer to consumer. Skill will come in time to those directly interested in the business of cold storage, and may remove some of the complaints that are now made in reference to the system. But it will be a more difficult matter to secure the establishment of adequate refrigeration in British markets. The climate there is not subject to the extremes of cold and heat experienced in this country, and finding it possible to handle the produce of Ireland, Denmark, Holland and other near-by producing countries without refrigeration, it is to be feared that the temptation will not be sufficiently strong to induce the building of cold storage warehouses to handle colonial products. Until this is done the full benefit of the present refrigeration arranged for by the Canadian Government and private capitalists in this country cannot be realized.

CANADIAN LEATHER EXPORTS.

In spite of the advantages which Canadian tanners possess in the shape of cheap raw material, the exports of leather from this country to the United Kingdom are comparatively small, although it is satisfactory to know that they are growing. Canadian tanners of sole leather turn out a product which is no way inferior to that of the United States, and by successful marketing, it commands as good a price in British markets. Nor are harness leather tanners disposed to yield first place to their American competitors. But in upper leather stock, such as waxed splits, satin hide and glove hide, as an English importer writes to the High Commissioner for Canada, "the Canadian is a long way behind in the production of these articles in comparison with the American."

The reason for the inferiority of the Canadian product is, we believe, the lack of production on a large scale. While the bulk of the sole and harness leathers produced in this country are turned out of tanneries possessing the most improved plant and operated by tanners who have the capital necessary to produce finished material on a large scale, upper leathers, with few exceptions, are produced by small tanners, who are in no position to compete with their energetic rivals in the United States. The conditions for production in the two countries are very similar; and it appears beyond a doubt that experienced tanners, who invest capital in a well-equipped tannery, will not find their labor unrewarded.

In the matter of currying leather British importers complain that "sufficient attention is not paid in Canada to the finish and appearance of the stock," and advise that "the splits shall be better trimmed, of finer wax, less grease (consequently causing them to be firmer), and thoroughly graded; that is, all light substances placed together, all medium substances together, and all heavy substances together, whereas at the present moment they are sent over all mixed up. Then, in their grain leather, that is, buff and satin, greater care must be exercised by Canadian makers in the production of these articles, "closer trimming, firmer dressing, using less grease, and putting a brighter finish on the grain."

It has been rumored for some time that several Canadian tanners were about to enter upon the production of upper leather on an extensive scale with a view to exportation, but only at Kingston have we heard of active work being commenced in this connection. From enquiries made of this journal we know that several British tanners are discussing the chances of success in Canada. It is to be hoped that these enquiries will result in substantial progress being made in the industry. If the present movement in favor of the exportation of dressed meats in the place of live cattle is equal to the expectations of those interested in the trade, tanning in Canada must witness marked development.

THE KLONDYKE TRADE.

The other day a correspondent of THE MONETARY TIMES who had just returned from Vancouver used the expression in his letter: "You need not be afraid to say that going to the Klondyke is not what it is cracked up to be." And we have heard, both before and since, that the mad rush to the Yukon gold fields is quieting down, and that not a few who went as far on the way as Vancouver have been glad to come east again. A few months ago the factories were busy on Klondyke orders, and quantities of Canadian supplies were going west. But apparently the rush of people westward has not continued, and the expected consumption of goods has not taken place. A Pacific coast and Western merchant, who has visited Montreal and Toronto this week, says that "the bottom appears to have fallen out of the Klondyke trade," and he knows a number of houses who are looking at their large stocks with some anxiety. He says the Hudson Bay Co. are overstocked at many of their posts, from Edmonton to the coast, with grey blankets and similar goods bought especially for the Klondyke trade. He said he found blankets particularly were a drug, both in Vancouver and Victoria, and Mackinaw cloths was another item mentioned.

THE COST OF MANUFACTURED GOODS.

That manufacturers often lose money—more money than they have any idea of—because they do not take enough pains to keep track of items of cost in the process of manufacture, has been shown many times. But it is one of those things that must be reiterated again and again before some manufacturers can be got to perceive that it pays to look closely into items in the factory, and to have a good system of accounting with which to treat merchandise in process. "Costing goods" is important to a merchant; and it is still more important to a manufacturer, who is liable to more waste than a merchant by reason of great variety of labor and of material; to loss through the misuse of fragments of time by hands; to destruction of assets by stupidity of laborers, and who risks serious loss or error by carrying things "in his head" that ought to be subjects of minute calculation and careful record.

As it is put in a recent issue of Accountics: "Costs are various in kind, and in the modern factory are somewhat intricate, if not actually complex, and they are becoming more and more perplexing in character every year. The time has gone by when the foreman's estimate of what goods cost to make, or the unsupported figures of the superintendent, were sufficient for making contracts and establishing price lists. The record figures of the cost of goods actually produced are now required, and not only must these include material and labor, but likewise they must embrace the proper pro rata of fixed charges, incidental expenses and depreciation of plant."

A paper on the subject of "Cost Accounts," was read before the Institute of Chartered Accountants of Ontario, in February or March last, as we noticed at the time. The author says cost records of practical value can be obtained from a firm's books of account, and at no serious expense. He divides the cost of manufacture into several component parts: 1st, material; 2nd, labor; 3rd, direct charge of production. These three items made the shop cost. To these is to be added the price of selling, advertising and distributing; the total makes the cost of the goods, and the margin between the selling price and the cost as determined will be the gross profit. Illustrations are given of the working, and the books proposed to be used are described in a way which we cannot well reproduce; but we strongly recommend manufacturers interested in the subject to procure copies of the April and May numbers of the magazine named, or possibly they are to be had in pamphlet form at the Institute of Accountants or of the author.

A SYSTEM OF FIRE MARSHALS.

A project well worthy the careful attention of Canadian municipalities has been discussed, as our readers have repeatedly been told, by a number of Ontario mutual fire insurance companies. This is the appointment by Government of fire marshals in counties and towns, whose business it shall be to investigate causes of fires. The scheme has received valuable advocacy at the hands of the Guelph Board of Trade, which has sent out numerous circulars on the subject and received replies from more than 100 Ontario municipalities, most of them, we believe, favoring the proposal. Something of the kind is very desirable if incendiaries are to be detected and punished and the fire loss is to be lessened.

The experience of the State of Massachusetts, where such a system has been for some years in operation, is very instructive and encouraging. The percentage of incendiary fires in Boston, which under the fire marshal system has been reduced to a normal average of about 5 per cent., was still further reduced to 3½ per cent. in 1897. The percentage of incendiary and unknown fires in the State outside of Boston has been gradually lowered from a former average of 35 per cent. to less than 18 per cent. It appears that 33 per cent. of the total number of incendiary fires were intended to defraud insurance companies, 1 per cent. was the result of pyromania, 9 per cent. of revenge and 2 per cent. of insanity. In 16 per cent. of the insurance defrauding fires the insured parties have had more than one fire, and in one instance seven fires.

The annual report of Fire Marshal Whitcomb shows that there were in Massachussets last year 4,080 fires, which occasioned a loss of $4,369,400. Of these fires, 337 were incendiary and 409 of unknown origin. During the year there were 56 arrests and 41 convictions for incendiarism, with four cases awaiting trial. Before the establishment of the office less than 18 in a hundred of the number of arrests resulted in convictions. Last year over 73 per cent. were convicted, while the proportion of convictions to the total number of incendiaries has been increased tenfold. There is here a good basis for the belief that some such system in our midst would prove invaluable. Human nature in Canada is not materially different from what it is in Massachusetts.

OUR AUSTRALIAN LETTER.

"I have seventeen cases set down for trial, and here you have wasted a whole hour over the first one," growled the judge of the New South Wales Divorce Court now sitting in Sydney. The poor man was getting discouraged, as he well might. He had been hearing and deciding ten cases per day, but the applications had been pouring in at the rate of twelve and a-half per day. In striking contrast with this rapid court is the sedate and leisurely way in which civil cases are settled. One case has been on and off for fifteen months, chiefly on, and it is not finished yet. The explanation is that there is money for the legal gentleman in these civil cases, while there is not much in the ordinary divorce business. Divorces are not so freely granted here as in the Western States of America, but the rapid increase in the number of couples who wish to get rid of the bond is alarming the thoughtful. Shameless beggary and divorces are the two disgraces of Sydney.

The chartering of the sailing ships which bring the freight from New York and practically from Eastern United States and Canada has for some time been in the hands of four firms, who formed a combine. The natural result is that freight rates went up from 12 to 18 cents per cubic foot with 5 per cent. primage. Another firm—Flint, Eddy & Co., of New York—have gone into the business, with strong support from this end, and rates have already dropped to fifteen cents, and will probably go lower. There are other charges made against the ring. They were commission agents as well as ship charterers, and it is claimed that goods which did not pass through their hands and pay a tax of five per cent. did not get on as well as those that did. Canadian exporters should note this reduction and take advantage of it.

This is unluckily what most of them will not do. Canadians are learning, but learning slowly. An indignant Queensland merchant, who had given a sample order to a Canadian firm, writes: "Goods are all right, but charges on them abominable. They were ordered to come by the cheapest route and they have come by the dearest, with the result that I claim ten pounds for difference in freight." This Canadian manufacturer will declare, when this demand is made upon him, that there is no money in the export business, when the whole trouble in this case was through his careless neglect of instructions. Another lot of goods recently arrived here. The freight charges and goods were all right, but the bill of lading was wrong, the invoice was wrong and the instructions as to method of packing had been neglected. Result—it required a guarantee to get the goods, the mistakes that were made in invoicing may lead to some loss, and every package had to be opened, because there were no indications as to its contents, as there should have been. Since these goods were indented and had to go forward, this created unnecessary labour and handling here, and hence suspicion upon the part of the purchasers, as they like to get original and unbroken packages.

In a case where carriages were the goods, the packing directions were fairly followed. First shipment arrived in bad condition and had to be revarnished. This one is opening out very well, but one top has a nail through it and the inner lining of another is very badly torn This, however, is not very serious.

Lastly, J. & T. Bell, of Montreal—and the name of the firm should be given—has sent out the first lot of Canadian boots and shoes imported into Australia. The buyers report everything all right, bills of lading, invoices and packing, and "the goods are better than the samples, and I expect to re-order," writes one delighted purchaser, and all say that if the boots and shoes wear as well as they look, there is a great trade here for this firm.

Good sales have recently been made of consignments of Canadian paints, varnishes, buggies, bolts, and some canned fruit. This consignment business must be carefully done. First, it must be known that the goods are likely to be sold here; second, that they may get into the hands of responsible parties; and lastly, that the details of the shipment are properly carried out. Each ship from New York for the last few months has brought five or six carloads of Canadian chairs, and the trade is only fairly opening. There is a good prospect of a general furniture trade being opened. Good orders have been taken for school desks, cotton goods, rubber goods, and other lines. Canadian agricultural implements are in demand. Four firms are now in the trade, the Manson Campbell Company, of Chatham, being the latest to enter the lists. Bicycles are a little quiet, but Canada is getting its share of the trade. Manitoba wheat and flour have been enquired for, and though the price is high business is being done. It is bringing over sixty cents per hundred pounds more than any other flour in the market. The Klondyke rush has so upset things that one importer could get but one-half his order filled by last steamer.

The Spanish trouble ought to give Montreal its chance to start a line of steamers direct for the Cape and Australia. The New York firm that has broken into the ring has put on steamers, on the line advocated by the Canadian Commissioner at this point two years ago, viz., via Cape and South Australia, returning via Singapore, the Mauritius and the Cape, with Montreal, Halifax and St. John as the terminal cities as circumstances might require. The war increased rates, if it continued, should make a Canadian line a certain success.

F. W.

Sydney, New South Wales, 23rd April, 1898.

BRITISH COLUMBIA MATTERS.

An occasional correspondent, addressing us from Vancouver, on May 19th, points out that The Monetary Times was not quite correct in stating that the British Columbia Government is voting $5,000,000 to railroad extension, without obtaining a definite quid pro quo. "The sum which the Province is authorized to borrow will be $5,000,000, but of this $800,000 will be applied in part to general purposes of the administration, and in part towards meeting the expense of raising the loan, which last will probably amount to $150,000. And of the balance that is to be applied to subsidies in aid of railroad extension, the sum of $1,600,000, which it is proposed to grant to the new Teslin Lake scheme of Messrs. Mann and Mackenzie is, until repaid, to yield a Provincial royalty of 4 per cent. on the gross receipts of the railroad. This subsidy, which Premier Turner thinks likely to produce a revenue of $50,000 a year, will about pay interest on the principal of the subsidy, though it will not yield aught appreciable toward the provision of the necessary sinking fund to be applied in redemption of such principal. Thus the Province will for a time at any rate receive something, though by no means what is adequate, in return for the subsidy in aid of a proposed line towards the Yukon, via a coast port in northern British Columbia, that will either be on Alice Arm or on Kitinat Bay.

"The weak point about the subsidy arrangement is that it takes insufficiently into account the probability that the productive life of the railroad, dependent as it will be in the main on the placer mines of the Yukon, is scarcely likely to exceed ten years, in which time the best gold placers are usually almost worked out in countries like the Yukon, where inclemency of climate renders successful hydraulicing a rare event. The same climatic obstacles will in all human probability impede the development of most of the gold quartz deposits of the far north, by rendering so high the cost and so great the difficulty of working them, as to put such mining, in most cases, out of the question by reason of the requirement of quite exceptionally rich and extensive bodies of ore. The arrangement as to the Teslin Lake Railroad subsidy should, accordingly, rather, as it would seem, have been based on calculations providing not only for payment of interest, but also for gradual reimbursement of principal within 10—or taking a larger risk—15 years at most.

It, however, at the time of writing, seems doubtful if Messrs. Mann & Mackenzie will, after all, accept the Provincial bonus and proceed with their scheme, unless backed also by substantial aid from the Dominion Treasury. They are alarmed by the rapid progress of the rival British Yukon Company's project of building a line by September next from Skagway to Lake Bennett. If the British Yukon people can do this, as they assert they can and will, the Skagway line will anticipate by a full season the operation of the Teslin Lake railroad and largely cut the ground from under the feet of the organizers of the latter, it being doubtful if the Yukon can support two costly railroads. Hence the Provincial Government may not be required to disburse for one of the stated railroad purposes the sum of $1,600,000 appropriated towards it. The same remark applies to the proposed grant of $920,000 in aid of the proposed British Pacific Railroad, or rather of a 230 mile portion of it, to be built between Bute Inlet and Quesnelle. Hitherto all efforts to finance this scheme have failed, as the portion of line proposed to be aided runs through a difficult and in large part barren country, and would be dependent apparently for its financial success on its inclusion in a second transcontinental railroad through Canada. The latter is not likely to be even begun for a long time, opposed as any such project must and will be by all the formidable forces at the call of the C.P.R. Hence likely enough, and fortunately for British Columbia, a large part of the sanctioned loan of $5,000,000 may not be required. If, however, the loan should be raised in its entirety, it will increase the debt of the Pacific Province to over $11,500,000, a big liability for a land of 140,000 people only, including 40,000 Indians, Chinese and Japanese.

The Klondyke boom has largely subsided, as regards the outfitting and general northern trade of Vancouver and Victoria, though during the last few days a steady business has been done in supplying some of the members of the Canadian military and official expedition, and in outfitting some 60 Australians, Yukon bound. Many British Columbia traders think that there will be a big summer rush to the far North, but this will in all probability be largely prevented by the deterrent effects upon British and American mine speculative enterprise of the Spanish-American war. Against such revival is also militating the news which has recently reached every part of the United States and Great Britain, that many and great disasters have occurred to Yukon gold-seekers. Some in Vancouver still believe that from the United Kingdom will come nearly 20,000 would-be gold-seekers in the Klondyke, but the more conservative among local retailers will be well satisfied in their expectations if 10,000 arrive gradually from England. The prudent amongst the northern traders of British Columbia are indeed now reckoning rather on steady trade than on a continuance of the boom, and are taking care not to increase largely present stocks, which indeed in some cases it will take considerable effort to sell gradually to sufficient advantage.

N. C. S.

DOMINION BANK.

It is natural to suppose that the authorities of the Dominion Bank, which began in 1894 to pay quarterly dividends of three per cent. each, occasionally sigh for the return of the days when the bank's net earnings were from $212,000 to $240,000 a year. These were the figures of, say, half a dozen or a dozen years ago; but the three years last past showed only $189,000, $184,000, and $182,000 respectively. The difference between earnings of 15 or 16 per cent. on capital, as in the former period, and 12½ per cent., which is the average shown in the last three years, is very marked, especially when a financial institution is expected to divide 12, as this bank has now done for several years. Still there is no compulsion about the matter; if the directors find they cannot continue to earn twelve per cent., it is not to be expected that they will pay that rate. No reasonable shareholder ought to grumble at ten, which in these days of reduced earnings is a remarkably good dividend.

Nothing of a reminiscent or prophetic character respecting business conditions or prospects finds place in the report, which is of the usual brief character. Nor were any lengthy addresses made at the annual meeting on Wednesday. The few words spoken by Sir Frank Smith, the president, were characterized by his usual good sense. We observe that while, correspondently with increased deposits, the current discounts show active increase, there is also a very decided addition to the bank's investment in municipal and other debentures. This, of course, while it swells the aggregate of immediately available assets to a larger sum than probably ever before, also betokens a low rate of earning for a considerable proportion of the assets. However, the affairs of the Dominion Bank are shrewdly looked after; and it may be regarded as quite likely that an institution with deposits almost nine times as large as the paid capital is in an exceptionally good position to earn dividends when profitable business offers.

LA BANQUE NATIONALE.

Since the month of May, 1896, we have not had the pleasure of being furnished with a full report of the proceedings of La Banque Nationale. But we are now glad to see that, after several years of distress, occasioned by bad debts, a turn has come, and the bank is making continued progress. The thirty-eighth annual report shows profits of $130,610, which is equal to not far from eleven per cent. on the capital of the bank. Now this, when the deposits are not more than about two and three-quarter times the paid capital, is a very creditable earning. There is a wonderful increase in circulation, for one thing, since 1894, or even since 1896, and the bank's business shows activity and growth all round. In fact, the totals of the assets and liabilities of he bank now amount to $6,089,000 where in the year 1896 they were only $4,762,000. Loans and discounts are increased a million and a quarter. Such figures speak for themselves. An improved dividend is a natural consequence. After making provision for bad and doubtful debts, a dividend of six per cent. is declared and the sum of $50,000 added to Rest. This makes the Rest account $100,000, and there is $30,000 at contingent account. Nor must we omit to notice that the real estate and past due debts are greatly reduced, a circumstance which must afford pleasure to the management, which has had hard and steady work, no doubt, all through the year.

TORONTO BOARD OF TRADE GRATUITY FUND.

This fund, which has been a subject of discussion and dissension in the Toronto Board of Trade for many a day, will soon be among the things of the past. An Act has passed both Houses of Parliament and only awaits the Royal assent to become law, under which the trustees of this fund are empowered to discontinue this branch of the Board's work and distribute the accumulated funds among the members entitled to the same. The securities held by the trustees were offered to the public by advertisement last month, and tenders for the same were opened and considered last Friday. The tender of the North American Life Assurance Company for all the securities, being the highest, was accepted.

A circular has been issued to members of the Board who are subscribers to the Gratuity Fund, dated 23rd May, advising that the trustees "expect to be prepared to make payment on the 1st June next, or as soon after that date as the Act may he declared law, of the sum of $125, in accordance with the provision of the Act, to all subscribers who at that time shall be registered as members in good standing, and having paid all assessments previously levied." It is to the credit of the trustees of this fund, whose duties have been very far from trivial, that they were so prudent in the handling and investment of the moneys that the securities, which amounted to something over $102,000, commanded a very satisfactory premium.

SUN INSURANCE OFFICE.

In this country we consider a concern old which has been in business fifty years. What are we to say, then, of a company which is nearly two hundred years in existence? The Sun Fire Office was founded in 1710, and its business is among the largest in the world. In 1897 it took £1,012,340 in premiums, as compared with £969,695 in 1896. The aggregate at risk, after deduction of the amounts reinsured, exceeds £425,000,000, being an increase of about £36,000,000 on the corresponding figures for the year 1896. The losses paid and outstanding amount to £588,296, being at the rate of 58.11 per cent. on the premiums received. The expenses of management were £343,252, being at the rate of 33.91 per cent. The income from investments during the year has amounted to £78,671. After providing for the usual reserve of 40 per cent. of the premiums to cover liabilities under current policies, a balance of £142,401 remains, which has been transferred to the credit of the profit and loss account. In view of the increasing need of retaining large amounts on individual risks, a special reserve fund has been created by the transfer of £100,000 from profit and loss to provide for the liabilities thus incurred. Dividend at the rate of 4 shillings per share had been declared in January; to this is now added 4s. 6d. per share, payable in July. The company has no less than seven million dollars surplus over capital and all liabilities, and is one of the soundest and strongest concerns in the English insurance list.

ALLIANCE ASSURANCE COMPANY.

The fire insurance fund of the Alliance, translated into dollars, amounts to $3,936,800, which is apart from a profit and loss account of half a million. The life fund is nearly four times as great, but we do not particularize this for Canadian readers, because the company does not look for life risks in this country. At the annual meeting, held in London this spring, the company exhibited a fire premium income of £536,651 sterling, and a ratio of fire loss equal to 55.22 per cent., which is a decidedly low ratio, and an expense and commission ratio of 34.26 per cent. The company does business in the United Kingdom, where it has fifteen branches; in Africa, Australia, New Zealand and the United States. It has a strong board of directors, with Lord Rothschild at the head, and the aggregate of its assets reaches £4,591,448, equal to the comfortable sum of nearly twenty-three millions of dollars. These assets are in British and foreign Government securities, £515,000; Colonial securities, £89,380; Bank of England stock; railway stocks and shares, £1,838,000; house property, lands, loans, deposits, and cash in bank. The capital is five millions sterling, with eleven per cent. paid up. It is not necessary for us to say anything more to convince our readers that Alliance policies are desirable ones.

INSURANCE AGENCY CORPORATION, LIMITED.

A month or more ago we had occasion to note the granting of a charter by the Ontario Government to a company under the name of the Insurance Agency Corporation of Ontario, limited. We now learn that a meeting of the shareholders of this company was held last week for the purpose of organizing. The following gentlemen were elected a board of directors for the ensuing year, namely: Messrs. Hugh Ryan, Z. A. Lash, Q.C., A. E. Plummer, Hon. L. M. Jones, James Hedley, Lieut.-Col. the Hon. D. Tisdale, M.P., W. B. McMurrich, Q.C., Walter E. H. Massey, and Geo. H. Roberts. The necessary by-laws were adopted and provision made for an immediate entry upon the company's business, which is to be carried on in the Janes Building, King and Yonge sts., Toronto. At a subsequent meeting of the new board Mr. W. B. McMurrich, Q.C., was elected president, Mr. W. E. H. Massey, vice-president, and Mr. Geo. H. Roberts, managing director and secretary.

The corporations' charter, among other things, permits it, we observe, to assist policy-holders by loan on the payment of premiums; receive for safe keeping, policies, documents and valuables; and do a general agency business in all the different branches of insurance. The new corporation is also prepared to examine or give opinions on policy contracts, prepare assignments and other documents in connection with any change desired in a policy, collect insurance claims and attend to any business pertaining to insurance, whether in Canada or elsewhere. Policy-holders in insurance companies which have withdrawn from Canada may make arrangements to pay their premium to the corporation. It will thus be seen that the new company has scope for a considerable business, for there are always people looking for advice about life assurance—the trouble with whom is that they often won't take good advice, but fly away to the assessment bodies. The safe keeping of insurance policies and the looking after payment of premiums, fire or life, for those who are absent or traveling, and the collection of claims are convenient features which will commend the corporation to busy business men. For people of limited income, or for those of irregular earning power, the advance of money to pay premiums is often a great boon. As may be seen, the company is very respectably officered, and the list of shareholders includes several wealthy men.

FOR GROCERS AND PROVISION DEALERS.

It is proposed to form a Wine and Liquors Section of the French commercial body in Montreal, La Chambre de Commerce. Mr. L. A. Wilson is proposed as the president of this subordinate body (if it should be constituted at the meeting of La Chambre next week), H. A. Dawes, treasurer, and L. A. Lapointe, secretary.

Mail advices from Smyrna continue to report a very unfavorable outlook for the coming sultana raisin crop. England is reported to have cleaned up the balance of the stock remaining in Smyrna, paying prices above a parity with the quotations here for a similar grade of goods.

It is the intention of the Pure Gold Manufacturing Co., of Toronto, now and for years carried on in Toronto by Mr. Alexander Jardine, to sell out to the Pure Gold Manufacturing Company, Limited, capital, $175,000, composed of Mr. and Mrs. Jardine; Francis Gallon, traveler; Jas. Litster, supt., and Franklin W. Fraser, accountant, to make spices, baking powder, blacking, etc. This we understand to be merely a change in the form of the concern, which is long established and we believe successful, and involves no real change of personnel.

The Trinidad Shipping and Trading Company, Limited, writing from Port-of-Spain, Trinidad, under the date of May 12th, says: "The progress of sugar making goes on uninterruptedly, and large quantities of produce are now at shipping places awaiting tonnage. The regular steamship lines to London and New York have all their available space applied for, and are now asking advanced rates. We have no charters to report. Sales of sugar continue to be made for local consumption only. There is some inquiry from Canada, but so far we do not think any business of consequence has been done."

Changed conditions in export of dairy products at Montreal are shown in our market reports this week. Instead of the remarkable increases of cheese export, month by month or week by week, that were shown last year, there is this year a falling off. From the opening of navigation to the 21st May exports of cheese were 24,254 boxes, where at the like period last year they were 57,710 boxes. But this may all be changed in a few weeks, for the pasturage is now looking well in the country, and the flow of milk must increase. Butter, on the other hand, shows a considerable increase of export at Montreal, 3,947 packages having gone seaward this spring, against only 554 last year same time.

Smith, Baker & Co.'s tea circular, dated Yokohama, Japan, April 29, says: "With the present issue we close statistics for season 1897-98, the total export to the United States and Canada amounting to 42,386,812 pounds. Nothing much can be said about new teas. Within the past two days some 250 piculs have arrived, most of which have been purchased at prices ranging from $41 to $55 per picul. These early arrivals show the effect of the unfavorable weather (too much cold wind and want of sunshine) which has prevailed. However, with normal spring weather a marked improvement in quality can soon be looked for. There have been no arrivals of new leaf at Hiogo as yet. Comparison of tea export for corresponding periods past seasons from Yokohama and Hiogo (in pounds):—

	Current Season.	1896-97.
To New York, Eastern, Middle and Southern cities and Canada ..	37,192,663	37,784,430
To San Francisco................	5,194,189	4,831,720
To England	46,525	423,274
Total	42,433,377	43,039,424

ONTARIO CHEESE MARKETS.

The pastures throughout the country are now in excellent condition, and a large make of cheese is reported. The offerings have been large, and in Ontario about equal to those of the same week last year. For the week ending May 26th, 1897, we reported fifteen cheese boards having offered 18,910 boxes, while during the present week fourteen boards offered 18,175 boxes. There is a marked difference in the prices quoted in the two weeks; whereas last year quotations ranged from 8½ to 9 1-16 cents per pound, recent markets have recorded a range of 6⅝ to 7⅜ cents per pound in May, 1898. Foreign advices are discouraging, and British markets are unsettled and lower. Importers maintain that there was nothing upon which to base the advance made some weeks ago, other than the rise in breadstuffs and firm tone of the pork product market. It is a blessing to the trade that less fodder cheese than usual was made this year, as the existence of any considerable quantity of inferior cheese in export markets would certainly lead to their complete demoralization.

ABOUT SHOES AND LEATHER.

Still another war novelty in leather is a pocketbook richly embossed with the stars and stripes, surmounted with the American eagle.

An order for 20 anchors, each to weigh 4,000 pounds, has been received by the American Steel Casting Company, of Sharon, Pa. They will be shipped to South Africa.

An American exchange says, respecting "War Novelties in Leather," that the latest leather belt has an army or navy emblem for a buckle. Another, that comes in a variety of leathers, has a brass buckle with crossed muskets in relief.

As an evidence how war sets various industries in motion, Messrs. Peter Rose & Sons, Baltimore, Maryland, are at work on a United States Government order for 500 sets of army wagon harness. Work on a duplicate order will begin as soon as this lot is finished.

Certain Rochester manufacturers have been experimenting with a "dummy drummer," so called, that has proved to be quite a success. The latest one to try the plan is W. E. Cherry, jr., and he reports that his "silent salesman" has been bringing him many orders. His sample cases, neatly arranged for transportation and inspection, have visited many cities and have brought in good orders. The dummy is now filled with fall samples, and is ready to make its journeyings about the Union. In it are shoes of the prettiest designs and most approved patterns.

The magnitude of the United States Rubber Company is indicated by the figures submitted in the annual report, submitted May 17th, and dated New Brunswick, N.J. The assets, which in March, 1897, were $41,093,000, were last March $41,221,770. The preferred stock amounts to $19,400,500, and the common stock to $20,166,000. A rise in the price of its stock took place on the statement made at the annual meeting that, notwithstanding the 16 per cent. cut in prices of goods at the beginning of the year, the company shows the full 8 per cent. on preferred, and a surplus of $272,000 besides, which remains undivided in the sub-companies, which have now over $2,000,000 of surplus undivided.

The power of reputation is great, and the trade reputation that continues for twenty-five or fifty years, honestly maintained, is worth, in many cases, all the efforts made to secure it. Canadians will read with pleasure what our Australian correspondent says to-day about the shoes of J. & T. Bell arriving in that country. But Englishmen do not read with pleasure that, when the shoes which British contractors supplied to the British soldiers in Egypt fell to pieces after a little wear, the authorities had to get a fresh supply of native shoes, which gave great satisfaction. Let us hope that the United States army now being supplied with shoes, do not suffer from the disgusting rapacity of the contractor.

WITH THE DRY GOODS MERCHANT.

A machine for the manufacture of golf stockings has been produced by a man in the Eastern States, which is said to be very simple and durable, and can turn out a great variety of patterns. It can be applied to any of the rib knitting machines. This is surely important for golf stockings are necessaries of life to many lovely young men.

Advices of early May from the north of Ireland announce that several large firms have suspended payment in the Belfast flax spinning trade. The principal firms involved are the Cogry Flax Spinning Company, the Ligoniel Flax Spinning Company, the Belfast Flax Spinning Company and Messrs. Robert Stewart & Sons, Lisburn. The latter firm has unsecured liabilities amounting to £143,833 and considerable secured liabilities. The bankers' claim amounts to £28,000, and there are over three hundred creditors.

It is in obedience to a natural and proper instinct that manufacturers endeavor, by forming combinations, to protect themselves from ruinous decline of prices, says the Textile Record, of Philadelphia. When goods are selling at or below cost, the consumer is getting advantages to which he is not entitled, and the producer is operating under conditions which must ultimately ruin him and hurt society. He is entitled to make some profit from his work, and it is to the general public interest that he should do so. We may, however, doubt if there is large promise of success for the combination of manufacturers of knitted underwear, recently formed, even though the movement have a considerable degree of justification. The enterprise includes but a small number of mills, and these by no means the largest. To control prices it must have all or nearly all of the establishments; but, even then, the door will remain wide open for new men to engage in the industry and to take advantage of the higher prices fixed by the combination. Unfortunately, perhaps, the knitting business may be undertaken with smaller investment of capital than is required for other manufacturing industries.

ANSWERS TO ENQUIRERS.

A. R. C., Peterboro, writes: "Thank you for calling down that purblind American for ignoring Canada, as he did in his compilation of telephone statistics. Canada is "on deck," in this as in other things, and all the contempt of Americans, who have never been out of their own State, can not put her "in the hold," Your article on page 1520 says that Canada has 40,000 telephones in use, of which more than 30,000 are Bell telephones. Have you any particulars as to the share of the different provinces in this total."

[We reply that the head office of the Bell Telephone of Canada answers our enquiry in the following terms: "You have got your Canadian figures pretty nearly right in your article of last Friday. Our statistics of the 31st December, 1897, in round figures are as follows:

Telephones in Prince Edward Island	500
" Nova Scotia	2,500
" New Brunswick	3,000
" Ontario and Quebec	32,000
" Manitoba and N.W.T.	2,000
" British Columbia	1,250
Total number	41,250

This refers to 'Bell' telephones only. There are of course a considerable lot of other telephones located in the country." It will thus be seen that we were within the mark in our estimate.

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, May 26th, 1898, compared with those of the previous week:

CLEARINGS.	May 26th, 1898.	May 19th, 1898.
Montreal	$10,928,631	$12,797,403
Toronto	6,291,447	7,824,958
Winnipeg	1,792,048	2,123,809
Halifax	1,044,506	1,221,680
Hamilton	543,254	693,835
St. John	521,244	615,681
	$21,121,130	$25,277,366

Aggregate balances this week, $2,836,208; last week, $3,196,933.

—Complaints from shippers and steamship owners continue as to the lack of accommodation in the harbor of Montreal. Some prominent men of Montreal, Ottawa and the west of Ontario were at lunch on board the transatlantic new ship "Dominion" in harbor last week. Mr. McMullen, M.P., who is supposed to have some influence with the present Government at Ottawa, speaking of the importance of Montreal as the ocean harbor of Canada, said that the Government ought at once to grant the money needed for harbor improvements. More significant still, Mr. C. M. Hays, general manager of the Grand Trunk, expressed his wonder why the large and handsome ship "Canada" had been withdrawn from the St. Lawrence. "She is considered sufficiently fast to carry the United States mails," said he, "and yet not fast enough to carry the Canadian mails" Mr. Hays further said that the working of the Grand Trunk along the wharves had reached its maximum, owing to the want of the necessary facilities in the harbor. Until the port was improved he did not see that anything further could be done by his company.

—That was a significant saying of General Hallowes, the commander of the military forces in Jamaica, in moving for a vote of money for the defences of the Island: "War may break out at any moment, and the Island is required to resist any attempt to wrest her from England." On instructions from the British War Office, the Jamaica Legislature, by a special vote on Thursday last, authorized a £35,000 increase in the military appropriation for local defence. The only regular troops left on the Island are a battalion of the Berkshire regiment. The Second Leinster regiment had been landed at Kingston, Jamaica, a few days before from the troopship "Dilwara," but they were at once ordered to re-embark for Sierra Leone, West Africa. There is a depot of the Second West India regiment (blackmen) on the Island, but in case of war all regular British troops would be withdrawn from Jamaica.

—The death, at the age of nearly 89, of William Ewart Gladstone, removes the greatest intellectual figure within the memories of the present generation. He was truly a Christian statesman; and it is one of his claims to admiration that he was as distinguished for honesty as for supreme ability. The bodies of few untitled men have been followed to the grave by so illustrious a group of Englishmen as those who are to be Gladstone's pall-bearers. They are these:—The Prince of Wales, the Duke of York, the Marquis of Salisbury, the Earl of Kimberley, the Earl of Rosebery, the Archbishop of Canterbury, Mr. A. J. Balfour and Sir William Vernon Harcourt.

It is agreeable to learn that, as a result of its operations during the year 1897, the directors of the Lancashire Insurance Company of Manchester, England, have been enabled to pay an increased dividend, and at the same time add $150,000 to the fire reserve funds of the company.

—It has been arranged that the Bank of Ottawa will open a branch in Bracebridge about June 1st. Premises have been secured and we expect to learn the name of the manager very shortly.

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending April 30, 1898.

			CAPITAL.					LIABILITIES.

J. M. COURTNEY, *Dep'y Min. of Fin.*

Meetings.

DOMINION BANK.

The annual general meeting of the Dominion Bank was held at the banking house of the institution, Toronto, on Wednesday, May 25th, 1898.

Among those present were: Sir Frank Smith, Col Mason, Messrs. S. Alcorn, William Ince, Thomas Long, John Long, J. Risley, Wm. Spry, William Ramsay, J. Lorne Campbell, W. R. Brock, W. Crocker, A. E. Webb, John Fletcher, H. D. Gamble, E. Leadlay, M. Boulton, E. B. Osler, William Hendrie, John Stewart, Walter S. Lee, W. D. Matthews, Chas. Cockshutt, H. M. Pellatt, Wm. Ross, A. W. Austin, Geo. W. Lewis, Thomas Walmsley, J. K. Niven, George Robinson, R. D. Gamble, and others.

It was moved by Mr. E. B. Osler, seconded by Mr. E. Leadlay, that Sir Frank Smith do take the chair, which being done, Mr. W. D. Matthews moved, seconded by Mr. W. R. Brock, that Mr. R. D. Gamble act as secretary.

Messrs. Walter S. Lee and M. Boulton were appointed scrutineers.

The secretary read the report of the directors to the shareholders, and submitted the annual statement of the affairs of the bank, which is as follows:

REPORT.

The directors beg to present the following statement of the result of the business of the bank for the year ending 30th April, 1898:

Balance of profit and loss account, 30th April, 1897		$29,925 75
Profit for the year ending 30th April, 1898, after deducting charges of management, etc., and making full provision for all bad and doubtful debts		182,462 30
		$212,388 05
Dividend 3 per cent., paid 1st August, 1897	$45,000 00

During the past year two new offices of the bank have been opened, one in Winnipeg, Manitoba, in June, under the management of Mr. F. L. Patton, and one in Montreal, to which Mr. C. A. Bogert was appointed manager. Both of these offices promise to be of substantial advantage to the bank.

FRANK SMITH,
President.

R. D. Gamble,
General Manager.

Dominion Bank,
Toronto, 30th April, 1898.

The adoption of the report was moved by Sir Frank Smith and seconded by Mr. E. B. Osler.

It was moved by Mr. S. Alcorn, seconded by T. Walmsley, and resolved, that the thanks of this meeting be given to the president, vice-president and directors for their services during the past year.

It was moved by Mr. Wm. Hendrie, seconded by Mr. J. Risley, and resolved, that the thanks of this meeting be given to the general manager, managers and agents, inspectors and other officers of the bank, for the efficient performance of their respective duties.

It was moved by Mr. Geo. W. Lewis, seconded by Mr. Anson Jones, and resolved, that the poll be now opened for the election of seven directors, and that the same be closed at two o'clock in the afternoon, or as soon before that hour as five minutes shall elapse without any vote being polled, and that the scrutineers, on the close of the poll, do hand to the chairman a certificate of the result of the poll.

Mr. Thomas Long moved, seconded by Mr. W. S. Lee, that the thanks of this meeting be given to Sir Frank Smith for his able conduct in the chair.

The scrutineers declared the following gentlemen duly elected directors for the ensuing year: Messrs. A. W. Austin, W. R. Brock, William Ince, E. Leadlay, Wilmot D. Matthews, E. B. Osler, and Sir Frank Smith.

At a subsequent meeting of the directors, Sir Frank Smith was elected president and Mr. E. B. Osler vice-president, for the ensuing term.

Correspondence.

TOBACCO RAISING IN ESSEX.

Editor Monetary Times.

Sir,—I have received your letter of enquiry, and I have remarked with care what you say of the possibility that a distinguished firm of Canadian manufacturers of tobacco, and also, I believe, of cigars, in Hamilton, may very shortly erect an establishment in Chatham which shall utilize the now extensive and still increasing product of the County of Essex in the shape of tobacco leaf. I trust that your information may be correct with respect to the founding of the manufacturing establishment in question. Indeed I wish that factory might be erected here.

No great length of time has elapsed since I was informed by a person, in the commercial travelling line, whom I chanced to encounter one evening in a casual way at an hotel in this town, that in the opinion of well-informed business persons, and even agriculturists of experience in Eastern Canada, the widening enterprise of tobacco culture within the borders of this country would prove to be "but a flash in the pan." (These were the words he used). He explained himself to mean that the farming industry in question was but a novel experiment, and would not last; partly because there was no scope for tobacco cultivation in this country (Canada), and partly because the farmers would soon find out that tobacco plants would exhaust their land.

I think, sir, that I can hardly be far astray in asking your own evidence, Mr. Editor, in support of what I stated to the person mentioned, about the extent of tobacco-growing in Essex County, both now and long ago. You must recollect, as a former resident of Essex, that as late as between 1850 and 1856 there was shipped from this town by steamers, such as the "Earl Cathcart" and the "George Moffatt," quite a quantity of tobacco leaf to Montreal. But if you do not, I will beg the liberty of referring you or any one else to W. H. Smith's Gazetteer of Canada, published by Rowsell at Toronto in 1846. I have this work in front of me at this moment, and assume that copies of it are to be had in one or other of your great Toronto libraries. Turning to page 5 of this work, I find stated as among the exports from Amherstburg, in the year 1844, the following, being part of the £7,221, 10 shillings (currency) worth of land produce and manufactures:

300 barrels potash, value...	£1,500
200 hogsheads tobacco, value.	1,500
45,000 standard staves, value..	450
50,000 ft. black walnut lumber, value...	125

To say nothing of furs, raw hides, lard, hams, pork, potatoes, wheat and corn, which are also included in the list. And on page 105 of this Gazetteer the reader is informed, in the description given of Malden township, in this county, that "Tobacco has been grown in this township which has sold for 1 shilling 10½d. currency per pound, on the premises." This is equal to rather more than 37 cents, reckoning by the money of the present day.

It would, I freely confess, be a natural subject of enquiry, on the part of persons at a distance, why the cultivation of a product, which fifty years ago could be so successfully raised and find ready market in the Lower Canada of those days, should have been almost abandoned. As to this I give you my own impression, which is that the activity of demand for wheat, in days when it went to 75 cents and a dollar per bushel, led agriculturists to give this cereal the preference and cease to cultivate tobacco plants, which you may be aware require much care and tending.

In my humble opinion, the informant, or informants, of the commercial salesman whom I encountered, as I have related, were but ill-informed about tobacco in Essex, and are quite certainly astray in regarding the present active movement towards its growth, not only in Essex, but in Kent and Elgin, to be "a flash in the pan." I think the movement to have elements of permanency, the more so because of the present conditions of turbulence in Cuba, from whence so much of our tobacco leaf has hitherto come, and because of changed conditions in the Philippine Islands. So greatly have agriculturists and horticulturists in South-West Ontario been aroused on the subject of growing the leaf, that to the north of us, in Lambton and Middlesex, and to the east of us as far as Charlotteville, in the County of Norfolk, people are now setting out tobacco plants.

You have asked me, sir, further, for some particulars of the size and prospects of the tobacco crop of 1898, in our county. This I am not in a position to give. Messrs. Walker & Sons, of Walkerville, might tell you, if so disposed. There is a well-known maker of cigars in London, whose name escapes me at the moment, who has been recently back and forth through many of our townships, East and North, advising the farmers to procure plants and enter upon the industry, offering them prospects of a steady market for the leaf. He may possess some statistics, but I have none, nor can I perceive a way to get them thus early. The area grown will in this county be large. Of this I am persuaded, that ordinary skill and a little more than ordinary care bestowed upon the culture of suitable tobacco plants in this Essex climate will yield an excellent return; and I have no nervous fears of exhaustion of the soil. Restoratives can be applied to the land in this as in other cases.

Malden.

Amherstburg, Essex Co., Ont., May 21st, 1898.

FRENCH COLONIES IN INDIA.

The report of the trade for 1897 of the French Indian colony of Pondicherry has just been made public by M. Lebon, Minister for the Colonies. In the year recorded the value of the imports reached 2,601,917f. and the exports 8,694,636f. The imports showed a tremendous decline over those of the preceding year, while among exports, coffee, groundnut oil, rice, blue cotton cloths, and dried fish increased, and peeled groundnuts, indigo and saffron declined. The Colonial office has intimated that the condition of the colony was far from satisfactory. At the opening of the Conceil General in Pondicherry the other day Gov. Girod said: "Our exporting firms pay dearly for their overestimated confidence in the cultivation of groundnuts, (peanuts). During the last two years the output has failed completely. All business has been stopped, and the traffic of our port has diminished in a proportion surpassing the most pessimistic predictions. The disasters which have followed are difficult to repair." In 1896 the export of groundnuts reached 128,443 sacks; last year it was only 1,051 sacks.

—All a book agent wants is his profit, and you do not want his book. Pay him his profit and save money.—Atchison Globe.

—The St. Paul Pioneer Press talks right out: "The series of unblushing falsehoods and broken promises whereby Count Muravieff tricked Lord Salisbury in the Port Arthur and Tallenwan negotiations raises some suspicion as to the worth of Russia's promises to give equal trading privileges in Manchuria to all nations. If Russia desires to secure for England a firm and powerful ally she can do so in no way more effectively than to shut off a portion of our growing trade with China. Lying may be 'diplomacy' in Europe, but it is not the American kind, and the American people are not likely to submit quietly to being stripped of their rights by such methods." There is a strong, healthy tone to that.

—A by-law to regulate the hours of licensed hotels and liquor stores in Sherbrooke has been adopted. Its provisions are: 1. Hotel bars shall be closed from 11 p.m. Saturday night to 5 a.m. Monday morning. 2. Windows of bar rooms shall not be obscured during closed hours, 3. Liquor shops shall be closed during same hours as hotels. 4. Billiard and pool rooms, etc., shall be closed on Sunday. 5. Hotel and liquor shop keepers shall be fined $20 for violation of these conditions.

—A Tallahasse, Fla.. paper computed that whereas. at the price of cotton prevailing thereabouts for the past several years, two acres ot land planted to cotton yields only $20, the same space planted to cabbage would, at the present price of cabbages there, bring from $120 to $140. " Yet, more than 1,000 acres are planted to cotton to one planted to cabbage." it says. A ten-pound, home-grown head of cabbage sells here for ten cents

—Great Britain has a longer seacoast line than any other nation in Europe. It measures 2,755 miles with Italy second, 2,472 miles. Russia ranks third and France fourth.

—"What made your daughter weep after her wedding over those ten beautiful piano lamps?"
"She hasn't any piano."—Chicago Record.

—The homely sunflower is rapidly coming to the front as a useful article. Its seed makes excellent food for cattle, its oil is equal to the best linseed oil, its stalks are a better heat-producing product than coal, and the sticky substance which exudes from it has been made into a covering for bicycle tires.

—"Did you find the wideawake salesman you advertised for?"
"Yes, but we couldn't keep him; the only. business qualification he had was insomnia."—Chicago Record.

TORONTO MARKETS.

Toronto, May 26th, 1898.

Dairy Products.—Dealers are advising shippers to discontinue making roll butter, and as a consequence there has been an increase in the receipts of tubs. The weather has been too warm for the shipment of rolls, and a number of them have arrived in bad condition, and in sale showed considerable loss. The demand for butter is almost entirely local, and it is difficult to place quantities at prices which will yield satisfactory profits to forwarders. There is a small export demand, which is confined entirely to creamery, and this at a very low price. The quality of dairy butter shows marked improvement as a result of the advancing season, and the fact that the cattle in all districts are now in pasture. We quote dairy at 12 to 12½c. per pound, and creamery, hoxes, 15½ to 16c. per pound. The cheese market is very dull and Old Country centres are, by latest advices, "panicky." It appears that there was little upon which to base the recent advance in values, and the bottom now appears to have fallen out of the position of speculative interests, and in the reaction there has been a decline in prices. The situation is elsewhere reviewed. Egg supplies continue liberal, and dealers are anxious to get prices down to a profitable pickling basis. Values in Ontario are so low that they do not allow merchants to operate at all freely in competition with American traders. Local prices are 10 cents per dozen, and country prces, 8 to 8½ cents.

Flour and Meal.—Grade is quieter and orders for immediate shipment, which some days ago were urgent, are not to be had. Values in sympathy with wheat are lower and the general tone of the market is lacking in strength.

Grain.—The wheat market is dull and uninteresting. Crop prospects have been generally more favorable, and they have encouraged the bear speculative sentiment still latent in the trade on part of those so lately and severely punished for their disbelief in the worlds shortage of the old crop. In Ontario prospects at this time of the year were never brighter for a large yield of wheat, and the growing plant is reported in all sections of the country to be in the best condition. The latest mail advices, regarding the condition of the growing crops abroad, speak of brilliant prospects in France. From Russia the reports are in the main favorable, particularly on winter crops. The Roumanian reports are favorable. Hungarian quite favorable. Italy satisfactory, Spain favorable, Holland and Belgium favorable and Germany most promising. Peas are dull and rather weak. Oats show a decline of 2c. per bushel. Rye is nominal. Corn remains unchanged.

Green Fruits.—In wholesale circles the usual reaction after a holiday is being felt, although to a less degree than might have been expected. The Wednesday sales were moderately well attended, and prices fairly firm. Messina oranges are rather slow of sale, and Californias are in all quarters given the first call. We quote: Catania, 80s, $1.75 to $2 half box; Blood, 80s, and 100s, $2.75 to $3 half box; Mediterranean Sweets, fancy, 126s, 150s, 176s, 200s, 216s, $3 to $3.25 per box; Mediterranean Sweets, fancy, 250s, 300s, $2.50 to $2.75 per box; California Seedlings, 126s, 150s, 176s, 200s, 216s, $2.50 to $2.75 per box; California Seedlings, 250s, 228s, 300s, 360s, $2 to $2.25 per box. A fair market exists for lemons, but it is understood that the trade is keeping back all the best keeping stock. We quote: New Messina, fancy, 300s, 360s, November cuts, $3 to $3.50; New Messina, choice, 300s, 360s. $2.50 to $2.75; New Messina, 420s, November cuts, $2.50 to $2.75; Extra fancy Sorrento, large boxes, 300s, $4 to $4.50. Bananas are selling well and extra fancy fruit brings $1.50 to $2 per bunch. The trade say that business in this class of fruits with the country is showing very satisfactory increase. Pineapples are scarce and dear. In some way, it is thought, the supply available for export from Florida has been limited by the war. There is a good demand for strawberries and but very poor stock with which to satisfy it. The market is now being supplied with Maryland and North Carolina fruit, which is not of the best description.

Hides and Skins.—The market is much firmer and local prices have advanced ½c. per lb., dealers now paying butchers 8½c. per lb. for green cow hides, No. 1 Toronto inspected, and 9c. per lb. for steers. Cured cow hides are quoted at 9c. per lb. Calfskins are also higher, green being quoted at 10c. to butchers. For pelts 15c. is the market price and supplies are not very free. Sheepskins are nominal, while lambskins bring 20c. From Chicago, May 25th, we note the following: Offerings of hides were only limited, as packers continued sold up fairly close on late take-off hides. The demand was moderately active, and prices were firmly maintained. Business reported was 1,200 bulls at 9¾c. and 600 native steers at 12½c., closing at 12¼ to 12½c. for native steers, 12 to 12½c. for Texas, 10¾ to 11c. for butt brands, 9¾ to 10c. for Colorados, 10¼ to 10½c. for branded cows, 11½c. for heavy native cows and 12c. for light do.

Pork Products.—All lines of hog products are in brisk demand. There has been, since the opening of the season, an increasing sale of smoked meats. Prices remain firm at the recent advances noted in previous issues. If the present activity in heavy meats continues, and there is every prospect of its doing so, stocks of this description will be exhausted long before the new pack will be available for consumption.

Wool.—There is nothing of importance taking place in the market. Supplies of washed fleece wool limited, but the 24th of May, which is the date at which many farmers first begin preparations for the washing operation, having passed, it is likely the movement will soon be freer. No one is looking for a brisk opening of the market this year and all are content to let the market take its course and allow values to find their normal basis. The London wool sales were brought to a close on the 19th inst., with prices ruling firm, with the same strong competition that marked this sale from the opening. Carpet wools were generally dull, with prices ruling steady, but little in the way of demand coming forward. The American markets show no change.

MONTREAL MARKETS.

Montreal, 25th May, 1898.

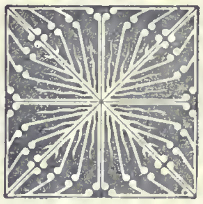
Ashes.— The market is a shade stronger, though the demand is not materially improved; the improvement is probably due to the very light receipts. We quote $3.60 to $3.65 for first quality of pots, seconds, $3.25 to $3.30; pearls about $4.75 per cental.

Cements and Firebricks.—Receipts of cements for the week are nil, and of firebricks 30,000. For cements there is a steady seasonable enquiry at steady prices, though no specially large sales are reported since last writing. We quote $1.80 to $1.90 for Belgian, and $2.20 to $2.30 for English. Firebricks $16 to $22 per thousand.

IF YOU'RE BUILDING
OR RE-DECORATING

Make up your mind
to use our

Metallic
Ceilings



One of Many Designs.

We make designs to suit any room of any building.

They are handsome in appearance and remain beautiful. You'll appreciate their superiority over any other style of interior finish, and their moderate price.

Mail us an outline giving the shape and measurements of your walls and ceilings and we'll send an estimate with full information about this popular fire-proof finish.

Dairy Products.—The shipments of cheese from this port have been quite small compared with those of a year ago. From the opening of navigation to the end of last week the exports were 24.254 boxes, as compared with 57.710 boxes for the same period of last year. Reports from the country, however, indicate that pasturage is now good and the flow of milk increasing, so that larger receipts will be looked for from this onward. Values are distinctly lower than a week ago. Quebec cheese sold on Monday as low as 6½c. per lb., and a nominal quotation for Western would be 7 to 7¼c. with the foreign demand indifferent. While cheese shipments show a falling off from last year, exports of butter are considerably larger, figuring at 3.947 packages, as compared with only 554 packages to this date last year. The market, however, is dull and rather easier, 16½c. being the extreme figure for fine creamery, and dairy rolls selling down to 12½c. per pound.

Furs.—No new features are reported in this line. There are advices of some fair lots of raw furs still in the country, and we will continue quotations for several weeks. We quote: Mink, large dark. $1.50; small, do., $1 to $1.25; marten. $1.75 to $2.25; fisher, $4.50 to $7; lynx, $1 to $2; otter, $1 to $12 for dark: pale. $5 to $7; red fox, large, $1.30 to $1.50; small, $1; cross fox, $3 to $6; bear, cubs, $3 to $7; medium, $7 to $10; large, $12 to $15: skunk, 15 to 70c., as to color and stripe: coon, 20 to 75c.; rats, fall, 7 to 10c.; kits. 2 to 5c. Beaver. not quoted, killing being forbidden by law.

Groceries.—The sugar market is showing increased strength, but prices are not advanced on spot. European cables report an advance of 3½d. per cwt. in raw beet within a few days, and raw canes are also firmer. We still quote standard granulated at 4½c., and yellows ranging from 3 11-16 to 4⅛c. in wholesale lots. Refiners report a rather slack demand at the moment, but are looking for a brisker enquiry as the fruit season approaches. The larger lot of Austrian referred to several weeks ago. is reported to be well absorbed, principally by manufacturing confectioners. The molasses market continues very strong; a broker reports the sale this week of a cargo of Barbadoes to arrive at 21c. landed gauge in bond, which is equal to 29c. net cost. There are at the moment two first cargoes of Barbadoes unloading in the harbor, aggregating about 1,500 puncheons. So far there have been bought for this market only from 9.000 to 10,000 puncheons, fully half of which is for the Canadian Sugar Refinery, for refining purposes. The tea market is quiet, but with values in all lines firmly held. Coffees are in moderate request and steady; we quote Rio 10 to 13c., Santos, 10 to 13½c.; Mocha, 20 to 24c.; Java, 20 to 24c.; Maracaibo, 12 to 16½c. Valencia raisins are very scarce, and a broker who had an order from a Western house, reports finding only one firm with any stock, and they hold layers at 6c. in quantity. Some little enquiry is noted for canned corn from jobbers, and holders are firm at 75 to 80c. Quotations for new pack of salmon have not yet been made, but figures are expected to be a little easier than last year.

Hides.—Values are wholly without change on spot, though Chicago reports indicate increasing firmness in the market there. Local receipts of beef hides are comparatively small, and are being readily absorbed by tanners, but on the other hand receipts of calfskins are larger, showing some accumulation, and dealers complain that they are paying too much for them. We quote dealers' prices for beef hides 8, 7, and 6c. per lb. for Nos. 1, 2, and 3 respectively; calfskins, 10 and 8c. per lb.; lambskins, 15c. each; sheepskins $1.10 each, and few now coming in.

Leather.—Some of the shoe manufacturing houses already report fair orders for fall goods from salesmen who are working coast points, but the majority of travellers are not yet en route, and active buying of leather has not yet set in. Values are firmly held, and the foreign demand is excellent. We hear of several Western tanners who have sufficient English orders to keep them busy for several months, and one Kingston firm is enlarging its tannery, contemplating manufacturing altogether for the British market. We quote: Spanish sole, B.A., No. 1, 24 to 25c.; do. No. 2. 22½ to 23½c.; No. 1 ordinary Spanish, 23 to 24c.; No. 2, 20 to 21c.; No. 1 slaughter, 26 to 28c.; No. 2, do., 24 to 25c: common, 20 to 21c; waxed upper, light and medium, 30 to 35c.; do. heavy, 27 to 30c.; grained, 32 to 35c.; Scotch grained, 30 to 35c.; western splits, 22 to 25c.; Quebec do., 18 to 20c.; juniors, 18 to 20c.; calf-splits, 30 to 35c.; calfskins (35 to 40 lbs.), 60 to 65c.; imitation French calfskins, 65 to 75c.; colored calf, American, 25 to 28c.; Canadian, 20 to 24c.; colored pebble cow, 13 to 15c.: russet sheepskin linings, 30 to 40c.; colored. 6 to 7½c.; harness, 24 to 27c.; buffed cow, 13 to 15c.; extra heavy buff. 15c.; pebble cow, 13 to 13½c.; polished buff, 12 to 13c.; glove-grain, 12 to 13c.; rough, 22 to 23c.; russet and bridle, 35 to 45c.

Metals.—Since last report there has been quite a considerable business done in domestic pig iron, several large orders aggregating close on to 2,000 tons having been booked for extended delivery, on the basis of about $15 a ton. In Scotch iron but little is doing. In other lines there is nothing specially new. We quote: Summerlee pig iron, $17.50 to $18; Carron, No. 1, $18; No. 3. $17.25; Ayresome No. 1, $17.50, No. 3, $16.50; Shotts, $17.25 to $17.50; Carnbroe, $16, ex-store; Ferrona, No. 1, $15; Hamilton No. 1, $15 to $15.50: No. 2, ditto. $14 to $14 50: machinery scrap, $14 to $15: common ditto, $12 to $13; bar iron, Canadian, $1.40 to $1.50; British, $2 to $2.15: best refined $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.10 to $2.15; 52 sheets to box; 60 sheets, $2.25; 75 sheets, $2.35; all polished Canadas, $2.40; Terne roofing plate, 20x28, $5.75 to $5.90; Black sheet iron, No 28. $2.25; No 26, $2.15; No. 24, $2.05; No. 17, $2; No. 16 and heavier, $2.15; tin plates—Bradley charcoal, $5.60 to $5.70; charcoal, I.C., Alloway, $3.15 to $3.25; do., I.X., $3.90 to $4; P.D. Crown, I.C., $3.60 to $3.75; do., I.X. $4.50; Coke I.C., $2.90 to $2.95; do., standard, $2.75 to $2.80 for 100 lbs.; coke. wasters, $2.70; galvanized sheets, No. 28, ordinary brands, $4; No. 26, $3.75; No. 24, $3.50 in case lots; Morewood, $5 to $5.10; tinned sheets, coke, No. 24, 5½c.; No. 26, etc., the usual extra for large sizes. Canadian bands, per 100 lbs., $1.65 to $1.75; English hoops $2 to $2.15. Steel boiler plate, ¼-inch and upwards, $1.85 to $1.90 for Dalzell, and equal; do., three-sixteenths inch, $2.50; tank iron, ¼-inch, $1.50; three-sixteenths do., $2; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to $2.50; Russian sheet iron, 9c.; lead, per 100 lbs., $3.85 to $3.90; sheet, $4 to $4.25; shot, $6 to $6.50; best cast-steel. 8 to 10c.; toe calk, $2.25; spring, $2.50; sleigh shoe, $1.85; tire, $1.90; round machinery steel. $2.25; ingot tin, 16½c. for L. & F.; Straits, 16 to 16¼c.; bar tin 17c.; ingot copper, 13 to 13½c.; sheet zinc, $5 to $5.25; Silesian spelter, $4.75; Veille Montagne spelter, $4.75 to $5; American spelter, $4.50; antimony, 9½ to 10c.

Oils, Paints and Glass.—The demand in these lines is well sustained for the season of the year. In values there are no striking changes since a week ago. Turpentine inclines to easiness though no change has been made in quotations. Linseed oil is very firm abroad, also leads. and local grinders report a difficulty in getting their orders for dry leads forward, owing to corroders having a press of business. Paris green is again firmer in New York. We quote: Turpentine, one to four barrels, 48c.; five to nine barrels, 47c.; net thirty days. Linseed oil, raw, one to four barrels, 49c.; five to nine barrels, 48c.; boiled, one to four barrels, 52c.; five to nine barrels, 51c., net 30 days; olive oil, machinery, 90c; Nfld. cod, 37 to 40c. per gal.; Gaspe oil, 33 to 35c. per gal.; steam refined seal, 45 to 47½c. per gallon in small lots. Castor oil, 9 to 9½c. as to quantity. Leads (chemically pure and first-class brands only), $5.62½; No. 1, $5.25; No. 2, $4.92½; No. 3, $4.50; No. 4, $4.12½; dry white lead 5c.; genuine red do., 4¼c. to 4½c; No. 1 red lead, 4c. to 4¼c.; Putty in bulk, bbls., $1.65; kegs, $1.80; bladder putty, in bbls., $1.80; smaller quantities, $1.95; 25 lb. tins, $2.05, 12½ lbs.. tins, $2.30. London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to $1.75; yellow ochre $1.25 to $1.50; spruce ochre, $1.75 to $2. Paris Green.50and 100 lbs. drums 17c, 25 lb drums, 17½c.; 1 lb. cartoons, 18c.; pound tins, 18½c.: window glass, $1.40 per 50 feet for first break; $1.50 for second break; third break, $3.10.

ESTABLISHED 1885.

HEAD OFFICE:
Queen City Chambers, Church St., Toronto.

DIRECTORS:
JAS. GOLDIE, Pres. J. L. SPINK, Vice-Pres.
THOS. WALMSLEY, Treas. HUGH SCOTT, Mgr. and Sec.
Adam Austin, Inspector.

This Company was organized in 1885, specially for the purpose of insuring manufacturing industries, warehouses and contents.

The primary object being to give protection against loss by fire at a minimum cost consistent with absolute security.

The system adopted has been to inspect all risk before acceptance and fix the rate to be exacted equitably in accordance with the hazard assumed.

Assurers with this company have made a saving, upwards of $108,000.00 on the current rates charged, in addition to which, on the rates exacted by us, dividends have been declared to policy-holders amounting to over $24,000.00, together, making the very substantial sum of over $132,000.00 that our policy-holders have saved during the eleven years we have been in operation.

As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please address

Millers' and Manufacturers' Insurance Co.,
32 Church Street, Toronto, Ont.

The DOMINION Life
ASSURANCE COMPANY
HEAD OFFICE, ... WATERLOO, ONT.

Authorised Capital................$1,000,000
Gov't Deposit at Ottawa 50,000
Subscribed Capital 257,600
Paid-up Capital 64,400

The Dominion Life has made handsome gains in very essential feature during 1897.

It has gained in number of lives assured, 8.2 per cent.; in cash premiums, 8.6 per cent.; in number of policies, 8.6 per cent.; in amount assured, 10.5 per cent.; in interest receipts, 16.6 per cent.; in assets, 19.0 per cent.; in surplus over all liabilities, 42.2 per cent.

No Company anywhere is safer, sounder, more equitable or more favorable to the assured in all its arrangements than the Dominion Life. Call on its agent when thinking of putting on more life assurance.

JAMES INNES, M.P., Pres. CHR. KUMPF, Esq., Vice-Pres
THOS. HILLIARD, Managing Director.

COKE AS A SMOKELESS FUEL FOR BOILERS.

Many attempts have been made to burn coke for steam purposes and many of these have failed. There is one case in which it probably will always fail, and unfortunately, this is the case which is most prolific in the production of smoke. Many boilers are entirely too small for the amount of work to be done; the maximum amount of steam must be produced in the minimum amount of space, and additional space is either too valuable to be used for power development, or cannot be obtained at all. The only way in which the owner of such a plant can supply the necessary amount of steam is to burn that quality of fuel which will give the greatest quantity of steam per square foot of grate. This is, in practically every case, soft coal, and, as it must be burned in the most wasteful way, large quantities of smoke result. Coke cannot be burned under these conditions at all, and nothing but rigorously enforced laws will abate the smoke nuisance.

As coke is very largely carbon it requires as much, and often more, air per pound of fuel to actually burn it. The fuel bed must be kept deep or it will be found impossible to maintain the steam pressure and that no fire is more difficult to bring to its proper condition after it has once become low has been the result of the experience of everyone using coke. As the latter will make a heavier clinker, the draft must be very strong after a fire begins to get dirty.

The valuable heating surface in a coke-fired boiler is that directly over the fire, as the gases will not carry flame, and tests have shown that after leaving the fire chamber proper, fifty per cent. of all the heat had been taken up.

The heating surface then can be smaller and the grate should be larger than ordinarily made for coal, which largely accounts for the reduced capacity obtained on trials.

About two-thirds as much coke as coal can be burned per square foot of grate in ordinary running. Grate openings must vary in width with the size of coke used; if the openings are 0.3 to 0.4 of the entire grate area, they are sufficient to admit the proper quantity of air, and it has often been found necessary to water-cool the grates. Boiler plates must be kept cleaner on the water side over the fire to prevent the plates or tubes from burning with the intense flame.—H. W. Spangler, in Cassier's Magazine.

BURKING THE QUESTION.

Aldermen who burk the movement to meet the reasonable demands of the Underwriters in the matter of fire protection are taking upon themselves a great responsibility. The fact must be patent to all, that the only practical scheme is the one for which provision has been made in the estimates. Its rejection means the throwing down of the gauntlet to the insurance men. If that is a wise thing to do; if we are indifferent about our insurance rating; if we can afford to tell the Underwriters to do their worst, well and good.

It is time the gentlemen who are determined to build a new fire hall, or destroy any chance of the permanent settlement of the vexatious question, should cease acting like a lot of disappointed children. A majority of the people's representatives wisely decided on a practical, economical and efficient scheme, by which the necessities of the city in fire protection can be met without incurring any debt. Provision has been made in the estimates for the undertaking, and the Council committed itself to the scheme. But a mistake of $75 in the tenders is now seized upon by the defeated minority to burk further progress.

The Herald is not concerned about the success of this or that plan. It wants some move made to save the city from disratement and bring about the last performance of that hoary farce, enacted every time the fire bell rings and the hook and ladder truck is dragged out. Aldermen who burk the present scheme know the people will not vote for a $5,000 fire hall. They know the consequence of their action will be the bringing into operation of higher insurance rates. Are they prepared to assume that responsibility?—Guelph Herald.

ARGENTINA CATTLE EXPORTS.

A detailed statement, showing the numbers and destinations of the live cattle exported, in each of the last three years from Argentina, has been issued by the Agricultural Society of Buenos Ayres. The considerable diminution in this trade which took place between 1895 and 1897 has already been noticed. We have arranged the following table so as to show the number of head of cattle exported from Argentina, firstly, to European countries; secondly, to Africa; and then to South American countries:

Destination.	1895. No.	1896. No.	1897. No.
United Kingdom	49,537	65,906	82,565
France..	1,640	3,663	3,196
Belgium..	1,945	4,401	1,985
Portugal.	371	1,444	520
Italy.	171	1,517	343
Germany.	130	1	....
Spain..	....	1	....
Africa.	....	....	334
Uruguay	158,663	130,949	52,537
Chili.	97,417	64,707	54,929
Brazil.	80,745	97,059	24,612
Bolivia.	17,270	6,626	5,647
Paraguay.	147	3,422	1,455
Antilles.	90	....	....
Other Countries.	....	2,843	....
	408,126	382,539	228,123

It is noteworthy that, though the total export has so largely declined over the three years, the export to Europe has simultaneously increased. Thus, the total receipts of Europe, which were 53,794 head in 1895, rose to 76,933 head in 1896, and to 82,565 head in 1897. This increase of 34,815 on the two years is, however, practically accounted for by the expansion to the extent of 33,028 in the imports into the United Kingdom. In fact, of the total cattle exports from Argentina, the United Kingdom took 12 per cent. in 1895, 17 per cent. in 1896, and 36 per cent. in 1897. The decline in the exports from Argentina to the adjacent countries—and notably, Uruguay, Chili and Brazil—is noteworthy, and is clearly shown in the table. We should observe that the figures given for the United Kingdom do not exactly coincide with those in our own trade returns, which show an import from Argentina of 39.494 head in 1895, of 65,699 head in 1896, and of 73,867 head in 1897. Moreover, according to El Comercio Exterior, the total export from the Argentine was 238,121 head last year, the difference probably being due to unrecorded shipments to "other countries."—Times.

THE GLASGOW FIRE.

The fire which occurred in Glasgow on the 25th April was one of the most disastrous that ever took place in the city. The loss, according to the insurances, works out at about £120,000, but probably the actual loss will be much greater.

Viewing the result, it is no exaggeration to say that the efforts of the Fire Brigade were nearly fruitless. With the exception of two tenements, which were very seriously damaged, the whole large collection of buildings bounded by East Howard St., Dunlop St., Great Clyde St., and Ropework Lane was completely destroyed. If there is evidence in this deplorable result of incapacity on the part of someone connected with the Fire Brigade, the position of affairs is serious for the fire insurance companies not less than for the public. We are compelled to say that a feeling of dissatisfaction exists, and that this fire is not the only one which has seemed to afford ground for complaint. There appears to be a want of good judgment. Too much attention is concentrated on buildings which are hopelessly lost, to the neglect of buildings which might be saved. Onlookers at a fire are inclined to applaud the efforts of firemen, and it is unusual to find them criticising adversely the arduous and dangerous work of fire extinguishing: but in this case uncomplimentary remarks regarding the arrangements were heard on all sides. We do not wish to give more weight to those remarks than they deserve, and we merely make mention of them as something quite uncommon. The expression of disapproval took a more emphatic form in one case than mere words. Sixty men and six steamers were at work, and practically nothing was saved. Should a fire take place in some dense mass of buildings, such as we have in Buchanan St., what the result might be is frightful to contemplate, in connection with similar management. Discontent is springing up, and is spreading, and we venture to suggest that a searching enquiry ought to be made.—Scottish Critic.

NICARAGUA CANAL.

Senator Morgan has reintroduced in a modified form his bill of the last Congress, amending the act incorporating the Maritime (Nicaragua) Canal Company, says the Railroad Review. The capital stock of the company is fixed at $100,000,000, the principal and interest to be guaranteed by the government, which is to have a lien on the assets of the company. The canal is to be completed under the supervision of the United States engineer officers within six years, and is to cost not exceeding their estimate of $115,000,000. A new section declares the neutrality of the canal, with a proviso that it being a necessary connection between the eastern and western coasts of the United States the right is reserved to protect it from all interruption at all times. At a meeting of the stockholders of the Maritime Canal Company, held May 5th, in New York, Charles P. Daly, Daniel Ammen, Horace T. Hotchkiss, Henry E. Howland and Robert Sturgis were elected to succeed themselves as directors of the company for a term of three years "class 1891." At a meeting of the board of directors, which followed the stockholders' meeting, the present officers, who have held their offices since the organization of the company, were re-elected: Hiram Hitchcock, president; Charles P. Daly, vice-president; Thomas B. Atkins, secretary and treasurer.

—Few people are aware, says an exchange, of the fact that in a watch they are always provided with a compass, with which, when the sun is shining, the cardinal points can be determined. All one has to do is to point the hour hand to the sun, and south is exactly half way between the hour and the figure 12 on the watch. While the sun is passing over 180 degrees (east to west), the hour hand of the watch passes over 360 degrees (from 6 o'clock to 6 o'clock). Therefore the angular movement of the sun in one hour corresponds to the angular movement of the hour hand in half an hour; hence, if we point the hour hand toward the sun the line from the point midway between the hour hand and 12 o'clock to the pivot of the hands will point to the south.

LEGAL DECISIONS.

DOMINION VS. PROVINCE.

Judgment was given by the Judicial Committee of the Privy Council on 26th ult., on the streams and lakes question submitted by the Dominion and Provincial Governments of Canada. The case was argued July 28th, 1897 Mr. Edward Blake, Q.C., Mr. A. E. Irving, Q.C., and Mr. J. M. Clark, Q.C., appearing for the Province of Ontario, and Mr. Christopher Robinson, Q.C., and Mr. Locknis, of the British Columbia bar, for the Dominion. Following is a summary of the decision on the points submitted:—

1. That the beds of the rivers and lakes are the property of the Provinces.

2. That the public harbors are vested in the Dominion, but in respect of harbors generally it is dependent on facts whether or not the harbors become Dominion property.

3. Fishing regulations seem to be divided between the Provinces and the Dominion. The Dominion has power to make regulations regarding open and close seasons, the size of meshes in nets, etc., but the ownership of the fishing privileges rests in the Provinces.

The Dominion has the power to issue licenses to parties acquiring fishing rights from the Provinces, but cannot grant monopolies.

4. The right of the Dominion to prevent or permit the erection of works in navigable waters is confirmed.

The Supreme Court decision was delivered on October 13th, 1896, on a series of questions submitted for opinion. It held practically that outside of the harbors the Provinces controlled the fishing rights in the streams.

INSURANCE COMPANY'S ASSESSMENT.

Re Canada Life Assurance Company and city of Hamilton.—At Osgoode Hall, Toronto, May 26th. Bruce, Q.C., for the company, appealed from the decision of a board of three county court judges confirming the income assessment of the appellants by the city of Hamilton at $692,000. The contention of the appellant is that the income of the company is the sum actually received by the members of the company, i.e., the shareholders, as dividends from the capital stock, i.e., 20 per cent. per annum upon the capital stock of the company, $125,000. Robinson, Q.C., and Mackelcan, Q.C., for the corporation of the city of Hamilton, opposed the appeal, and contended that the profits divided by the company among policy-holders are part of the income and liable to assessment, relying on Confederation Life Association v. City of Toronto, 24 O.R. 643, 22 A.R. 166. Reserved.

NOT A NEWSPAPER.

In the case of Slattery & Lawrence vs. R. G Dun & Co., where libel was charged by plaintiffs, a motion was made last month by counsel, on behalf of the defendants, for security for costs on the ground that the "Daily Bulletin" in which the alleged libel was published is a newspaper within the meaning of the libel Act. Mr. W. L. Scott, local master at Ottawa, has given a decision dismissing the motion, and deciding that the Bulletin published by plaintiffs is not a newspaper within the meaning of the Act.

DEBENTURES of the city of Ottawa amounting to $262,660, were last week sold at par to the Bank of Ottawa. Other tenders ranged from 96 to 99 per cent.

Summer Dress

For business the sack suit keeps well in front and in favor. It suits old men and young men and is always presentable. Of course there is much in the designing and finishing, and one always finds from season to season variation enough in cut to make one feel there is change of style. Some drapers have the happy knack of introducing their own individuality in the designing. This you will find in garments made by HENRY A. TAYLOR, Rossin House Block, and this week he is showing some specially designed business sack suits. His stock of summer weight woolens is very superior.

Mercantile Summary.

Falmouth, N S., is to have a reed and rattan factory.

The consumption of tobacco in Canada per head of the population is about two and a half pounds. In France, according to a scientific journal, it is decreasing, being at the present time about two pounds a head of the population annually, whereas in Holland it is seven pounds, in the United States five pounds, in Belgium and Germany three pounds, in Austria-Hungary two and one-half pounds.

During the two weeks ending 1st May, there were cleared for ports in the British Islands from St. John, N.B., 9,282,000 feet of deals and battens, scantling and boards, also 289 tons of birch timber. In the same period there were cleared for United States ports 3,865,000 feet of long lumber, 6,015,000 cedar shingles, 6,187,500 lath, 980 pieces of piling, and 493 cords of firewood. From the outport of Quaco went 328,500 feet of lumber, 680,000 lath, and 1,240 pieces of piling. A considerable fleet of sailing vessels is now on the way to the Restigouche, Miramichi, Kent county and Baie Verte ports for deals for the British market. Ocean freights have advanced, and steamers are hard to get.—Maritime Merchant.

Rossland is very proud of the big payment of $500,000 made the other day by the British America corporation on account of the purchase of the celebrated Leroi Mine in that camp. It is one of a series, the purchase price being three millions of dollars. The entire agreement, says the Rossland Miner, made by Colonel I. N. Peyton with the B. A. C. was cabled from London to Spokane. There were 1,422 words in the message and the cost was $570. The principal beneficiaries of the sale live in Spokane, but W. J. Harris, of Rossland, is credited with about 40,000 shares, worth at $6 per share, $240,000. The Peytons, Valentine, I. N. and W. A., are jointly the holders of $950 000 worth of stock, while the Turner interests are listed at $522,000. Colonel Ridpath is reputed to hold $230,000 worth of the stock.

Mr. B. T. A. Bell, of Ottawa, has been visiting the mining districts of Nova Scotia. He states that while there is no "boom" the mineral industries of the Province are making steady progress. The output of coal in 1897 exceeded 2,200,000 tons, being the largest in the history of this industry, while with respect to gold, on an invested capital of something less than half a million dollars, the Province yielded during the same period 28,000 ounces of gold, of a value of about $500,000. In his opinion a great future awaits the gold mining industry in Nova Scotia. Judicious capitalization and careful and skilled management were wanted. The easy means of access to the Province, the low cost of working, the cheapness of labor, fuel and supplies, and the probable permanent nature of the deposits, are good reasons why capital would find remunerative investment in that industry. Mr. Bell said that English capitalists were turning their attention to the Province and that the output would be still larger this year. The dividend-paying mines last year were the Brookfield, in Queen's county; the Richardson, at Isaac's Harbor; New Egerton, at Fifteen-Mile Stream; Blue Nose, at Goldenville; Oland, at Montague; Modstock, at Country Harbor. The Richardson has a forty stamp battery, to be increased this year to sixty stamps, and the working costs, mining and milling, are as low as $1.68 per ton.

Publishes each issue ESSAYS ON ACCOUNTING PRACTICE IN LEADING ESTABLISHMENTS in various industries; SHORT ARTICLES ESPECIALLY ADAPTED to the wants of BEGINNERS in office work; REVIEWS AND CRITICISMS of books on accounting and business subjects, written in a way to correctly describe the works; LETTERS OF EXPERIENCE from ACCOUNTANTS AND OFFICE MEN; QUESTIONS AND ANSWERS of interest to subscribers; NOTICES OF MEETINGS and BRIEF REPORTS OF PROCEEDINGS of leading ACCOUNTANTS' AND BUSINESS MEN'S ASSOCIATIONS; ILLUSTRATED DESCRIPTIONS of the BEST and NEWEST devices for OFFICE EQUIPMENT; brief EDITORIAL LEADERS ON TOPICS OF THE MONTH of interest in accounting and office circles; PORTRAITS OF EMINENT ACCOUNTANTS, with BIOGRAPHICAL SKETCHES; ACCOUNTING MISCELLANY, etc.

Monthly. $1 a year. Ten cents a copy.
ACCOUNTICS ASSOCIATION, Publishers,
262 West Broadway, New York.

Mercantile Summary.

BEFORE the Japanese-Chinese war Japan had only 160,000 tons of steam merchant vessels. Now she is stated to have 400,000 tons.

Two failures are reported this week from Arnprior, Ont. The more important of the two is that of H. W. W. Gardner, general store, who is making an offer of 65 cents on liabilities of $7,479, showing apparent assets of $10,100 in stock and accounts. The business was started in 1895 as Gardner & Brown, Gardner having been previously in business at Sault Ste. Marie, where he is reported to have compromised.——Patrick Barrett, doing a small grocery business in the same town, has assigned. He is an old soldier, who had worked some years in the sawmills, making some little savings, which he embarked in business three or four years ago.

FURTHER trouble is reported in the boot and shoe trade of Quebec city. Bouchard, Fils & Co. finding themselves embarrassed by heavy losses made by the failure of the Commonwealth Shoe Co. of Quebec, and W. J. Guinane, Toronto, have approached their creditors with an offer of compromise at 40 cents on the dollar, payable 25 cents cash, and 15 cents in four months, liabilities being about $12,000. The firm was formed only last fall, the senior having been formerly a fairly successful pork butcher.——The Commonwealth Shoe Co., of the same city, whose suspension was reported last week, has made a proposition to pay 60 cents on the dollar on liabilities of $16,000.

THE following further failures are reported from Nova Scotia, probably in anticipation of the new insolvency law in that province, which goes into effect July 1st. T. E. Henderson, shoes, Parrsboro, has assigned; liabilities being about $3,600, with assets estimated at $3,000. He previously did business in the name of his wife, M. A. Henderson, unsuccessfully.——Maxwell & Walsh, tailors, of Amherst, also carrying on a branch at Parrsboro, have assigned. Prior to assignment they gave bills of sale for $363 on stock, $276 covering horse, etc., and $130 covering three feather beds, etc.——E. F. Belter, dealing in organs, sewing machines, etc., formerly of Annapolis, has assigned.——Mrs. E. Proudfoot, milliner, Halifax, is in trouble. She made an offer of 33½ cents, which she has since increased to 45 cents. She owes $4,100, and shows assets of only $2,900.——Harkness & Sutherland, engaged in the lumber trade at Hansford and Maccan, have assigned. They confessed judgment for some $8,000, and also gave a bill of sale on machinery for $725 before assignment.

WHOLESALE TRADE ONLY SUPPLIED

Mercantile Summary.

A FAILURE is reported in the Montreal wholesale shoe trade, being that of J. C. Hemond & Co., who have assigned upon demand made by Paul Galibert, manufacturer of dongola leather. The largest merchandise creditor is a Toronto firm, and the liabilities are calculated at about $30,000. The firm has been in weak shape for some time past. Mr. Hemond failed in 1891, resuming business under cover of his wife's name. She died shortly after, and the business has since been continued by Mr. H. in his capacity as tutor to his minor children. Two years ago a compromise was effected at 25 cents on the dollar.

SOME stunning freight engines have been procured by the Ottawa, Arnprior and Parry Sound Railway. Four of them were delivered at Montreal Saturday. The engines are almost twice as large as the ordinary size, and are known as 10-wheel "Moguls," having three large driving wheels on each side, 57 inches in diameter. The cylinders are compound, and use the steam twice. Exclusive of the tender, one of the engines in working order weighs 147,000 pounds. The length of the engines and tender is 62 feet. Each engine is capable of drawing 1,200 tons of freight up a one per cent. grade at a good rate of speed.

IT is stated by a New Brunswick journal that the capacity of the Dominion Pulp Company's mill at Chatham is to be doubled, so that it will within a short time turn out 30 tons of pulp per day. At the Mispec pulp mill, says the same paper, the contractors are anxious to push the work forward with all possible despatch, so the firm asked the masons, who are union men, to work ten hours a day in order to facilitate the work, and offered to pay them for the extra work at union wages. The men refused, and the Messrs. Mooney are, in consequence, looking for non-union men who have more sense and more enterprise.

—INCORPORATION by Ontario letters patent have been granted to the Ontario Silver Co., Limited, capital $150,000, to make and deal in cutlery and electro-plated ware. It will buy out the business of Leonard McGlashan, of Stamford; E. G. Clarke, of Muncie, Indiana, and Alvah K. Potter, of Lockport, who did business at Welland under a similar name. These parties are the principal proprietors. Other companies granted incorporation are the Union Advertising Company of London, Limited; the People's Telephone Company of Windsor, Limited, to put telephones through Windsor and Sandwich, $25,000 capital; the Thomas Horn Company, Limited, $20,000 capital, for dairying and stock raising in Ontario county.

IT appears that the Royal Electric Company is disposed to stand very firmly on its rights with respect to a contract it has for lighting with the City of Montreal. The contract for the lighting of the incinerator and works at the Gregory farm having been awarded to the Lachine Rapids Land and Power Company, the general manager of the Royal Company wrote the city authorities that his company could not comply with the letter of the board asking the company to disconnect the farm from the company's circuit, for the reason that their contract with the city gave them (the Royal), the exclusive right to supply light for city purposes; consequently the company was unable to accept the board's instructions to discontinue the use of these lights, but should continue to serve the lights and be ready to serve them, as per contract. The letter was handed to the city solicitors, and thereby hangs a tale.

M. C. DICKSON, D.P.A., Toronto

Mercantile Summary.

W. H. DENSMORE, keeping a small general store at Fredericton Junction, N.B., has assigned to the sheriff. He has only been storekeeping a few months, and had previously been in the saloon business for some years here and at McAdam Junction.

MESSRS. NORTHWAY & ANDERSON have purchased the Ham dry goods stock at Chatham, and will continue the business under the firm name of John Northway & Co. This firm now conducts large dry goods stores in St. Thomas, Simcoe, Tilsonburg, Chatham and Orillia.

IT is stated by the Ottawa Journal that the Dominion Government has decided to offer Ottawa $60,000 a year in full of civic claims for a Government contribution to the city treasury. At present the Government spends the equivalent of about $25,000, so that the city will be $35,000 a year better off henceforth.

THE Brantford Carriage Company has been granted by the council of that city—or rather a committee of the council—has recommended that the company be exempt on machinery and plant for five years with the exception of school and local improvement taxes. A reduction of tax on real estate was refused, however.

AT Winnipeg court house, a week ago, F. S. Young, formerly local manager of the Globe Savings & Loan Co., was charged with embezzlement of the company's funds. There were numerous charges for different amounts, aggregating in the whole $2,346.12. Young pleaded guilty, and his lordship deferred passing sentence.

A TIME table for refrigerator cars for butter, on its line through the Eastern Townships has been arranged by the C.P.R. beginning 1st of June. Bedford, Sherbrooke, Megantic, leave Wednesday, a.m., arriving at Montreal, Thursday, a.m., leave Mansonville, Thursday and Warden, Saturday; Quebec, Wednesday. From Pembroke, on the Ottawa, the car will leave Wednesday, a.m.

THE people of Windsor want better streets and some public spirited citizens have been consulting with the aldermen about improving them. It is thought probable that a by-law will be submitted to raise money to be expended on the streets.

AN unusually bitter municipal contest was closed last week when a by-law to buy Berlin waterworks was carried by a majority of 221. The owners of the plant, Messrs. Moffett, Hodgins & Co., of Syracuse, N.Y., built the works ten years ago, and then made a ten-year contract with the town.

SAYS the Winnipeg Free Press of 26th ult., F. Cloutier's stock of clothing and boots, valued at $20,000, was sold by auction by order of the assignee. The purchaser was Mr. Finklestien, at 60 cents on the dollar. Another lot of goods belonging to Mr. Cloutier, valued at $3,500, was sold at a rate of 76 cents on the dollar.

THE estate of Quigley & Co., of Guelph and Berlin, has been wound up, and a second and final dividend of 5½ cents on the dollar has been declared, payable on May 28th. A former dividend of 25 cents on the dollar was paid some time ago, making a total of 30½ cents on the dollar. The total amount paid to creditors was $5,703. The receipts of the estate were $9,553; the total liabilities $18,699.

MONTREAL failures for the week are few. A demand of assignment has been made upon A. R. Archambault, an East-end piano dealer, but figures as to liabilities, etc., are not yet available.——A demand of assignment has also been made upon Ernest Riel, saloon-keeper, and Demoiselle Alma Paquette, in a similar line of business, has assigned, owing about $1,500.

BRIEF business careers seem now-a-days to characterize many would-be merchants. It is scarcely more than two years since A. J. Hodgins bought the bakery and confectionery stock of J. J. Bunting, at Stratford. The purchase amounted to $1,000, over half of which was paid in cash. In December last, Hodgins became cramped for money, and was obliged to mortgage his chattels. He now assigns, and the dividend will be a very small one.

RAILWAY charters given away by the British Columbia Government continue to demand good prices. The London and Vancouver Finance and Development Company is the corporation last reported to have made a nice clean up by selling a valuable concession obtained from the Legislative Assembly. After deducting lobbying expenses, the company made a profit of over £4,000 on its charter-mongering in this Province.—Rossland Miner.

"YOU may be right about the matter in question," writes a subscriber, about a matter in dispute; "It has escaped my memory, but I have no doubt you know best and will have a record to guide you. For you, doubtless, carry out in your private affairs the very good advice so frequently given as to keeping books, in that valuable journal, THE MONETARY TIMES—which we all read. In fact, we follow the instructions therein set out for our guidance in about the same particular manner as we do those found in the Bible."

A DISSOLUTION of partnership took place early in the spring of 1896, between Cronk & Tallman, boot and shoe dealers in St. Thomas. Since that time H. W. Tallman has continued the business, and in February of last year claimed a surplus of $6,000. Now it is said that E. A. Smith, a dealer in bankrupt stocks, got a bargain in his purchase from Tallman, who has made an assignment.——Frank A. Case, who removed from Arthur a year ago, and opened a general store in Wallaceburg, also took a notion to sell out his business a few weeks ago, and has since assigned.

Why is the GENDRON the Best Wheel on Earth?

BECAUSE

It has good common-sense up-to-date talking points.
It has new, distinct and attractive features.
It is unexcelled in beauty, style and finish.
It has the best in material and workmanship.
It is the most perfect in its lines and bearings.
It is the easiest and smoothest running wheel in the world.

Gendron Bicycle

It has no discarded experiments.
It does not cause ridicule by having about it abandoned devices.
For utility, speed, safety and comfort the Gendron Bicycle is pre-eminent.
The capacity, long experience and methods of the manufacturers insure a product of the highest standard.
It is fitted with the fast, lively and durable Buckeye Tire that can be easily repaired if punctured and is fully guaranteed.
Secure the delightful feeling of confidence and safety by using the celebrated Waters Brake.

The GENDRON MFG. CO., Limited
TORONTO

At Fort William, Ont., the Customs collections for the past ten months of the fiscal year 1897-1898 were $92,913.03. For the last fiscal year they were $76,898.28.

Settlement along the portage branch of the Northern Pacific is rapidly increasing, and to those who know the country as it was when first opened out, its present appearance would be a revelation.

At the annual meeting of the directors of the Lake Erie and Detroit River Railway at Walkerville, the following officers were elected: President, F. H. Walker; vice-president, Dr. S. A. King; managing director, E. C. Walker; treasurer, J. H. Walker; secretary, Henry Lye; solicitor, J. H. Coburn.

In the Senate, last week, when the bill respecting loan companies came up for its second reading, Hon. David Mills explained that it provided for incorporation by letters patent of loan companies, and also for bringing existing loan companies under the operation of the Act There were provisions to give more uniformity to the law and greater protection against failures of companies who were almost unanimous in favor of the bill.

The activity of demand for farm land throughout Manitoba and the Territories is reflected in the C.P.R. sales during the month of May. The company disposed of 43,000 acres, and all of it to actual farmers. A large number of people are getting land this year, and delegations from the United States to Manitoba are numerous. Three thousand three hundred immigrants arrived at Winnipeg during the month.

The Ottawa Journal of Wednesday says that the lumber merchants of the Ottawa Valley find it difficult at present to ship lumber for export, as they can scarcely get freight cars on the Ottawa, Arnprior and Parry Sound and Canada Atlantic railway lines. For the past two weeks most of the cars have been monopolized in carrying grain from Depot Harbor to Montreal and other points. On Sunday thirty-five special trains, composed of grain cars, left Ottawa. Some days between thrity-five and fifty special trains have pulled out.

TENDERS FOR

ST. JOHN CITY DEBENTURES.

Sealed Tenders, marked "Tenders for Debentures," will be received at the office of the Chamberlain of the City of Saint John, up to 13th June, 1898, for the purchase of Saint John City Debentures for the whole or any part of the sum of

One Hundred and Forty-Seven Thousand (147,000) Dollars

to be issued in sums of $1,000 each, under the provisions of Act of Asesmbly, 52 Vic., Cap. 27, Sec. 29, payable in 40 years, with interest at the rate of Four per cent. per annum, payable half-yearly.

The said debentures are issued by orders from Common Council of the City of Saint John under authority of Act of Assembly, which provides for creating necessary Sinking Fund for redemption at maturity.

The proceeds of said Debentures are to meet expenditures for Public Services such as the extension of water and sewerage service in several places and districts as adopted by Common Council under date of 2nd September, 1897, in the sum of $12,000. Also the extension of water supply service on western side of the harbor and the laying of a new main from Spruce Lake to that part of the city, on the said western side of the harbor, in the sum of $135,000.

First Interest Coupons payable 1st November, 1898.

If desirable these Debentures may be issued in sums of $500 each.

Not bound to accept the highest or any tender.

FRED SANDALL, Chamberlain,
City of St. John, N.B.

Chamberlain's Office, 13th May, 1898.

The shipments of wheat from the Fort William elevators last week were very large, amounting to 500,000 bushels. The receipts were 180,000, and the amount in store May 31st is only 631,000 bushels.

Copied into the Toronto World of this morning is an extract from an editorial in the Montreal Witness, expressing in more direct terms than our Montreal letter in to-day's issue ventures to do, the prevailing idea in Montreal with respect to the character of the Pied du Courant harbor scheme.

A carload of United States sheep from Vermont arrived at Vancouver on May 30th en route to Sydney, by the "Aorangi." They are to be exhibited at a great sale of stock in Sydney beginning in July. The owner expects to get $1,000 apiece. They are Spanish Merinos, but the owner, Bissell, calls them American Merinos now.

According to a Brandon, Manitoba, despatch of May 30th, the railway officials state that the "tramp" element is greatly in evidence on he trains coming from the West these days. It is not an unusual sight to see six or more of the vagrants arrive in town in a bunch. It is supposed that many of these are returning "Klondykers."

A week ago we noted that Alfred Hunt, private banker at Bracebridge, had suspended payment. Since then he has assigned to Sheriff Bettes, and although a statement of his liabilities has not yet been prepared, they will probably exceed $50,000. Over half of this sum is due depositors, who will have to wait some time before they receive a dividend, for the assets are by no means immediately available. Considerable sums have been locked up by Mr. Hunt in real estate in Toronto and elsewhere. It is evident that he could not have realized his responsibility as the custodian of trust funds or he would have been more careful in keeping proper accounts of investments and steered clear of stone quarries and the like. His method of book-keeping too, or more properly his lack of method, is not at all creditable to him. No man nowadays can expect to keep track of his affairs by using such antiquated processes. The estate will need some nursing in order to produce the best results.

—The Japanese merchant marine has increased since the Chinese-Japanese war from 160,000 to 400,000 tons of steam shipping. Lines are now organized sailing from the chief ports of Japan to China, India, Europe, America and Australia. This growth follows a change from an agricultural to a manufacturing nation. In 1872 Japan exported manufactured articles to the value of only $500,000; in 1896 exports of this class amounted to over $43,000,000 or 40 per cent. of her total exports.

—In spite of the rate war, which has now lasted nearly three months, no decrease in the earnings of the two great Canadian railways is apparent. The earnings of the Grand Trunk for April, this year, were $1,918,677, against $1,776,820 for April, last year. Canadian Pacific earnings increased in April $324,000, the total last month being $1,625,000, against $1,601,000 for the same month in 1897. Each month this year has seen an increase in the earnings of both companies. The Canadian Pacific earnings for the first four months of the year were $7,171,448, against $5,731,822 for the first four months of last year, an increase of $1,439,626. Grand Trunk earnings for the same period were $7,588,422, against $6,741,089 for last year, an increase of $817,343. The Canadian Pacific during this period earned $1,107 per mile of its mileage operated, and the Grand Trunk earned $1,873.

TORONTO, FRIDAY, JUNE 3, 1898.

THE SITUATION.

The Canadian delegates to Washington have been successful in arranging for the appointment of an international commission to settle all subjects of dispute between Canada and the United States. The agreement will go to England to obtain the sanction of the British Government. After this, the commission will be appointed, and it is thought that the first meeting may be held in Quebec, this summer, wherever the other sittings may afterwards be. In the subjects mentioned for settlement, Behring Sea and North Atlantic fisheries, the adjustment of the Alaskan-Canadian boundary, Klondyke transit and mining regulations, both countries are deeply interested, and an agreement with regard to them will benefit both. The list also includes the question of the migration of labor over the international frontier, and the wide and perhaps even more difficult question of trade reciprocity. Who the commissioners will be is in the future. It is essential that the numbers be equal on each side. We do not desire to see a repetition of the experience of 1842, when Lord Ashburton, with only Colly Grattan for his sole aid, had to face ten American negotiators with Daniel Webster at their head. Nor could Ashburton be exactly called an expert in the matters to be decided. It is essential that experts be appointed now. Senator Mills, for the boundary question is an available Canadian, as Sir Richard Cartwright would be for reciprocity. It will be essential that some trained diplomatist be found in the list.

Mackenzie and Mann have notified the Government that they will be unable to carry out their offer to build the Pacific Lake-Teslin railway, in the absence of supplementary aid from the Dominion, for which it was all along suspected and is now certain they were looking. The trend of events turned the traffic towards Skaguay, where a railway is being built wholly by private enterprise, without subsidy either in land or in money. That it is the better route for the traffic, apart from international considerations is undeniable. The road at Skaguay can be reached by water all the year round, and besides, it gives a much shorter cut to the Klondyke goldfields. The advantages in its favor recommend it to the enterprise of private capitalists and account for the favorable terms on which, from the public point of view, it is being built. This fact may well reconcile the Dominion to the non-construction, at the present time, of the rival Stikine-Lake Teslin road. To British Columbia the inability of Mackenzie and Mann to carry out their agreement will be a real disappointment, for the Province imagined that it was making a good bargain for a road that would have been of great local advantage, and for which it will now have to wait. An all-Canadian railway to the Klondyke is still a thing to be kept in view, though the pressure of urgency has, for the present, ceased to tell in its favor.

A return giving the amount of railway bonds of which the interest is guaranteed by the Government of British Columbia, is valuable as showing the terms on which the obligation was incurred. These bonds of the Nasup and Slocan road were for $647,072, and of the Shuswap and Okanagon for $49,990. To the first of these roads the guarantee extends 17 years, and to the other 20 years. The feature of the transaction which gives to the guarantee a businesslike aspect is that the bargain is not one-sided, as such guarantees often are. In return for its guarantee the Government receives no less than 40 per cent. of the gross earnings of the roads. Net earnings might have meant little or nothing; but with the gross earnings there can be no juggling. The nature of the transaction is that the Government lends its credit, instead of simply venturing the public resources for the benefit of private parties and the hope of indirect return for the public.

For superannuation in the Civil Service at Ottawa insurance has been substituted. Superannuation had been abused by every Government, though it may be in varying degrees, through enforcing premature retirements from places for which clamorous and irresistible demands were made. The demands upon the Superannuation Fund outran the amount received from the contributions of the civil servants, who became in time the beneficiaries. Perhaps this would have happened if partizanship had not enforced the retirement of men who for several years longer would have been able to perform their duties. The Superannuation Fund, at its worst, was one of the conditions of the public service, and what the Government added to the contributions of the civil servants was in the nature of a deferred payment. Five years ago reforms were made in the system, which were intended to make it self-sustaining, so that the burthen it imposed on the public treasury was rather a memory than a present pressure. But as Mr. Mulock has pointed out, there were defects in the system which required correction, notably the hapless condition of the family of the civil servant who died in harness, losing all the contribution to the fund which the deceased had made. Under the new law which provides for the insurance of civil servants, their contributions to the fund will bear five per cent., compounded half yearly. To minds prone to make comparison of those not comparable, it occurs to object: why pay five per cent. on this fund when the Government can borrow on much better terms, and when it allows only two and a half per cent. on Government savings bank deposits? In the latter case there is only a simple question of interest; in the former the difference between the five per cent. compounded and the two and a half per cent. is in the nature of a payment for services deferred instead of instant. This extra interest is part of the salary.

By a new commercial treaty between France and the United States the latter country gets the benefit of the minimum tariff of the French Republic for many products, including canned meats, lemons, oranges, grapes, apples, pears, and other fruits, cider and perry, common woods, logs, sawed and square timber, paving blocks, staves, hops, lard and its compounds. The United States on their part reduce the duties on crude tartar or wine lees; on brandies or other spirits distilled from grain or other materials, the duty is to be $1.75 per gallon; on paintings, drawings and statuary, 15 per cent.; on still wines, per case of 24 bottles, $1.25. Negotiations for a commercial treaty with England are in progress, and contrary to expectation the treaty with France has been completed first, and was proclaimed by President McKinley on the 28th May. It is classed as a reciprocity treaty and was negotiated under section 3 of the Dingley tariff law. When France had plenty of wine from which to distill brandy, Frenchmen used to say that no good spirit could be made from grain; now that the merest fraction of French brandy is the product of the grape, France seeks favorable reception abroad for a spirit which she makes from grain, and which presumably goes under the name of brandy, in virtue of more or less sophistication. Here we doubtless have the explanation of the fact that whiskey, notably Scotch whiskey, and in a lesser degree American and Canadian has supplanted brandy in most countries. The American duty on this liquor, under the treaty, is $1.75 per proof gallon. The negro, in Central Africa, gets gin for 36 cents a gallon, the sort of liquor, not a French product, on which Paris workmen in these evil days, break their fast, cheap, light wine being no longer within their reach as a daily ration.

When the war is over what will the United States retain of the possessions which, it is taken for granted, she will wrest from Spain? They are likely to comprise Cuba, Porto Rico and the Philippines. Will the United States cut adrift from the isolation which she has hitherto cherished and enter into the cares of the great family of nations? On this question public opinion in the Republic is divided, but the tide is running in favor of the expansionists. It was they who forced the war on an unwilling President, and they will clamor for the retention of all the territory occupied during the war. Their resolute audacity and strength of purpose are sure to win against an opposition which is to a great extent reduced to silence. The spirit of the expansionists is well exemplified on a cognate question, the annexation of Hawaii, committees of both Houses representing, in the face of protests of the Japanese government, that if the United States does not take the islands they will be gobbled up by Japan. On her part, Japan declares that she wants from Hawaii nothing but the due observance of a treaty under which a large number of Japanese emigrated to these islands. No doubt, if the United States is to hold the Philippines, Hawaii would be a convenient halfway house; but even so, the American opponents of annexation point out that a protected coaling station on the islands is all that is really necessary. The annexationists in Congress show the extent to which they are prepared to go when they tack on to an emergency revenue bill, born of the war, a proposition to annex Hawaii. Proceeding thus with regard to islands which have not been conquered, the same spirit would be sure to show itself with greatly increased vigor, when the question of the retention of conquests made from Spain, comes to be considered. For better, for worse, it may be taken for granted that the United States has made up her mind, though she be hardly yet conscious of the fact that she has outgrown the stage of national youth, when isolation was to her a protection and a necessity, and that she is henceforth destined to take a part in the great community of nations proportionate to her relative population, wealth and intelligence.

THE OTTAWA AND GEORGIAN BAY CANAL.

On the initiative of Mr. Poupore, the Ottawa and Georgian Bay Canal project has had an airing in Parliament. He asked the Government to guarantee two per cent. interest on $17,000,000 of the canal company's bonds for twenty years. We do not know whether the rules of the House permit private members to ask pecuniary favors of this kind in open Parliament; but if they do, the rules ought to be amended. In the British Columbia Legislature, no petition which asks a grant of money is receivable. Such requests should be made by deputation or petition to the Government, and not on the floor of Parliament.

The reply of the First Minister to Mr. Poupore's request will be satisfactory to the public. He took the ground that the Government ought not to give their sanction to the scheme unless there was evidence to satisfy them that $17,000,000 would build the canal, and that it was going to prove a commercial success. To a toll canal which would have to compete against free canals, the essential condition of success would be denied.

Would $17,000,000 do the work of construction? This is really the first question; for if the Government got entangled in a guarantee, and the first estimate of cost fell short, a demand for an increase of the guarantee would be sure to be made. The chances are that the answer given by Sir Wilfrid Laurier in Parliament is but a repetition of what has been given in private, and if so, Mr. Poupore's move was in the nature of an appeal from the executive to Parliament, always desperate, when the Government is backed by a strong majority. No new estimates of traffic and profit are likely to be presented that could satisfy any reasonable person that the undertaking would be commercially profitable.

Even if it could be proved that this canal could beat all internal rivals, it would remain to show that ocean freights would not balance the inland advantage. Many years ago, Mr. Workman, of Montreal, stated, and Hon. John Young accepted the statement, that down to the year 1854 ocean freights from Montreal to Liverpool had, on the average, been twice as high as those from New York. This disparity does not now exist, but the fact shows that the canal rates cannot be considered apart from the ocean freights.

It was, from one point of view, well that Mr. Poupore took a step which turns suspense into stern reality, even if it does prepare the funeral of a cherished bantling. If any Georgian Bay Canal were a necessity, the route now under consideration would, from the nature of geographical situation, command the preference. If no Ottawa and Georgian Bay Canal is, as we believe, destined to be built, at least in this generation, no such canal to Toronto or any other point outside of the Ottawa route will ever be possible. We have always regarded the expenditure on the little Trent Valley Canal as unjustifiable.

CANADIAN FOREIGN TRADE.

Ten months' foreign trading gives promise of an unequalled record when the fiscal year is closed next June. Returns to April 30th show the total trade to have amounted to $44,451,000, as compared with $204,435,000, an increase of $40,000,000. The imports entered for consumption, compared with the previous years, were as follows: 1898, $106,286,484; 1897, $93,498,952. This is exclusive in both cases of coin and bullion. The duty paid for 1898 amounts to $18,339,592, and for 1897 the amount collected was $16,941,691. Free goods in 1898 were imported to a value of $40,055,245, as against $33,004,891 in ten months the previous year, while the dutiable goods were valued at $62,617,083 in 1898, and $55,897,137 to April 30th, 1897. The coin and bullion imported for the ten months in 1898 amounted to $3,611,910, and in 1897 to $4,596,924. The imports for the month of April entered for consumption, exclusive of Vancouver, B.C., amounted to $10,127,634, compared with $8,395,828 for April, 1897, and while there was this wide increase in the imports, the duty collected for April, 1898, was $18,000 less than the duty collected for the same month in 1897.

The exports of Canada for the ten months, exclusive of coin and bullion, amounted to $130,090,077, compared with $102,943,632, for the same period in 1897, an increase of something like $27,000,000. Agricultural products, as was to be expected, have contributed more than half of the aggregate increase, showing a gain of $115,000,000 in value, being $13,668,000 for the ten months of 1896-97 and $28,774,000 for the same period 1897-98. This satisfactory showing is to be attributed mainly to the steadily increasing price of wheat and a revival in the flour trade. Animals and their products were exported from the country to a valuation of $6,000,000 in excess of the same period last year, while products of the mine show a $3,000,000 increase.

RECENT LEGISLATION IN P.E. ISLAND.

The legislature of Prince Edward Island, in the Dominion of Canada, past during its last session, an act to amend the Evidence Act of that province. This amendment was intended, we are told, to facilitate the collection of the tax imposed by the province upon commercial travelers, and to prevent evasions of the law imposing that tax. Under the provisions of this Act any creditor, who sells goods through a commercial traveler, and has to resort to P. E. Island courts to collect his claim for goods sold, or for promissory notes or acceptances, must prove at the trial of any action to recover, that the traveler who negotiated such sale had, at the time, a license under the provisions of "An Act to Impose a Direct Tax on Certain Classes of Traders." A circular to this effect has been issued bearing the name of Angus McMillan, Provincial Treasurer, and we have seen it in the hands of a wholesale house in one of the upper provinces.

If the people of Charlottetown, or the island of which it is the capital, choose, like the people of Fredericton and some other places down east, to adopt, and through recent more enlightened years to adhere to, such narrow and antiquated views of trade as to repel visitors and tax people who offer them goods, we can only wonder and wait. But the circular of the Charlottetown Provincial Treasurer goes farther in its statement of the effect of this law. "The provisions of said Act also apply," he says, "to all creditors seeking to prove claims against debtors under the provisions of an Act passed during the same session, intituled 'An Act Respecting Assignments for the Benefit of Creditors,'" although "the Act does not, however, apply to contracts entered into previous to the passing thereof on the 14th of May, 1898." This means, if we interpret it correctly, that if a house, in Montreal for example, sells a bill of goods to a retailer in Georgetown, Summerside, and the retailer neglects or declines to pay it when due, the authorities of the province will not assist that house to collect its justly due debt because a license to trade had not been paid to the Government. This, it seems to us, is something more than merely saying to merchants at a distance: "Keep away from us; we don't want you; we will fine and harass you if you dare attempt to sell us goods." It is virtually helping that debtor to defraud his creditors; because, if the Montreal merchant cannot produce his license the Summerside or Georgetown dealer may snap his fingers at him and make him wait for his money. This is one of the recent provincial enactments that needs revision.

ORGANIZED LABOR IN THE BOOT AND SHOE INDUSTRY.

Organized labor in Canada will not win laurels for its services to the boot and shoe industry of Ontario. Without any disposition on the part of this paper to advance sectional interests, it may be said that industrial conditions naturally favor Ontario as the centre of the shoe-manufacturing industry. The province possesses an abundant supply of bark suitable for tanning purposes and convenient to transportation facilities. No province in the Dominion has better advantages in the matter of hides, the cattle markets of Ontario standing out prominently in Canadian trade circles. The advantages of Toronto and other Ontario cities as distributing points are recognized in the number of wholesale distributing houses centred there. In a word, Ontario tanners can make leather and Ontario merchants can sell shoes, but Ontario manufacturers find it difficult, if not impossible, to convert profitably the leather into footwear.

The solution to the difficulty lies in the labor problem, which is a most important item in the cost of producing footwear. Ontario workmen will not work at wages which will allow manufacturers to follow an aggressive policy in their competition with eastern producers. The employees of the J. D. King Company have for some weeks been attempting to force the recognition of trade unionism in spite of the fact that labor leaders generally concede that trade unions can be successfully conducted only when they extend over the whole field of competition. If organized labor can equalize labor conditions all over the Dominion, then the Ontario manufacturers would consider them in the light of valuable allies rather than opponents; but until trade unionism is an accomplished fact throughout the Dominion it is impossible for any manufacturer to accept it and submit to the inevitable dictation which follows.

While the strike continues in Toronto, business that would in the natural course of affairs come to Toronto, and money which would be paid out to workingmen in this city, is going to other cities. The shoe factories of Quebec city have within recent years shown phenomenal growth. The Quebec Chronicle says that:

> The city of Quebec has now thirty-two boot and shoe establishments, exclusive of those at Levis and Lorette. They are as follows: W. A. Marsh & Co., Migner, Goulet & Garant, J. H. Larochelle, John Ritchie, Jobin & Rochette, Rochette, Allaire & Cie., successors to Rochette & Dion; J. Muir & Co., C. E. McKeen, hertofore the Adams Shoe Co.; W. H. Polley & Co., Thomas Duchaine, J. N. St. Pierre, Dominion Shoe Co., Bresse & Co., P. Boissonnault & Fils, H. Griffith, T. Schrybert, Filion & Dion, J. S. Langlois & Cie., Amos Campbell & Co., Budden, Nermette & Lachance, Migner, Boucher & Co., G. Bouchard, Fils & Cie., E. W. Woodley, Samson & Clement, successors to Leclerc & Cote; Jos. Poirier, A. Poirier & Cie., Demers & Cie., Canada Shoe Co., Victoria Shoe Co., Chas. Paquet, Frs. Berrouard, J. H. Blais. Four of these manufacturers have a capacity to turn out goods from 2,000 to 3,000 pairs per day. Five others have a capacity of

turning out 1,000 pairs per day, thirteen from five hundred to one thousand pairs, and the other five from one hundred to five hundred pairs per day.

Messrs. J. D. King & Co. have a capacity in their Levis factory to manufacture an average of 1,000 pairs per day. Thus in Quebec, according to this estimate, there are about 30,000 pairs of boots and shoes manufactured per day, and 9,000,000 per year of three hundred working days. We do not by any means begrudge the city of Quebec her prosperity, so largely associated with the production of boots and shoes, but, at the same time, it is impossible to refrain from regretting that the leaders of organized labor in Ontario have not sufficient foresight to see that western labor as well as capital, must compete with the east to make the industry a success.

WHEAT VALUES LOWER.

Conditions in grain circles have been working during the past fortnight towards a slump in wheat. Bear influences have been uppermost, and when 31st May came, which was the last day for the victims of the Leiter "deal," there was a violent fall of almost 50 cents. Local prices show an average decline of about seven cents per bushel since our last issue. Ontario winter and spring wheat are quoted 90 cents to $1, as against $1.03 to $1.08 per bush. last week, while Manitoba hard shows a decline from a range of $1.10 to $1.42 per bushel to $1.18 to $1.37 per bushel. The crop conditions in Ontario and Manitoba and other wheat-growing districts of the Dominion are described by correspondents as all that could be desired. In the Western States the present condition of the wheat crop is said to be equal in progress to anything ever developed. Seed went into the ground in fine condition, with the surface fairly dry, and with the deep frost underneath. Enough moisture was supplied to start germination, and with moderately dry weather following the plant went deep into the earth. Then came the general rain throughout the entire Northwest, giving abundant moisture for several weeks to come. Rust, it is said, is already showing itself in the fields of Kansas and Missouri, and, to a small extent, in other winter wheat States. The danger to winter wheat now lies in that direction, owing to heavy rains in the past few days. From most of the wheat countries abroad reports are received showing the condition of the growing plant to be excellent.

When Europe showed, some weeks ago, a phenomenal demand for wheat, the world was scoured for supplies, and with the high prices ruling every inducement has existed to bring out the remainder of last year's crop. The world's wheat shipments last week were 13,029,000, against 11,239,000 the previous week, and 5,705,000 last year, of which India shipped 3,016,000, against 2,136,000 the previous week and none a year ago. Russian wheat shipments (ex St. Petersburg), 4,664,000 last week, against 3,272,000 the previous week, and 2,872,000 a year ago. America is credited with having sent 4,309,000 bushels by way of export. Trafton says that last week's exports of wheat were the best of any week in 1898, and only exceeded three times, and slightly, too, 1897.

Where the decline will stop, and what will be the basis of values for the new crop next autumn we cannot say. The N. Y. Journal and Bulletin in this connection says: "If under $1 wheat is seen at the seaboard for contract grade the first three months of the new crop year, then Europe's crops will have to turn out better and be harvested earlier than now seems likely, and everything will have to favor the crop of the world to reduce the export value of wheat much under that figure the first half of the crop year. Indeed, the rest of the world, or the majority of the wheat-raising countries, will have to raise more than average crops to bring wheat below a $1 basis during the entire coming year, for never have been the reserves run so low the world over as they will be this year in the history of the trade, if statistics and authorities are anywhere near right.

CURRENT LUMBER CONDITIONS.

In its review of the features of the United States lumber market, the North Western Lumberman took a somewhat despondent tone in its issue of May 21st, which is not, however, so perceptible in its remarks on May 28th. In the first of these issues that journal said: "The quietude of trade in the east, consequent on the influence of the war on the money market and the general caution in financial and business circles which prevails, is an important feature of the general condition. With some exceptions, demand for most kinds of lumber throughout the middle and New England states is pronounced dull. At Albany, shipments into New England are fairly large; otherwise trade is unseasonably quiet. Stocks of pine and spruce at that point are said to be low for the season, especially in respect to northern spruce, while supplies of western pine are not excessive. Breaks in the Erie canal have delayed its opening, and thus shipments from Tonawanda and Buffalo to Albany, New York and other eastern points have been belated, which is being taken into account as affecting trade in the immediate future. . . . . Box lumber is still in short supply at the east, and prices are well sustained. Low grade western stock is selling relatively better than good lumber in the eastern markets and consuming centres.

"The state of business in the eastern states is having a dulling effect on the market for bulk stocks at points on the great lakes. In Saginaw valley the eastern car load trade has sunk to small proportions, and not much is moving to Lake Erie points by the cargo."

On Saturday last the report as to pine is in part as follows: "In the wholesale northern pine trade there is still apathy in respect to a liberal stocking up with this season's product of the mills. The manufacturers are holding fast for the prices they set out to obtain in the spring, and the wholesale dealers in Chicago, Toledo, Tonawanda, Buffalo and other points west and east are settling down to the conclusion that there is to be no serious break in prices. Eastern reports indicate a continuance of the dullness that settled on the lumber trade after the declaration of war in April. There has been very little recovery as yet, though a slight awakening is reported at Tonawanda, where the demand for cutting up stock, barn boards, farmers' clear, shippers, and other lines has somewhat improved. The Erie Canal was lately opened for the season, and many boat loads are now on their way eastward. This movement helps to relieve the monotony somewhat at Tonawanda and Buffalo. Reports from New England continue to indicate a weakness in the spruce trade, frames in the Boston and Portland markets having dropped from $13.50 to $13 a thousand, carrying prices of other spruce downward in corresponding ratio. In New York, trade is waiting for the war disturbance to pass over, and a new play to begin of enterprise in the building and manufacturing lines. The condition in the east in respect to the war paralysis is different from that in the west. In the interior the war has apparently had little deterrent effect on the lumber trade, except in the cities, where real estate improvement has been checked by an inability to secure loans on the security that before the outbreak of hostilities was deemed sufficient. In point of fact the lumber trade of the entire country is now dependent on agricultural prosperity, and on industries and transportation matters closely connected with such prosperity." . . . The hardwood export trade, the Lumberman continues, has not suffered so much from the war as was expected.

AUTUMN COLORS.

The color cards issued by the Paris syndicates of manufacturers indicating the different shades in which their materials will be dyed for the fall season, and the names by which the several shades will be designated have recently been issued to the trade, and we are indebted to the New York Economist for information of their contents. The color card issued by the Chambre Syndicale des Fleurs et Plumes, while applying more directly to millinery, is regarded as the most authoritative of the lists of shades issued each spring and fall. The one just issued for the fall of 1898 opens up with blues of a lavender cast. More blue, they are sure to be freely employed. Only one of these, Barbeau, was on the summer card—under the name of Cuirasse. This series includes Lavande, Jacinthe, Pervenche, Centauree, Bourrache and Barbeau. The shade National, formerly Royal, is pronounced good, though a trifle hard. Ciel is a familiar shade present in this card. The shade, Bleuet, is now named Lobelia, the former name being applied to a lighter tint. A new shade, Hussard, is clear and bright, reminding one of the Marie Louise blue of—well, many years ago. Three beautiful shades of blue are Turquoise, Olympia and Arlesienne, the two latter not included in the 1897 card. It seems safe to look on blue as an important fall color, though it will be more prominent for combinations and accessories than for costumes. The six lavender blues, three greens and three shades of a crushed strawberry cast are perfectly new. The latter are Nouveau Jeu, Cyrano and Lysiane. The greens of a cold, watery cast, Ondine, Triton and Neptune, are decidedly evening shades.

In all, there are twenty-two shades on the card that were not in the summer list, including the shades mentioned above—a pink, Trianon; a violet, Gracieuse; three browns, Biche, Castor and Mordore, and two pale greens, Aloes and Cycas, rather of the mignonette order.

Although yellow is supposed to be going out just now, the card gives the whole range, from Creme to Recamier (formerly Favorite), including Paille, Ceres, Cleopatre and Coq de Roche. As a combination, yellow will be seen, but the favor for burnt orange as a trimming has been exhausted. The geranium series runs from Corail, Trianon, Porphyre, Cactus, Parot to Arbouse, the Pourpre of 1897. This line is important, as are the two Cerise tones shown, Reine and Roi, which silk and dress goods buyers think most excellent.

Violet should not be overlooked, but in making a selection the reddish tones, Gracieuse, Ophelia and Veloutine, should be omitted in favor of the franker shades, Polonia and Iris, which were Clematite and Iris on the last card. Brown for the coming season will be more important in dress goods than in silks and trimmings. In the card Taboc, Marron and Mordore represent the standard range, while three more novel shades are Beige, Biche and Castor.

It will pay to keep in mind the lavender blues, clear violets, geranium and cerise reds, browns, grays and Russian greens. Also the two darker shades of the crushed strawberry, old-rose sort, as they indicate a new departure toward a line which took splendidly several years ago.

A card dealing specially with shades for trimmings, buttons, etc., shows prominently the yellow tints and the Cerise, Geranium, Violet and lavender-blue shades. It also contains handsome browns, together with six gray shades, giving the dark tones omitted from the card just described. These shades of gray have sold well this spring season and are ordered for fall.

The regular list of the season's shades and tints, issued by the Chambre Syndicale de la Confection et de la Couture, applies more especially to dress goods, cloaks and suits, although often employed in connection with other lines. Signs indicate that browns are to be placed in the front rank for fall, so far as dress goods are concerned. This is easily explained. Brown is suited to almost any complexion. Of the six shades of brown presented the two following will suffice: Paien, a golden brown, and Salak, which approaches a seal. In the Castor range, which should be included in the browns, there are five shades, of which Zibeline is the most desirable. Blues are regarded as likely to become second favorites as fashionable shades. It should be understood that in reviewing the card, fashion's tendencies are under consideration and not the selling qualities of colors. In the latter case, blacks would be placed first and blues second. Enee, a beautiful shade of marine blue has been much admired. Neptune, a navy, is of course included. Oriental blue, better known as cadet, has been selected as a sure favorite. Barbeau, a high shade on the turquoise order, is especially desirable for relief and combinations.

Grays have a fair show to stand third as favorite colors. Of the nine shades shown the three following will be ample: Ibsen, Bjornson and Chinchilla. The present tendency of greens is away from the bronze and toward the brighter tones. Fermiere is the best on the card, and Speranza is easily second choice, while Concombre, on the sage order, could be profitably included.

Each of the three cerise shades are recommended for immediate use, but they are rapidly losing ground. They are Libertine, Maine and Flibustier. Insulaire, a garnet; Imerne and Bouddhiste, lighter shades of garnet, are the coming reds, being deeper in tone. Regarding the yellow series, only one shade is worth consideration, and Etoile, a tone on the maize order, has been chosen.

The foregoing are thought to be the colors fashion will favor for the coming Fall. Conservatism pervades all business operations. Prominent and successful dress goods men have cut down the color range of fancy dress goods to six. Shades having yellow tints are in disfavor. Solid colors and melanges will take the lead in dress goods. Cavallotti is almost unanimously regarded as the most desirable of the dahlias, and is recommended. Cyrano is a pink shade, from which one can work out the desired tones ad libitum.

In selecting shades a basis has been given. As the card applies to several lines, generally speaking the darker tones should be selected for dress goods, the medium for combination materials, and the lighter tones for ribbons.

MODERN MONTREAL.

Coming down Beaver Hall hill from the beautiful into the more utilitarian part of Montreal, one who used to know the city intimately, ten or twenty years ago, finds some peculiar changes, which may not occur to the man who tramps his usual round up and down that most inviting avenue three hundred and thirteen days in the year. Old Zion Congregational Church has disappeared. This is no news—and the conversion of the church for a time into a newspaper office was only a change of the form of education which went on there, from religious to secular—But now even the newspaper office has disappeared, which leaves only the Baptists and Unitarians to contend with the proud "Scotch Cathedral" for religious ascendancy on the hill; and knowing the Montreal Scotchmen as I do, the ultimate ascendancy is hardly to be doubted.

But at the foot of the hill, near the Old Haymarket—which charming open space the Grand Trunk folks had the cheek to demand as a site for their offices and the city had the pluck to refuse—some new names on the left-hand and farther down strike the eye, that make us think of Dr. Kellogg's book on the Jews. That clergyman is a strong believer in the commercial skill and aggressive character of the Semitic race, and points to the inroads they are making in Europe and America, intimating that their supremacy at Jerusalem and elsewhere is only a matter of time. Go on down past the Queen's statue, past the old but still stately building that George Winks put up in the sixties, and the more modern and striking Bank of Toronto building, and look at the names on the signs in McGill street. Here are Wolf, Boker, Schultze, where used to be Donnelly, Walker, Mackay. Turn the corner into historic St. Paul street, and you have Schomann, Levi, and then Cohen, in the old gray buildings here and there, instead of Greene and Mulholland. Surely, therefore, it is not uncalled for to speculate on how far this German and Hebrew repatriation of the city is to go. The history of some American cities is interesting in this connection.

The widening of St. Paul street west of McGill is a feature that relieves the eye in a tangle of narrow streets towards Griffintown. And this brings one to speak of the site the city is offering to give the Grand Trunk Railway for their offices. It consists of a whole block on the west side of McGill, extending from William street to St. Paul, the old Phillips estate property, and is to have a street—possibly Grey Nun—opened up behind it to form a square. There seems to be a re-awakening of affection for the Grand Trunk of late in Montreal, which has so long caressed, not to say coddled, the Canadian Pacific. Maybe the former company's veiled threat of taking the offices to Toronto had to do with it. When one remembers, however, the enormous excavations and structures of the C.P.R. at the east end, and when he sees their splendid hotel facing Viger Square, now nearly finished, he is led to ask why all this expense was undertaken, and to wonder what recondite relation it all bears to the Pied-du-Courant scheme for Montreal harbor. Enquiring of different city men as to the prospect of something being done towards better berths for ocean ships near the canal basin, so badly needed, one replied:—

"That, sir, is a conundrum, chiefly political."

Another said: "For an answer to that you must go and ask Prefontaine (the Mayor), dear boy; and then go and ask Tarte. If what they say agrees, then you can put your question to the City Council and the Harbor Commissioners."

On another day I ventured to ask a person, who was neither a politician nor a joker, how it was that when the Minister of Public Works announced in the House, May 18th, that an understanding had been reached, and the wishes of the commercial bodies of Montreal as to the harbor would be respected by the Government, the same minister, on May 27th, would give no satisfaction to a deputation who went from Montreal to see him on these very harbor matters. His reply was:

"Well, you see, Mr. Tarte is a philosopher. Thought and research have convinced him that Nature intended the harbor of Montreal should be down at Hochelaga, below the rapid current. Shall he, then, as a patriot and a devout man, expend public money in thwarting Nature? No, no; perish the thought. Whatever he may have replied in the house is a bagatelle, he believes in the East End harbor scheme—and his friends."

Without speculating on what the future may do for the harbor, if the high-level plan of Mr. Kennedy be carried out, let us look at the harbor as it is. No one now doubts the utility of the Guard Pier, which, I was assured, was the only thing that saved the city from inundation at the swelling of the waters this spring. Going out towards this as far as one may, a row of ocean steamers lie delivering coal or loading wheat, while lumber barges from the west pass the locks, and clusters of canal boats are waiting for lumber cargoes to take down Lake Champlain way to the Eastern States, and grain barges are waiting to be unloaded. There are three Allan Liners discharging cargo and three railway tracks along the wharves seem lined with cars; while the piles of barrels, bags and boxes, the stream of trucks and drays, the moving mass of men and things, give an impression of just the sort of congestion, at this central point, that some of the steamship men have lately been complaining of. Blessing their horses in an excited and semi-profane manner, the carters toil up the ramps alongside their loads, while the donkey-engines of the ships deposit more loads on the groaning wharves. These ramps, it appears, are to disappear with the coming of the hoped-for high-level wharves, for in the sweet but distant by-and-bye the whole of the wharfing is to be made of the height of the present revetment wall. Virtually, it means an extension of Commissioner street one or two hundred feet towards, or rather over, the water.

Stirring slowly in the gentle breeze the familiar tri-color of the Allan Line at the tips of spars along the harbor front recalls the earlier days of that first great trans-atlantic advertisement of Canada. The vessels of this line, steam or sail, old or new, have always seemed graceful ones, which is more than can be said of some of the stiff steel tanks for coal or cattle, grim and sullen-looking in their unrelieved black, stretching in unwieldy length beyond the wharves. But the age is utilitarian, and beauty of outline or rig in a vessel must give place to carrying capacity. It is the same on the great American and Canadian lakes, witness the 4,000-ton ore carriers from Superior to Cleveland, and the "Algonquins" or "Rosedales" to Canadian lake ports. Nay, it is the same in naval architecture, where massive ugliness and strength of iron and steel have superseded the graceful wooden walls of old days.

Speaking of changes, from one's point of vantage at the Custom House wharf, what is stranger to the eye than the transformation of the great Victoria Bridge from a rectangular tube of steel to a series of girders, with a fringe of footpath and trolley track outside the main metals? With all these alterations, however, one thing remains unchanged, and that is the outline of the mountains to the south; another, the lovely islands in the great river. The clean, gray front of the harbor wall, with its background of limestone warehouses from canal basin to Bonsecours market undergoes change with time. Spaces of blue gray wall or dark roof which had fixed themselves in the memory as landmarks have become huge green or red backgrounds for advertisements of "Comfort Soap," or "Morris Beef," or "Davis Cigars," in white if not yellow letters, each the size of a shop window. Or the blues and grays have become darkened by factory smoke to a more sombre hue.

In Griffintown, and still further inland, the modernizing of the city goes on. Quaint old houses and shops replaced with new—narrow streets made wider and better—tangles of wires for fire alarm, telephone, telegraph, street railway, darkening the sky—trolleys and bicycles on asphalt where used to be cobble-stones and numberless drays. But nowhere, happily, any sky-scraping steel buildings such as metamorphose the larger American cities. Seen from the water, the noble contour of the mountain still rounds the view and brings into relief the countless spires and facades of church and convent, college and hospital against the lustrous green. The land and water view from the top of Mount Royal is still unsurpassed; but whether one looks over St. Henri and along the canal towards Lachine, or eastward where fields and trees are so fast becoming red brick houses and straggling factories, the growth of the city confounds the recollection and even plays pranks with the imagination.

"What will it be, old chap, when Maisonneuve extends clear down to Bout de l'Isle, and when the Lachine water power has filled the west end of Montreal Island with factories?" said an enthusiastic companion, who is a believer in a materialistic earthly hereafter.

What, indeed. Will they tunnel the mountain, and blast away St. Helen's, roof over the Back River and make a sluice-way of Lachine Rapids and bring Laprairie and Longueuil into the city? Well, there must still be some landmarks left. Let us hope that Mount Johnson and Mount St. Hilaire may be untouched, and that the shadow of St. James' dome will still preserve to us the Windsor hotel and Dominion Square. Montreal without the Windsor would be a wilderness indeed.

J. H.

Montreal, 31st May, 1898.

JAPAN'S NAVAL AMBITION.

The awakening of Japan in recent years, and the astonishingly energetic way in which she has set herself to enlarge her naval and mercantile fleets, finds illustration in some recent statistics of ships which she is having built in the shipyards of four countries, England, Germany, France and the United States. She has now building, at three different English yards, three ironclad battle ships; one of 15,188 tons displacement and 18 knots speed; one of 15,400 tons and 18 knots; one of 15,140 tons and 18 knots. Three armored first-class cruisers—all at the works of Armstrong & Co; two of 9,855 tons and 21½ knots each, and one of 9,906 tons and 20¾ knots. Besides these large vessels eight torpedo boat catchers of 31 knots and 316 tons displacement are ordered from England.

There are building for Japan in France one armored first-class cruiser of 9,460 tons and 20 knots, and one armored second-class cruiser of 4,227 tons and 22½ knots per hour.

In Germany, one armored first-class cruiser, "Yakumo," of 9,800 tons displacement and 20 knots speed, at works of Vulcan Company.

She has under construction in the United States, two armored second-class cruisers; one at Cramp's works, "Kasagi," of 4,980 tons and 22½ knots speed, and the other, "Chitose," at Union Iron Works, San Francisco, of 4,840 tons and 22½ knots.

Here we have a total of 111,273 tons of ships of war; and it is noticeable that the stipulations of the Japanese Empire with respect to speed are exacting. Not one of these huge vessels is to have less speed than 18 knots, or say 21 miles per hour, and the torpedo catchers are to make 36 miles within the hour. There are seven first-class armored cruisers and three ironclad battle ships. Her experience at sea against China has taught her something.

For the mercantile marine of Japan there are building in England twelve vessels, nine of which are on orders from the Nippon Yusen Kaisha (the great shipping company of Japan), and three on orders from the Oriental Steamship Company. The aggregate tonnage of these vessels, all of which are to be finished before the end of the present year, is 42,300 tons. Four of them are of about 6,000 tons each, three of 3,500 tons each, two of 2,500 tons each, and three of 1,000 tons each. At the beginning of last year her mercantile marine consisted of 621 vessels of 387,500 tons; 448 of these were steamers. This does not take into account the native craft, which are very numerous.

TORONTO GENERAL TRUSTS COMPANY.

This company has passed its sixteenth year, and contrives to add to the volume, and apparently also to the variety, of its business. The list of capacities in which it acts—as committee, liquidator, guardian, administrator and what not—it is now-a-days used as a trustee and an investment agent. Twelve hundred estates are in its hands, and the aggregate of the business the company looks after is fifteen millions of dollars. It is not unnatural to enquire why, with the handling of all this enormous sum, cannot the company earn more profit than $28,039, which is all it had to divide in 1897? Portions of the report and of the president's speech afford answers to the question.

Partly because its business has to be done at low rates of compensation, for the reason that there are now half a dozen concerns in the business; partly because the margin between the rates the company pays for money and the possible return from it is narrow; partly because some losses on real estate transactions have been written off. With this company, as with other business associations or individuals, it has likely been found the case of late years that it is necessary to do more work now-a-days than formerly and to take less pay for it. In the transactions of a concern such as this it may very naturally happen that some dozens or scores of small estates of $10,000 passing through its hands cause vastly more trouble, clerk-hire, traveling and other expense than estates of $500,000. And yet in the one case the company may charge a large fee, and earn it, where in the other it may have to take $200 for work that cost it an expenditure of $350.

We believe that the company's methods of administration are business-like and well systematized, and there is evidence that its treatment of real estate and land mortgage transactions is not dilatory or timid, but vigorous and effective. With such a board of directors nothing else could be looked for, since they are experienced in a great variety of businesses and are none of them inactive men. We observe that the only change made in the directorate is the substitution of John Bell, Q.C., for Hon. Richard Harcourt. The officers are the same and the inspection committee of the board is re-appointed.

NORTH BRITISH AND MERCANTILE.

Doing business all over the world, keeping up its traditions of careful management, working quickly on for some ninety years steadily enlarging its business, it is perfectly natural to find the North British and Mercantile Insurance Company adding year by year to its surplus. The addition made in 1897 to its fire funds was £151,337, and the amount carried as profits of that year to its life reserves, £418,038. These amounts are in pounds sterling, by duly translating which into dollars, viz., $2,846,000, we on this side the Atlantic get a better idea of the sum. What must be the resources of a concern who can add to its reserves from the business of a single year nearly three millions of dollars? the balance sheet gives them. At the beginning of this year this great company had over fifty-two million pounds sterling (£52,112,204 17s. 2d).

The business of the company is conducted with prudence, likewise with skill. Its business in the United States brings an income of half a million sterling, and its premiums in Canada are creeping up towards half a million dollars annually. They were last year $431,093. The loss ratio on the company's whole fire business was 56.46, the premiums last year being £1,433,829; the losses, £809,605; the commissions, £241,816; the expenses of management £242,912. To quote from the London Review, of May 11th: "It has been said, 'Happy is the nation which has no history;' so it may be said, happy is the insurance company which, transacting enormous business, is never heard of in the shape of contentious correspondence or argumentative explanations. Its shareholders may rise up and bless the manager. The North British and Mercantile is not heard of in this way, but, to use a well-known American expression, it is 'sawing wood' all the time, and whether it is in Great Britain, the United States, or any other quarter of the globe, the name of the company is sufficient."

LA BANQUE DU PEUPLE.

At the gathering, which was a large one, of depositors in La Banque du Peuple in Montreal the other day, the manager read a comparative statement of the financial position of the bank in May and in last November. This showed the total assets and liabilities to have been as follows:—

	1st May, 1898	1st Nov. 1897
Assets	$2,579,155	$3,146,819
Liabilities	1,828,793	1,912,976

The manager proceeded to explain the shrinkage in assets and diminution in apparent surplus. The bank had been realizing, and selling what might be called bad debts and poor assets in the shape of old notes, etc., and the difference between the face value of those notes, etc., had to be carried to profit and loss. Mr. Grenier, the chairman, referred to the amount of $1,000,000 worth of notes overdue, held by the bank and given as assets. Of course the bank could not hope to realize the face value of these notes. As to the real estate, the same remark applied. The bank premises were valued at $300,000, but the best offer made for them was $150,000.

The pension of $2,000 a year which had been voted by the bank in its prosperous days to Mr. Trottier, the retiring cashier, was called in question by a depositor, who was informed that the pension was now being contested in court. If it were decided that the bank must continue it, that pension would be capitalized and the capital amount credited to Mr. Trottier, according to his age, his claim being privileged equally with, but not more so than, those of the other creditors. Although Mr. Trottier is a debtor of the bank for a large sum, the pension, being for maintenance, cannot be seized.

The statement of the bank's financial position on the 1st of this month, compared with that on Nov. 1st last, is as follows:

LIABILITIES.

	1st May, 1898.	1st Nov., 1897.
Notes of the bank in circulation ..	$19,033 00	$20,898 00
Balance due depositors	1,802,409 43	1,884,665 54
Balance due to other banks	5,439 53	5,439 53
Unclaimed dividends	1,911 12	1,973 87
	$1,828,792 08	$1,912,976 94

ASSETS.

	1st May, 1898.	1st Nov., 1897.
Specie	$6 10	$11 69
Dominion notes..................	127 00	9 00
Circulation guarantee funds	23,525 00	23,525 00
Notes and ch·ques of other banks..	657 89	561 92
Deposits in banks	84,526 52	62,126 71
Current loans and discounts	224,057 54	478,203 68
Debts and notes overdue..........	1,036,956 30	1,446,952 81
Mortgages	50,055 38	51,689 50
Real estate........................	730,988 99	754,172 47
Bank buildings	311,854 70	323,144 89
Debentures, etc.	116,400 12	6,421 37
	$2,579,155 54	$3,146,819 04

AN OLD-FASHIONED COUNTRY STORE.

Kennebunkport, Maine, has an old-fashioned sound, linked in one's aural memory with Kennebec or Androscoggin, suggestive of fishing schooners and garden sass, of "Hank" and "Silas," of yarns and reminiscences. It looks out on the broad Atlantic towards Cape Cod and the classic Isle of Shoals, and is not many miles, as the crow flies, rom Portland. This village, apparently, has been chosen by an American artist for the scene of a very attractive picture, entitled "An Old-Fashioned Country Store," reproduced in lithograph, and published by Chase & Sanborn, the well-known coffee merchants of New York and Montreal. A simple, natural, every-day scene it is, true to its homely title. Relieved against a background of shelves and brown wall is a group of typical Down-Easters surrounding the stove of the country store. This stove is set in a sort of foundation of sawdust, boarded in, which makes a handy receptacle for the tobacco juice of the loungers. None of them is a smoker at the moment, but presumably they mostly chew.

One, the quaintest of the four, sits on an up-turned butter keg, his sharp New England profile toward you; long wrinkled neck, gray chin-whiskers and large ears. His faded green surtout coat hangs upon his loose frame as if it might have fitted him once upon a time when he was younger. His cap, of a dusky gray, has a flap tied above the peak, but giving evidence that it may be to cover ears and neck in heavy weather. We should name him Josh, at a venture; he sort o' looks like it. Exactly the color of the owner's trousers is the bull pup stretched on the floor beside him—but this may be a mere co-incidence. The little basket by his side indicates that he has been buying some "fixins" from the storekeeper.

At the other side of the stove is a small man on a rickety high-backed chair tilted from the fire, in approved American style. One feels impelled to call him "Deacon," a white beard and wrinkled face with twinkling eyes giving token of placidity and quiet shrewdness. One of the occupants of a "settee," or high-backed bench, has his legs crossed and one foot braced against the stove-board. So far as a bushy beard allows his lower face to be seen, he is busy in two directions; for one thing, he seems to have a quid in his jaw: for another, he is certainly whittling a pine stick, and the shavings from it are in evidence. Beside him is, perhaps, the oldest man of all, whose white hair and beard surround a dignified and ruddy face, but whose weary blue eyes give him an air of sadness. A cane grasped in either hand indicates that he is lame. It would surprise no one to hear this handsome but pathetic figure greeted with the reverend title of "Father."

One can only guess, and in all likelihood guess in vain, at the subject of their conversation. From the time shown by the octagonal clock on the wall, a quarter to four, it is, in the parlance of the locality, "gittin' along towards evenin'"—for to primitive, early-rising folk such as these, five o'clock was, as it has in later days grown to be among fashionable people, the proper time for tea.

Speaking of tea, there is a chest of it on the counter of the little shop, and it forms the topmost article in a pile of other stuff, a bundle of dried codfish surmounting all. The nearest shelves are full of bottles of catsup, packages of corn starch, boxes of sardines, tins of canned goods," bars of soap; while the higher ones contain delf in the shape of large jars and small jugs. On a pile of boxes near the door stands a "nest" of wooden pails, colored blue, red and green. Above these hang tarpaulins and sou-wester hats. The window, whose small panes are admirably clean and the frame free from cobwebs, has suspended in it stogy boots, lanterns, corn-whisks, and so on.

Bu it is high time to take notice of the storekeeper, who stands farthest away from the looker-on, with an air of preoccupation on his business-like countenance, pouring something from a tin scoop into the pan of the grocery scales. If one may judge of the man from his arrangements and his dress, he is a tidy merchandiser, for the shop is clean, the man is clean, his clothes are spruce. He wears a collar and necktie, which none of the other persons in the scene do, and his sandy hair, as well as goatee and moustache, are neatly brushed. We conceive him to have somewhat the look of a Sunday school teacher on a week day; that air of downright uprightness of speech and deed which on one occasion induced the following brief obituary of a Hoosier merchant:

> "Here lies JOHN SMITH. He wuz a gud feller, an' never cheeted. He haint never ben known to put sand in his shuger altho there wuz a sandbar rite clost to his house. An' he never putt no water intoe his licker, altho' the Ohigho River run right apast his door. Peece to his remanes."

What, we wonder, could be the topic of these four men's talk that New England afternoon? Was it a storm on the Maine coast? Was it the Boston fire of 1873; Or is this a scene of the long-ago during the Civil war? Perhaps, after all, the gathering was merely the outcome or forerunner of a town meeting; it could hardly be anything so trivial as a horse race. There is no indication in the faces or attitudes of the group to denote a subject so serious as a Presidential election being discussed. That the discussion was a quiet one is plain from the unexcited air and attitude of everybody. Nay, there was not even noise enough made by the party to disturb the slumber of Josh's dog. At all events, the scene is a delightfully natural one in An Old Fashioned Country Store, which must appeal to the recollection of many in both Canada and the United States, who has witnessed just such scenes in just such places. There is truth to Nature here—and that is what pleases the average man in a picture.

It is due to the painter of this homely, wholesome picture to notice the skill with which he has made use of the bright advertising cards and labels distributed about the shop to relieve the prevailing low tones of its interior. In fact if the painting has a fault it is the prevalence of gray tints. "FRESH BUTTER," in blue and black; "TRY OUR COFFEE," in red and blue; "ENAMEL SOAP," in white and pink, and various labels in shades of green and bronze and copper color relieve the grayness of the barrels and the leadenness of the stove and pipes. Nor must we fail to note the enlivening effect of the Deacon's lilac trousers and the blue of his kerosene oil-can on the floor in the foreground.

Typical faces and figures, these; portraits, we should not wonder. And if a Boston lithographer could make so satisfactory a copy, what must the original be like? Abbott Graves, of Kennebunkport, THE MONETARY TIMES salutes you as an artist, who, as Artemus Ward phrased it, could even "throw some soul into a line fence."

THE HEMP MARKET STRONG.

Among the commercial effects of the Spanish-American war has been the sharp advance in the price of rope. Sisal rope is now quoted 9¾ cents, and manilla is on a basis of 11 cents per pound. A month ago sisal was quoted at 7¾ cents, and manilla 8¼ cents per pound. Values have been forced up by several causes outside of the present belligerency. First, there is the blockade at Manilla, which threatens to shut off the supply of manilla hemp from the Phillippine Islands; second, the unusually heavy crops in agricultural countries, creating an active demand for binder twine, and third, the short crop of sisal in Mexico. These factors combined have caused a rapidly advancing market. The strength of hemp has been marked during the past year, and within that period prices have in the case of Manilla advanced 100 per cent., and in sisal 150 per cent. in primary markets.

WITH THE DRY GOODS TRADE.

The Willimantic Linen Company is to become part of the American Spool Combination.

Toronto men's furnishing stores have within the past two years made wonderful strides. A number of them now occupy the best sites in the retail centre of the city, and have most handsome display windows.

At Liverpool, on June 1st, spot cotton was in limited demand, prices lower; American middling, fair, quoted 4 1-32d.: good middling, 3¾d. In New York on that day, spot cotton in the local market closed very dull, with quotations unchanged, on the basis of 6 9-16c. for middling upland, and 6 13-16c. for middling Gulf.

The tendency of Paris to adopt lighter shades of a color than are preferred in the United States accounts for the omission from the Fleurs et Plumes card of the more sombre shades of blue, gray and brown. The difference in taste must be considered in making a selection of colors, the Paris lines being followed, but in darker tints of the various hues.

Ribbon trade is active in Boston, and fairly so in New York. Velvet ribbons continue in excellent demand, both in black and colors, with nearly all shades scarce. Double-faced satins and satin and gros grain still lead in the demand, with some inquiries for taffetas and moires. Fancy ribbons continue slow and are hard to move except in the low-priced grades.

Our Montreal correspondent writes that there is a satisfactory feeling in wholesale dry goods circles of that city, proceeding from the fact that their customers paid unusually well in May and on 1st of June, and also from the circumstance that recent fine weather has made demand good, both in warehouse and on the road for light dress fabrics and other summer wear. Retailers in Quebec, as well as in Ontario, seem to feel hopeful and cheery over the good prospects for the crops.

On Monday and Tuesday last, in New York, the market for foreign merchandise of a textile character was as a rule dull. The value of foreign dry goods imported last week showed a decrease compared with a year ago. The imports so far this year are $42,708,288, against $61,723,048 a year ago—a decrease of $19,014,760; and value thrown on the market $40,527,909, against $66,811,894 a decrease of $26,283,985. A New York importing house told the Bulletin on Monday that their orders for foreign woolen goods in both dress goods and men's wear fabrics had (for fall) been disappointing up to date, being much below the average of recent years, and they believed that their experience was not at all a singular one.

Chabrieres, Morel & Cie, of Lyons, in their circular bearing date of May 6th, 1898, report the state of the market in that district as follows: "The outbreak of war between the United States and Spain has, of course, spread an uneasy feeling on the silk and the silk goods markets. The prudence of European and American buyers, the rise of the Italian exchange from 106 to 108.50 lire, and the approach of the crop, have influenced prices unfavorably; nevertheless, quotations have not given way beyond .50f. to 1f. on Cantons and 1f. to 2f. on the other descriptions. It seems as if political events were not likely to exercise any deep influence on consumption, so that the future of prices will probably depend upon the outturn of European and Asiatic crops. In France the cold weather of April has on some points checked the vegetation, but in Italy and in Syria prospects are very favorable both as regards the growth of leaves and the abundance of seeds. It is, however, too early to make forecasts, the more so as the crop in Europe will be late this season."

FOR GROCERS AND PROVISION DEALERS.

St. John, N.B., is still discussing the possibility of a pork factory for that city.

We hear of the shipment from Japan for Montreal houses of new picking teas. They are expected to arrive about mid June, and will probably cost 23 to 25c Prices of other sorts are steady.

Greater volume of cheese export is shown by the returns from Montreal. The total shipments for last week were 31,380 boxes, against 26,300 boxes during the same week of 1897. Butter also shows a gratifying and still larger increase in foreign export. The shipments last week were 3,105 packages, which compares very favorably with the 355 of last year, like period.

A letter from Sicily regarding shelled almonds states: "We have had lately a revival of the demand for prompt, as well as for full shipment, and the advance has made further progress. Buyers have already paid 68s. for prompt and 65s. 3d. for October, and even at these figures sellers are wanting, but there are still buyers at these prices. Sicily filberts on the spot are practically exhausted, with the exception of small remnants in strong hands. For new 41s. is demanded for October shipment."

A letter from Smyrna, dated May 10th, says of the fruit crop prospects: "Owing to abundant rains the prospects of the vines have much improved, and the fears temporarily entertained of drouth have been dispelled. With a continuance of favorable weather during the next month or two a good yield would be assured. With regard to figs, the damage has been due to the winter frosts, and the present rains may improve quality, but cannot contribute in any great measure to an increased production."

Hamilton is without grain elevator accommodation. The Spectator says: "A number of citizens are interesting themselves in the matter, and purpose to do something toward securing the erection of a grain elevator here. It is to be hoped that they will succeed. No city can do business in competition with its neighbors unless it has the conveniences, and the sooner the citizens of Hamilton provide themselves with grain elevators, stock yards and similar necessities for the carrying on of trade, the better it will be for Hamilton."

It is stated, and apparently upon good authority, that the Ogilvie Milling Company had purchased the oatmeal mill of Stephen Nairn, at Winnipeg, and would considerably enlarge the mill. The mill just purchased in Winnipeg is quite a large one, but Mr. Ogilvie, it is said, will double its capacity, and bring it up to date by the introduction of a number of improvements in machinery. At present the largest and the best equipped oatmeal mills in the world are in Iowa, and a representative of the Ogilvie interests will visit that state for the purpose of adopting any suggestions that may present themselves through an inspection of the mills there. The enlarged mill will give employment to a large force of operatives, and add considerably to the industrial life of Winnipeg. The output in oatmeal will enter into competition with that of American mills in foreign as well as the domestic market.

LIFE INSURANCE ITEMS.

Speaking of the appointment of Mr. R. H. Scott as superintendent of two departments for the western district of the Excelsior Life's business, the Stratford Herald notes that this company is opening a branch office in that city over Mr. Marshall's new store, south side of the market square, which the company is having nicely fitted up.

The annual meeting of the Ontario Mutual Life Assurance Company was held on May 26th. We have not seen their report for 1897 yet, but are told that it was considered by the meeting a very satisfactory one. Representatives, directors, and policy-holders of the company were present from Toronto, Ottawa and other parts of Ontario.

At the Hammond trial the other day, for the murder of his wife, Mr. Osler put the case briefly and strongly. He said: Prisoner bought a bottle of prussic acid on the morning of March 6. On the evening of the same day Katie, his wife, insured for $5,000, died from the effects of poison by prussic acid. "Her death meant $5,000 for that man," said Mr. Osler, as he pointed to the prisoner. The jury found Hammond guilty, and the judge sentenced him to be hung on September 15th. No one that we have heard of entertains doubt that he is guilty of murder, and no sympathy can be felt for him. May this be a lesson to insurance murderers.

Here is a new dodge, to prevent members of assessment insurance societies growing "tired," or taking alarm when the hat is passed round too often. It is announced that a new method of levying assessments has been adopted by the Supreme Chapter of the Royal Arcanum, at its recent meeting in Cleveland, Ohio. This scheme provides for an emergency fund of about $500,000 a year, and does away with the cutting down of certificates in amount year by year after the holders reach the age of 60 years. Each of the 196,000 members of the order will also pay a yearly assessment of 80 cents to meet the running expenses. That is to say, it is expected, or believed, or hoped that they will pay this. If they don't it is all the worse for the Arcanum or the Arcanians.

MISPLACED ECONOMY.

Economy is a proper thing, but economy may be carried to a pitch which results in mere disgusting parsimony or stupidity. In a department of his paper entitled "Office Juniors," the editor of the New York office magazine, entitled Accountics, encourages young bookkeepers or clerks to ask questions, to which he gives replies, or on which he makes comments. One very smart Alec in Cleveland wrote some time ago asking why the salutatory phrases in business letters, such as "Dear Sir," at the beginning, should be used, and why it is necessary to say "Yours Truly" or "Sincerely Yours" before a signature. Such things "have always looked to me as a waste of time and space," says this youth, who clearly belongs to the Gradgrind family. And then he actually goes into a calculation of how much a man could save—some cents a month, no doubt—by leaving off such useless, old-fashioned courtesy. It is agreeable to find that the editor has but little sympathy with a person who would reduce everything in this life to a dollar-and-cents level. He replies, and we thank him for so doing: "There is a certain courtesy in the salutation 'Dear Sir,' and it is only by its omission that the writer of a letter becomes curt and insulting. There is a manifest appropriateness to the ending of a letter when we write 'Yours truly,' or 'Sincerely yours,' because only by words so placed and used can we put on record our frame of mind when inditing the communication. However much we may look at the utilitarian side of the question, there is something graceful in these features of business correspondence."

ANSWERS TO ENQUIRERS.

Down East Canuck, Brockville.—(1) Those special taxes were done away with in the United States by an Act of July, 1870; (2) The public debt of the United States, as we find it set forth in the Banker's Magazine, was on the 1st May this year, as follows:—Aggregate debt, $1,798,550,207; total debt, less cash in the Treasury, $1,018,432,652.

R. R. S., Montreal.—Very true, the subject is of interest at the present time. But we gave, in The Monetary Times of April 29th, a lengthy description of the trade of Spain, in which you may find (page 1,427), answers to some of the queries you suggest. Probably the official figures of the 1897 trade are not yet made up; but the total trade of Spain for 1895 was $317,185,000. According to the report of Mr. Bartleman, U. S. consul at Malaga, the total of 1897 was $332,262,000. Her biggest share of trade was with France, namely, 31 per cent.; next, that with England, 22 per cent.; next with Cuba, 10½ per cent.; next with the United States, about $20,000,000. These refer to the 1895 trade.

Enquirer, City, encloses us a printed notification to a man whose name appears on the books of the Supreme Legion Select Knights of Canada, asking him to pay some ten dollars for as many assessments on members of that concern during 1897. "Enquirer" desires to know from us whether the man is liable for these calls. Of course we do not know what steps he has taken or can take to cancel his connection with the Supreme Legion of these Select Knights. If he is still a member—and up to May, 1897, he had admittedly paid calls—it is our opinion that he will have to pay. The very formal and peremptory circular from the High Court of Justice, Ontario, that accompanies the notice, tells Mr. Blank that as the corporation of the Select Knights is in compulsory liquidation, the local master will settle at St. Catharines, on 16th June, who the debtors and contributories are. And if the assessed person is not disposed to pay, he must appear before Mr. B. J. Leubsdorf, the Interim Receiver, by the 9th June, or give him notice that liability is disputed. If not, the person may be sued, and judgment recovered. It might be well for some thousands of others in fraternal societies to inform themselves of their responsibilities in connection with bodies which, though possibly neither "Select" nor "Supreme," have still been formed with an honest purpose to do good to the brethren. The trouble is that many of these concerns go too far when they attempt insurance.

BOOKS RECEIVED.

National Bulletin of Charities and Correction.—This is one of the quarterly publications of the National Conference, now grown to 1,200 members, on the subjects indicated, and is dated May. Most of the American States and Canadian Provinces are represented n the membership.

Life Insurance Chart for 1898.—This handy and valuable compendium of the fire and industrial assurance business of United States companies for the year 1897 is just out. It gives not only the income and outgo of the different companies in the various States, but a resume of the business of United States companies done in foreign countries. It is published by the Investigator Company, Lasalle street, Chicago.

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, June 2nd, 1898, compared with those of the previous week:

Clearings.	June 2nd, 1898.	May 26th, 1898.
Montreal	$14,405,936	$10,928,631
Toronto	8,895,471	6,291,447
Winnipeg	2,087,557	1,792,048
Halifax	1,133,331	1,044,506
Hamilton	656,204	543,254
St. John	465,451	521,244
	$27,643,950	$21,121,130

Aggregate balances this week, $3,892,205; last week, $2,836,208.

—An exchange points out a misapprehension under which farmers rest when they oppose the making of good roads, because they think that riders of bicycles alone will profit by them. The convenience of bicyclists, we remark, is but a minor—though not a small—feature of the movement in favor of improved country roads. And the farmer is short-sighted if he does not see that agriculturists who use the roads to take their produce to market need good roads most of all. It is true that in providing good roads the cyclists are also benefited, and that is why the latter are so interested in farmers obtaining their rights in this direction. Anyhow, the argument is a dog-in-the-manger one to use, that we will oppose improvement because somebody else is going to benefit by it.

—A letter which appears in our correspondence column, written last Saturday from St. John's, Newfoundland, by a special correspondent of The Monetary Times, illustrates the facility of reaching the island now possible as a result of the building of the railway across that important colony, and the providing of a swift steamer between Sydney, Cape Breton, and a port at the southwestern part of the island. We have some further information about the Newfoundland of to-day, which we hope to lay before our readers presently.

—We are informed that the figures in the April Bank Statement opposite the name of the Merchants Bank of Canada, under the heading, "Deposits by the public, payable on demand," should have been $3,645,424, instead of, as they appeared in the Government statement and in our columns, $3,045,424.

—Preparations are going on for the opening in the City of Quebec of a branch of the Bank of Hochelaga. Mr. Arthur Bruneau, who is to manage the branch, has reached Quebec with his family. The office, which will be open this week, is in the Tache block.

—The Merchants Bank of Canada has now branches in the Territories and in Manitoba at the following points: Edmonton, Alberta; Medicine Hat, Assiniboia; Neepawa, Souris and Portage la Prairie Manitoba.

Meetings.

TORONTO GENERAL TRUSTS COMPANY.

The sixteenth annual meeting of this company was held at its offices on the 23rd May, Mr. John Hoskin, Q.C., LL.D., the president of the company, occupied the chair, and among those present were Sir Frank Smith, W. H. Beatty, E. A. Meredith, W. R. Brock, R. Jaffray, Samuel Alcorn, T. Sutherland Stayner, James Henderson, J. K. Osborne, H. S. Howland, Alfred Hoskin, A. P. Burritt, Æmilius Irving, Edward Galley, J. G. Scott, A. B. Lee, F. C. Jarvis.

Mr. J. W. Langmuir, the managing director, acted as secretary, and submitted the usual statements, showing the operations of the company for the year ended 31st March, 1898. He also read the sixteenth annual report of the company, as follows:—

REPORT.

The directors of the Toronto General Trusts Company beg to submit their sixteenth annual report, which, with the accompanying financial statements, show the operations of the company for the year ended 31st of March, 1898.

The new business committed to the care of the company for the year amounts to $2,569,825.48, being the largest aggregate, both in value and in the number of estates, of any year in the company's history.

The very varied character of this large volume of new business will be better shown by an examination of the following summarized statement, namely:

Administrations	$162,397 46
Administrations with will annexed	30,190 00
Trusteeships	572,081 93
Executorships	188,679 99
Guardianships	60,077 39
Receiverships	54,500 00
Estate management agencies	236,323 88
Liquidatorships under Winding-up Act	1,100,000 00
Committeeships	21,787 02
Sinking fund management	30,000 00
Investment agencies	113,787 81
	$2,569,825 48

In addition to the new business thus summarized the company has, during the year, been appointed trustee for the issue of bonds and debentures for a large amount, as well as for the performance of other duties, which may ultimately lead to permanent work.

Notwithstanding the business of the company has so largely increased during the year, and that it has in the aggregate assumed such large proportions, it will be observed that the net profits have not correspondingly increased. The establishment of five new trust companies during the past two years, with the keen competition thus created for certain classes of business, and the great reduction in the rate of interest, as well as the provision that has to be made to meet losses, have largely reduced the net profits of the year. The assumption of such a volume of business necessitates the employment of a large and competent staff, even although the transaction of some of it is not attended with corresponding profit.

The profit and loss statement herewith submitted shows the sources from which the revenues of the company are derived, and the charges against such revenues. The net profits for the year, after making provision for every ascertained or estimated loss, amount to $28,039.09. Out of these net profits your directors have declared dividends during the year of nine per cent. on the paid-up stock, amounting to $22,500, and have carried forward to the credit of profit and loss $5,539.09.

At the beginning of the year there stood at the credit of the contingent account the sum of $54,656.78, and during the year $10,154.58 has been written off for ascertained losses, leaving still at the credit of contingent account $44,202.20.

Under the provisions of the Loans Corporation Act it becomes necessary to change the close of the company's fiscal year from the 31st of March to the 31st December, and the necessary action to that end has been taken.

All which is respectfully submitted.

JOHN HOSKIN,
President and Chairman of the Executive Committee.

J. W. LANGMUIR,
Managing Director.

Dr. John Hoskin, in moving the adoption of the report said:—The statements submitted to you are, as usual, very voluminous, and give indication of the very large amount of work involved in the conduct of the company's transactions. The managing director has repeatedly endeavored to curtail the number of statements which accompany the annual report, but when it is considered that we had to deal with a large number of estates closed up during the year, and with over twelve hundred estates still remaining in the company's hands, all having more or less active accounts, it will be seen how difficult it is to reduce the number.

The report informs you that during the year the company has been entrusted with over two and a half millions of new business, which is the largest amount assumed in any year since the establishment of the company in 1882.

The aggregate of the company's business is now close upon $15,000,000, comprising every conceivable kind of asset, and any shareholder who has had the management as executor or trustee of one or two small estates can readily form an idea of the care and anxiety, as well as the enormous labor connected with the administration of estates and business aggregating this large amount. When it is considered that five or six new trust companies have been established within the last two years, and that some of them have been very actively canvassing every part of the Province for business, I think I am warranted in saying that no better evidence can be furnished of the good repute and excellent standing of the Toronto General Trusts Company than a simple statement of these facts.

We have passed through a very long period of serious depression, which, as you are all aware, has been more severely felt in its results, by private individuals as well as corporations, in connection with real estate mortgage investments. I advisedly use the words "we have passed through," firmly believing, as I do, that we have seen the end of the depression, and that everything now apparently points to a restoration of at least fair prices and better returns for real estate.

During the past year it was considered desirable to appoint a sub-committee of the executive to enquire into the condition of the mortgage securities held by the company. The work was done in a very exhaustive way, and while we cannot and do not claim exemption from losses, the results of the examination have, on the whole, been very satisfactory. Of the properties that have come into the company's hands during the depression, nearly $100,000 worth have been disposed of during the year, without great loss, and we have every reason to hope that we shall be equally or even more successful in making sales in the current year.

Coming now to an examination of the profit and loss sheet, I may at once state that, notwithstanding the largely increased business of the company, and although our compensation for the management of estates has, owing to the increased volume of work, been greater than in any year, still our net profits have been considerably reduced. The explanation of this is one that will readily be understood by every shareholder, and more particularly by those who are directors of loan companies.

This company has all along assumed the most drastic measures in its treatment of mortgages in default, which are held for its capital and guaranteed accounts, by ceasing to take interest into its profits the moment that such default assumed a permanent form. As a result of this method, a very large amount of interest has been for the past five years excluded from profits. We had, as the report shows, a contingent fund of over $50,000 to meet losses at the beginning of the year, and after writing off all losses that had been ascertained, we start the year with over $40,000 at the credit of that fund.

Owing to the loss of interest referred to, some of which it is hoped will only be temporarily suspended, the profits of the company have been very considerably reduced. For this reason it has been thought advisable by your board of directors to reduce the dividend to 4 per cent. for the half year.

The usual examination of the business and securities of the company has been carried on quarterly by the Inspection Committee, which, with the inspection and audit by the auditors appointed by the shareholders, constitutes the most effective system of security for the public that exists in any company, so far as I am aware.

Mr. Vice-President Meredith, in seconding the adoption of the report, said:—

If we analyze the extraordinary increase in the new business assumed by the company during the past year we shall find that it is due to the growth of our proper business as a trust company, and not to our business as a loan company for the investment of moneys. It will be found, moreover, that the increase has been caused, not by the acquisition of a few large trust estates, but of a large number of comparatively small trusts. The number last year being nearly double that of the preceding year, we could not have more conclusive evidence of the growing appreciation by the public of the value of the services of the company, or of their confidence in the way its work is done.

The net profits of the company have, unfortunately, not increased with the growth of our business, but we are, I think, warranted for many reasons, some of which have been mentioned, in looking to better results in this respect during the current year. We are all rejoicing in the fact that the country, after a protracted period of depression, has apparently entered upon a new era of prosperity, and one which, if we do not misread the signs of the times, we may hope to be of even longer duration than the cycle of hard times from which we are just emerging. It cannot but be that this improved condition of affairs will prove an important factor in improving the business of the company. We are, indeed, already feeling in many ways its benefits, notably in the prompter payments of interest on loans, and the readier sale of farms and other real estate in the possession of the company.

In conclusion, therefore, I think we may look forward with a reasonable confidence, not only to a steady increase of our business during the year, but to a satisfactory profit and loss sheet at its close.

The election of directors was then held, and resulted in the re-election of John Hoskin, Q.C., LL.D., E. A. Meredith, LL.D., Hon. Sir Frank Smith, Senator Cox, W. H. Beatty, W. R. Brock, B. Homer Dixon, George Gooderham, Æmilius Irving, Q.C., J. J. Foy, Q.C., H. S. Howland, Robert Jaffray, A. B. Lee, J. W. Langmuir, J. G. Scott, Q.C., Samuel Alcorn, T. Sutherland Stayner, and John Bell, Q.C.

At a subsequent meeting of the new board of directors, Mr. John Hoskin was elected president, Messrs. E. A. Meredith and W. H. Beatty vice-presidents, and the following directors were appointed members of the executive committee: John Hoskin, Q.C., LL.D., chairman; E. A. Meredith, LL.D., Hon. George A. Cox, W. R. Brock, A. B. Lee, J. G. Scott, Q.C., T. Sutherland Stayner, J. J. Foy, Q.C., Robert Jaffray, and W. H. Beatty.

The inspection committee of the preceding year was re-elected, viz.: Vice-president, W. H. Beatty, chairman; Messrs. H. S. Howland and Æmilius Irving, Q.C.

Correspondence.

ST. JOHN'S, NEWFOUNDLAND.

Editor MONETARY TIMES.

SIR,—This is England's oldest colony, and thanks to the enterprise of the "Reid Syndicate," can now be reached in twenty-four hours from North Sydney, in Cape Breton. The island was discovered in 1497, and is situated at the entrance to the Gulf of the St. Lawrence, and is within about 1,700 miles of Ireland, which was once "the Island of Saints."

Newfoundland has an area of about 42,000 square miles, and is twice the size of Nova Scotia; containing a population of about 200,000 or a little less, and all of which are largely made up of Saxon and Celtic blood.

A stranger is at once struck with the appearance of the native Newfoundlander, even if he or she be of immediate English, Irish or Scotch origin, there is noticeable the soft florid complexion, the genuine Newfoundland accent which is peculiar to itself, and the warm shake of the hand.

I have heard of "fogs" and "dogs," but of the latter I have not seen any, and of the former they are here till the present day. Even the Royal Mail steamships are compelled to remain in the harbor until a soft western breeze blows and the famous narrows are again open to the mariner.

As is well known, the great wealth of this colony consists in its fisheries and minerals. [illegible] a modern Cabot came to Canada, he would talk of Klondyke, Rossland and Nelson, and other points in Ontario, but the discoverer of Newfoundland told of rich waters such as the men of those days had never heard of. Early in the 17th century the products of these northern seas were each year in the neighborhood of half a million dollars, which would be nearly four-fifths of the exports of the colony. It is strange that the cold water seas are necessary to the life and food of the cod, and that the best fish are generally found within a short distance of the shore.

St. John's is a busy, commercial city, with over 32,000 of a population, and can boast of the best harbor in the world. The stores are modern and well filled with goods, in which can be seen large collections of products from Canada.

The elections last fall resulted in a change of Government, which it is expected will bring about important changes in the interest of the colony. Sir James Winter, like our own Sir Oliver, stepped down from the Bench and led the Opposition to victory. "The fourth estate" was not overlooked in the composition of the new Cabinet, as Mr. J. Alex. Robinson, the popular and able editor of the Daily News, is Colonial Secretary, and such an important office could hardly be in abler hands.

The banking interests are well looked after by the Bank of Montreal, Bank of Nova Scotia, and Merchants Bank of Halifax. The managers of which appear all popular with the citizens.

The field of insurance, in which THE MONETARY TIMES takes much interest, has been well worked here for some years. The losses sustained by the great fire were all satisfactorily settled, and almost a new city has sprung up. The Life business is represented by two of the strong American companies, the English interests by one or two strong companies, and the Canadian companies by three of their best. Just here I am referring to companies who do the "lion's share" of the business of the offices referred to."

In Toronto we think sometimes that our city in some respects is the greatest of all sinners, as to customs in the life business; but I tell you nay; since I arrived here I have learned on the best authority that a prominent insurance man for a very large institution came to this city a few years ago and took risks from five prominent citizens, agreeing to give them five policies of $5,000 each on the *fifteen pay Life*, and, as is often the case, these policies, taken in good faith, were put away and were not challenged for some four or five years, when the fraud was discovered. What is probably the worst feature of the case is that the policies referred to only begin to carry profits when they are in force fifteen years.

It is unnecessary to say that the agent referred to has not been here since, nor has he a habitation now in Canada; he is now where "the woodbine twineth."

St. John's, May 28th, 1898. X.

ARTIFICIAL BLACK MARBLE.

A black marble of similiar character to that exported from Belgium—the latter product being simply prepared slate—may be produced in the following manner: The slate suitable for such purpose is first well and smoothly polished with a sandstone, so that no visible impression is made on it with a chisel—this being the rough—after which it is polished finely with artificial pumice stone, and finely finished with extremely light natural pumice stone, the surface now presenting a velvet-like, soft appearance. After being allowed to dry, and the surface being thoroughly heated, the finely polished surface is impregnated with a mixture, heated, of oil and fine lampblack. This is allowed to remain twelve hours; and according to whether the slate used is more or less gray, the process is repeated until the gray appearance is lost. Polishing thoroughly with emery on a linen rag follows, and the finishing polish is with tin ashes to which is added some lampblack. A finish being thus made, wax dissolved in turpentine, with some lampblack, is spread on the polished plate, warmed again, which after a while is rubbed off vigorously with a clean linen rag. Treated thus, the slate has a deep black appearance like black marble, the polish being just as durable as the latter.

—"Why didn't you have the burglar arrested when you caught him in your house?" "My husband and he got to talking about the war, and as they held the same opinions my husband let him go."—Chicago Record.

AN ENVELOPE OF SILK.

A French novelty is a silk envelope. The silk fabric is chemically stiffened and a small piece of paper is pasted on the envelope for the address. The inventor of the envelope is endeavoring to secure the permission of the Government to weave into the silk envelope the design of ten-centime postage stamp, with the idea of selling the envelope during the Paris Exposition. If the Government consents, the envelope will be a real curiosity and will be very valuable to postage stamp collectors.

GRAIN TRAFFIC.

The quantity of grain going down the St. Lawrence this summer is only limited by the means of conveyance at hand, and the places of storage along the line. Some people attribute this glut to the war scare, but we are inclined to think that it must, in great part, be otherwise accounted for. The bulk of the grain passing from N.Y. to Liverpool goes in British bottoms, which cannot be molested. Unless we are greatly mistaken, the rush of grain from the interior to the seaboard, through Canadian channels, is chiefly due to the operations of Leiter and other speculators in Chicago. For a long time these men sought to corner the market; then, when prices had advanced to their satisfaction, they began to sell. The unloading process is now going on, and the liberated grain is going forward in unusual quantities to meet the dearth in Europe, of which the recent bread riots in Italy and Spain were a symptom.

Can the St. Lawrence hold the present volume of trade? Before this question can be answered, many circumstances must be considered. The principal difficulty in years gone by has been the fact that ocean freights are much higher at Montreal than New York. The volume of established trade at New York of one kind and another was so great that vessels could be sure of a cargo there, and flocked thither in great numbers. The chances for return cargoes on the westward voyage were also much better between Liverpool and New York than between Liverpool and Montreal. This state of affairs cannot easily be changed, and it is the part of wisdom to reckon upon its continuance for many years to come. The chief permanent benefit that is likely to arise from the boom the St. Lawrence route is getting this year, is the better knowledge of its advantages which will be held by Western shippers. When it is remembered that Buffalo has more than fifty elevators, while Kingston has just obtained her first instalment of three, it will be seen that a very slight diversion of trade from the Erie Canal to the St. Lawrence river will suffice to keep our present resources fully taxed. The natural tendency of commerce is to cling to accustomed channels. Hard as it has been to get any considerable quantity of grain away from the Erie Canal, when once the grain does come our way it will be equally hard for anyone to get it back. Exceptional as the present movement may be, it will give us the advertising we want, and the future of the forwarding trade will be simply a matter of dollars and cents.—Kingston News.

—Some time ago, says an exchange, the Rev. Theodore J. Shaffer resigned the pastorate of a Methodist church in Brownsville, Pa., to go to work in a rolling mill, soon became a boss roller, and has just been elected president of the local branches of the Amalgamated Association of Iron and Steel Workers in New York.

—A Western paper recently requested answers to the question: "What do you regard as the most common fault of present day young men?" Perhaps the most pithy reply of the hundreds received was this: "Preference for a white shirt job."

—Dr. Nansen has unfolded the plan of his next expedition, which will start from Behring Straits or a point further north. The expedition will last probably five or six years. Dr. Nansen said it was not important to reach the North Pole. It was sufficient to continue scientific investigations. The cost of the expedition will be about 300,000 roubles.

—He called on his friend the manager the other day—just a friendly call to be sociable—and he said: "You must have a lot of calls from careless people who take up your time and never do the business any good." "Yes, I do," said the manager, "it is an awful bore, but my chief clerk has a good remedy; he sizes a man up, and when he thinks he ought to go he tells me I am wanted at the telephone." Just then the chief clerk came in and said: "You are wanted at the telephone, sir."—California Knapsack.

—The Lafrance fire engines continue to attract attention. Ottawa bought one for $6,000, which was entered at the custom house as worth $4,200. Then Montreal bought one for $8,000, which for customs entry was valued at $4,500. There seems to have been much more profit on Montreal's than on Ottawa's, says the Gazette, though Ottawa's was the means of turning a city council out of office. Where, we beg to add, is the necessity of going outside of Canada to buy steam fire engines, any way?

—"The Engineering and Mining Journal" reports that the total value of the mineral production of the United States in 1897 was $678,966,644. This shows an increase over 1896 of only $199,000, which was due to the lower prices prevailing during the year, the quantity being greater in most cases. The notable items of this production were $59,210,795 gold, $37,755,815 silver, 200,257,243 tons of coal, 510,190,719 pounds of copper, 197,712 tons of lead, and 9,652,680 tons of pig iron. The largest single item in value was coal, which in round numbers was $206,500,000. Pig iron came next with a valuation of $92,677,000, gold third, $59,210,795, and copper fourth, $56,325,055.

—A consular report from Norway says: "Bicycles may be said to be in general use in this district, although not as extensively as in other parts of Europe; the use being, perhaps, more limited to the class in comparatively easy circumstances. The roads are macadamized and would be adapted to bicycling were it not for the large rainfall in Western Norway, which amounts to about 85 inches per annum. The hilly nature of this part of the country is an additional drawback, necessitating as much walking as riding. In spite of these conditions, however, the bicycle continues to grow in popularity. Two domestic manufacturers of cycles are located at or near the capital, Christiania." The trade in bicycles in China increased very rapidly during the past season and gives promise of even more rapid expansion during the season now opening. Bicycles are used in Corea chiefly by the foreign element. Something over 100 wheels are in use, and of late the natives have begun to ride to some extent.

TOO WELL ILLUSTRATED.

A singular incident occurred in a Hoboken saw mill. An operator had three fingers severed by a revolving saw. A few days afterward, an insurance adjuster called at the mill to investigate the accident. He was shown the machine by the superintendent, who offered to tell him all about the accident; he said that it was a case of pure stupidity, and after explaining the utter carelessness of the operator in the most bitter way, undertook to show the adjuster exactly how it must have occurred. He picked up a piece of wood and pushed it near the saw, which was then in motion; at the same time he looked up at the insurance adjuster, explaining, etc. Before he was aware, two of his own fingers were caught by the saw and severed.—Monthly Bulletin.

WHITE LEATHER.

White cowhide has long been used for various purposes, though its place has now been taken to a considerable extent by other and cheaper leathers. It is used, for example, in making suspender tips, and its use in making military belts is familiar. For this purpose it is made up with the flesh side out, and the belts are whitened as occasion may require with chalk or pipe clay.

White calfskin is more extensively used than white cowhide. White calf is used for fine and costly work in book-binding, it may be for gift books, and sometimes for prayer books. White calf is also used for suspender tips.

More extensively used than either white cowhide or white calfskin are the white sheepskins. White sheepskin is used also for suspender tips and for covering trusses and other articles of metal, and for the trimmings of shoes. It is used for book binding, especially for the binding of medical books, in which use it is first sprinkled with a coloring material which gives it a mottled appearance.—New York Sun.

ELECTRIC RAILWAYS IN JAPAN.

Two corporations, the Tokio Electric Railway Co. and the Tokio Electric Car Railway Co. have been organized for re-equipping existing horse car lines in Tokio and building new lines of electric railway. The former company has at present a capital stock of $2,500,000 and will control all lines in the eastern half of the city, aggregating 100 miles of track to be built within five years. It will change 20 miles of horse car line to electricity. The second named company will operate the lines in the western portion of the city. Additional roads aggregating about 200 miles will be taken up by each company upon the completion of the first 120 miles by each. An estimate on the first 50 miles of road, including the entire equipment of cars and the power station, is placed at $2,500,000. A central power station will be built on a river about five miles from the centre of the city, and power will be delivered to the trolley lines by eight transformer stations placed at convenient points in the city. The streets are mainly 60 feet in width, and the roads will be double track. There is also in contemplation a suburban line between Tokio and Yokohama, 18 miles in length, paralleling a steam railroad. In nine other cities and towns arrangements are being perfected for the construction of a sum total of 135½ miles of road.

NEW USE FOR SAWDUST.

The London Timber Trades Journal thus describes a new fuel, lately patented in England:

It is for a new fuel, which appears to possess much merit, and to deserve careful consideration of woodworkers. It is of the briquette class, but formulated on entirely new lines. The larger blocks heretofore employed give way to a cube 2½ inches by 2 inches by 2 inches, experience proving this the best universal size. It lights readily, gives out more heat, burns longer, weight for weight, than the best coals. It is very hard, there are neither dust nor "blacks," and, what is particularly to the point, it costs less than coals. Sawdust forms an appreciable percentage of the composition, and in these days of economical uses for by-products the opening of a new field for the advantageous disposal of wastes from sawmills is pleasant to hear of.

FOUR HUNDRED MILLIONS SPENT ON THE AMERICAN NEW NAVY.

"Fifteen years ago we had not a modern gun afloat in the navy of the United States," says Chairman Boutelle of the house naval committee. "We had no facilities whatever for the manufacture of armor. In fifteen years, while we have not done all that ought to have been done in that direction, we have at least accomplished some notable work. The total appropriations for the naval service during the past fifteen years have amounted to $387,987,840, of which nearly 50 per cent. has been appropriated during the past five years. In fifteen years we have increased the authorization of vessels for the new navy, including those in the present bill, by 258,014 tons, and of that amount nearly 51 per cent. has been authorized within the past three years. The increase in the armament of the navy has been such that at present our ships are capable of throwing at every discharge of their guns 122,260 pounds of metal, and of that amount the ships that have been authorized by the committee, during the past five years, have put afloat, and will put afloat, guns capable of throwing 63,928 pounds of all-round fire at every discharge, or more than one-half the capacity of the navy. A similar good showing is made regarding the construction of the 114 ships during the past five years and of the building of the battle ships and of torpedo boats."

BOOM IN THE STEAMSHIP TRADE.

The advance in the price of steam tonnage in England is phenomenal, and all the yards seem to have as much as they can do. In fact, some yards have contracts booked so far ahead that they are loath to enter into any further engagements, excepting at extended delivery. Many steamers are changing ownership at good profit to the seller. A late number of London Fair Play points out many instances of recent sales. A steamer of about 4,200 tons deadweight, to be delivered in February, was sold six months ago for £28,000 and was resold five weeks later for £29,500. A similar vessel for November delivery would not bring £31,000. A steamer of 4,500 tons deadweight, built in 1896, at a cost of £27,000, which was sold at the end of last year for £30,000, is now worth about £32,000. Numerous other instances are recorded of steamers changing hands at from £2,000 to £3,000 profits. There is also a good demand for old compound boats of about 2,000 tons deadweight for the Baltic trade. Those boats sold fully a year ago at £6,000 and £7,000, and now £10,000 is asked. An owner has just sold several large steamers, now building, at a profit of between 20 and 25 per cent. on the contract price. It is understood that a St. John shipping house, now with a steamer on the stocks on the other side, has been approached with a couple of very tempting offers for its boat. The advance over the contract price is considerable, and should the owners decide to sell, a large profit would be realized. The war has helped to boom the shipbuilding business.—St. John Globe.

THE DEEPEST MINE.

The deepest mining shaft in the world is what is known as the Red Jacket, Michigan. It is 4,900 feet deep, but 380 feet less than a statute mile. Compared with it the deep silver mines of the Comstock lode in Nevada, or the wonderful mines of Austria, worked for many centuries past, are but shallow pits. At the bottom of this shaft the temperature is 87 6-10 deg. Fahr. The miners are supplied with compressed air, which has a wonderful cooling effect on expansion. The water leached through the copper rock acquires an acid tone. Miners must protect themselves, as this water on reaching the skin produces ulcers, which in time eat to the bone. The shaft elevators ascend and descend at the rate of about eight miles an hour when carrying passengers, but when lifting ore the speed is increased to twenty-five and as high as thirty miles an hour. This great speed is never used when hoisting human freight, as flesh and blood could scarcely stand the strain of such rapid transit perpendicularly.—Nelson Miner.

Commercial.

TORONTO MARKETS.

Toronto, June 2nd, 1898.

Breadstuffs.—The grain market, in view of the depression in the large centres of trade, has been dull. Prices of wheat have, as elsewhere noted, declined and transactions are difficult to effect. Oats are inactive. Barley remains nominal. Peas are quiet. For corn and buckwheat there is only a nominal demand. Flour merchants are none too well satisfied with the present condition of affairs, and look, with anxiety, for repudiated contracts, as is unfortunately the usual thing on a sharp, downward turn of the market.

Dairy Products.—The market is depressed, and prices very low in view of enormous receipts of butter from the different country districts. The outside price obtainable for creamery is 15 to 15½c. per lb. on an export basis, while transactions in the city are difficult to make at 16½c. per lb. for prints, and 16c. for tubs. Offerings of large dairy rolls have ceased and all the butter coming forward is in the form of tubs which are selling at 12c. per lb. The make is large, and prospects all indicate a continuation of excessive deliveries. Cheese markets are dull and transactions are not readily made at figures quoted. Factory men are unwilling to accept buyers' offers, and the movement is, as a consequence, very slow. In the local market dealers quote 7½c. per lb. for new cheese, and 8c. per lb. for old cheese. There is a somewhat easier feeling in eggs. Purchases are reported to have been made at 8c. per lb. at outside points, while 9½ to 10c. per lb. is quoted locally. Considerable activity is reported on the part of picklers.

Green Fruit.—There is a good demand for oranges, and little wonder when the fruit is to be had at present prices. The Wednesday sale was well attended, and the goods were quickly sold. Arrivals show excellent condition. Mediterranean sweets are about 25c. lower than last week's prices. We quote: Cantania, 80s, $1.75 to $2 half box; blood, 80s, and 100s, $2.50 to $2.75 half box; Mediterranean sweets, fancy, 126s, 150s, 176s, 200s, 216s, $2.50 to $2.75 per box; Mediterranean sweets, fancy, 250s, 300s, $2 to $2.25 per box; California seedlings, 126s, 150s, 176s, 200s, 216s, $2.50 to $2.75 per box; California seedlings, 250s, 228s, 300s, 360s, $1.75 to $2 per box. The lemon market is very firm, and dealers predict higher prices. Hot weather alone is wanted to bring out an active demand. We quote: New Messina, fancy, 300s, 360s, November cuts, $3.25 to $3.75; new Messina, choice, 300s, 360s, $2.50 to $2.75; new Messina, 420s, November cuts, $2.50 to $2.75; extra fancy Sorrento, large boxes, 300s, something fine, $4 to $4.50. Canadian strawberries are in the market, first arrivals coming forward June 1st. There are not many pineapples coming forward; quoted at 10 to 20c. each. Bananas are scarce and high in price. At the moment there is a scarcity of ripe bananas.

Groceries.—Business is fairly good and orders from the country show a healthy condition of trade for the season of the year. Fair quantities of staple goods are going into consumption. Sugars remain very steady and with the exception of No. 2 granulated, now quoted 4½c. no change in local prices has been made.

Hardware and Metals.—Business has been fairly good, and most of the jobbing houses have been actively employed. The demand for harvest tools has fallen off, and are now of an assorting character. Snathes cradles, and scythes are moving freely. Trade this year in screen doors, green wire cloth, and poultry netting is much better than last year. In wire nails a satisfactory business has been done. Barb wire, as a result of lack of raw material, is scarce locally, and American manufacturers also find it difficult to fill orders as made upon them. There has been a number of changes in prices. Shot is now only subject to 7½ per cent. discount instead of 10 per cent. as formerly. Both sisal and manilla rope has advanced as we elsewhere note. In metals trade is fairly good and prices are firm. We quote an advance of 2c. per lb. in brass tubing. Ingot copper is quoted at 13c., pig lead at 4¼c. and antimony at 11c. per lb.

Hides and Skin.—Stocks of hides in Toronto are reported scarce. Dealers maintain that orders are in excess of supplies, and allege sales at 9½c. The market is, however, by no means secure on this basis, and may best be described as in a nervous condition. Chicago is the key to the situation, and any decline there would be followed here by a falling off in demand. Calfskins are unchanged. There are only moderate deliveries of pelts and lambskins. From Chicago, May 31.—For packer hides there was a firm market. There was a fairly good enquiry for supplies, and as offerings were limited, particularly of branded stock, to obtain supplies, it was necessary to pay full quoted values, closing firm at 12¼ to 12½c. for native steers, 12 to 12¼c. for Texas, 10¾ to 11¼c. for butt brands, 10 to 10¼c. for side brands, 10½ to 10¾c. for branded cows, 11½c. for heavy native cows, and 12c. for light do.

Leather.—Orders are only picked up here and there of small quantities. Straight lots are not asked for, and business is of a hand to mouth character. With raw material on its present basis, tanners should insist upon obtaining full rates before parting with stock.

Provisions.—All lines of hog products are firm, and merchants are reported to have disposed of stocks only upon an inducement of full rates. Quotations remain as last reported with a general feeling that a decline in values is not likely to occur for some time. Chicago says provision and live stock traffic continues large, particularly the former, which is the heaviest at this season in many years. This refers to traffic west of Chicago rather than to the seaboard, which has fallen off since the war blockade scare subsided in Europe and the heavy shipments of a month ago have been cleaned.

Wool.—As yet only small shipments of fleece wool have come forward, but offerings are not likely to be long delayed in view of the present hot weather. For washed fleece 16c. per lb. is quoted. The result of the last series of London sales was a small decline in the volume of Australian wool. The reduction, about 5 per cent., was in greasy wools, strongest in chalky descriptions of doubtful yield. Scoured ruled about ½d. lower all round. Crossbreds showed a similar falling off in value, and showing most in fine descriptions. Cape grease are 5 per cent. lower but on snow whites there is no reduction. The total available for sale in London, in the next two series (deducting the transit wools, but adding the old stock), may be estimated at about 470,000 bales, say about 270,000 bales for July, and (should it all be sold), about 200,000 bales for September. Of these 470,000 bales about 200,000 bales will probably be New Zealand wool. The next series is to begin on the 28th, the arrivals being limited to 300,000 bales. The date of the next Low wool sale has not yet been definitely fixed, but it will most probably be held on the 21st and 22nd June.

MONTREAL MARKETS.

Montreal, 1st June, 1898.

Ashes.—The market presents no novel feature; the demand continues very slack, and values more or less nominal We quote $3.60 to $3.65 for first quality of pots, seconds $3.25 to $3.30, pearls $4.75. None of the large lots usually received from Perth, Picton, etc., about this time, have yet come to hand.

Boots and Shoes.—The condition of trade at this "between seasons" time is not very active. Most houses have their travelers out on the road, and for some of them orders have begun to come in. These orders are fair, and the tone hopeful. By way of making ready for future business, the shoe manufacturers are looking round for leather, which promises to be dearer.

Cements and Firebricks.—The demand for cements continues of a steady character, with quotations firm at $2.20 to $2.30 for British makes, and from $1.80 to $1.90 for Belgian. Receipts for the week ending to-day are larger, one steamer alone bringing nearly 20,000 brls. In all, 22,500 of Belgian have been received, but only 300 brls. of English. Receipts of firebricks 48,000, and prices steady at $15 to $22 as to brand.

Dairy Products. — Cheese exports showed up very fairly last week, totalling 31,380 boxes, as against 26,300 boxes for the corresponding week last year. Receipts from the country are showing considerable increase, some 12,900 boxes being reported this morning. The market continues in somewhat unsatisfactory shape, the cable showing a weak feeling in England, and the local prices range from 7 to 7¼c. for Western, and 6⅝ to 6⅞c. for Eastern makes. Butter shipments continue to be much larger than last year, 3,105 pckgs. having been exported last week, as against 355 pckgs. for the same period of '97, prices, however, rule easier, 16 to 16¼c. being about the limit for choice creamery.

Dry Goods.—The semi-annual stock-taking is at present the all-absorbing occupation of most wholesale houses, but, notwithstanding, a very fair output of goods is going on, considering the season. A good proportion of fall orders is being booked, and the warm summery weather, of the last few days, has had a stimulating effect on the sorting demand for all lines of cottons and light seasonable fabrics. The reports, as regards payments from country merchants, are of a most gratifying character, some of the larger houses reporting them fully 50 per cent. ahead of this time last year.

Furs.—Interest in raw furs droops somewhat with the advancing summer, and receipts from this onward will be small. We shall continue to quote till after the London sales, which are reported to take place on the 12th inst. We quote: Mink, large dark, $1.50; small, do., $1 to $1.25; marten, $1.75 to $2.25; fisher, $4.50 to $7; lynx, $1 to $2; otter, $1 to $12 for dark; pale, $5 to $7; red fox, large, $1.30 to $1.50; small, $1; cross fox, $3 to $0; bear, cubs, $3 to $7; medium, $/ to $10; large, $12 to $15; skunk, 15 to 70c., as to color and stripe; coon, 20 to 75c.; rats, fall, 7 to 10c.; kits, 2 to 5c. Beaver, not quoted, killing being forbidden by law.

Groceries.—This week has developed few features of marked interest. The jobbing demand is reported of a steady and very fair character; collections are very satisfactory. The sugar market inclines to firmness. The St. Lawrence refinery advanced their prices a sixteenth after last writing, but as the Redpath company did not follow suit, they were obliged to return to the old prices, which are 4½c. for standard granulated, Austrian granulated, 4 3-16c.; Dutch do., 4¼c.; yellows range from 3 11-16c. to 4⅛c. Refiners report a very quiet demand at the moment, but anticipate an active enquiry as the month advances. Molasses continues to rule very firm at 30 to 31c. per gal. for Barbadoes in a jobbing way; agents report the booking of orders for two cargoes at 20½c. and 21c. respectively, landed gauge in bond, equal to 28½ to 29c. net cost. Teas have ruled very quiet the past fortnight or so. Advices are to hand that some moderate lots of new pickings from Japan are afloat for this market, calculated to cost 22 to 25c., and they will be due here about the 15th to 20th inst. California dried fruits rule very firm, and prunes have scored an advance of half a cent. No new pack of lobsters have been offered in this market as yet, and it is said Europe is absorbing the bulk of the year's supply.

Hides and Tallow.—At the usual weekly meeting of the Hide Association, held on Monday, the price of beef hides was advanced a full cent, owing to the strength of outside markets, and the comparatively small receipts here. Dealers are now buying on the basis of 9c. per lb. for No. 1., and quoting 10c. to tanners. Lambskins are also advanced to 20c. each. Calfskins remain at 10 and 8c. per lb. for Nos. 1 and 2 respectively; receipts of these are rather smaller. Tallow sells very slowly, and prices are easy at 1 to 1½c. per lb. for rough, 3 to 3½c. for rendered.

Nowadays You're Old-Fashioned if you don't use our

Metallic Ceilings

One of Many Designs.

They're so much better than any other interior finish—more beautiful and durable, as well as fire-proof and hygienic. We make countless designs suited to any room in any building.

You'll appreciate their economical superiority.

We will send you an estimate with full information, on receipt of outline showing shape and measurements of the walls or ceilings to be covered.

Hops.—Comparatively little enquiry is reported in this line of late. What few recent sales have taken place, have been at a range of from 12 to 14c. per lb. for choice Canadian, yearlings, 7 to 9c.; choice Bavarian quote at 25 to 28c., and Bohemian 27 to 30c. per pound.

Leather.—Manufacturers are more frequent visitors to the "swamp" of late, but actual sales of leather are not yet very large or frequent. June is expected, however, to show a fair volume of business. The market continues to rule very firm, and this week's advance in hides is likely to further stiffen the ideas of holders. Some dealers in fine slaughter sole decline to consider less than 28c. for their goods in round lots, and claim to have considerable orders booked at this figure. The American market is reported very strong, though sales are not active. We quote: Spanish sole, B.A., No. 1, 24 to 25c.; do., No. 2, 22½ to 23½c.; No. 1 ordinary Spanish, 23 to 24c.; No. 2, 20 to 21c.; No. 1, slaughter, 26 to 28c.; No. 2, do., 24 to 25c.; common, 20 to 21c.; waxed upper, light and medium, 30 to 35c; do., heavy, 27 to 30c.; grained, 32 to 35c.; Scotch grained, 30 to 35c.; Western splits, 22 to 25c.; Quebec do., 18 to 20c.; juniors, 18 to 20c.; calf-splits, 30 to 35c.; calfskins, (35 to 40 lbs.), 60 to 65c.; imitation French calfskins, 65 to 75c.; colored calf, American, 25 to 28c.; Canadian, 20 to 24c.; colored pebble cow, 13 to 15c.; russet sheepskins linings, 30 to 40c.; colored 6 to 7½c.; harness, 24 to 27c.; buffed cow, 13 to 15c.; extra heavy buff, 15c.; pebble cow, 13 to 13½c.; polished buff, 12 to 13c.; glove-grain, 12 to 13c.; rough, 22 to 23c.; russet and bridle, 35 to 45c.

Metals and Hardware.—Little that is new can be reported in this line. The wants of local consumers of pig iron have been pretty well supplied by the recent large sales reported in these columns, and in other lines of metal trade the movement is of a moderate character. Tin and Canada plates are still very firm, but in some quarters buyers are pursuing a waiting policy, believing that the English market will shortly ease off. Ingot tin has undergone a slight advance, and local prices are a little higher. We quote: Summerlee pig iron, $17.50 to $18; Carron, No. 1, $18; No. 3, $17.25; Ayresome, No. 1, $17.50; No. 3, $16.50; Shotts, $17.25 to $17.50; Carnbroe, $16, ex-store; Feronna, No. 1, $15; Hamilton, No. 1, $15 to $15.50; No. 2, ditto, $14 to $14.50; machinery scrap, $14 to $15; common ditto, $12 to $13; bar iron, Canadian, $1.40 to $1.50; British, $2 to $2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.10 to $2.15; 52 sheets to box; 60 sheets, $2.25; 75 sheets, $2.35; all polished Canadas, $2.40; Terne roofing plate, 20 x 28, $5.75 to $5.90; Black sheet iron, No. 28, $2.25; No. 26, $2.15; No. 24, $2.05; No. 17, $2; No. 16 and heavier, $2.15; tin plates—Bradley charcoal, $5.60 to $5.70; charcoal, I.C., Alloway, $3.15 to $3.25; do., I.X., $3.90 to $4; P.D., Crown, I.C., $3.60 to $3.75; do., I.X., $450; Coke, I.C., $2.00 to 2.05; do., standard, $2.75 to $2.80 for 100 lbs.; coke, wasters, $2.70; galvanized sheets, No. 28, ordinary brands, $4; No. 26, $3.75; No. 24, $3.50 in case lots; Morewood, $5 to $5.10; tinned sheets, coke, No. 24, 5½c.; No. 26, etc., the usual extra for large sizes. Canadian bands, per 100 lbs., $1.65 to $1.75; English hoops, $2 to $2.15. Steel boiler plate, ¼-inch and upwards, $1.85 to $1.90 for Dalzell, and equal; do., three-sixteenths inch, $2.50; tank iron, ¼-inch, $1.50; three-sixteenths do., $2; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to $2.50; Russian sheet iron, 9c.; lead, per 100 lbs., $3.85 to $3.00; sheet, $4 to $4.25; shot, $6 to $6.50; best cast-steel, 8 to 10c.; toe calk, $2.25; spring, $2.50; sleigh shoe, $1.85; tire, $1.90; round machinery steel, $2.25; ingot tin, 16½ to 17c. for L. & F.; Straits, 16¼ to 16½c.; bar tin, 17c.; ingot copper, 13 to 13½c.; sheet zinc, $5 to $5.25; Silesian spelter, $4.75; Veille Montagne spelter, $4.75 to $5; American spelter, $4.50; antimony, 9½ to 10c.

Oils, Paints and Glass.—The inclination to easiness in turpentine, noted last week, has developed into a decline of a cent. This is about the only change to be noted in these lines. Linseed oil rules very firm at quotations. For Paris green there is not the usual seasonable demand, but prices are firmly held at the late advance. We quote: Turpentine, one to four barrels, 48c.; five to nine barrels, 47c.; net thirty days. Linseed oil, raw, one to four barrels, 49c.; five to nine barrels, 48c.; boiled, one to four barrels, 52c.; five to nine barrels, 51c., net 30 days; olive oil, machinery, 90c.; Nfld. cod, 37 to 40c. per gal.; Gaspe oil, 33 to 35c. per gal.; steam refined seal, 45 to 47½c. per gal. in small lots. Castor oil, 9 to 9½c. as to quantity. Leads (chemically pure and first-class brands only), $5.62½; No. 1, $5.25; No. 2, $4.92½; No. 3, $4.50; No. 4, $4.12½; dry white lead 5c.; genuine red do., 4¼c. to 4½c.; No. 1 red lead, 4c. to 4¼c.; Putty in bulk, bbls., $1.65; kegs, $1.80; bladder putty, in bbls., $1.80; smaller quantities, $1.95; 25 lb. tins, $2.05; 12½ lb. tins, $2.30. London washed whiting, 40 to 45c.; Paris white, 85 to 90c; Venetian red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2. Paris green, 50 and 100 lbs., drums 17c.; 25 lb. drums, 17½c.; 1 lb. cartoons, 18c.; pound tins, 18½c.; window glass, $1.40 per 50 feet for first break; $1.50 for second break; third break, $3.10.

Wool.—Business in raw wool cannot be called very active, but manufacturers are buying some moderate mixed lots. The market continues to rule very firm, and spot stocks are in narrow compass; of Australians there are practically none, and but light supplies of Natals and B.A.'s. A cargo of about 1,000 bales of Cape has just arrived at New York for a Montreal house, about half of which has already been sold, to arrive, and the balance will likely go into stock.

Agents wanted to represent the Company

The Metropolitan Life
Insurance Co. of New York

"THE LEADING INDUSTRIAL COMPANY OF AMERICA,"
IS REPRESENTED IN
ALL THE PRINCIPAL CITIES OF THE UNITED STATES AND IN CANADA.

THE METROPOLITAN is one of the oldest Life Insurance Companies in the United States. Has been doing business for over thirty years.

THE METROPOLITAN has Assets of over Thirty-Five Millions of Dollars, and a Surplus of over Five Millions.

THE METROPOLITAN pays Two Hundred Death Claims daily, and has Four Million Policy-holders.

THE METROPOLITAN offers remunerative employment to any honest, capable, industrious man, who is willing to begin at the bottom and acquire a knowledge of the details of the business. He can by diligent study and practical experience demonstrate his capacity and establish his claim to the highest position in the field in the gift of the Company. It is within his certain reach. The opportunities for merited advancement are unlimited. All needed explanations will be furnished upon application to the Company's Superintendents in any of the principal cities.

ESTABLISHED 1885.

HEAD OFFICE:
Queen City Chambers, Church St., Toronto.
DIRECTORS:
JAS. GOLDIE, Pres. J. L. SPINK, Vice-Pres.
THOS. WALMSLEY, Treas. HUGH SCOTT, Mgr. and Sec.
Adam Austin, Inspector.

This Company was organized in 1885, specially for the purpose of insuring manufacturing industries, warehouses and contents.

The primary object being to give protection against loss by fire at a minimum cost consistent with absolute security.

The system adopted has been to inspect all risk before acceptance and fix the rate to be exacted equitably in accordance with the hazard assumed.

Assurers with this company have made a saving, upwards of $108,000.00 on the current rates charged, in addition to which, on the rates exacted by us, dividends have been declared to policy-holders amounting to over $24,000.00, together, making the very substantial sum of over $132,000.00 that our policy-holders have saved during the eleven years we have been in operation.

As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please address

Millers' and Manufacturers' Insurance Co.,
32 Church Street, Toronto, Ont.

The DOMINION Life
ASSURANCE COMPANY
HEAD OFFICE, ... WATERLOO, ONT.

Authorized Capital.................$1,000,000
Gov't Deposit at Ottawa 50,000
Subscribed Capital.................. 257,600
Paid-up Capital 64,400

The Dominion Life has made handsome gains in very essential feature during 1897.

It has gained in number of lives assured, 8.2 per cent.; in cash premiums, 8.5 per cent.; in number of policies, 8.6 per cent.; in amount assured, 10.5 per cent.; in interest receipts, 16.6 per cent.; in assets, 19.0 per cent.; in surplus over all liabilities, 42.2 per cent.

No Company anywhere is safer, sounder, more equitable or more favorable to the assured in all its arrangements than the Dominion Life. Call on its agent when thinking of putting on more life assurance.

JAMES INNES, M.P., Pres. CHR. KUMPF, Esq., Vice-Pres
THOS. HILLIARD, Managing Director.

Extended Insurance

Is granted by the Unconditional Accumulative Policy of the Confederation Life Ass'n. Under this provision the full amount of the policy is, in the event of the non-payment of the third or any subsequent premium, extended as a term insurance, and the policyholder is held fully covered for the full face value of the policy for a term of years definitely stated therein.

Paid-up and Cash Values are also guaranteed.

Rates and full information sent on application to the Head Office, Toronto, or to any of the Association's Agents.

INDUSTRIAL CO-OPERATION.

The programme just published of the Co-operative Congress, which is to be held at Peterborough, England, during the coming summer, illustrates the remarkable degree of progress made in the field of industrial co-operation on the other side of the water. Whereas, in the United States the profit sharing movement has made comparatively few steps forward within recent years, it has been worked with increasing success year by year in the United Kingdom. In 1883 the number of industrial co-operative societies in England was 15, representing a capital of $450,000. The number, according to the latest statistics, has grown to 152 societies, with an aggregated capital of six millions. We learn from the report in which these figures are given that "the tendency of these organizations is strongly toward the production of commodities. Many have grown from insignificant beginnings to mammoth concerns, with hundreds of members and enormous capital. In London alone there now exist co-operative societies of leather workers, builders, engineers, bookbinders, printers, hatters, tailors and numerous other branches of trade, all of them working together with results more and more satisfactory every year." The object of the forthcoming Congress is to exhibit on a complete and extensive scale the products of co-operative labor in the United Kingdom, and to afford an opportunity for those interested in the movement to learn the practical results secured, and to exchange views on the subject of co-operative production. No doubt interesting and valuable information may be afforded, which would throw light on the reasons for the slowness of the co-operative movement to take a hold in this country. Numbers of attempts have been made here to carry into practice the co-operative idea, both in industrial and in agricultural undertakings. Some of these were started on socialistic lines and others on a purely commercial basis. While a proportion of these undertakings has been measurably successful, probably the larger number have been abandoned after a trial of more or less duration. But even the most successful of the survivors do not seem as a rule, to possess the progressiveness and assurance of permanent vitality that characterizes many of the English institutions. It was only a week or two ago that the embarrassment was announced of one of the most conspicuous co-operative manufacturing concerns in the United States—that of Alfred Dolge of Dolgeville, N.Y., where the scheme of co-operation included, in addition to profit sharing, a life insurance scheme and a system of pensions for old and disabled employees. Why the co-operative method should be so much more of a success in the one country than in the other does not seem clear. There is no such radical difference in race or in the general industrial conditions as can account for it. In fact, no substantial reason has been adduced why the movement should not prosper here as it is prospering in England.—The Metal Worker.

ENGLAND A BIG CUSTOMER.

The total exports of green and dried apples from the United States last year amounted in value to $3,700,000. Of these apples, only $738,000 worth went to Germany. Great Britain took $2,169,000 worth. A very small portion of the total exports in other articles of fruit was sent to Germany, Great Britain taking by far the larger part. What Germany really takes from us of our pork and hog products and our fruit, these figures will show: Total exports of cotton last year, 6,176,000 bales; England took 3,105,000 bales, Germany, 1,370,000; France, 304,000. Cattle—England took 378,000, Germany, 633 head. Flour, total exports 14,500,000 barrels; England took 8,250,000, Germany, 169,000. Bacon, total exports, 500,000,000 pounds; England took 286,000,000, Germany, 26,000,000; France, 2,000,000. Hams, total exports, 165,000,000; England took 134,000,000, Germany, 3,000,000.—Grocer's Journal of Commerce.

SHE BOUGHT THE SHOES.

It was in a little country store in a little country town, where the patronage is chiefly that of country people. Not that it is not in an aristocratic neighborhood, for it is. Along the Hudson are the palaces of millionaries and multi-millionaires, but it is needless to say that they do not as a rule patronize the little country store for bonnets, gowns or boots.

So upon one occasion, when a visiting cousin of one Miss Multi-millionaire felt that she needed a new pair of boots she turned up her small nose in disdain when she was advised to try the country store. Nevertheless it was a case of necessity, or she thought it was, so the man in the shop was electrified one day at the appearance in his establishment of Miss Multi-millionaire's Cousin.

He recognized in his customer a wealthy woman, and made haste to serve her to the best of his ability. Incidentally he made up his mind that she could serve him by taking a pair of shoes which he was particularly anxious to dispose of. They were good shoes, and that was the only trouble with them. They were of fine French kid, 4½ double A width. They had been ordered by a customer who did not take them, and they were a drug in a shop where customers looked upon a pair of $6 shoes as a wicked extravagance.

"I would like," said this new customer, "a pair of your best French kid boots." The regular customers always asked for shoes.

Several pairs of boots which were brought out and tried on were found to be unsatisfactory. Then the six-dollar boots came, and they were really a perfect fit.

"Why, these are delightful," said Miss Multi-millionaire's Cousin as she stood up and viewed the boots with a critical air. "I don't think my New York bootmaker could do better than this for me," and she looked pleased and relieved. "How much are they?"

"Five dollars," said the shopkeeper. He was very anxious to get rid of those shoes, and to do it was worth sacrificing a dollar. The pleased expression faded from the face of the customer.

"I am afraid they slip a little at the heel," she said, discontentedly, wriggling the toes inside the pretty little boot, and making an effort to move the heel. "And they do pinch my toes so. I'm sure they're too short."

"Yes, I'm sure they are," answered the man, realizing in a moment that he had made a great mistake, and with calm patience he took off the boots, buttoned them, and, putting them in a box, placed the box on a high shelf.

Then he took out one pair of boots after another; some—and perhaps he knew it—were too long, some were too short, and some were too broad. The customer was becoming tired and worn out. There was nothing right, until finally what was apparently a sudden recollection struck the shopman.

"Now, I have," he explained, "a pair of custom-made boots, made for a very nice woman, who did not take them, and it occurs to me that they would just fit you." Thereupon climbing to the high shelf again, he brought down the identical boots that the customer had before tried on. She slipped a foot into one of them and gave a sigh of relief.

"Why didn't you tell me of these before?" she exclaimed reproachfully. "They are perfect. How much are they?"

"Nine dollars," answered the shopman stolidly, but with a feeling of palpitation in the region of his heart.

"I'll take them," said the customer with another sigh of relief and satisfaction.

And the proprietor of that shop went to sleep that night with a light heart and an easy conscience. He had helped a dissatisfied woman to make up her mind and was $4 in pocket by the transaction. —New York Times.

SCIENTIFIC PROGRESS IN THE LAST DECADE.

A contributor to La Nature (Paris, May 7th) remarks that the best reply to the attitude toward modern science of certain critics who profess to make light of what they call its pretensions, and who magnify its failures, is to enumerate some of the wonderful discoveries and inventions of the last few years. This he does in the following brief though striking fashion:

"Suppose that a man had fallen into a trance just after the closing of the Exposition of 1889, that is, less than nine years ago, and consequently knew nothing of the progress that has been made since that time, up to the period of our next great international manifestation. His admiration and his study would be devoted to the following objects:

"1. The bicycle, which is revolutionizing our habits, and which existed in his time only in rare specimens, bulky indeed compared with the little queen of our day. 2. The horseless carriage, moved by petroleum or electricity, whose future is perhaps even more promising than that of the bicycle. 3. The electric railways, which scarcely existed in 1889 and which will modify in the next century the conditions of working of the great trunk lines. 4. Polyphase currents, which enable us to transmit and distribute natural motor forces at great distances. 5. The Laval steam turbine, a new process—from the industrial standpoint—for utilizing steam at high pressure. 6. The inter-combustion motor of M. Diesel, which is the most economical means now known for transforming heat into work. 7. Calcium carbide, which gives rise to acetylene, one of the illuminants of the next century. 8. The cinematograph, with which we have been recently filled with wonders to the point of saturation. 9. The Roentgen rays, which are revolutionizing the healing art. To these nine discoveries or great inventions, whose results are already ours, and whose benefits we enjoy daily, we may add: 10. Liquid air for industrial purposes. 11. Color photography, in which the latest results of the Messrs. Lumiere have just been presented to the Academy of Sciences, by M. Mascart. 12. Wireless telegraphy, a process full of promise. 13. Cold light, obtained by luminescence of rarefied gases traversed by the electric current. 14. High-frequency currents, with which Tesla and D'Arsonval have conducted such marvelous experiments.

"In less than ten years, solely in the domain of mechanics and physics we have fourteen new sensational discoveries which are to be added to the already long list of the scientific conquests of the nineteenth century, and which we should have to explain to our sleeper on his awakening." — Translated for The Literary Digest.

ONE OF SPAIN'S MINES.

The land of Spain possesses in the Rio Tinto group some of the richest copper mines in the world. These are owned by a British company, which is able to pay 4 per cent. interest upon £3,546,020 of first mortgage bonds, 5 per cent. on £1,625,000 of preference shares, and lately a 40 per cent. dividend on £1,625,000 of ordinary stock, besides placing at the last dividend declaration £40,000 to reserve fund. The hitherto fortunate stockholders now tremble, however, for bankrupt Spain may well, it is thought, seek to tax right heavily—almost to ruinousness—so valuable a property that is largely foreign owned.

DECISIONS IN COMMERCIAL LAW

RE MELCHERS AND DE KUYPER.—The resemblance between a registered trade mark and a mark sought to be registered, which may be sufficient cause (54-55 Vict. c. 35) for the refusal of the Minister of Agriculture to order registration of the latter, need not be so close as to entitle the owner of the registered trade mark to an injunction against the applicant in an action of infringement. It is the duty of the minister to refuse to register a trade mark when it is not clear that deception may not result from such registration.

MORROW V. LANCASHIRE INSURANCE CO.—Morrow placed $2,100 insurance with the defendant company on his barn. Subsequently he mortgaged the farm to a loan company, and the policy was assigned as collateral security. The instrument of mortgage provided that the mortgagor must insure the buildings for not less than $1,000, while the mortgagees might, without consulting the plaintiff, place any further insurance on the property. The mortgagees then secured, as they thought, the cancellation of the policy of $2,000, and effected a new insurance with another company. This was done without either the consent or knowledge of the plaintiff. A fire destroyed the barn, and Morrow, knowing nothing of the steps taken to cancel his policy, sent the usual notice of loss to the defendant company, which promptly denied liability, alleging cancellation of the policy. The pliantiff then wrote offering to furnish proofs of loss, and the company again denied their liability and said nothing about the offer to furnish proofs of loss. The court held that the plaintiff did not cease to be "the person insured" within the meaning of the Insurance Act, and that the company could be discharged only on following strictly the provisions of the Act. The insurance effected by the mortgagees could neither be held to be a "subsequent" insurance nor a "double" insurance. The company was held to have made such a repudiation as relieved the plaintiff from making proof of loss.

GIGNAC V. ILER ET AL.—Where there was evidence of a request made by a person in embarrassed circumstances by one who had endorsed notes for him, for a conveyance of an equity of redemption in land to secure the endorser against his liability, and the first proceeding taken to impeach the conveyance was a seizure of crops upon the land under an execution against the grantor more than sixty days after the transfer was made, it was held that there having been pressure the conveyance could not be impeached as a preference. But the statement of the consideration in the conveyance being untrue, the onus was upon the grantee to prove beyond reasonable doubt that there was some other good consideration, and his unsupported statement that such existed was insufficient. Therefore the conveyance must be treated as voluntary, and so void under the Statute of Elizabeth.

HERE is the generous way our Western people do things: Dan Godfrey's English band, which is on its way to the Winnipeg Exposition, had arranged to play in Rat Portage. It was therefore moved, in the town council, by councilmen Teevins and Chadwick, and carried, That the mayor be requested to, by proclamation, declare Monday, 6th inst., a half holiday in the afternoon, and that the mayor extend to Dan. Godfrey and his band the freedom of the town.

Summer Dress

For business the sack suit keeps well in front and in favor. It suits old men and young men and is always presentable. Of course there is much in the designing and finishing, and one always finds from season to season variation enough in cut to make one feel there is change of style. Some drapers have the happy knack of introducing their own individuality in the designing. This you will find in garments made by HENRY A. TAYLOR, Rossin House Block, and this week he is showing some specially designed business sack suits. His stock of summer weight woolens is very superior.

TENDERS FOR

ST. JOHN CITY DEBENTURES.

Sealed Tenders, marked "Tenders for Debentures," will be received at the office of the Chamberlain of the City of Saint John, up to 13th June, 1898, for the purchase of Saint John City Debentures for the whole or any part of the sum of

One Hundred and Forty-Seven Thousand (147,000) Dollars

to be issued in sums of $1,000 each, under the provisions of Act of Asesmbly, 52 Vic., Cap. 27, Sec. 29, payable in 40 years, with interest at the rate of Four per cent. per annum, payable half-yearly.

The said debentures are issued by orders from Common Council of the City of Saint John under authority of Act of Assembly, which provides for creating necessary Sinking Fund for redemption at maturity.

The proceeds of said Debentures are to meet expenditures for Public Services such as the extension of water and sewerage service in several places and districts as adopted by Common Council under date of 2nd September, 1897, in the sum of $12,000. Also the extension of water supply service on western side of the harbor and the laying of a new main from Spruce Lake to that part of the city, on the said western side of the harbor, in the sum of $135,000.

First Interest Coupons payable 1st November, 1898.

If desirable these Debentures may be issued in sums of $500 each.

Not bound to accept the highest or any tender.

FRED SANDALL, Chamberlain,
City of St. John, N.B.

Chamberlain's Office, 13th May, 1898.

Mercantile Summary.

THE assignment is reported from Tatamagouche, N.S., of C. K. McLellan, storekeeper, dealing more particularly in stoves, furniture, etc. Several mortgages, bills of sale, etc., had been previously recorded, to the amount of $2.100, in favor of Timothy McLellan.

IT has been agreed by the finance committee to recommend to the city council of Kingston that a by-law be submitted to the ratepayers providing for a bonus of $25,000 to be paid the Dominion Cotton Mills Company; also that the company's property be exempted from taxation for twenty years. It is said that if the measure passes the company will close up its mill at Montmorency, Que., and remove the plant to Kingston.

CUSTOMS receipts at Montreal show a very great increase for May over May of 1897, largely it is said caused by sugar being brought in to escape the new increased duty. The total customs returns for May last at that port were $601,775, as compared with $408,548 for May, 1897. In May, 1896, the receipts were $532,606. The total customs receipts at Montreal for eleven months of the present fiscal year have been $6,746,525, compared with $6,280,525 for 1897. These figures show that the increase of $193,526.90 for May were quite abnormal

AT a special meeting of the council of the Chambre de Commerce, the French commercial body of Montreal, the following resolution was unanimously adopted: Resolved, that this Chamber once more affirms the urgency of the construction of a dry dock, as well as of the extension of the high water wharves in the bay of Hochelaga to facilitate the erection of grain elevators and the construction of railways leading thereto, as embodied in the resolution proposed by the Mayor of Montreal, now under the consideration of the Montreal Harbor Commission.

NESTOR DESILETS, of St. Tite, Que., has had but a short business record. Formerly a clerk at St. Jacques des Piles, he began general storekeeping at his present address, little more than a year ago, on a capital of a few hundred dollars. He has been apparently able, however, to obtain liberal credit, for he has assigned, owing, it is said, some $7,000, with a deficiency of near $2,000. A meeting of his creditors is called for the 13th.——J. M. A. Blanchette, general dealer, of Ste. Louise, Que, lately reported insolvent, is endeavoring to compromise at 25 cents. Creditors are not disposed to accept this figure, but would consider an offer of 40 cents. Liabilities placed at about $3.400, with apparent assets of $2,400.—— Pierre Lussier, a baker at Longueuil, has assigned, owing about $1,200.

IT is probably a sign that the people of her fold are "forehanded." when we find the Church of Rome making such preparations for the accommodation of her many parishioners in the Province of Quebec as are mentioned in the following paragraph from an Eastern paper: "A Sherbrooke architect has furnished plans for the following Roman Catholic churches to be built this summer: At Marbleton, foundations already laid, completed by November 1st, cost $8,000; at Garthby, of wood, finished by November 1st, cost $11,000; at Barford, granite with cut stone front, foundations already laid, finished by January 1st, cost $19,000; at St. Cecile de Whitton, of wood, finished in autumn, cost $6,000; at Factoe's Mills, chapel of wood, finished in June, cost $3,000; at Island Pond, finished in autumn, cost $9,000; restoration of church at Paquetteville, $7,000.

Publishes each issue ESSAYS ON ACCOUNTING PRACTICE IN LEADING ESTABLISHMENTS in various industries; SHORT ARTICLES ESPECIALLY ADAPTED to the wants of BEGINNERS in office work; REVIEWS AND CRITICISMS of books on accounting and business subjects, written in a way to correctly describe the works; LETTERS OF EXPERIENCE from ACCOUNTANTS AND OFFICE MEN; QUESTIONS AND ANSWERS of interest to subscribers; NOTICES OF MEETINGS and BRIEF REPORTS OF PROCEEDINGS of leading ACCOUNTANTS' AND BUSINESS MEN'S ASSOCIATIONS; ILLUSTRATED DESCRIPTIONS of the BEST and NEWEST devices for OFFICE EQUIPMENT; brief EDITORIAL LEADERS ON TOPICS OF THE MONTH of interest in accounting and office circles; PORTRAITS OF EMINENT ACCOUNTANTS, with BIOGRAPHICAL SKETCHES; ACCOUNTING MISCELLANY, etc.

Monthly. $1 a year. Ten cents a copy.
ACCOUNTICS ASSOCIATION, Publishers,
262 West Broadway, New York.

Mercantile Summary.

THE steamer "Superior City," the largest barge on fresh water, passed down the Canadian canal at Sault Ste. Marie on Saturday on her initial trip. She is 450 feet long, and carried 6,696 net tons ore bound for Chicago.

THE Winnipeg Free Press learns from Mr. J. T. Gordon, the well-known cattle buyer, that no shipments of cattle are being sent east [June 4th] or to the Old Country at present. Hundreds of stockers from the province are, however, still being sent to the ranges in Alberta. Dan Hamilton, of Neepawa, Man., says the Commercial, shipped six carloads of stockers to Lethbridge, Alberta, last week.

ON Monday last a firm of bankers, A Weston & Company, of Painted Post, N.Y., and Weston Engine Company, made a general assignment to Hon. John B. Stanchfield, of Elmira, N.Y. It is feared, says a press despatch, that enterprises at North Tonawanda, N.Y.; Manistique, Mich.; Ottawa, Ont., and Governeur, controlled by A. Weston, may be involved, which, if true, will "tie up" a large amount of property.

UNDER letters patent of the Province of Quebec, the Northrop Loom Company of Canada is incorporated, to make textile machinery, etc., capital, $100,000. The charter members are: George Otis Draper, of Hopedale, Massachusetts, machinist; Andrew F. Gault, merchant; Samuel H. Ewing, banker; Richard R. Stevenson, manufacturer's agent, all of Montreal; Louis Simpson, of Valleyfield, manager, and Samuel Finley, of Montreal, gentleman.

DOMINION authority is granted to the following companies:—The Nova Scotia Steamship Co., headquarters, Halifax, N.S.; all Halifax parties, J. T. Hamilton, A. E. Jones, Geo. Musgrave, R. T. Braine, F. J. Phelan. Capital stock, $50,000, to operate steamers to and from Canadian and foreign ports. Canadian Electric and Water Power Co., Limited, capital, $150,000; Hon. John Haggart and others, headquarters, Ottawa. Montreal Mining and Trading Co., Limited, Robert Bickerdike, J. A. L. Strathy and others.

UPON the demand of the Central Thread Agency, an assignment has been made by Tanguay & Beland, jobbers in fancy goods, Quebec city. The firm has been in existence only since January, 1897, when they succeeded to Beland & Vezina, who failed just previously. Mr. Tanguay had been in the retail dry goods business, unsuccessfully.——It is reported that the Commonwealth Shoe Company, of the same city, already reported in difficulties, has succeeded in compromising liabilities of $16,000, at 50 per cent. cash, and will continue in business.

Mercantile Summary.

THE will of Sir Henry Bessemer, who died on March 15th, aged 85 years, has been proved. The gross value of the whole of the estate has been entered at £92,538, and the net value of the persona estate at £58,217, but the will, says the Times, appears to indicate that he had disposed by gift during his lifetime of property to the value of twice or three times as much as he left.

NEW two-dollar counterfeit Dominion notes are circulating in Sherbrooke, Que., Montreal, and the province generally, says the Montreal Witness. They are exceedingly good imitations and difficult to detect. The green coloring on their back is not dark enough, and the words "British American Note Company, Montreal," are in larger type than on the genuine note. A distinguishing mark for the non-expert is that the "i's" are not dotted.

WE learn from the Marine Review that very thorough improvements are being made in the passenger steamer "Badger State" and "Empire State," recently purchased from the Detroit Dry Dock Co. by the Northern Transit Co., of Cleveland, for service on Lake Ontario. It is expected that the "Empire State" will be first to enter upon the Toledo, Cleveland and Ogdensburg service. Traffic arrangements for the new line have been made with the New York, Ontario and Western Railway, at Oswego; Veamont Central, at Ogdensburg, and also the Richelieu and Ontario Navigation Co. for Montreal service.

AN effort is being made by the Quebec Cold Storage and Warehouse Company to bring back the shipping which this port has lost for several years past, and to benefit themselves and their customers that company has decided to guarantee the shipment of goods (stored with them) to England within ten days from the time received and the company notified of the intention to ship. This refers principally to butter and cheese refrigerated comparments. The ports covered by this guarantee, says the Chronicle, are London, Liverpool, Bristol and Glasgow. Steamers for Manchester, Leith and Aberdeen will also, however, be frequently utilized.

FOR a number of years, the name of F. W. Wheeler & Co., of West Bay City, Michigan, has been familiar as one of the foremost iron and steel shipbuilding firms on the Lakes. They have, unfortunately, fallen into financial difficulty and are forced to issue a circular to creditors stating that they hardly expect to be able to continue business in any way after the completion of the three steel vessels they are building for the Bessemer Steamship Co. By reason of their embarrassment of several months ago, the firm were compelled to issue bonds to their creditors. The Besssemer company is now to take charge of the yard and complete the vessels.

WE observe the application for incorporation of the Eastern Townships Chrome Iron, Mining and Milling Company (Limited), capital stock of $50,000, headquarters Montreal; to produce and mill gold, silver, copper, chrome iron, etc.; the parties being Raymond Prefontaine, M.P., mayor of Montreal; Joseph R. Fair, Montreal; C. A. Chenevert, M.P.P., Berthierville; John U. Gregory, Quebec; Colonel Charles King, capitalist, Sherbrooke, and some other persons in St. Hyacinthe and St. Paul, Minn. Likewise of the P. & A. Corset Company, Limited, to make corsets, veils and knitted goods. The parties mostly reside in Farnham, where the headquarters are, some in Montreal. The capital is to be $50,000.

M. C. DICKSON, D.P.A., Toronto

Mercantile Summary.

THE Shediac Boot and Shoe Company, of Shediac, N.B., of which James Webster is president, and A. J. Webster, general manager, employs from eighty to ninety hands and pays out about $350 in wages every week.

THE Duplessis Pegging and Sewing Machine Company, Limited, capital $50,000, headquarters St. Hyacinthe, is incorporated to buy patents for machines for pegging boots and for sewing boots, and other machines, and for making and selling such machines.

NOTICE of application for incorporation is given by the G. A. Holland Co., Limited, of Montreal, capital $60,000, to make and sell baskets and sporting goods, and to carry on a general mercantile business. Charles C. Holland, Robert K. Holland, Hugh Watson and Stuart Foster are the parties.

AN argument in favor of the principle of closing stores early in the evening is advanced by the Goderich Star, which says: The early closing movement is now working in almost every town and village around us, but Goderich merchants have not yet fallen in line. Possibly the reason is that a previous proposition to close their stores at six o'clock p.m., did not commend itself to the Goderich merchants. The present proposal to close at seven is more likely to succeed.

THE cruiser "Stanley" arrived at Port Hawkesbury, N.S., on 6th inst. with the French schooner "Marie Eugenie," of St. Pierre Miquelon, in tow, she having been seized off Margee Island, with contraband cargo on board. The cargo consisted of brandy, gin and tobacco.

THE following are the results of the smelting operations in the Hall Mines, limited, at Nelson, B.C., for the four weeks ending 28th May, 1898. In twelve days and twenty-one hours' smelting 2,902 tons of ore were smelted, yielding 123 tons of matte, containing (approximately) 47 tons copper, 38,780 ozs. silver, 216 ozs. gold.

THE Montreal lumber firm of N. & A. C. Gray, recently reported in financial difficulties, have arranged a compromise at 30 per cent on liabilities of $14,000. A. D. Taylor, an absentee lawyer, to whom they had given a large amount of accommodation, figuring on the list for $9,493.

COMMUNICATION between Pelee Island and the mainland of Ontario by telephone has been stopped since last February, but a cable to be laid across to the island was taken west last week per steamer "Arabian." It has a gross weight of ten tons and is a great improvement on the old cable, being larger and better wrapped. It arrived from Europe quite recently.

TOBACCO transplanting is the order of the day in Essex county, according to the Amherstburg Echo. One man has sold over 100,000 plants and was unable to meet the demand for as many more, but he expects to have a million before the season closes. Thomas Ward has put in 6,000, Albert Fox 2,700, Haines & Johnston 5,000, Thos. Brooker 10,000, H. Bailey 1,500 and S. Fraser 30,000 the past week. These, we take it, are all in the townships of Colchester and Malden.

IT had been hoped that the affairs of Letang, Letang & Co, wholesale hardware merchants, might have been settled up without recourse to insolvency proceedings, but owing to pressure from one or two sources, a regular assignment has been made to the court, and an order has been issued for a meeting of creditors to be held before the judge for the appointment of a curator. The schedule of liabilities as filed in Court, shows direct liabilities $130,600; privileged, $2,117, and indiredt, $39,386.

UNDER the Ontario Companies Act, the following companies have been granted letters patent:—The Goderich Elevator and Transit Company, Limited, capital, $150,000; parties, A. M. McDonald, W. L. Horton, Jas. Clark, J. T. Garrow, of Goderich; the Messrs. Mooers, of Kingston, and James Fair, of Clinton; under the name of the Toronto Grain and Seed Cleaner Manufacturing Company, Limited, capital, $40,000; parties, S. C. Duncan-Clark and others, of Toronto.

ROBERT BARR, a Canadian writer who revisited Canada from London, England, the other day, used to be the "Luke Sharp," of the Detroit Free Press. He declares that some of the finest humor written is to be found in Dr. Drummond's book, "The Habitant." "Indeed, the life and language of the 'habitant' is full of unconscious humor." Barr has lived among the French-Canadians, and has observed their peculiarities, not only of speech but of life and manners. Gilbert Parker, another Canadian writer, who has now a reading constituency which is world-wide, found enough in the historic past of Canada to inspire some of his best work. And he thinks there are the plots of a score of books to be found in the common life of Canada to-day.

Why is the GENDRON the Best Wheel on Earth?

BECAUSE

It has good common-sense up-to-date talking points.
It has new, distinct and attractive features.
It is unexcelled in beauty, style and finish.
It has the best in material and workmanship.
It is the most perfect in its lines and bearings.
It is the easiest and smoothest running wheel in the world.

Gendron Bicycle

It has no discarded experiments.
It does not cause ridicule by having about it abandoned devices
For utility, speed, safety and comfort the Gendron Bicycle is pre-eminent.
The capacity, long experience and methods of the manufacturers insure a product of the highest standard.
It is fitted with the fast, lively and durable Buckeye Tire that can be easily repaired if punctured and is fully guaranteed.
Secure the delightful feeling of confidence and safety by using the celebrated Waters Brake.

AN express freight train eastward from Toronto the other day took a car load of Heintzman pianos to Prince Edward Island, where these handsome instruments have made a favorable impression.

THE shovel shop of the D. F. Jones Manufacturing Company at Gananoque suffered disastrously by fire on Tuesday last, under curious circumstances. A twelve-ton flywheel on the large roller broke, and one large piece struck the dome of the boiler, another a petroleum tank, sending the oil all over, which brought fire from the furnace. The building and machinery were insured for $3,000 in the Millers' and Manufacturers' Insurance Co.

A GENERAL dealer at Salmon Arm, B.C., Robert Stewart by name, is in the hands of an assignee.——T. H. Fahey, boot and shoe dealer in Winnipeg, finds that his creditors have taken possession of his stock, which is in good shape, but his bookkeeping style is bad, and the books do not show the condition of the business. His habits are anything but what they should be, and creditors are simply trying to protect themselves before their money is all gone.——A. G. Hample, butcher, in the same city, has assigned.

FROM Montreal is reported the assignment of George Lightbound, carrying on a grocery commission business, under the style of Lightbound, Rolston & Co. This action was the result of a demand in insolvency, made by Alfred Powis, of Hamilton. Mr Lightbound was formerly senior partner in the old wholesale grocery firm of Lightbound, Rolston & Co., and previously Robertson, Lightbound & Co., in their day one of the leading houses in the trade. Since the failure of L., R. & Co. in 1894, Mr. Lightbound has carried on principally a commission business, using the old style. The present liabilities are small, about $7,500 it is believed.

THERE is a difference of opinion between the boards of trade of Peterboro and Toronto with respect to the Trent Valley canal scheme, and some correspondence has come of it. The former body thinks, and writes a letter saying so, that the canal, if completed, would be a regulator of grain freight rates eastward. The Toronto body does not so consider, but classes this with the Georgian Bay canal scheme, which it has also opposed. Certainly there is weight in the argument that to give Government assistance in the building of either scheme would be to injure the route by the Welland, the lakes and St. Lawrence canals—that national waterway which this country has spent and is spending so much to improve.

PROFITABLE INVESTMENT

THE Western Canada Loan and Savings Company has declared dividend for the present half-year, at six per cent. per annum as before.

MANY in Ontario will hear with regret of the death, on Monday evening last, of Mr. Alexander Robertson, so well known as the manager at Brantford of the Bank of British North America for a quarter of a century. It is but three or four years since he resigned the agency, and it was thought likely that he would live many years to enjoy his retirement. His illness was not of long duration, and was scarcely thought to be serious.

FOR forty years Henry Sewry has been in the foundry business at Barrie, and up to 1882 he seemed fairly prosperous. He was then credited with a surplus of $15,000, but it was largely composed of real estate. He then was Mayor of the town. But two or three years later he found himself cramped for money and mortgaged his chattels for $2,000. In order to assist him in the manufactory of stoves, the town voted him a bonus of $7,000, but that was easily lost in the venture. Since then he has been short of funds and now makes an assignment.

IT is an illustration of the changing currents of Canadian wholesale trade that another Toronto dry goods importing house has occasion to consult its creditors because of declining trade and reduced resources. Messrs. Alexander & Anderson, formerly of Front street east, now of Wellington street west, who succeeded Ogilvy, Alexander & Anderson, the parent house of which was an old one, have found the importing business unprofitable for several years, and may need some indulgence from their creditors as soon as a statement, now in preparation, is completed. The firm also manufactures cloaks and mantles, which branch of their business, we are told, is quite prosperous.

IN February, 1897, W. H. Lenfesty's grocery business in Hamilton was changed into the Co-operative Trading Co., Limited. About $3,000 capital was subscribed and $2,500 paid thereon. It appears that the trouble which has overtaken the concern now is largely a personal one. Mr. L. claims that the shareholders owe him $1,500 for his stock, goodwill, etc. The result of the dispute is an assignment.——South Bros. opened a small furniture shop at Niagara Falls in 1896 or 1897. The venture has proved a losing one and ends in an assignment.——In Toronto on Friday last a meeting of the creditors of Collins & Co., dry goods dealers at Kincardine, was held. The firm showed a small surplus, and creditors allowed them time to make an offer for stock, etc.

THE creditors of W. J. Guinane met at Clarkson's office in Toronto, on Monday, 6th. By the statement submitted the liabilities direct are $54,510.87; secured, $7,068.05; preferred, $1,315.74; total, $62,894.66. Assets, retail stock in Yonge street store, $11,770.26; wholesale stock, $9,240.33; sundries, $1,407.39; Queen street stock, $3,262.80; total, $25,680.78; nominal surplus in hypothecated goods, $7,226 53; fittings, $1,536.17; book accounts, $391.40; total assets, $34,834.88. Showing a deficit of $28,059.78. Mr. Clarkson explained the various items. On motion of Mr. James Robertson, of Montreal, the following were appointed inspectors: Messrs. M. H. Ludwig, J. A. McIntosh, C. D. Scott, L. McKellar and James Robinson, with power to deal with the assets after such investigation as they may deem necessary.

THE SITUATION.

Spanish diplomats are unfortunate as writers of letters and also in having them stolen. A letter of a late Spanish ambassador, stolen from the post office at Havana, was the cause of his recall from Washington. A letter written by Senor Carranza, late of the Spanish embassy at Washington, stolen by detectives at Montreal, occasions a demand from the Washington Government for his expulsion from Canada, on the ground that he is abusing the hospitality of this country by making it as a base for collecting information for the use of his Government, in defiance of British neutrality. To this demand Carranza replies that the accusation is based upon inexact information, the published translation of his letter being inaccurate. The truth will be gathered from reference to the original. There is another complication connected with the case. A detective named Kellert, being suspected as the letter thief, was arrested and acquitted. Kellert now causes the arrest, on a capias, of Carranza and his companion, Du Bosc, also late of the Spanish legation at Washington, for false arrest. This movement was backed by a seizure before judgment of the bank account of Carranza. Judge Mathieu accepted bail of $1,000 for the due appearance of the Spaniards.

Nobody here justifies the means taken by American detectives to obtain possession of the Carranza letter. The fact that the supposed thief was arrested showed that our laws would not have been permitted to be violated with impunity if the right man had been caught. Detectives must pursue their ends by lawful means. Mr. Enoch Thompson, Spanish consul here, throws out a suggestion that a despatch written by the Governor-General [of Cuba ?] to Senor Polo, was never received. Is this a hint at Grahamizing in the United States or the Canadian post office ? Nothing of the kind, we feel confident, would be permitted with the sanction of the authorities here. The question has been asked whether American spies cannot, as well as Spanish spies, serve their country, in Canada, by conveying to its Government information about the war ? It is difficult to see what information connected with the war movements American spies could find here ; Spanish spies might get some such information here at second hand, in default of being able to get it at first hand.

On the second reading of the bill to authorize a loan of $2,000,000 to the Montreal Harbor commissioners, Mr. Tarte defended his action, on the ground that the improvements on which he insisted were necessary for the trade of the country. From the first, it has been obvious that one cause of the objection to his plans was that the harbor commissioners were to be made responsible for the cost of the dry dock, though this part of the improvements is one which, in other places, has been made at the expense of the Government. The Quebec dry dock, Mr. Tarte pointed out, earned $6,000 last year ; but if this fact was cited to prove, as it appears to have been, that the proposed dry dock at Montreal will be a paying work, it will hardly answer the purpose, as the interest on the cost will be several times that amount. If the Montreal dry dock ought to be built at the expense of the Government, and the onus is on the Minister of Public Works to show that it should not, then the responsibility of its construction ought to be shouldered by that department, and neither the work nor the cost should be put upon the Harbor Commission. It would be far better to decide that point now than to wait till the transfer of the item to Government account is complicated by other questions. Grain elevators, Mr. Tarte points out, are required, and these ought to be furnished by the carrying interests, which up to the present time are far from having, in this particular, made the most of our great internal water communications. Sir Wilfrid Laurier gave assurance that the loan of $2,000,000 will add nothing to the public debt, so confident is he that the harbor dues will answer for the interest for all time. After the Lake St. Peter financing, it requires a robust faith to hold with a firm grasp this opinion.

In connection with the engagement of the credit of the Dominion for the Montreal Harbor improvement, Mr. Tarte, the Minister of Public Works, made a charge against two prominent citizens that, as members of the Harbor Trust, they "caused the windmill basin to be constructed in their personal interest at a cost of over $1,000,000." If these gentlemen should feel it incumbent on them to vindicate their commercial honor, it is difficult to see how they could proceed. A statement made in Parliament is privileged and cannot be challenged in the courts. A commission of enquiry is scarcely more available, since the accuser, as a member of the Government, would have a voice in the selection of the commissioners. Such an accusation as this should not have been made under conditions which virtually deprive the accused of the means of effective defence.

What we suggested as probable is now held as the best opinion on the effect of Lord Herschel's copyright bill. The belief is that this bill will not prevent the Hall Caine agreement going into effect. Without some such agreement Canada has no moral standing ground on which she can deal with the property of English copyright holders at her will. She has the right to legislate on the question of copyrights. What does this mean? It means what it would mean in any other country, the right to protect copyrights which its people create. It does not mean that she has a moral right to appropriate on her own terms other people's property. The plea that others steal means, if it means anything, that precedent sanctifies crime. The only moral right we have to touch British copyrights is a right derived from agreement. Hall Caine has solved the question for us, in the only way in which it can be solved. And even then we have to assume his right, in a general way, to treat for the whole body of British authors. That right is doubtless imperfect, but from the nature of the case it is the only one attainable. The ratification of that agreement will do something like justice; at any rate, it will save us from the otherwise deserved reproach of literary piracy.

THE CROW'S NEST PASS ABUSE.

If we may trust the report of the commission appointed to enquire into alleged ill-treatment of laborers in the Crow's Nest Pass, an abuse of monstrous proportions which has been unearthed, calls aloud for redress, as well as for some means of preventing its possible repetition. Whether the agents made false representations to the men whom they, in effect, lured to their doom, may admit of doubt; but of the grossly brutal and inhuman treatment of the men the evidence of certainty is only too plain. The nature of the contract, as onlookers saw at the time, was one-sided, such as the courts would not willingly have enforced and such as the law ought not to sanction. The men could not quit work without giving a fortnight's notice, but they might be dismissed at any time without cause assigned. But the bargain made with the men, unequal and unfair as it was, was not observed by the company, its contractors or sub contractors. It is quite clear that the case is one in which the company must be held morally responsible, legally if possible, and it is their plain duty to repair the mischief as far as possible, though they cannot recall to life the men who died for want of medical aid, for which they paid but did not get. It is difficult to believe that the company would sanction the hundred villainies detailed in the report, and it is almost equally difficult to see how they could have been wholly ignorant of the facts. At any rate, the company must be held responsible. To the company, after it had declared that it was going to build the road, on its own account, a subsidy of $3,000,000 was given. Sub-contractors, working under the company, left men out in tents without stoves, at a temperature of 30 to 40 below zero, fed them on frozen food, or when cars were used for shelter, the contracted space allotted to them amid reeking filth, recalls the black hole of Calcutta, without its deadly heat. The Commissioners' report must be followed up by practical measures, to the enforcement of which the Government must rigorously attend. If the company be wise, it will voluntarily offer all the redress in its power, without waiting the compulsory action on which public opinion will otherwise insist. At the same time, full justice will not be done till the sub-contractors, who appear to have committed revolting crimes, are made criminally responsible for their acts.

Several suggestions are made by the Crow's Nest Pass Commission as to the part which the Government should take in connection with the construction of public works in which Government intervention is exercised, directly or indirectly. Workmen should, it is contended, be engaged under Government supervision and only men in good health accepted. This implies that railway companies can no longer be trusted to deal with labor without Government supervision. Employers, too, it is assumed, require to be protected from frauds by agents, as well as honest laborers from the ill-treatment and tyranny of contractors. The Government agents should, it is suggested, examine all contracts between contractors and the men they employ. The purpose of such examination is not distinctly stated; but immediately following is a statement of what wages should be paid, $2 to $2.50 a day, and that board should not exceed $5 per week, the sale of liquor in the neighborhood of the works being prohibited. This seems to imply that, in the opinion of the commissioners the Government should have a voice in the making of such bargains, a contention which, in ordinary cases, is not likely to be conceded. If we once admit the right of the Government to take part in private contracts, and virtually to dictate wages, where are we to stop? The case of Government subsidies takes us outside the category of purely private interests; such subsidy gives the Government the right to make stipulations or conditions. In all cases the authority of the Government may be used to protect the weak and the poor, who have not the means of protecting themselves; but this is something different from interfering in the making of bargains between private persons. At the same time, it must be admitted that the necessity of guarding against the recurrence of abuses such as those to which railway construction at the Crow's Nest Pass has given birth, in some form, has been but too fatally established.

If the suffering occasioned by the infamy of the Crow's Nest Pass fail to awaken public attention to the policy of granting subsidies of public money to enrich private persons, a striking object lesson will go for naught. To the Crow's Nest Pass Railway the princely subsidy of $3,000,000 was given out of the public treasury of Canada. It must have gone far towards meeting the cost of construction, if it did not wholly suffice for that purpose. Yet the men, whose labor built the road, were paid wages which in many cases barely sufficed to pay their board, and in fact sometimes left them in debt. The families of the married men must have been left to starve. The millions paid in subsidy go to enrich the favored company. The same financial operation is being repeated in a score of places. It is time to call a halt and abandon this improvident system, with its resulting corruption and demoralization. The controllers of the subsidized roads, in gratitude for favors received, aim in turn to become the masters of Parliaments and Governments. Political parties crouch beneath their sway, and are willing to go on making sacrifices of the public resources to obtain their good will. And so it will be to the end, unless the corrupting system of subsidies is abolished. Until this monster evil be attacked with a force sufficient to bring about its destruction, it is idle to talk of reform or to expect amelioration in railway finance.

BANK OF MONTREAL.

To the shopkeeper, the manufacturer, the forwarder, proof of improved business and the accumulations of successful thrift offers itself in the tangible shape of larger purchases, improved orders, more constant cargoes. And all these are in evidence this year in Canada; so that the classes of persons mentioned do not perceive any need of going beyond the evidences of prosperity that present themselves in pleasingly concrete form at their very doors. The banker and the publicist, however, require to take a wider view. They must look beyond the "here and now," must peer beneath the surface of things commercial, and look indeed far over the financial horizon for evidence or suggestion of the coming trend of business and monetary affairs.

There are several important banking institutions in Canada whose transactions take a wide range, far beyond our own territory, extensive as that is. And the more our commerce grows, either eastward from Atlantic shores or westward from the Pacific coast, the more exacting its demands upon the skilled observation of our bankers and public men. While we, close at home, comfort ourselves with experiences of good crops realized and with prospects of increased industrial production, the banker finds himself with something more comprehensive to look after. What of the effect and duration of the Spanish-American war? What of the complicated issues of a possible European *embroglio*, such as agitates the minds of ministers and ambassadors? How will these affect Canadian export trade and shipping, how influence the money market of the world? Such considerations cannot be absent from the minds of bankers who do business on this continent and beyond it.

If matters such as these were present to the minds of the managing authorities of the Bank of Montreal—and that some of them were is clear from the addresses of both the chairman and the general manager at the annual meeting on Monday last—they yet do not bulk largely in the deliverances of these gentlemen. Mr. Clouston confined his observations mainly to reviewing the conditions of business and finance in Canada and the neighboring States. He notes as a curious fact that the bank was at one period of the year receiving a better rate for short loans in Germany than in Montreal. Another uncommon circumstance was that the balance of trade in favor of the United States for ten months of the present fiscal year reached the great sum of $514,000,000, whereas in no previous full fiscal year had it reached $300,000,000. This is an astonishing proof of the productive power of that people.

The effect of the enhanced value of grain upon many Canadian interests is well summarized by Mr. Clouston. Indeed, both he and the vice-president dwelt upon it as a stimulating force in a great variety of directions. The loan company and the bank, the railway and the steamer, the merchant and the artisan, all benefited by it to a marked degree. The existing activity in manufactures, whether for home or foreign consumption, is another satisfactory feature of the moment, and the mining development in Kootenay and Rat Portage proceeds apace: "the mines are gradually passing from the chrysalis and chromo stage into actual development and production," as Mr. Clouston very happily says. True, our lumber trade has received a check, by reason of overstocked markets in Britain and cessation of demand from the United States. Large stocks were carried over from last year, and, says Mr. Clouston, "I am afraid the year's cut has not been sufficiently curtailed." He concludes with an approving reference to the taking power by the Canadian Government to lower the rate of interest on Government savings bank deposits to 2½ per cent. as a wise and business-like step. At the same time he considers that with a war going on almost next door to us, of indefinite duration, it may not be practicable at once to put this reduction into effect.

Mr. Drummond fails to see any evidence as yet of the benefit which some people expected the Spanish-American war was to bring to Canada, In this he is at one with our friends in the Maritime Provinces whose export trade, especially to the West Indies, has been disturbed, and whose shipping is menaced by foreign blockades and the diversion of accustomed traffic. His paragraph on the question of credit deserves to be quoted in full: "The curtailment of excessive terms of credit in many branches of business, must be regarded as satisfactory, for, while credit is of the very essence of modern business, too extended terms are a fruitful source of mischief both to the giver and receiver. In this connection, the failure record of the year deserves attention. The number of failures is smaller than for a number of years, and the amount involved is moderate."

As to the menace referred to at the last annual meeting of this bank, of the possible adoption by the United States of free coinage of silver, Mr. Drummond does well to remind us that it is not altogether removed. The fre taxes rendered necessary by the expenditures for the existing war will tend, unhappily, to revive in the minds of many ignorant or superficially educated people in the States the vicious theories of Bryanism. Every well-wisher of the Great Republic will hope that it may be saved from the disastrous effect of such a measure. We are glad to hear the State of Oregon has declared by a majority of 15,000, against the free coinage of silver and all other schemes for the debasement of currency and the repudiation of debt.

The statement of the Bank of Montreal for 1897, as we remarked on a former occasion, shows the largest net earning for four years, viz., $1,265,300, which is at the rate of 10.544 per cent. on the paid capital. A circumstance in connection with the deposits is that while they have appreciably increased in amount, some $3,000,000 specially deposited in large amounts has been withdrawn, and is replaced by deposits from the public in smaller sums. The increase of $2,600,000 in discounts is partly from the general expansion in business, and partly from special operations.

QUEBEC BANK.

An increase of some four hundred thousand dollars in the totals characterizes the statement of the Quebec Bank for 1897-98. Circulation is shown to be active; there is an increase in current discounts, while there is a still greater increase in the, perhaps, less productive assets known as "immediately available." The deposits show a growth of a quarter million; and the feature of the additional sum, that must be gratifying to the management, is that those obtained without interest are in greater ratio than those on which interest is to be paid. The net profits sufficed to pay six per cent. dividend and make an addition of $50,000 to Reserve. While less than some former years, considering the reduction of rates by competition, this is not a bad rate of earning by any means.

The Quebec Bank is not in the habit of boasting, but it might justifiably take credit for the record of having for eighty years paid dividends averaging six per cent. per annum. An unusual series of removals of directors by death falls to be now chronicled. Mr. Shaw, Mr. Renfrew and Mr. Withall have all passed away within the year, all of them shrewd advisers. The language of the report very well describes their peculiar and prolonged connection with the bank: "Having acted together in harmony during a number of years, and having been, all of them, equally inspired by a strong sense of duty to the bank, their respective services were made more effective to promote its interests by the perfect understanding that existed between them." Mr. John Theodore Ross has been appointed vice-president, and the vacant directorships are filled by the appointment of Messrs. Vesey Boswell, F. Billingsley and C. R. Whitehead.

EASTERN TOWNSHIPS BANK.

Although it might have been thought that the Eastern Townships Bank could just as well have paid their shareholders one per cent. bonus this year as last, since its net profits are not smaller but larger than in the previous twelve months, the authorities contented themselves with one-half per cent. bonus, in addition to the usual seven per cent. dividend. They have, however, placed $50,000 to Rest account, as compared with $35,000 so placed last year, bringing that fund up to $835,000, and carried forward about as much as before. Such profits as these are very noteworthy, when we bear in mind the smaller proportion than some other banks of its deposits to its capital and Rest; and with an expected reduction in the rate of interest on deposits, it justifies the directors in the expectation of continuing to pay a bonus to shareholders.

The state of business and the success of the farming class in the Eastern Townships of Quebec seem, from the result of this bank's transactions last year, which usually reflects the prevalent conditions in that district, to have been satisfactory during 1897. Deposits have been increased by $400,000, which is a sign that the people are "forehanded," and the bank's circulation has been well maintained. In recommending that the number of directors resident where the head office is situated should be increased to at least four, the directors explained that it was desirable that there should always be a quorum available, and also that the increasing business of the bank—which must necessarily be controlled and directed from the head office—might receive full consideration. Their wish in this respect appears to have been complied with. It is interesting to notice that an increase has been made in the remuneration of the president and directors, a token of appreciation which there is every reason to think is deserved.

CANADIAN DAIRY PRODUCTS.

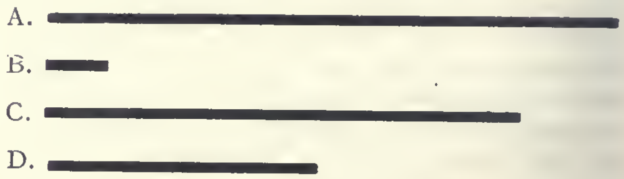
Canada and the United States contributed in 1897 no less than 82.8 per cent. of the total quantity of cheese imported in to the United Kingdom, and 38.8 per cent. of the total consumption? As compared with the United States, Canada's share of the trade amounted to 76,351 tons, against 31,581 tons. The total exports of all countries other than Canada to Britain amounted to 53,811 tons, or, in other words, the exports from the Dominion exceeded by 22,540 tons the total quantity exported to British markets by other colonies and foreign countries. These statistics give Canadians sufficient reason to feel proud of the prominence their country occupies in dairy product markets. But unfortunately this immense turnover of cheese was not followed by corresponding profits to those engaged in the trade. Messrs. W. Weddel & Co., of 16 St. Helen's Place, London, E.C., have compiled the following table showing the average top prices of Canadian cheddar cheese in London during the seasons 1896-7 and 1897-8:—

	Per cwt. May.	Per cwt. June.	Per cwt. July.	Per cwt. August.	Per cwt. Sept.	Per cwt. Oct.
1896-97....	48s. 2d.	47s. 0d.	45s. 0d.	43s. 6d.	44s. 6d.	51s. 0d.
1897-98....	57s. 5d.	48s. 6d.	43s. 5d.	44s. 0d.	47s. 9d.	47s. 7d.
	Nov.	Dec.	Jan.	Feb.	March.	April.
1896-97....	53s. 6d.	52s. 9d.	55s. 2d.	60s. 9d.	59s. 2d.	58s. 3d.
1897-98....	46s. 6d.	45s. 3d.	44s. 2d.	43s. 0d.	42s. 3d.	42s. 9d.

This table, showing a steady decline from the high prices, recorded in the opening month of the season represents serious losses to all engaged in the trade. September cheese sold at the lowest prices on record.

When values fell below a figure that would remunerate makers, the production was still continued, because most Canadian dairymen were solely cheese producers. The market was, to a large extent, subject to control by Canadians in that they were exporting the bulk of the supplies; but few factories, however, were deterred from production on account of the depressed condition of values.

Butter, although not realizing at all times top prices, in 1897-98 brought far more satisfactory returns. The market was maintained on a steady basis, and Canadian creamery owners and butter forwarders made modest profits, while those in the cheese trade suffered disastrously. The lesson is apparent to everyone. All dairymen should be in a position to alter their plant within a reasonably short time to take advantage of the changing markets, and be able to make milk into either butter or cheese at will. An effort is being put forth to this end, and in 1897 Canada was surpassed by only one colony, Victoria, in the quantity of butter supplied the mother country. But compared with the total quantity of butter imported, Canada's contribution was a mere pittance. The relative standing of our butter and cheese exports to Great Britain to the aggregate exports from all sources is shown by the following comparative lines:



A. Total imports of butter into Great Britain.
B. Imports of butter from Canada.
C. Total imports of cheese into Great Britain.
D. Imports of cheese from Canada.

It must not be thought from this showing that there is no room for development in the cheese trade, and that the makers of the Dominion have necessarily reached their maximum output. There was in addition to an importation of 130,160 tons, a domestic make of 147,617 tons of cheese consumed by the British people. But the present opportunity of the dairymen of the Dominion lies in the direction of increasing the output of butter. A prominent London importer of Canadian butter says, "the high quality which much Canadian butter possessed last year made it a formidable rival to many continental varieties in British markets; and European butters will find in the near future a severe competitor in the Canadian production. Cheap fertile virgin land, light taxes and economic means of transit are advantages which Canada possesses in a marked degree over the exhausted soils, high rents and heavy taxes of many European butter-producing countries. Denmark, France, Sweden, Holland and Russia are the principal countries with which Canada must compete for the butter trade. The intelligence of the farmers of this country, it may be presumed, is not less than that of the countries with which Canada must compete for the butter trade. If success is finally to rest with Canadians, it can only be attained through the closest relations between the allied industries of cheese and butter making.

EXPORTS TO AUSTRALIA.

It will be observed that our New South Wales letter in to-day's issue gives statistics of the trade of that Australian colony with Canada for several years. An increase of exports thither by this country from $263,000 in the year 1894 to $936,000 in 1897, equal to 350 per cent. growth in three years, is creditable to Canada. An Australian journal, commenting on the failure of Australia to increase her exports to the Dominion, blames their own people for lack of enterprise, and urges them to advertise themselves and to take some pains to cultivate trade by means of special visiting or agents here, as Canada has done over there. Our correspondent enumerates the dozen articles in which Canadian export has mostly increased; and further says, that while in certain descriptions of goods sent there was a falling-off, that falling-off was occasioned by Canadian exporters failing to fill orders satisfactorily. This is still another reminder to our manufacturers and merchants that they must obey instructions of customers if they desire to sell to the Australians.

CREDIT MEN'S CONVENTION.

The annual convention of the National Association of Credit Men of the United States is to be held in Detroit, Mich., on June 22nd, 23rd and 24th next. The privilege of the floor will be freely granted to all representatives of mercantile houses, although members alone will be allowed to vote. Naturally, the chief feature of the meeting will be modes of regulating credit, the collection of debts, etc. But another feature will be the holding of meetings of representatives of different trades on the first day of the convention in different rooms of the Cadillac Hotel. The trades in question will be dry goods, hardware, groceries, drugs, clothing and boots and shoes. A Rochester man will act as chairman of the dry goods gathering. At these conferences such topics as dating, discounts, credits and collections, as they relate peculiarly to each trade, will be discussed.

The programme for Wednesday, June 22nd, includes the calling to order of the convention by the president

On the second day, Thursday, 23rd June, the business will begin at nine o'clock. After the reports of the committee on credentials and Improvement of Mercantile Agency service have been presented, resolutions will be offered in regard to the need of improvements in mercantile agency service and the necessity of credit men giving to these agencies the fullest information in their power in regard to the methods, character, etc., of debtors. The advisability of merchants giving the mercantile agencies statements of their affairs at least once a year will be suggested, and very likely debated. Also the advantage which would accrue from the agencies making use of the statement blanks endorsed by the Credit Men's Association. These resolutions are to be responded to by representatives of the Bradstreet Company, R. G. Dun & Co., and the Credit Clearing House.

It is intended that resolutions shall also be presented in regard to the taxation of foreign corporations, the giving of preferences, and the desirability of the speedy enactment of the Torrey bankruptcy bill.

FREEHOLD LOAN AND SAVINGS COMPANY.

A remarkable feature of the report and presidential address of the Freehold Loan and Savings Company, and a welcome one, is the frankness with which details of the business of the company, such as its arrears of interest, its real estate on hand, its losses ascertained, are made known. The effect of these upon the company's earnings is stated; the probable further results of a certain policy calculated, and the action of the directors thereupon sought to be justified, in writing off doubtful assets freely as they have done. We do not see any valid objection to this procedure; on the contrary, we think it more than likely to secure confidence, either at home or abroad, to have a group of business men take the position of saying, as this board of directors has apparently done, "We have nothing to conceal. It is known in both Canada and Britain that values of landed property in Ontario and Manitoba had fallen; that there was a real estate 'boom' in Toronto, which has burst; that there were certain properties loaned upon which did not yield a return. Our company has suffered along with other like institutions, and now we have investigated our position most thoroughly, and purpose showing you very plainly how much we have suffered." Such an attitude is to be commended, and it received the approval of an unusually large meeting of shareholders on Tuesday last.

Leaving the report and the balance sheet for a moment, let us first examine the president's address, which goes into particulars about the real estate market generally and the experience of the Freehold in particular. The company's vacant lots in Winnipeg have nearly all been disposed of; the company has sold during the year 95 properties, either farms or Toronto houses; of the 122 houses on hand, only five are vacant; the company has 117 farms on its hands, but every one of them is rented. This last is a formidable list, but the Freehold's books show that the return received from these rented farms in 1897 was 3½ per cent., which is not only a pleasing, but a reassuring fact, because it shows a return for the twelvemonth equal to the cost of the company's borrowed money of to-day. Again, the company's handsome building in Toronto, which was valued in former years at $359,624, is written down to $200,000. This is a bold step, but a businesslike one, and is in pursuance of the promise made in the report of twelve months ago, that the board would write off bad debts as they became known, and make a liberal allowance for depreciation of securities. The sum written off this year, in addition to the $159,550 from the building, is $200,000, making $359,550 taken from the Reserve, which leaves that fund at $300,000, while the contingent fund stands at $41,703. The company's assets in mortgages and buildings amount to $5,586,880 and its unpaid subscribed stock to $1,904,400, making $7,491,280, as against obligations outside its shareholders of $3,886,504.

In common with other loan companies, the report tells us, the Freehold has participated in the improved conditions of real estate in town and country. It is true that farms are now in greater demand, and that city properties are becoming more productive; and the improvement is clearly shown by the receipt of so large a sum as $340,208 as interest and collections of arrears by this company in 1897, while the actual earnings were only $285,576. The upward tendency now shown must have a good effect upon mortgage loan companies' earnings. And as the improvement proceeds, the Freehold, much of whose loans are on the best farms of Ontario and Manitoba, will doubtless share in it, being all the better able to do so from the "cleaning up" of its assets that has now been accomplished

OUR AUSTRALIAN LETTER.

Trade is quiet, as it is commonly at this time of the year. It is affected a little by the Federation agitation, by the fear that the United States-Spanish war may have some effect upon prices of wool by lessening the demand from the United States—and by the unfavorable weather in the South and North-West portions of the colony of New South Wales. It was supposed that the heavy rains of February assured a good season, but for the first time in the experience of the oldest inhabitant such a rain failed in some sections to produce grass. The reason given is that the drought has been so prolonged that there was not enough rain to give the ground the thorough soakage to bed rock that was needed. The coast region has had copious falls, but the outlook for some of the sheep runs is gloomy. Singularly, while this is so, and the imports of many lines of merchandise are considerably less than for the same period last year, the revenue returns for April show an expansion of £124,000, being additions to nearly all departments of the Government income. It is not likely that the Premier will have such a pleasant surprise for this month of May.

In spite of droughts, and wars and rumors of wars, the trade of the colony grows, though not by leaps and bounds, as could not be expected under the circumstances. The figures for the [fiscal] years 1896 and 1897 are:—

	Imports.	Exports.
1896	£20,561,510	£23,010,349
1897	21,744.350	23,751,072

About two-thirds of the importations for each year were of merchandise for home consumption. The trade per head of the estimated population was as follows:—

	1896.	1897.
Imports	£15 19 4	£16 11 10
Exports	17 17 4	18 2 6

Under the trying circumstances of the last three years this development is satisfactory and reassuring. It is more so when the falling off in the value of the colony's chief exports—wool and silver—are considered. The figures of these exports per head for the years 1891 and 1897 in shillings and pence are:—

	1891.	1897.
Value per head wool	193 0	122 5
" " silver	63 4	25 11
Value per head total	256 4	148 4

In 1891 these two items constituted more than two-thirds of the exports of home products. They have now fallen to little over half. Agricultural productions, such as breadstuffs, meat, butter, having advanced in amount.

The figures of the trade with Canada are:—

	Imports from Canada.	Exports to Canada.
1894	£ 52,740	£14,523
1895	61,742	16,804
1896	83,810	11,555
1897	187,291	19,348

The trade with Canada has grown more rapidly during the past few years than with any other country. The growth of imports from Canada and the almost stagnant condition of exports to Canada has attracted attention here and a journal here in quoting the figures for all Australia, which show a decline in exports since 1894, says:

"The explanation for the difference between the two colonies can be accounted for only by the fact that Canada has made a direct and persistent effort to get into this market and has succeeded, while Australia has let the trade take its haphazard course, with the natural consequence that it has fallen off. Should not these figures give us a good, practical lesson, and show those interested in the advance of Australian commerce the necessity of having a resident representative in the various foreign commercial centres, to look after our interests and push the introduction of our natural and national products?"

The article showing the largest increase is flour, and the importation still continues though not in such large quantities as last year. When Manitoba flour was first introduced here it was difficult to get bakers to pay more for it than for local flour, though they had heard about its quality. Then they gave an advance of ten shillings per ton and last week the quotations were; best local, £11; Manitoba, £14 10s,

£3 above any other flour. This market will pay a fair price for a good article, but it takes some hammering and some time to convince it of the value of an article offered. This applies to other things than flour.

The importations of Canadian manufactures show a gratifying increase; indeed they have doubled during the year. The increases are in agricultural implements, cotton, bicycles, carriage makers' material, pianos, drugs and chemicals, paints and varnishes, window blinds, etc. In some cases there was a falling off, attributable wholly to neglect on the part of Canadian manufacturers in failing to fill orders satisfactorily. There has been a steady growth in everything that has been persistently pushed. Among the new lines of merchandise which have been successfully introduced is chairs. The trade in this article last month was just four times the amount it was estimated it would be, and already is on the basis of nearly fifty thousand dollars per annum. Other lines of furniture are being introduced, with equally favorable prospects.

The head of a firm doing a large trade in agricultural implements and machinery, Mr. James Martin, died on Saturday last. The firm. some two or three years ago, began by taking one or two Canadian agencies, and latterly have been corresponding with a view to others. The business will be continued, a son, who, though a young man, has been for some time in it along with the office manager, conducting it.

The popular vote on the Federation Bill takes place on June 3rd. If it proves a fine day it may pull through, but if it is a wet day, preventing a large country vote being polled, the bill is doomed in New South Wales

F. W.

Sydney, New South Wales, 9th May, 1898.

[A cable despatch of June 6th from Melbourne says that the voting in Victoria and Tasmania has resulted in the adoption of the federation bill. Also that the result in New South Wales is still doubtful but is believed to be opposed to the Commonwealth Bill, as drafted.—Ed. Mon. Timns.]

TORONTO TRADE FIGURES.

The foreign imports and exports at this city last month were nearly a fourth greater than in the same month of 1897, the imports having been of the value of $1,772,127 and the exports of $608,744, where in May, 1897, the respective figures were, by the Board of Trade bulletin, $1,294,597 and $529,711. A good deal of the increased imports consisted of free goods, such as raw material of manufactures, wool, hides and skins, free metal articles, dyes and chemicals, but there was considerable increase in dutiable imports also, dry goods, books, jewelry, metal wares and drugs all showing larger importations. Our customary list of principal articles of import is as under:

PRINCIPAL IMPORTS, DUTIABLE.

	May, 1898.	May, 1897.
Cotton and manufactures of........	$ 95,931	$ 86,201
Fancy goods, laces, etc...........	25,465	34,281
Hats, caps, bonnets................	25,740	21,604
Silk and manufactures of	70,483	49,947
Woolen manufactures...............	100,194	74,581
Total dry goods................	$317,273	$266,614
Brass and manufactures of........	$ 5,889	$ 6,316
Copper "	234	178
Iron and steel "	166,826	113,274
Lead "	13,925	7,208
Metals and composition	17,026	7,654
Total metals....................	$203,900	$134,630
Books and pamphlets..............	$28,195	$21,297
Bicycles and tricycles	58,010	58,130
Coal, bituminous..................	24,919	10,467
" anthracite (free)	59,119	72,466
Drugs and medicines..............	25,997	24,219
Earthen, stone and chinaware......	19,922	26,110
Fruits, green and dried...........	23,526	14,328
Glass and glassware..............	17,450	19,161
Jewelry and watches	27,376	21,281
Leather and manufactures of	28,972	37,610
Musical instruments	10,413	9,611
Oils of all kinds..................	19,106	32,340
Paper and manufactures of........	36,661	40,359
Seeds, flower and field............	1,423	8,474
Spirits and wines..................	6,646	3,748
Wood and manufactures of........	14,537	10,293

Among exports the items showing increase were dead meats, barley and manufactured products, for there was no increase in live cattle, nor yet in wheat and oats. Agricultural implements and leather were as usual the principal items in the list of manufactured goods last month. A list is appended :—

EXPORTS, PRODUCE OF CANADA.

Produce of	May, 1898.	May, 1897.
The Mine...........................	$ 252	....
" Fisheries	192	$ 15
" Forest	12,560	57,273
" Field.............................	61,405	28.933
Animals, etc.	314,343	300,248
Manufactures	189,045	105,677
Total	$577,797	$492,146

ONTARIO MUTUAL LIFE.

It is a feature well worthy of remark in the statement of the 1897 business of the Ontario Mutual Life Assurance Company that there was a decrease of $414,154, as compared with the year 1896, in lapsed and surrendered policies. It is further significant of an improvement in the financial conditions of the country when we find that there were lapsed policies in this company re-instated to the amount of $44,695 last year. It is a handsome achievement for the Ontario Mutual to have reached that its new policies issued in 1897 were over three millions of dollars. This, we believe, is a larger aggregate of new business than it had ever done in a twelvemonth before, and is a tribute to the popularity of the company and the faithful and energetic work of its agents. Death claims were low, comparing very favorably with those of 1896. Altogether, the company is entitled to claim that it has made substantial progress in the year 1897. It manages, we believe, to secure its business without the high-pressure and expensive methods that some companies feel themselves compelled toadopt.

ATLAS ASSURANCE COMPANY.

A good name goes a long way to secure the attention of the public to a company, and to retain it when secured. This circumstance was perhaps kept in view by the old English proprietors of the Atlas Assurance Company when they founded that company some ninety years ago, to do underwriting. The growth of the company, its strength and the volume of its business, are shown in the figures of the 1897 report presented the other day at the annual meeting in London. Fire premiums (net) for the year were £357,520 and life premiums £143,723, making the tidy aggregate of two millions and a half of dollars, taken in during 313 days. The fire losses were only 57.3 per cent. of the premiums. The operations of the year showed a surplus of £45,870, out of which a dividend of 24 per cent. on the original paid-up capital was declared, which was a pleasant thing for the shareholders. The fire fund was increased by £15,000, bringing it up to £385,000. The fire and reserve funds of the company stand at £437,664, and the total assets amount to £2,287,000, or more than eleven million dollars. The strength of the company is thus adequately vouched for, and its reputation in the Old Country is first-class. The life assurance fund amounts, we may remark, to £1,575,000 sterling; but this may not particularly interest Canadians because the Atlas solicits only fire business in Canada.

LIVERPOOL AND LONDON AND GLOBE.

At the sixty-second annual meeting of the Liverpool and London and Globe Insurance Company, held in Liverpool about the middle of May, the report for the year 1897 and the lengthy accounts connected therewith were taken as read. It is not to be wondered at that they were so taken, for they are voluminous enough to require for their exposition two or three pages of a journal such as ours. We shall occupy ourselves mainly with the fire department of the company's business, for it is with this that Canadians are familiar. The fire premium income for the year, after deducting re-insurance, amounts to £1.540,706. The losses, inclusive of full provision for all claims to the close of the year, amount to £857,714. The account, after providing for expenses shows, without the addition of interest, a surplus of £165,169, which has been carried to profit and loss account. This profitable result, it must be remembered, is after paying heavy losses in Melbourne and by the great Cripplegate fire in London.

The life business of the company amounted in volume to £572,000, on which the premiums were £24,630. But the total premium income, after deducting the amount paid for re-assurances, was £242,139. The net claims paid (including bonuses) amounted to £204,262. There was, besides, an annuity business of something over £155,000. Total funds of this great company are translated into dollars, $47,876,000, more than $30,000,000 of which is life funds. The paid-up capital is $1,228,000, the fire re-insurance fund $3,710,000, and the general reserve fund a trifle over $6,500,000. These figures represent a growth of over sixty years of careful administration, honorable dealing and successful business over a great part of the world.

In the address of Mr. Earle, the chairman of directors, it is stated that the ratio of fire loss for the year was 55.67 per cent., as compared with 54.09 per cent. in 1896; interest earnings were slightly lessened because of the declining rate of earnings of securities, and expenses were in some directions unusual. Yet shareholders were paid 36 shillings per share dividend. Small wonder that the company's shares are at such an enormous premium. Mr. Percy M. Dove has been for twenty-five years manager of the Liverpool and London and Globe, and a special vote of thanks to him, to the sub-manager and the actuary was passed at the meeting. The chairman referred to the threats here and there as to municipal fire insurance. But, in his opinion, "the day is far distant when such remarks need be seriously considered, or that public bodies will be likely to obtain from Parliament power to embark in such a venture at the expnese of the ratepayer, for we have recently heard from the chairman of one of the large fire companies that the average return to fire insurance companies is only 6¼ per cent. on the figures recently issued for 1897, which is a good year." The company's business in Canada continues to be ably looked after by Mr. G. F. C. Smith, who was able to show last year premiums of $$352,228 and losses of only $$241,531.

THE CANADA-MANCHESTER LINE.

A gentleman in Kingston wrote us some days ago for particulars respecting the new line of freight steamers between Manchester and Canada. He asked if it were true, as stated, that its capital was $5,000,000, and that it will operate five steamers from Montreal in summer and St. John, N.B., in winter to Manchester by way of the canal—big ones, too, to have a carrying capacity of 8,500 tons. We do not know that the company has any such big ships now, but it is building some, we are told. The Manchester people are very proud of their canal, and well they may be, for it is a modern monument to the enterprise of a great community It must be remembered, too, that, as Dr. Parkin told his audience in the National Club here the other night, Manchester is the centre of five millions or more of a dense manufacturing population. And Canada is interested in getting her food products up that canal and directly to these people. As to the company, we are told, as illustrating the way these live Englishmen take hold of an enterprise such as this, that double the amount required to float the company was subscribed in the short time allowed for tender, namely, from the 12th till noon of the 14th of the month. The company intends to build nine vessels, and three of them will be finished shortly, to be named the "Manchester City," "Manchester Trader," and "Manchester-Commerce," respectively. One of these is expected to arrive at Montreal in the early part of July this year. We learn upon enquiry that what the company intends is to organize a fortnightly purely Canadian service of first-class freight steamers between Manchester and Montreal during the summer months, and from Halifax and St. John with Manchester during the winter months. The company has good men on its directorate, and we believe deserves consideration from the Canadian people.

THE CHEESE BOARDS.

That there will be a very large make of cheese this year is now practically assured. During the week we have been advised of twenty cheese board meetings at which 36,517 boxes were boarded. The same date last year fifteen boards offered 28,254 boxes. The range of prices last year was 8 to 8¼c. per lb., a vast difference as compared with the range of 6¾ to 7¾c. this week. The high prices last summer led to a reaction in the autumn which, we hope, may be obviated this season. We append our usual table of transactions:

Boards.	Date of meeting.		No. of factories.	Cheese boarded. Boxes.	Cheese sold. Boxes.	Price per lb. Cts.	Date of next meeting
Brockville........	June	2	..	4,146	....	$7\frac{1}{16}$	......

EGGS.

Another pickling season will soon be closed. Active operations have been conducted by the egg picklers for some time, and it is understood that large supplies have been prepared. Prices have ruled high, fully 1½ to 2 cents per dozen in excess of those paid last year. The outlook in the United Kingdom would scarcely warrant the values that have ruled during the season. In some sections the Canadian egg has a good reputation with British consumers, but as a rule the Canadian egg suffers to the full extent the disadvantages of the wide separation of Canada from the British Isles. English and Scotch buyers cannot understand how eggs from a country so far distant can be sold as strictly new laid. The time occupied by a shipment in reaching the British markets has been so reduced within recents years that the distance is no longer an impassable barrier in the way of exporting fresh eggs. But, as we have repeatedly asserted, it is essential that egg-growers and shippers in this country should exercise the greatest promptness in the matter of marketing supplies. Cold-storage will not take the place of promptness or make amends for delay.

FOR GROCERS AND PROVISION DEALERS.

The American Tobacco Co. have made a new issue of 62,000 shares of stock ($50 each) in all $3,100,000, for the purpose of acquiring additional properties and providing fresh capital.

Mr. Forban's factory at Grande Etang, N.S., under the management of Joseph Landry, has already packed 225 cases of lobsters, says the Bras d'Or Gazette of 1st June, referring to the spring lobster season.

"Durn you and your old grocery!" shouted a man, quoted by the Indianapolis Journal, who backed up against the fresh paint. "Didn't you see that sign, 'Fresh paint?'" asked the grocer. "Of course I did, but I've seen so many signs hung out here announcing something fresh that wasn't that I didn't believe it."

It is reported here, writes our Montreal correspondent on Wednesday evening, that Western canners, or at least, some of them, are already offering new pack vegetables at the following prices:—Tomatoes, 75c.; Indian corn, 65c; peas, 62½ to 65c. Of the last-named goods, delivery is stipulated to be made at close of June.

The Stratford Herald says that the dealers around Woodstock made large shipments of hogs last week. Jacobs & King shipped 1,000 fine hogs, 400 of which went from Woodstock to Montreal and Hamilton. Conrad Seltzer shipped 1,100 from Bright, Baden and Atwood. The prevailing price is $4.70 to $4.75 per 100 lbs.

Even so serious-minded a paper as the New Glasgow Chronicle thinks the following retort justified: A countryman entered one of our grocery stores and purchased goods amounting to 20 cents and proffered in payment 18 cents, with the remark that 18 cents was enough, because the grocer would reap enough profit on the transaction at 18 cents. The grocer replied: "Alas, my dear man, the days of the prophets are gone, we are now under a new dispensation."

The Grocer and Country Merchant in its comments upon the National Association of Wholesale Grocers, who are meeting at Niagara Falls this week, in order to combine business and pleasure, is severe on its measures. We quote: "The association is still working on the old chestnut of preventing manufacturers from selling to retailers. It is of course optional with wholesalers to buy from whom they choose, but not always possible for the manufacturer to distinguish between wholesale and retail. Are the Gilbeys who do a twentieth part of the entire British wine trade and yet sell single bottles to be classed as wholesale or retail?"

IN THE DRY GOODS STORE.

A despatch from Troy, N.Y., announces that the $30,000,000 collar, cuff and shirt syndicate will soon be an actuality.

Specially in keeping for piazza use, in the hammock or in the porch chairs are the cotton cushions overlaid with a cord lattice and those of colored cotton with applique centre of chintz.

Two Boston women set a fire the other day by cleaning a piece of silk with gasoline and shaking the fabric to dry it. The friction produced a spark, and the goods and the women were badly burned.

Madame Custom says, off with all your silk and chiffon lamp shades in summer, and on with paper ones to secure cool effects. The latest of these are in plain and ombre crepe paper with floral borders.

Remnants of silk, damask and tapestry for odd uses, chair sets, cushions, screens, etc., in seaside or forest summer houses, are effective, and cost little. Shopkeepers! look up your remnants of this sort, and put them before Muskoka visitors or Georgian Bay holidayers.

Very smart for floor decoration are the round hassocks of corduroy, with flat, square cushions on top. It is quite the thing in the United States, to have a number of cushions and hassocks strewn around on the floor a la Turk.

Some people are so crazily anxious for original designs or patterns in dress that they remind one of the woman in Chicago, to whom a shop-girl (they call them sales-ladies over there) said: " Madam, these flowers will look well on your hat; they are a perfect copy of Nature." But the haughty female replied: "Then I don't want them; show me something original."

A communication from the secretary of the Cotton Mill Company, offering the mills in Dundas for $25,000, or less for immediate sale, was received by the Dundas council on Monday last. Letters from George Bertram and Mr. McMillan were read. Evidently from the letters these two gentlemen were unable to agree, and their offer to the town in regard to the axe factory was unconditionally withdrawn.

—Montreal, Winnipeg and Quebec parties, to the number of seven, some merchants, others advocates, are the incorporators in Quebec province of the Kennedy Company, limited, capital $100,000, to make, buy and sell clothing, hats, shoes, shirts, all machinery, plant, tools, furniture, materials and supplies, used in the manufacture of the same. John E. Kennedy, H. W. Beatty, Alfred E. Paris, Charles A. Barnard, are the Montreal applicants; also there are J. A. Richard, of Winnipeg, and Jules Tessier, of Quebec.

Before leaving for Scotland, Mr. Alexander Hope, late manager of the Paton Manufacturing Company at Sherbrooke, was presented with a handsome letter, accompanied with a cheque from the company. Mr. Hope has shown much skill in introducing economies in administration, which the directors say it will be their duty to adhere to in the future, as likely to prove of lasting benefit to the welfare and prosperity of the concern. The mill hands also made a presentation to Mr. Hope, in the shape of a case of cutlery. Such testimonials bespeak not only the ability, but the pleasing character of the man.

In an effort to account for the depression in the Canadian flax trade in the face of an increased price for manilla fiber and rope, as noted in our columns last week, the Huron Expositor advances the statement that the influences which have brought about the present state of affairs are increased production in Russia, where labor is at a low ebb, combined with a substitution of cotton where flax was wont to be used. The closing down of the Mitchell flax business has been a severe blow to that town. Many have been thrown out of employment.

INSURANCE ITEMS.

A long and interesting communication respecting the International Congress of Actuaries in London last month is held over for lack of space. The gathering, it appears, was even a more memorable one than that of 1895.

There are many who will be glad to know that the accident which recently injured Mr. W. M. Ramsay of the Standard—a fall from his horse—resulted in nothing more serious than a severe shaking-up There were no bones broken.

In the advertisement of the New York Life annual statement for 1897—and a very handsome statement it is—we observe that the company is still open to treat for district representatives at various points in Canada. The comparison of the company's figures for 1897 with those of 1891 is interesting and shows marked growth.

The Canadian Fire Underwriters' Association has been meeting in Montreal on Wednesday and Thursday of this week. Mr. P. H. Sims, of the British America, who is president of the association, left Toronto on Tuesday; he is accompanied by Mr. Robins, the secretary, Mr. Kenny, and several other Western insurance men. The case of the city of Hamilton is to be adjudicated upon at this meeting, we are told.

What is described as the greatest fire that ever took place in India was the conflagration of last week at Peshawar, a fortified town of India, capital of a district of that name, in the Punjaub, east of Cabul and near the Indus River. The fire was not mastered for twenty-four hours and destroyed 4,000 houses, doing damage to the amount of about four crores of rupees (about $20,000,000). Peshawar is described as a place of 60,000 people, the houses built for the most part of unburnt brick in wooden frames and generally three stories high.

The by-law to raise $6,000 for fire protection, submitted to the ratepayers of Carberry, Manitoba, was defeated by twelve votes. This circumstance leads the Carberry Express to ask, " What must the inhabitants of Manitoba outside of Carberry think? That we want fires and it pays us to have them. The Municipal Council has worked heroically to provide fire apparatus, and when fires again occur, the council of 1898 cannot be blamed for not providing fire protection, as has been heard at every fire for years."

British offices hankering after more New York business just now had better pause and ponder over the following quotations: Mohawk Building, Fifth avenue, 15 cents for five years; New York Times Building, 12 cents for five years; Mills Building, 10 cents for five years; Empire Building 15 cents for five years; and a large new building on Park Row, opposite the Post Office, with builders' risk thrown in, 10 cents for five years. Low water mark was apparently reached when the Hebrew Institute was covered at 8 cents for five years. It is occupied as a trade school, and the boys do a little woodworking.—Post Magazine.

There is something decidedly fascinating in the way that some insurance offices have of dealing with the centuries, says the Chronicle. Here is the Hand-in-Hand, of London, which lost $105,000 over the Cripplegate blaze, going back to 1766 to find an equally large loss. In that year it dropped $128,000 through a fire in Cornhill. The Hand-in-Hand is being blamed, rather, for holding such a large commitment in a dangerous quarter like Cripplegate. The loss there takes at one sweep all that would have been profit on the year's fire account and presents it with a loss on the twelve months trading of $18,670. Last December the Hand-in-Hand celebrated its two hundred and first birthday.

Hamilton has been doing something to meet the views of the Canadian Fire Underwriters' Association in respect to her fire appliances. Twelve-inch water pipes have been laid on King street, from James to Sophia, and along York to connect with the same sized main on that street; also 12-inch mains on Robinson, Hess, Hannah, Caroline and Maria streets. A lot of six-inch pipe has also been put down, and new hydrants have been put down at close intervals in the business part of the city. The stand-pipe has been raised, an aerial truck has been ordered, and also a chemical and hose wagon. In explanation of the result of a recent test of the Hamilton appliances, it is explained by Chairman Hannaford that an accident interfered with it.

BANK CLEARINGS IN THE STATES.

Bank exchanges for last week at thirteen leading cities in the United States outside New York are $380,518,789, which is 17 per cent. over last year and 11 per cent. over 1892. The leading western cities continue to report heavy exchanges. Baltimore, Minneapolis and Chicago show the greatest increases, New York next; only Cincinnati and Louisville exhibit a decrease. The totals of the thirteen cities and the exchanges of New York for the week are given below:

Total....	$380,518,789	$325,352,173	+17.0	$341,987,673	+11.3
New York..	679,418,062	484,992,651	+40.1	587,875,145	+15.6
Gr'd total	$1,059,936,851	$810,344,824	+30.8	$929,862,618	+14.0

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, June 9th, 1898, compared with those of the previous week:

Clearings.	June 9th, 1898.	June 2nd, 1898.
Montreal	$14,883,184	$14,405,936
Toronto	9,631,522	8,895,471
Winnipeg	1,912,608	2,087,557
Halifax	1,246,688	1,133,331
Hamilton	847,950	656,204
St. John	751,027	465,451
	$29,272,979	$27,643,950

Aggregate balances this week, $4,474,109; last week, $3,892,205.

—As showing the activity of New York's foreign trade in May, and for eleven months 97-98, the following figures, taken from Dun's Review, will be found interesting. They are compared with similar figures for 1886-97:

	Exports.		Imports.	
	1898.	1897.	1898.	1897.
Week	$9,963,132	$6,763,156	$7,827,210	$11,692,786
Four weeks..	40,371,965	35,102,471	32,961,529	53,104,513
Year	202,251,237	163,881,022	186,500,711	221,733,406

—We are informed this week that an office of the Bank of Hamilton has been opened at Delhi, Ont.

—The following changes in the staff of the Canadian Bank of Commerce are announced: Mr. H. J. Grasett, manager at Waterloo, Ont., is appointed manager at Barrie, and Mr. A. W. Robarts, accountant at the Montreal branch, will be manager at Waterloo. Mr. H. H. Morris, manager at Barrie, will assume charge of an office of the bank which will shortly be established at Vancouver, B.C. Mr. F. L. Crawford is appointed accountant of the branch in Montreal,

STOCKS IN MONTREAL.

A FARMER SUCCEEDS.

Judge Morson has given judgment in the wheat-buying case which came before him recently, and has decided that when a farmer sells a load of grain to a buyer who looks at one bag, but may, if he wishes, look at every bag in the load, it is not selling by sample, and the buyer cannot, after the wheat has been warehoused, claim it was not up to the bag he saw, and refuse to give the price agreed upon. The facts of this case were that Wm. White, on May 5, came to market with 25 bags of wheat and sold the load to P. McIntosh & Sons, at $1.02 per bushel, the buyer judging of the quality by examining one bag. After the wheat was warehoused the buyers claimed that the load was inferior to the sample and offered to pay only 80c. per bushel. Mr. White then entered suit to recover $52.25. Judgment was given for the plaintiff with costs.

A PUZZLE STORY.

Here is one that is going the rounds of the hotel corridors, cafes and other places where men do most congregate. A young fellow, temporarily in hard luck, but with wits undimmed, found himself one day with but 75 cents in his pockets, and a room rent bill of $1 to pay. Instant eviction was the penalty for non-liquidation. He hadn't a thing in the world upon which to raise the other quarter, and, as is usual, when a man is down, his few friends refused to accommodate him. Finally an idea struck him. Going into a nearby pawn shop he laid down his 75 cents and asked for a loan of 50 cents on it. Of course he got the 50 cents, together with the customary pawn ticket. The young man's next move was to hunt up an acquaintance. "I've got a pawn ticket here calling for 75 cents in cash," he explained to the acquaintance. "Will you give me 50 cents for it?" Naturally the other was nothing loath, and immediately forked over the half dollar. Then the young man had $1. The question that is causing all the discussion is: Who was the loser in the transactions, and how much did he lose.—American Investments.

—"Pa," said the youngest of seven, "why don't you go to war?" "I have all I can do to keep the reconcentradoes in this house from starving," replied the parent, sadly.—North American.

—Not a weak proof of the advent of better times is furnished in the fact that, while the superintendent of the House of Industry here charitably supplied 15,000 loaves of bread in March, the number fell to 2,000 in May.

—Judge Snider granted on Tuesday last a winding up order to The Templar Publishing Company of Toronto, on petition of President F. W. Watkins. The company's solicitor asked to have Mr. S. H. Graham, the business manager, appointed liquidator, but the judge declined to make the appointment without an affidavit as to Mr. Graham's qualifications.

Meetings.

BANK OF MONTREAL.

The eightieth annual meeting of the shareholders of the Bank of Montreal was held in the board room in the city of Montreal, at 1 o'clock on Monday, June 6.

There were present: Hon. George A. Drummond, vice-president; Messrs. Hector Mackenzie, Hugh McLennan, W. W. Ogilvie, W. C. McDonald, A. T. Paterson, G. F. C. Smith, M. Burke, Henry Mason, John Crawford, W. J. Buchanan, F. S. Lyman, Q. C., G. A. Green, John Morrison, James Shearer, J. P. Scott, Richard White, James Wilson, James Tasker, A. T. Taylor, M. S. Foley, B. A. Boas, H. Morton and F. T. Judah, Q. C.

On motion of Mr John Crawford, Hon. George A. Drummond, vice-president, was unanimously voted to the chair, in the absence of the president, The Right Hon. Lord Strathcona and Mount Royal.

On the motion of Mr. Hector Mackenzie, seconded by Mr. F. T. Judah, Q.C., it was agreed: "That the following gentlemen be appointed to act as scrutineers, Messrs. F. S. Lyman, Q.C., and W. J. Buchanan, and that Mr. James Aird be the secretary of this meeting."

The report of the directors to the shareholders at their eightieth annual general meeting, was read by Mr. Clouston, general manager, as follows:

REPORT.

The directors have pleasure in presenting the eightieth annual report showing the result of the bank's business of the year ended 30th April, 1898:

Balance of Profit and Loss account, 30th April, 1897...		$ 886,909 98
Profits for the year ended 30th April, 1898, after deducting charges of management, and making full provision for all bad and doubtful debts............		1,265,300 09
		$2,152,210 07
Dividend 5 per cent., paid 1st December, 1897	$600,000	
Dividend 5 per cent., payable 1st June, 1898	600,000	
		1,200,000 00
Balance of Profit and Loss account carried forward....		$ 952,210 07

Since the last annual meeting of the shareholders a branch of the Bank has been opened at Lethbridge, N.W.T., and a sub-agency to the Toronto branch has been opened in premises on Yonge street in the city of Toronto.

All the offices of the bank, including the head office, have been inspected during the past year.

STRATHCONA AND MOUNT ROYAL
President.

Bank of Montreal, Head Office, 6th June, 1898.

E. S. CLOUSTON,
General Manager.

Bank of Montreal, Montreal, 30th April, 1898.

THE GENERAL MANAGER.

Mr. Clouston said: There are only a few items in our statement this year which call for special explanation. In our liabilities there is an increase in the circulation of $1,000,000, caused partly by increased expenditure in railroad building, the influx into the Yukon district, and partly by the general expansion in business. Our deposits have increased $600,000. Without explanation this would not show their true condition. I referred last year to a large increase over the previous year, and stated that, in my opinion, it lacked permanency. We have probably had withdrawn from us $3,000,000 of special deposits of large amounts, and they have been replaced by deposits of smaller sums from the public of a more permanent, and therefore more satisfactory character. In our assets, the funds readily available have been reduced $800,000, from $26,545,256 to $25,703,869, chiefly in our Dominion and Provincial securities. The discounts have increased $2,600,000, partly from the general expansion in business and partly from special operations which will probably be closed out in the next few months. The overdue debts show a reduction of $90,000 Our profits for the year, as shown in the statement, are $35,000 greater, derived chiefly from the enhanced value of money in the European markets; and it is a curious condition of affairs that at one period of the year we were receiving more for short loans in Germany than could have been obtained here in Montreal. In London the bank rate advanced to 2½ per cent. on the 23rd September, 3 per cent. on the 14th October, 4 per cent. on the 7th April, where it remained till 26th May.

Up to the time that war seemed inevitable, the rate for call money in the United States ruled low, and even then it only advanced to firmness for a short time, as the credit balances established in Europe by the immense balance of trade in its favor, prevented any great stringency. It is worth while noting the figures of this balance of trade. On the 30th April the balance of trade for ten months in favor of the United States amounted to the enormous sum of $514,000,000, whereas in no previous full fiscal year in its history had they attained $300,000,000. At present the rate for call money in the United States is merely nominal, though it remains to be seen what effect the replenishing of the coffers of the treasury, drained by the expense of the war, will have on the market.

With reference to trade conditions in Canada, it is difficult to estimate the great boon the enhanced value of grain has been to this country. It has enabled the farmers to reduce their mortgage indebtedness, and it has increased their purchasing power, stimulating trade in all directions, giving more freight to the railways, their traffic returns showing large gains. The prophets who last year were predicting that the low price of grain had come to stay, must feel that they have mistaken their vocation. The export of provisions and eggs is steadily increasing. The supply of cheese, unfortunately, has been in excess of the demand, and prices are unsatisfactory, but it is hoped that, with the cessation of strikes and the increase in field work in England, there may be an improvement. The demand for merchandise and manufactures of all sorts is very satisfactory. In the Territories, ranchers have received highly remunerative prices for cattle and horses, and, with additional markets opening up in the mining districts, they have every reason to feel hopeful. In British Columbia there has been a great impetus to trade, by the migration to the gold fields of the Yukon, and in the Kootenay, mines are gradually passing from the chrysalis and chromo stage into actual development and production. In the Maritime Provinces trade has been rather dull, owing to depressed markets for lumber, both in England and the United States, while the demand for fish, one of the chief staples of the Lower Provinces, has been seriously affected by the war.

The worst feature in the present situation in Canada, is the condition of the lumber market, owing to the overstocked condition of the foreign markets and the cessation of the demand in the United States. Considerable stocks were carried over from last year, and I am afraid the year's cut has not been sufficiently curtailed. Locally, however, the demand has been very good. Generally speaking, business is good and the outlook promising.

In the United States the year commenced with the same promising conditions as in Canada, possibly more strongly established, but the war has rather checked some enterprises and industries, but we hope for a short period only.

In this resume of the business of the country I have refrained from statistics, as I consider I am doing all you desire of me by restricting myself to the figures in our statement.

There is one matter I will refer to. The action of the Government in taking power to reduce the rate of Government Savings Bank deposits this session to 2½ per cent. was a wise and business-like one, and should commend itself to those who take a business point of view. If there is one department of a Government which should be conducted entirely apart from politics and strictly on business lines, it is the Department of Finance, and there would have been no excuse if they continued to pay as much for a temporary deposit, such as a savings bank deposit is, as for loans running for a long period, particularly when ordinary municipalities can borrow now at 3½ to 3¾ per cent. If it is considered the duty of a Government to furnish a safer place of deposit for the public than that furnished by banks, the axiom should never be lost sight of that "the greater the safety, the smaller the return for your money;" and the Government showed a sense of what was due to themselves, and to the public, who have to pay for the increased interest, which, after all, benefits only a very small proportion of the people. You will notice that I said it was right to take the power, for it is quite possible that before the time arrives to exercise it, circumstances may render it injudicious to put it into effect. With a war on hand in the neighboring country, and with the uncertainty as to the period when it will cease, serious consideration should be given before taking any definite step towards fixing a value for money in the future.

If there are any questions in connection with the business of the bank I will be happy to reply to them.

THE VICE-PRESIDENT.

Honorable George A. Drummond said: It seems almost superfluous to add anything to the full statements now laid before you, and the remarks of the general manager, but, in accordance with precedent, I will ask your attention for a few moments. You will, I think, agree with the directors in regarding the results of the year's business and the position of the bank's affairs as eminently satisfactory.

The statement in the accounts that "full allowance has been made for bad or doubtful debts," is in the view of the directors, fully justified. The directors are pleased to express their recognition of the ability and prudence displayed by the management, and the loyalty and devotion to the interests of the bank on the part of the large and increasing staff.

Early in the past year indications were not wanting that the country had entered on the long-deferred era of better times. Confidence was returning and the general anticipations of improvement were reflected in the great commercial barometer, the Stock Exchange, by a steady advance in the value of securities. A rude shock was given when, on the 25th April, 1898, war against Spain was proclaimed by the United States. Vague expectations had been hazarded that, in some way or other, the derangement of affairs in the neighboring Republic would result in benefit to ourselves. So far I fail to see any. The established channels of trade and finance in the neighboring states have not been materially affected. We can only express the sincere hope and desire for the speedy restoration of the blessings of peace.

It is impossible to avoid noting, with satisfaction, the growth of a kindlier feeling towards the Mother Country among our friends and neighbors.

The general and remarkable advance in the value of most farm produce is eminently satisfactory. The farming community has long suffered from an unnatural depression, and may be congratulated on the improvement which, to a country like ours, exporting a large share of its products, is of enormous and widespread importance. Calculations by experts go to prove that during the past six months, at the very least, seven to eight millions of dollars extra has been realized on cereal deliveries in the advance in values, while, since the opening of navigation, the exports of wheat, corn, rye, peas, oats, buckwheat, barley and flour have nearly doubled as compared with those of the corresponding period last year. Cheese has been depressed and unremunerative in consequence of over production. Butter and eggs have been exported in rapidly increasing volumes, and there seems to be no limit to the possibilities of this trade, due regard being had to quality. In general business it is reported that there is a marked increase in volume, if not in prices, in many departments, such as dry goods, hardware, leather paints and oils, and in many branches of manufacturing industry.

The curtailment of excessive terms of credit in many branches of business, must be regarded as satisfactory, for, while credit is of the very essence of modern business, too extended terms are a fruitful source of mischief both to the giver and receiver. In this connection, the failure record of the year deserves attention. The number of failures is smaller than for a number of years, and the amount involved is moderate.

The steamship lines report a large business at fair rates. Ships during the winter from Portland and St. John have been full, and since the opening of navigation, inward cargoes have been larger than usual and outward full. The proposed fast line of Atlantic steamers for passengers and mails is not yet apparently secured, but as such a line is of vital importance, not only to the trunk lines of railway, but to the Dominion, the hope is expressed that it may speedily be brought to a successful realization.

The great lumber interest must be reported in less satisfactory terms. While the cut of logs has been restricted, and the output of deals will be smaller than for years past, prices for both have not improved.

At the last annual meeting, reference was made to the menace of the possible adoption of free coinage of silver by our neighbors; of that we hear little at the moment; but it is conceivable that in the grave financial adjustments entailed by the vast expenditures now going on by the United States, another opportunity may be afforded for the agitation of such questions as this. However, as all these expenditures are well within the resources and powers of the nation, I confidently believe that sound principles of finance will prevail.

In Canada no event has excited more interest than the gold discoveries in the Yukon, and the rush to that district. The continued progress and extension of mining in British Columbia is a satisfactory circumstance.

Projects of railway extension have been mainly directed to these districts, and the construction of the Crow's Nest Pass line, by the Canadian Pacific Railway Company is the most important work in progress.

As a whole then, the symptoms of returning prosperity are in the ascendant and the shareholders may rely that the Bank of Montreal will be prepared to meet increased responsibilities should they arise, and to maintain its position among the financial institutions of the Dominion.

I will move: "That the report of the directors now read be adopted and printed for distribution among the shareholders."

The motion was seconded by Mr. A. T. Paterson, and carried.

THE DISCUSSION.

Mr John Morrison, having made a few remarks in reference to the report, Mr. John Crawford alluded to the fact that the deposits had increased to the extent of $2,000,000, or thereabouts. He wished to know whether the interest on deposits had been paid up to the 1st June, or had it only been paid up to the 30th April.

The General Manager.—It has been estimated up to the 30th April.

Mr. Crawford.—I see that you have reduced your Dominion and Provincial Government securities. Were you dissatisfied with them, or was it to establish a profit, or what was the object in diminishing the Dominion and Provincial Government securities $800,000 ?

The General Manager.—This will nearly always be a fluctuating amount, as we are dealing in them continually, buying and selling. I think since then we have increased the amount.

Mr. Crawford remarked upon the large amount at the credit of current loans, and expressed a desire to see published, as was the practice in London, the amount reserved for rebate on interest, etc. Touching on the bank premises, he noted that they were placed at the same amount, viz., $600,000. He understood that a considerable amount had been expended in building branches in the West, at Vancouver, Winnipeg and elsewhere. He wished to know to what item the expenditure upon these buildings had been put, or whether it had been paid out of the profits of the bank.

The Chairman.—You speak about bank premises; I think I may say the general manager will answer your questions generally, but in regard to that point, I think I can answer myself. If we kept an account of the expenditure on the bank premises, we would have to exert our judgment in writing off any depreciation and a host of other things. As you are very well aware, whatever you don't see in the statement is not lost to the bank. It is far better the bank premises should remain at a moderate amount and not be added to or balanced every year; in my opinion, it is infinitely better in the interests of the bank.

Mr Crawford.—You have not said anything about our highly esteemed though absent president. For the last two years, I think, he has not been here, and I think it would be in the interests of the shareholders, and it would probably be your desire to explain to them the present position of affairs—to give them some intimation as to whether it is likely we shall have the honor of his return here as president or not. I am sure there is not a shareholder who would not like to see him back again. Hold the office open for him as long as you think proper, but I just suggest that it would be a frankness on the part of the chair to say: "Gentlemen, you need not be astonished that your president has not been here, or that you have not heard from him for two years." I think it would be in the interests of the president himself; and I would be delighted to hear you say that he was coming back in one, two or five years.

The Chairman.—I would very gladly give any information on that point, if I possessed it; but I don't. I have no knowledge of the intentions of Lord Strathcona, but I may point out to you that he is a member of the London Board, and his abilities are at the service of the bank in all matters, and there are many important ones that turn up in London; so that he is not lost to us.

Mr. Crawford.—That is quite satisfactory, Mr. Chairman, and I am quite sure that the prestige of his name, whether he is present here in person or at the branch in London, is of vast importance, to this bank.

The Chairman.—There certainly was an omission in not referring to something of that sort, but it really was an inadvertence.

Mr. Crawford enquired when the proposed revision of the Banking Act was to take place, and he was informed by the chairman that the present act expired in 1901, so that the revision would probably be considered in 1900, the session after next.

Mr. Crawford then asked if there was any limit to the amount that the bank could loan to a customer.

The chairman replied that there was no fixed amount that he knew of.

Mr. Crawford then proceeded to speak in favor of comparative columns being published in the annual statement, after which the chairman said: I will ask the general manager to reply to anything that happens to occur to him with reference to your enquiries, but I may remark that I have before me now the annual reports of a great number of banks, amongst them the largest and most important in England, the National Provincial Bank, and they give no more information in their statements than we give—no double columns—and, with the exception of one bank in the Dominion, no other bank, I think, gives it. I think you must have forgotten also that a much better thing than that is given to you every year. A large part of the remarks just made by the general manager, was an explanation of the points wherein the present condition of things differed from last year's. He explained to you how the deposits compared, and why they were so and so, on throughout nearly the whole statement. As to the mere fact of having parallel columns, we are all in possession of the annual statement; it is well known to everybody; and while it is conceivable to a person who knows accurately what took place last year, to those who don't know the parallel columns might be of some use; but that is not the body of shareholders.

The chairman then put the motion for the adoption of the report, and it was carried unanimously.

Mr. G. F. C. Smith moved:—

That the thanks of the meeting be presented to the president, vice-president and directors for their attention to the interests of the Bank.

This was seconded by Mr. J. Philip Scott, and adopted.

Mr. Hugh McLennan moved:—

That the thanks of the meeting be given to the general manager, the inspector, the managers and other officers of the bank for their services during the past year.

In making the motion he, on behalf of the directors, congratulated the bank, which had over 500 employees, on the faithful manner in which these employees discharged their duties. So far, he remarked, as he heard from those having business at the bank, in no case had he heard any expression unfavorable to any employee of the bank in the discharge of his duties.

Mr. W. W. Ogilvie seconded the motion, and spoke of the loyalty of the employees to the institution. They appeared to be proud of it. He had known many instances in which they had been offered double the salary they were receiving to go elsewhere; but there was something they valued as much as money, and that was being connected with the Bank of Montreal. So long as that loyalty prevailed among the employees of the bank, it would be a great source of strength. (Hear, hear).

The motion was unanimously concurred in.

The General Manager.—I have to thank you, on behalf of myself and my fellow-workers, for the kind expressions that have fallen from Mr. McLennan and Mr. Ogilvie. I have no doubt these expressions will stimulate the staff to further efforts on behalf of the bank. As to what was said about the loyalty of our clerks, I can only say that it was perfectly correct.

Mr. B. A. Boas moved:—

That the ballot now open for the election of directors be kept open until 3 o'clock, unless fifteen minutes elapse without a vote being cast, when it shall be closed, and until that time, and for that purpose only, this meeting be continued.

This was seconded by Mr. A. T. Taylor, and unanimously agreed to.

Mr. John Crawford moved:—

That the directors consider favorably the expediency of publishing the comparative columns in the report at the annual meetings.

Mr. James Wilson seconded the motion, which was adopted.

On the motion of Mr. John Morrison, a hearty vote of thanks was accorded the chairman, who acknowledged the same.

The ballot resulted in the election of the following gentlemen: R. B. Angus, Esq., Hon. G. A. Drummond, A. F. Gault, Esq., E. B. Greenshields, Esq., W. C. McDonald, Esq., Hugh McLennan, Esq., W. W. Ogilvie, Esq., A. T. Paterson, Esq., Right Hon. Lord Strathcona and Mount Royal, G. C. M. G.

At a meeting of the newly-elected directors, held June 7th, the Rt. Hon. Lord Strathcona and Mount Royal was re-elected president, and Hon. George A. Drummond, vice-president.

QUEBEC BANK.

Proceedings of the eightieth annual general meeting of shareholders of the Quebec Bank, held in the banking house, Quebec, on Monday, 6th June, 1898.

Present: Messrs. John Breakey, J. T. Ross, G. Lemoine, W. A. Marsh, P. Johnston, Major Jas. Morgan, D. Smith, Thos. Norris, Robert Brodie, Capt. W. H. Carter, Wm. Tofield, E. H. Taylor, E. F. Wurtele, H. Budden, John Shaw, Thos. Piddington, Dr. A. G. Belleau, D. H. Geggie, W. Brodie, Hon. F. E. Gilman, W. Sutherland, Geo. Tanguay, R. F. Cream, and others.

On motion of Mr. J. T. Ross, seconded by Mr. G. Lemoine, the chair was taken by Mr. John Breakey and Mr. T. C. Coffin was requested to act as secretary of the meeting.

The chairman read the report of the directors, and Mr. McDougall, the general manager, read the statement of the affairs of the bank as on the 14th of May, 1898.

REPORT.

The directors beg to present to the shareholders the eightieth annual report of the affairs of the bank, showing the result of the business for the fiscal year ended the 14th May, 1898.

PROFIT AND LOSS ACCOUNT.

Balance of Profit and Loss Account, 15th May, 1897		$ 60,660 14
Profits for the year ended 14th May, 1898, after deducting charges of management and making provision for bad and doubtful debts		212,074 90
		$272,735 04
Dividend 3 per cent. paid 1st December 1897	$ 75,000 00	
Dividend 3 per cent. payable 1st June, 1898	75,000 00	
Transferred to Rest account	50,000 00	
		$200,000 00
Balance of Profit and Loss carried forward		$ 72,735 04

The net result of the business for the year just completed is slightly smaller than for the year before, although this result has been obtained by the employment of a larger average amount of money.

The rate of interest earned on security loans in the fore part of the year was not so good as it is now, and the advantage secured by the reduction of the rate allowed to depositors did not become altogether effective till the year was well advanced.

The directors have, however, been enabled to make a further increase to the Rest by adding thereto the sum of fifty thousand dollars.

It has been our misfortune this year to lose the services of Mr. S. J. Shaw, Mr. G. R. Renfrew and Mr. W. J. Withall, by whose death the board has been deprived of three members who were at once good friends and wise advisers.

Having acted together in harmony during a number of years, and having been, all of them, equally inspired by a strong sense of duty to the bank, their respective services were made more effective to promote its interests by the perfect understanding that existed between them.

The office of vice-president, so worthily filled by Mr. Withall for twenty-eight years, is now occupied by Mr. John Theodore Ross, and the vacancy created by the death of Mr. Shaw was filled by the nomination of Mr. Vesey Boswell. There are still two vacancies on the board remaining to be provided for at this meeting.

All of which is respectfully submitted.

JOHN BREAKEY,
President.

GENERAL STATEMENT, 14TH MAY, 1898.

THOMAS MCDOUGALL,
General Manager.

Quebec Bank, Quebec, 14th May, 1898.

The general manager commented upon the items composing the statement, after which the following resolutions were passed:

Moved by Mr. John Breakey, seconded by Mr. W. A. Marsh, that the report and statements now read be adopted and published for the information of the shareholders.—Carried.

Moved by the Hon. F. E. Gilman, seconded by Mr. P. Johnston, That the thanks of this meeting be given to the president, vice-president and directors for their valuable services during the past year.—Carried.

To which the chairman made reply.

Moved by Mr. D. Smith, seconded by Mr. Wm. Tofield, That the thanks of this meeting be given to the general manager, inspector, managers and other officers of the bank for the efficient manner in which they have discharged their duties.—Carried.

The general manager replied thereto and said that the work of the several offices of the bank is carried on effectively and with economy.

Moved by Mr. Thos. Norris, seconded by Major Jas. Morgan, That Mr. John Shaw and Mr. E. H. Taylor be appointed scrutineers of the ballot, and that the ballot box be now opened and remain open till 4.30 o'clock of this day, for the election of directors, and that if five minutes elapse without a vote being cast, the scrutineers be empowered to close the ballot box.—Carried.

The scrutineers subsequently reported as the result of the ballot, that the following gentlemen were elected directors for the ensuing year, viz.: Messrs. John Breakey, J. T. Ross, Gaspard Lemoine, W. A. Marsh, Vesey Boswell, F. Billingsley and C. R. Whitehead.

Moved by Mr. G. Lemoine, seconded by Mr. W. A. Marsh, That the thanks of this meeting are hereby tendered to the scrutineers for their services.—Carried.

The chairman having vacated the chair, it was moved by Mr. R. Brodie, seconded by Major Jas. Morgan, That the thanks of this meeting be given to Mr. John Breakey for his services in the chair.—Carried.

The directors give notice of their intention to ask the shareholders at the next annual meeting to change the date of the general annual meeting from the first Monday to the second Monday of June in each year.

T. C. COFFIN,
Secretary.

EASTERN TOWNSHIPS BANK.

The annual meeting of the shareholders of this bank was held at their banking house, in the city of Sherbrooke, on Wednesday, 1st day of June instant, a fair number of shareholders being present.

Notice of meeting having been read, R. W. Heneker, Esq., the president, took the chair.

Wm. Farwell, the general manager, was elected secretary.

F. C. Thompson and Wm. Morris were elected scrutineers of votes.

Minutes of last annual meeting were then read, after which the president on behalf of the directors, submitted the following

REPORT.

The directors have much pleasure in submitting to the shareholders the balance sheet, and profit and loss statement at the close of the financial year, and to express their satisfaction at the results of the year's business.

As will be seen by the profit and loss statement, the directors have been able to provide the usual dividend at the rate of seven per cent., a bonus to the shareholders of one half of one per cent., and to add to the reserve fund fifty thousand dollars, leaving a balance of profit of twenty-two thousand seven hundred and fifty-six dollars and twenty cents ($22,756.20) to be carried forward.

The directors feel that their action in thus continuing to increase the strength and earning powers of the bank by adding to the reserve fund, as the profits permit, instead of increasing the rate of dividend at the present time, will meet with the approval of the majority of the shareholders; they are in hopes, however, that the profits in the future will also enable them to give from time to time a small bonus, as well as adding to the reserve.

The funds of the bank have been profitably employed during the year, the note circulation has been well maintained, and deposits have increased to the extent of four hundred thousand dollars ($400,000), showing the increasing wealth of the Townships. Owing to the cheapness of money in the great centres, the Government have been able to effect loans at greatly reduced rates, and in consequence have decided to reduce the interest payable on Government Savings Bank deposits. An Act has been passed during the present session, which comes into force on the first of July next, reducing the rate to 2½ per cent. This action has not as yet been followed by the banks, but the general tendency is in that direction in the near future.

The directors are pleased to be able to report an improvement in business generally, brought about by the excellent harvest of 1897, coupled with high prices for farm products, greatly benefiting the farmers, and as a matter of course giving life and energy to all other branches of business; added to which the discovery of gold in the Yukon country, and the development and working of the mines in British Columbia, Nova Scotia and other sections, have created a large demand throughout our manufacturing establishments, so that almost every industry in the country has felt the general improvement in business. The outlook for the future is most promising.

Your directors, after careful consideration, are of the opinion that the number of directors resident where the head office is situated should be increased to at least four, not only that there may always be a quorum available, but also that the large and increasing business of the bank—which must necessarily be controlled and directed from the head office—may receive the fullest consideration. They recommend that action to that effect be taken at the present meeting.

Your directors desire to express their regret, that through the appointment of their colleague, Colonel John G. Foster, to the Consulate of the United States at Halifax, N.S., they have been deprived of his valuable services. On his resignation they proceeded to appoint Mr. C. H. Kathan, of Stanstead, in his place "ad interim." Mr. Kathan is a prominent business man well and favorably known in that section, and strongly recommended by our late colleague as his successor.

The head office and branches of the bank have been regularly inspected during the past year.

In conclusion, the directors desire to place on record their entire satisfaction with the zeal and attention of the staff generally to the business of the bank.

The whole respectfully submitted.

R. W. HENEKER,
President.

Wm. Farwell,
General Manager.

Upon conclusion of the report the president briefly addressed the meeting touching upon the various items of the statement, condition of business at various points served by the bank, the good crop prospects for this season and general prosperous outlook, and closed by moving the adoption of the report. This was seconded by Major Wood. The general manager having been called upon made a short address, and after remarks by other shareholders present the report was adopted.

The thanks of the shareholders were voted to the president and directors, and the appropriation for their remuneration was increased in the sum of sixteen hundred dollars per annum.

Thanks of the shareholders were also voted the general manager, managers, and other officers of the bank.

The ballot was then taken for election of directors for ensuing year. After the whole vote had been cast the scrutineers reported the following shareholders elected, viz.: Richard W. Heneker, Matthew H. Cochrane, Israel Wood, J. N. Galer, N. W. Thomas, T. J. Tuck Gardner Stevens, C. H. Kathan, H. B. Brown

There being no further business the meeting adjourned.

FREEHOLD LOAN & SAVINGS CO.

At the annual meeting, held June 7th, at the company's office, corner of Victoria and Adelaide streets, Toronto, the following were present: C. H. Gooderham, T. S. Stayner, Hon. Senator J. C. Aikins, H. S. Howland, Hugh Ryan, Capt. W. F. McMaster, Hon. S. C. Wood, A. J. Somerville, Alex. Smith, F. X. McGee, Wm. Cook, T. M. Rowland, C. S. Gzowski, jr., W. W. Robinson of Hamilton, John Russell of Winnipeg, Rev. Dr. Moffatt, M. Shewen, G W. Jackes, Philip Browne, Chas. S. Howitt, W. A. Douglass, B.A., N. J. Rowell, Richard Wickens, Mr. Knox, B. E. Bull, R. T. Gooderham, E. W. D. Butler, E. W. J. Owens, Jos. Blakeley, Eli Hyman, J. C. Hamilton, J. K. Niven and Daniel Spy, C.E.

Mr. C. H. Gooderham presided, and the Hon. S. C. Wood, acting as secretary, read the report with the financial statement, and the thirty-ninth annual report of the auditors, as follows:

REPORT.

The board of directors beg to submit the annual report, together with the accounts for the year ending 30th of April, 1898.

The earnings of the company amounted to $285,576.63, and, after deducting commissions and all other expenses, and paying two half-yearly dividends of 3 per cent. each, a surplus remains of $10,562.46, which has been carried to contingent account, making that fund $41,703.11.

In common with other loan companies the Freehold has participated in the improved times. The condition of the loans both in Ontario and Manitoba shows a very favorable change.

Farms are in greater demand, both for purchase and lease, city properties are becoming more productive, there are fewer vacancies, and rentals have advanced very materially. While the interest earned during the year was, as above stated, $285,576.63, the amount collected (of course partly for arrears), reached the satisfactory sum of $340,208.67.

Your directors, being confident that an opportune time had arrived—values not only having reached their lowest level, but an upward tendency is plainly discernible to the most casual observer, and estimates based on present values would be a safe criterion in determining the amount to be written off the loans of the company as probable losses—decided to have a thorough examination of the accounts of mortgagors, followed by a detailed report dealing with every loan on the books of the company. This examination and report has been made, with results most satisfactory and quite up to the expectations of your directors.

Having regard, however, to the very marked shrinkage in values that has prevailed for some years, they decided to anticipate any probable losses that may be sustained without taking into consideration the present promising outlook, and have estimated the reductions at the very large sum of $359,550, and have reduced the Reserve Fund to $300,000.

The deposits and debentures of the company, including interest, amount to $3,886,504.09. These constitute the total liability to the public, for which we hold the following securities:

Mortgages on real estate, office premises, etc.........	$5,586,880 00
Unpaid subscribed stock.....	1,904,400 00
Making a total of.........	$7,491,280 00

being $3,600,000 in excess of and about double the amount of the liabilities.

You will be asked to pass a by-law changing the financial year and fixing the times for the holding of our future annual meetings.

The directors have again to acknowledge the valuable services of our agents in Edinburgh and Glasgow.

The books, vouchers, and securities of the company have been carefully examined by the auditors, whose reports are hereto appended.

S. C. Wood, Managing Director. C. H. Gooderham, President.

Toronto, 7th June, 1898.

Assets and Liabilities, April 30, 1898.

S. C. Wood, Managing Director. C. H. Gooderham, President.

Toronto, May 25, 1898.

To the President, Directors, and Shareholders of the Freehold Loan and Savings Company, Toronto:

Gentlemen,—We, the undersigned, having examined the securities and vouchers, and audited the books of the company (excepting the business of the Manitoba branch, which has been duly audited and certified to by local auditors), certify that we have found them correct, and that the annexed balance sheet is a correct statement of the company's affairs for the year ending April 30, 1898.

Joseph Blakeley,
W. A. Douglass,
Auditors.

Toronto, May 25, 1898.

Gentlemen,—We, the undersigned, have examined the securities and vouchers and audited the books of the Freehold Loan and Savings Company for the year ending April 30, 1898, and kept in their office in the city of Winnipeg, and have found them correct.

W. Hutchinson,
J. Scroggie,
Auditors.

Winnipeg, May 7, 1898.

The president, in moving the adoption of the annual report, made the following remarks:—

Gentlemen,—Before moving the adoption of the report, I desire to make a few remarks regarding certain matters referred to therein.

For the past ten years we have had depressed times and shrinkage in values in this country. There has been a falling off in the price of farm lands, and rentals have fully sympathized with this depreciation. From 1885 to 1896, inclusive, farmers had to practise the strictest economy to enable them to meet their obligations, and a great many farmers throughout the Provinces of Ontario and Manitoba, owing to continued low prices and other causes, had fallen behind in their payments.

Last year times commenced to improve; crops were fair, prices generally higher, and the marked increase in the collections demonstrates that with fair prices the farmers of Ontario and Manitoba can, and will, meet all reasonable obligations.

Ontario and Manitoba are largely agricultural provinces, and the cities, towns and villages depend for their prosperity upon the operations of the farmers. Depression in agriculture means in a very short time a corresponding depression in all other industries, consequently the hard times in rural districts soon found its way into our cities and towns.

In Toronto we had the additional misfortune of an unjustifiable boom for some years, and from this we have not fully recovered.

Our practice has been to write off all ascertained losses each year; but feeling that values had reached their lowest mark, and that any change must be for the better, the directors unanimously decided to thoroughly investigate and to ascertain the exact position of all their loans.

Having regard, therefore, to present prices, and not to future advances, they decided to adopt drastic treatment in cutting down values, and to put in the pruning-knife regardless of the magnitude of the total cuttings.

The carrying to a special account the sum of $359,550 as written off our reserve will not in any way interfere with the earning power of the company, as it is simply transferring such parts of loans as are at present unproductive, and are considered doubtful. This leaves the remainder with the earning power unimpaired.

Having referred to the depressed times and shrinkages in values, allow me to turn for a few moments to a brighter side, and to a more hopeful outlook.

Our collections on account of interest alone were $340,208.67, a larger amount than for several previous years.

We have received in cash on account of farms sold and repayments on principal, $293,490.63.

We have sold 95 properties, partly farms and partly houses in the city. Besides this our vacant lots in Winnipeg have nearly all been disposed of.

In this Province of Ontario we have 117 farms on hand, and they are all occupied at fair rentals.

Of the 122 houses on hand, including a few in West Toronto Junction, there are only five vacancies.

The rentals of city properties are being advanced as the rent terms expire. I may add that the demand for the purchase of houses in the city is increasing. In quite a number of cases where the mortgages are in arrears the company is collecting the rentals.

It is pleasing to be able to state of this class that every house is occupied.

The rate of interest on our sterling bonds, renewed or charged for new money, in no case exceeds 3½ per cent.

The interest obtainable on new investments in Ontario has been very materially reduced; but the higher rates prevailing in Manitoba compensate to a considerable extent for the falling off in Ontario.

Owing to the large number of office buildings erected about the same time as and subsequent to that of the Freehold building, the supply of offices in Toronto exceeds the demand, and although our building will compare most favorably with any other in the city, both as to occupation and rentals paid, the income has been considerably under the estimates given to your directors by prominent real estate dealers to whom the plans were referred before its erection.

The item, "Building Furniture, etc.," now stands in our books at $200,000, having written off $159,550.

More prosperous times in the future will increase the demand for offices—rents will advance, and the value of this building will be enhanced accordingly. On the other hand, should the income from the building be reduced by a further decline in rentals, future balance sheets will show a corresponding reduction in its value.

Your directors are devoting a large amount of time and attention to the affairs of this company. As president, I fully realize the responsibility attaching to my position, and I assure you we are doing everything in our power to protect and advance the interests of the corporation.

At present the crop prospects in both provinces are all that could be desired. A large number of sales have been made since the close of our year, and we have every reason to anticipate a prosperous future.

It will be noticed that the expense account is somewhat larger than last year. This has been caused by the very large number of sterling bonds falling due, exceeding that of any previous year. This means increased commissions to agents, stamp duties, bank charges, etc., etc.

The statutes of Ontario recently passed require that the annual returns to the Government (corresponding to our yearly accounts) be made up to the 31st December in each year. You will, therefore, be asked to give your sanction to a by-law changing the financial year, and also to one fixing the time for holding future annual meetings.

Mr. T. S. Stayner seconded the report, which was then unanimously adopted.

After a resolution thanking the president and directors for their attention to the interests of the company, and also a resolution thanking the manager and staff for their services during the year, Messrs. Joseph Blakeley and W. A. Douglass, B.A., were appointed general auditors for the current year, and W. Hutchinson and James Scroggie, auditors for the Winnipeg agency.

The election of directors was then held, and the scrutineers reported the following elected: C. H. Gooderham, T. S. Stayner, Hon. J. C. Aikins, H. S. Howland, Hugh Ryan, W F. McMaster, and the Hon S. C. Wood.

At a subsequent meeting of the directors, C. H. Gooderham was elected president, and T. S. Stayner vice-president, for the coming year.

ONTARIO MUTUAL LIFE.

The 28th annual meeting of the Ontario Mutual Life Assurance Company was held in the Town Hall, Waterloo, Ontario, on Thursday, May 26th, 1898. The attendance, though not large, was representative, and much enthusiasm prevailed.

The president, Mr. Robert Melvin, of Guelph, occupied the chair, and on the platform the following directors were seated: Messrs. Taylor, Hoskin, Bruce, Britton, Fisken, Clement, Kidd, Somerville and Fair.

On motion of Mr. E. P. Clement, seconded by Mr. Geo. A. Somerville, Mr. W. H. Riddell, secretary of the company, acted as secretary of the meeting. The minutes of the last annual meeting were formally taken as read and adopted.

The president then called upon the secretary to read the directors' report.

REPORT.

Your directors respectfully submit the following as their report for the year ending Dec. 31st, 1897:

Since we last met you, it has been our misfortune to lose by death the services of our president, the late I. E. Bowman, who was one of the founders of the company, its first and only president up to the time of his death. Eulogy of him is not necessary, as he long held positions of honor and trust, and deservedly commanded the universal respect of all who knew him for sterling honesty and integrity, for his fairness in all his dealings with his fellow-men, and for his devotion to duty. He will be missed at the board, over whose deliberations he so ably and so long presided. Mr. Hendry was appointed director in his place.

We are pleased to inform you that the business of the past year has been of the most gratifying character in every respect, and that we still continue our liberal scale of distribution of surplus to our policy-holders, notwithstanding the great lowering of the rate of interest, and consequently lessened earning power of money.

The number and amount of policies issued during the year was 2,020 am'nting to	$3,070,900 00
No. of applications declined, 90, amounting to..........	122,500 00
Net premium income.........	644,107 05
Interest on investments.......	175,873 25
Total income.................	819,980 30
Total assets..................	3,741,405 01
Total amount of insurance in force	21,487,181 38
Reserve to meet liabilities on insurance in force according to Government requirement, H. M. 4½ per cent..	3,327,789 46
According to our standard, Actuaries' 4 per cent......	3,486,372 41
Amount paid for death claims	126,425 00
Endowment	49,086 00
Purchased policies...........	97,784 29
Annuities	780 17
Surplus	73,676 29
Total amount paid to policy-holders	347,751 75
Mortality for 1897...........	135,633 00
Surplus earned..............	91,303 39
Surplus over all liabilities, our Standard, Actuaries' 4 p. c.	231,417 05
Government Standard, H. M. 4½ per cent..............	390,000 00

The demand for money was not active during the year, but the funds of the company have been fully invested, but at a little lower rate of interest.

The interest on our investments has been well met, and the amount of overdue and accrued interest is much less than for many years.

The collapse of several of the larger Assessment Companies, and a feeling of uncertainty towards some others, have had the effect of directing the attention of many of the better class of assurers to companies whose business is based on level premiums and ample reserves. With other old line companies we have been benefited by increased business, and hope to benefit to a much larger extent in the near future.

Financial statements prepared and certified to by your auditors are herewith submitted for your consideration, also certificate of executive committee on mortgages and other securities of the company.

You will be called upon to elect four directors in the place of B. M. Britton, Q. C., Geo. A. Somerville, F. C. Bruce and J. Kerr Fisken, all of whom are eligible for re-election.

On behalf of the board,
R. MELVIN,
President.

Waterloo, May 26th, 1898.

THE PRESIDENT'S ADDRESS.

In moving the adoption of the report the president said: I am sure you will, with me, deeply regret the death of our late president. As was expressed in the address to his family, the board feel that as individuals they have lost a valued friend and wise counsellor, and we know that with us you highly appreciated his sterling honesty and integrity, and the faithfulness with which he discharged the duties of president for so many years.

The business of the past year has been in every way of the most satisfactory character; indeed, it has been one of the best years, if not the best, in the history of the company, both with regard to the amount of business done and the character and quality of that business, enabling us to distribute to the policy-holders the large sum of $73,676.29, an increase of nearly $2,000 over the previous year, and considerably over double the amount paid in 1887, $34,849. You will see by the report that the net result of the year's business, with regard to new business taken and business revived, we have added to the amount of insurance in force in December, 1896, the sum of $1,485,719. It might be interesting to see how we compare with other companies in the amount and quality of our business. We accepted assurance for $3,070,900 and added to our previous amount $1,485,719.

The fifteen Canadian companies added to their insurance in force, December, 1896, $13,623,969, of which sum The Ontario contributed over 10 per cent. So that it will be apparent to you that we have more than held our own in the struggle for business in Canada, and that the Canadian companies are yearly absorbing more and more of the life assurance business of the Dominion, a result that must be gratifying to all Canadians.

Our income has kept pace with the increase of our business and shows an increase over last year of $59,577.06, and our total assets show an increase over last year's of $336,497.32, amounting to $3,741,405.01. Ten years ago they were $1,089,448, an increase since 1887 of $2,651,957. If we were to adopt the principle of many corporations or companies of adding to our assets the increased value of our debentures over the amount we paid for them, amounting to $56,087, our assets and surplus would both be increased by that amount; but we have not in any case taken these securities in account at a larger sum than we paid for them.

Our reserve is calculated on the Actuaries' Table, the highest assumed rate of mortality, and all our business, new and old, is on a 4 per cent. basis, and has been for several years. Some of the companies still base their reserves on the Government standard, H. M. 4½ per cent, while the majority of them have adopted a lower rate of interest for new business, still retaining the Government standard for their old business.

The death rate is a certain and fixed quantity, while the rate of interest or value of money is very unstable, but always with a downward tendency. So whatever we may do with regard to profits, surplus, etc., we are bound to make ample provision for payment to the utmost farthing of our obligations. In making these remarks I do not wish to be understood as meaning that the time has arrived to change our basis of reserve, but if the time should come when it may become necessary, that The Ontario, as on former occasions, will be one of the first to adopt a still higher standard of safety.

It is gratifying indeed to observe the very great decrease in lapses and surrender values. This has been the weak spot in all life assurance companies for many years, but let us hope the very marked improvement this year may continue, and that not only we but all other companies may share in a like improvement.

In conclusion—I have endeavored to show you that as compared with 1896 we added largely to our insurance in force and as compared with 1887 we nearly doubled the amount of insurance on our books; that, as compared with the past or any other year our lapses are very much less, our reinstatements more, our total income much greater, and that we paid more surplus last year than in any previous year; that, as compared with 1887 we paid more than double, that we added largely to our reserve and to our surplus, that our death rate was less, and that up to the 1st of May in the present year our new business is greater by $101,000 than for the same time last year, and our death rate up to May 1st is not greater than for the corresponding period of last year. Therefore have we not reason to hope, with the active and earnest co-operation of our policy-holders, board, agents and staff, in all legitimate and honest ways, to anticipate for 1898 as great, or even greater prosperity than we had in 1897 ?

VICE-PRESIDENT'S ADDRESS.

Mr. Alfred Hoskin, Q. C., second vice-president of the company, said in seconding the adoption of the report: I must be permitted to add a few words to what has been said in regard to our late president. In his death the company not only sustained a great loss, but the board was deprived of a friend. Mr. Bowman was an all-round man; he was not only careful and solid, but had a clear mind and foresight. His judgment in the investment of our funds was sound, and he was always alive to the advancement of the insurance part of the business. The agents and all connected with the business, cannot but admit that he was ever ready to listen, and, after consideration, to adopt suggestions made in the interests of the company. He earned his rest, and I feel warranted in saying that we all miss him.

I desire to add a few words as to the position of the investment part of our business. Although we are an insurance company, and every effort should be made to push and enlarge that portion of the business, yet the stability of that depends upon the security of the investments—without the latter the former would be in peril, and the agents would find a difficulty in securing insurances if the assets of the company were doubtful. In 1897 the invested funds of the company amounted to $3,484,781. The care of such a large sum entails considerable labor and anxiety upon those who have charge of the same, for upon the earning power of this sum depend largely the profits we have to divide. It is almost unnecessary for me to remark that the rates to be obtained are steadily falling, and in addition the difficulties of finding investments are increasing. Complaints are sometimes made by policy-holders that their profits are not increasing fast enough, but if they thought for a moment they must conclude that, as profits are less in every kind of business and in loan companies, the profits from the investments of assurance companies must be similarly affected.

I find that in 1896 our average rate of interest on our invested assets was 5.62 per cent., and in 1897 5.13 per cent. This to a great extent arises from our having to reduce the rate, in many instances, from 6 to 5½ per cent. In comparison with other companies of about our size, I find that during the years 1896 and 1897 the net rate of interest earned by them was respectively only 4.44 and 4.34, 4.92 and 4.65, 4.76 and 4.63 per cent.; so you will see that our showing, by comparison, is a good one. Agents very naturally desire to get as much remuneration as possible, but they should have regard to the decreasing earnings of all companies, and also that very few concerns can stand an increasing expenditure upon a decreasing earning power.

I find that, as compared with other Canadian companies, our investments (except in two companies) upon mortgages are larger and (except in one instance) our investments on debentures are greater, comprising about 75 per cent. of our total funds invested. Our remaining investments consist almost of loans on the security of our policies and real estate.

I might state for the information of the policy-holders, that once a year a committee of the board handles every mortgage and debenture, and ascertains the position of each mortgage account, and where thought necessary gives instructions for their being looked after.

ASSESSMENT COMPANIES.

Mr B. M. Britton, Q. C., M. P., Kingston, referred to the harmony that existed at the annual meeting of the company, and the enthusiasm manifested in its proceedings from year to year. He was pleased to note the steady growth of the company, and the satisfactory results achieved for its policy-holders. He contrasted the advantages which policy-holders enjoyed in a well managed legal reserve life company like The Ontario Mutual Life as compared with certificate holders in any kind of assessment companies, which, as well said by the Superintendent of Insurance for the Dominion, "were an experiment" and that "what has just taken place in the case of the Massachusetts Benefit Assessment Association exemplified in a striking manner what may be expected in the case of all similar associations." At best insurance in such societies can be considered only as temporary. He believed that the time was rapidly approaching when many of the assessment companies must necessarily go to the wall. Certificate holders must, if such associations do not wholly collapse, "either drop out or pay very largely increased premiums, and that too at a time when by reason of impaired health, or for other causes, it may be impossible to obtain insurance elsewhere."

No company can stand forever, humanly speaking, unless the premiums charged are sufficient to cover the risk of dying and the expenses of conducting the business. Public opinion at the present time is much more enlightened on this subject than formerly, in proof of which he instanced the discussions which have recently taken place in Parliament on the subject of life insurance in general and assessment insurance in particular. The half-heartedness with which legislators approached the subject in the past has been supplanted by a sincere desire to understand the needs of the insuring public, and to safeguard their interests by legislation of a practical character, which while fostering all legitimate life insurance, will make it impossible for counterfeit insurance to obtain a lasting foothold in Canada.

OTHER BUSINESS.

Hearty votes of thanks were accorded to the president, vice-presidents and directors, for carefully looking after the company's affairs, and to the manager, secretary, actuary, officers and agents for faithfully discharging their respective duties during the past year.

Regret was very generally expressed at the absence of the manager from this meeting, owing to severe illness, from the effects of which he has not yet recovered, and a resolution conveying the sympathy of the meeting was passed, and expressing the hope that his health may soon be restored.

On motion of Mr. J. L. Troy, Dr. Webb, Medical Director, and Mr. George Wegenast, Actuary, were appointed scrutineers for the election of four directors. The balloting which followed resulted in the re-election of Messrs. B. M. Britton, Q.C., M. P., Francis C. Bruce, wholesale seed merchant, Hamilton; J. Kerr Fisken, B.A., Toronto; and Geo. A. Somerville, manager of The Huron & Erie Loan and Savings Company, London.

On motion Messrs. J. M. Scully and Geo. Davidson were re-appointed auditors for the present year.

The directors met subsequently and re-elected Mr. Robt. Melvin, president; Mr. C. M. Taylor, first vice-president, and Mr. Alfred Hoskin, Q.C., second vice-president of the company for the ensuing year.

Commercial.

TORONTO MARKETS.

Toronto, June 9th, 1898.

Dairy Products.– Deliveries of dairy butter are heavy, and the quality is thought to be better than it was a year ago, although there is in some of the parcels received a bad loss in value through carelessness on the part of makers and lack of classification by the merchant. Merchants quote 12½ to 13½c. per lb. Deliveries of creamery are also heavy, and export trade is being done only on a low basis of values It is thought the market will remain quiet during June. There is a good local consumption of cheese. There is practically none of the old make in the market. Quotations are about 8c. per lb. The pastures are in splendid condition, and everything points to a large make this season. The demand for eggs in the city trade has fallen off, and is somewhat less than it was a month ago. Dealers quote 10c., with an occasional lot sold at 10½c. per dozen. Picklers are pretty well through with the season's operations, and, as noted elsewhere, have been paying high prices for their stock throughout the season.

Flour and Meal.—Trade is inactive and values unsettled, in sympathy with the loss of strength in wheat markets. Merchants report the situation as but a natural reaction from the extremely active movement last several weeks ago.

Grain.—Crop conditions still continue as good as the best on record, and farmers are counting on big harvests next autumn. Importers in the United Kingdom are not showing much anxiety to purchase supplies in the face of continued weakness across the Atlantic. The bears in the United States have broken the market on heavy Russian and Indian shipments and weaker cables and fine crop prospects and weather combined, with foreign selling in New York, and free commission house selling West. Harvesting has begun at Oklahoma, and is said to be a few days earlier than last year, and to be likely to occupy about ten days. This has also influenced the market. Local wheat prices are down about 5c. per bushel. Oats are also weaker. Barley remains nominal. Peas have declined, and are not wanted at the lower prices. There is little to report of rye, and stocks are pretty well shipped out.

Green Fruits.—Supplies generally are not abundant. At the Wednesday sale oranges brought good prices, an advance of about 25 cents over last week. The stock available was small and competition keen. We quote: Mediterranean Sweets, fancy, 126s, 150s, 176s, 200s, 216s, $2.75 to 3.00 per box; ditto, 250s, 300s, $2.50 to 2.75 California Seedlings, 126s, 150s, 176s, 200s, 216s, $2.50 to 2.75; ditto, 250s, 228s, 300s, 360s, $2.25 to 2.50. Lemons are firm and without change in price. Stocks are cleaning up well. Canadian strawberries are coming forward freely and selling at 9 to 11c., subject to daily change. There are a few bananas in the market. One firm, who usually handle five or six cars a week at this time of the year, are receiving only one a week. The demand is good and prices firm.

Groceries. — Business is slow and staple goods do not find free movement. Sugars are in short demand. Canned meats are firm and higher. In canned peaches there was an upward movement this week in face of reports of failure of crops.

Hides and Skins,—The market is strong, and from all quarters come reports of short supplies. City butchers are obtaining 8½c. per lb. for No. 1 green cowhides, and ½c. more for steers. Sales of cured are made in the neighborhood of 9¼c. per lb. The movement of hides is very firm; the quality shows improvement, the hair being shorter and the hides cleaner. There are fewer grubs, and in general their value to the tanner is increased. Green calfskins are quoted 10c. Lambskins are selling at 30 to 35c., although it is a question whether at this price the puller can get his money out of them. The sheepskin market is dull and nominal. From Chicago, June 7th. "Demand for packer hides was quiet, but as there was no pressure to sell, packers generally being sold well up to their kill, prices were firmly maintained, closing at 12¼ to 12½c. for native steers, 12 to 12½c. for Texas; 10¾ to 11c. for butt brands; 10¼c. for Colorados; 10½ to 10¾c. for branded cows; 11¾c. for heavy native cows, and 12c. for light do.

Provisions.—The demand for smoked meats is large and good quantities are going into consumption. Packers are looking for higher prices, but as yet there has been no quotable advance. For long-clear bacon the demand is active, and from present appearances the stock will be exhausted before the new pack is in the market. Higher prices are looked for.

Wool.—The new clip is coming forward very satisfactorily, so far as quantity is concerned. There is by no means any eagerness on the part of shippers to forward their offerings; but on the other hand there is enough delivered to make a market. Country merchants are paying 16c. per lb, for wool, which is, in the opinion of traders here, too much. They maintain that to be exported at a profit the clip must be secured at an even less figure. The small country mills are giving 17 cents, in barter, for wool which is equal to scarcely more than 15 cents cash. Recent advices from the Eastern States say: "During the past fortnight the tone of the market has improved and sellers are becoming more reluctant to make the concessions that seemed necessary to quicken the demand. The firm closing of the London auctions proves conclusively that, for the present at least, American wool is not in danger of being undersold by fresh importations, and this has so greatly increased confidence in the future of wool values as to have led to the withdrawal of some important lots that have been heavy on the market."

MONTREAL MARKETS.

Montreal, 8th June, 1898.

Ashes.—Business continues very dull, and receipts slim; one of the principal dealers reports that he has not bought a barrel for several days. Quotations are more or less nominal at $3.60 to $3.65 for first pots, seconds $3.25 to $3.30, pearls $4.75 per cental.

Boots and Shoes.—City manufacturers of boots and shoes report orders for fall wear as coming in satisfactorily on the whole, though some of them report business in the lower provinces as hardly up to the mark. From Quebec there is some complaint heard from those manufacturers who cater to the jobbing trade, that commands are not so large as was expected, but this may be remedied later.

Cements and Firebricks.—A continued good demand is reported for cements, and there is really some difficulty being experienced in filling all orders, as the bulk of the goods arriving are to fill orders placed some time ago. The receipts for the week ending to-day are 3,300 brls. of Belgian and German makes, English, nil; firebricks, 23,000. Quotations continue firm at old figures.

Dairy Products.—The cheese market firmed up a trifle towards the end of last week, and though it has barely held the gain, the conditions are rather better than at last writing. The usual Monday receipts of Quebec Cheese realized about 6¾c. per lb., and Western is quoted at 7⅛ to 7½c. Last week's exports were very fair, being 36,111 boxes; for the corresponding week last year the figures were 42,763 boxes, and total shipments this year to date are behind those of last year by 35,500 boxes. In butter shipments, however, there is a notable gain over last year thus far. Last week's figures are 2,468 packages, and for the season to date 9,520 packages, as against 1,627 packages last year. Values in this line are a shade firmer, with 16½c. quoted for fine creamery.

Dry Goods.—The half-yearly stock-taking is not yet fully over with all our wholesale houses, but a very fair amount of business is doing for the season. Quite a few country buyers have been in town since the 1st inst., making fair sorting selections, and picking up job lots which are frequently obtainable at stock-taking times. City retailers report business as a good deal better than it was at this time a year ago, and money is coming in well from country districts. Advices from England report an advance in hosiery yarns, and cashmere hose may be quoted 5 to 7½ per cent. dearer; cashmere dress goods are also reported very firm.

MONTREAL STOCKS IN STORE.

	May 28. Bushels.	June 4. Bushels.
Wheat	297,327	424,333
Corn	202,161	151,726
Oats	999,523	1,047,426
Rye	15,611	85,671
Peas	238,837	282,685
Barley	33,083	31,296
Total grain	1,786,539	2,023,117
Oatmeal	250	227
Flour	18,276	18,837
Buckwheat	78,687	56,066

Furs.—Receipts of raw furs are now of a dragging and limited character, and with advices of the London June sales, which open next Monday, we shall drop quotations until the fall. We quote: Mink, large dark, $1.50; small, do., $1 to $1.25; marten, $1.75 to $2.25; fisher, $4.50 to $7; lynx, $1 to $2; otter, $1 to $12 for dark; pale, $5 to $7; red fox, large, $1.30 to $1.50; small, $1; cross fox, $3 to $0; bear, cubs, $3 to $7; medium, $7 to $10; large, $12 to $15; skunk, 15 to 70c., as to color and stripe; coon, 20 to 75c.; rats, fall, 7 to 10c.; kits, 2 to 5c. Beaver, not quoted, killing being forbidden by law.

Groceries.—The question of a ten per cent. war duty on tea has evidently been finally decided upon in the United States, to go into effect July 1st, and there has been some resulting flurry in the local market. The demand so far, however, has mainly been from speculators, without any important business going through. One leading broker reports a shipment of between 400 and 500 pckgs, bought on American order, and one or two smaller invoices are also reported as being shipped but stocks of teas on spot up to the required standard are really small. Late cable advices from Japan report a rather easy market for high grade teas, but mediums are quite two cents a lb. dearer than this time a year ago. Ceylons and Indians in London are a fraction firmer. Refiners still report a somewhat slack demand for sugars from the jobbing trade, but think there should be a speedy improvement in this respect, as the season for small fruits is close at hand. In yellows values have been shaded a sixteenth, making the present range from 3⅝c to 4⅛c.; granulated kinds are without change, standard being quoted at 4½c., Dutch granulated 4¼c., Austrian 4 3-16c. Molasses continues fully as stiff as when last quoted. Some Western canners, it appears, are already making offers on new pack of vegetables, tomatoes at 75c, corn 65c., and peas 62½ to 65c., in the last named line delivery to be made the end of this month. Holders of gallon apples are likely to have to stand a very considerable shrinkage on their stocks, because, while the quotation two months ago was about $2.50, it is said $2 to $2.10 would now be an extreme figure, and stocks are said to be larger than was imagined. Very few new lobsters are offering as yet, and they would probably cost $10.50 to $11 a case in a wholesale way; a sale of a small lot of old talls was reported the other day at $9. Dried fruits are not much asked for as a rule, but a car lot of Californa loose Muscatels, Griffin & Skelly's 3 crown, just come to hand, has been quickly absorbed, and showed excellent quality. There is also some moderate demand for prunes, prices of which are very firm.

METALLIC ROOFING CO., LIMITED,
1178 King St. West, Toronto

HIDES.—Following on the advance of a cent in beef hides last week comes another big jump of two cents this week, dealers having put up the price at the Monday meeting to 11c per lb. for No. 1, quotation to tanners being 11½c. This move is partially due to a desire to crowd out some outside buyers, but the market is naturally in strong shape, with local receipts very small. Calfskins and lambskins continue on the same level as last week.

LEATHER.—There is little in the way of news in this line. The demand from manufacturers of footwear is yet moderate, but the English market continues to absorb steady shipments of sole, with some fair lots of black leathers. The strong advance in the hide market this week helps holders and the market is a strong one. Hyman's slaughter sole is quoted at 28c. in lots, and Breithaupt's figures are half a cent firmer. We quote: Spanish sole, B.A., No. 1, 24 to 25c.; do., No. 2, 22½ to 23½c.; No. 1 ordinary Spanish, 23 to 24c.; No. 2, 20 to 21c.; No. 1. slaughter, 26 to 28c.; No. 2, do., 24 to 25c.; common, 20 to 21c.; waxed upper, light and medium, 30 to 35c; do., heavy, 27 to 30c.; grained, 32 to 35c.; Scotch grained, 30 to 35c.; Western splits, 22 to 25c.; Quebec do., 18 to 20c.; juniors, 18 to 20c.; calf-splits, 30 to 35c.; calfskins, (35 to 40 lbs.), 60 to 65c.; imitation French calfskins, 65 to 75c.; colored calf, American, 25 to 28c.; Canadian, 20 to 24c.; colored pebble cow, 13 to 15c.; russet sheepskins linings, 30 to 40c.; colored 6 to 7½c.; harness, 24 to 27c.; buffed cow, 13 to 15c.; extra heavy buff, 15c.; pebble cow, 13 to 13½c.; polished buff, 12 to 13c.; glove-grain, 12 to 13c.; rough, 22 to 23c.; russet and bridle, 35 to 45c.

METALS, ETC.—No particularly interesting news is to be picked up in these lines of trade at the moment. We hear of a few car-lot transactions in Hamilton iron, at about $15.50 for No. 1, but in Summerlee, Carnbroe, or other British brands we do not hear of a recent transaction. From Glasgow warrants are cabled easier than a week or so ago at 46s. 1d. In the general run of heavy metals trading there is little new; last cables show the firmness in lead to be well maintained. An English letter just to hand speaks in a rather discouraging strain with regard to the strike in Wales, which is reported spreading if anything, and practically, all the important plate works in South Wales are said to be closed down, creating a good deal of uncertainty as to prices. We quote: Summerlee pig iron, $17.50 to $18; Carron, No. 1, $18; No. 3, $17.25; Ayresome, No. 1, $17.50; No. 3, $16.50; Shotts, $17.25 to $17.50; Carnbroe, $16, ex-store; Feronna, No. 1, $15; Hamilton, No. 1, $15 to $15.50; No. 2, ditto, $14 to $14.50; machinery scrap, $14 to $15; common ditto, $12 to $13; bar iron, Canadian, $1.40 to $1.50; British, $2 to $2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.10 to $2.15; 52 sheets to box; 60 sheets, $2.25; 75 sheets, $2.35; all polished Canadas, $2.40; Terne roofing plate, 20 x 28, $5.75 to $5.90; Black sheet iron, No. 28, $2.25; No. 26, $2.15; No. 24, $2.05; No. 17, $2; No. 16 and heavier, $2.15; tin plates—Bradley charcoal, $5.60 to $5.70; charcoal, I.C., Alloway, $3.15 to $3.25; do., I.X., $3.90 to $4; P.D., Crown, I.C., $3.60 to $3.75; do., I.X., $450; Coke, I.C., $2.90 to 2.95; do., standard, $2.75 to $2.80 for 100 lbs.; coke, wasters, $2.70; galvanized sheets, No. 28, ordinary brands, $4; No. 26, $3.75; No. 24, $3.50 in case lots; Morewood, $5 to $5.10; tinned sheets, coke, No. 24, 5½c.; No. 26, etc., the usual extra for large sizes. Canadian bands, per 100 lbs., $1.65 to $1.75; English hoops, $2 to $2.15. Steel boiler plate, ¼-inch and upwards, $1.85 to $1.90 for Dalzell, and equal: do., three-sixteenths inch, $2.50; tank iron, ¼-inch, $1.50; three-sixteenths do., $2; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to $2.50; Russian sheet iron, 9c.; lead, per 100 lbs., $3.85 to $3.90; sheet, $4 to $4.25; shot, $6 to $6.50; best cast-steel, 8 to 10c.; toe calk, $2.25; spring, $2.50; sleigh shoe, $1.85; tire, $1.90; round machinery steel, $2.25; ingot tin, 16½ to 17c. for L. & F.; Straits, 16¼ to 16½c.; bar tin, 17c.; ingot copper, 13 to 13½c.; sheet zinc, $5 to $5.25; Silesian spelter, $4.75; Veille Montagne spelter, $4.75 to $5; American spelter, $4.50; antimony, 9½ to 10c.

OILS, PAINTS AND GLASS.—While business this month shows some falling off in volume from May, the demand is still good for the season. As regards values the only change to be noted is a further decline of a cent per gallon in turpentine, the quotation for single barrels having been made 46c. on Monday. We quote: Turpentine, one to four barrels, 46c.; five to nine barrels, 45c.; net thirty days. Linseed oil, raw, one to four barrels, 49c.; five to nine barrels, 48c.; boiled, one to four barrels, 52c.; five to nine barrels, 51c., net 30 days; olive oil, machinery, 90c.; Nfld. cod, 37 to 40c. per gal.; Gaspe oil, 33 to 35c. per gal.; steam refined seal, 45 to 47½c. per gal. in small lots. Castor oil, 9 to 9½c. as to quantity. Leads (chemically pure and first-class brands only), $5.62½; No. 1, $5.25; No. 2, $4.92½; No. 3, $4.50; No. 4, $4.12½; dry white lead 5c.; genuine red do., 4¼c. to 4½c.; No. 1 red lead, 4c. to 4¼c.; Putty in bulk, bbls., $1.65; kegs, $1.80; bladder putty, in bbls., $1.80; smaller quantities, $1.95; 25 lb. tins, $2.05; 12½ lb. tins, $2.30. London washed whiting, 40 to 45c.; Paris white, 85 to 90c; Venetian red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2. Paris green, 50 and 100 lbs., drums 17c.; 25 lb. drums, 17½c.; 1 lb. cartoons, 18c.; pound tins, 18½c.; window glass, $1.40 per 50 feet for first break; $1.50 for second break; third break, $3.10.

WOOL.—Some moderate business is reported in imported wool, mainly Capes at 14½ to 16½c. per lb., though we also hear of one or two sales of extra fine lots at 17c. The market is very firm, with B. A. scoured quoted at 27 to 35c., and Natals, 17 to 18½c. No Australian here.

ALBANY, January 6th, 1898.

Certificate of Superintendent, State of New York Insurance Department.

I, LOUIS F. PAYN, Superintendent of Insurance of the State of New York, do hereby certify that the **New York Life Insurance Company,** of the City of New York, in the State of New York, is duly authorized to transact the business of Life Insurance in this State.

I FURTHER CERTIFY that in accordance with the provisions of Section Eighty-four of the Insurance Law of the State of New York, I have caused the policy obligations of the said company, outstanding on the 31st day of December, 1897, to be valued as per the Combined Experience Table of Mortality, at **four per cent. interest,** and I certify the result to be as follows:

Total Net Reserve Value—**$164,956,079.**

I FURTHER CERTIFY that the admitted Assets are—**$200,694,440.**

The general Liabilities **$2,366,330.** The Net Policy Reserve as calculated by this Department—**$164,956,079.** The Surplus Reserve Fund voluntarily set aside by this Company, which, added to the Department Policy Valuation, provides a liability equivalent to a **three per cent. reserve on all policies, $16,195,926.** The net Surplus, excluding Surplus Reserved Fund, is shown to be **$17,176,105.**

IN WITNESS WHEREOF, I have hereunto subscribed my name, and caused my official seal to be affixed at the City of Albany, the day and year first above written.

LOUIS F. PAYN, Superintendent of Insurance.

Valuation on the same basis as last year would show surplus of $33,372,031.40, an increase for year 1897 of $6,690,034.42.

The Company is prepared to treat with gentlemen of influence for appointments as District Representatives, Some valuable positions now vacant will be conferred on suitable applicants. For particulars apply to any of the following Branch Offices: **Western Canada Branch, 496 Main St., Winnipeg, Man.,** J. G. Morgan, Manager. **Toronto Branch, 20 King St. East, Toronto, Ont.,** R. J. Kearns, Agency Director. **New Brunswick Branch, 120 Prince William St., St. John, N.B.,** H. A. Austin, Manager. **Halifax Branch, Cor. Barrington and Prince Sts., Halifax, N.S.,** W. C. Somers, Cashier.

HEAD OFFICE:
Queen City Chambers, Church St., Toronto.
DIRECTORS:
JAS. GOLDIE, Pres. J. L. SPINK, Vice-Pres.
Thos. Walmsley, Treas. Hugh Scott, Mgr. and Sec.
Adam Austin, Inspector.

This Company was organized in 1885, specially for the purpose of insuring manufacturing industries, warehouses and contents.

The primary object being to give protection against loss by fire at a minimum cost consistent with absolute security.

The system adopted has been to inspect all risk before acceptance and fix the rate to be exacted equitably in accordance with the hazard assumed.

Assurers with this company have made a saving, upwards of $108,000.00 on the current rates charged, in addition to which, on the rates exacted by us, dividends have been declared to policy-holders amounting to over $24,000.00, together, making the very substantial sum of over $132,000.00 that our policy-holders have saved during the eleven years we have been in operation.

As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please address

Millers' and Manufacturers' Insurance Co.,
32 Church Street, Toronto, Ont.

The DOMINION Life
ASSURANCE COMPANY
HEAD OFFICE, ... WATERLOO, ONT

Authorized Capital.................$1,000,000
Gov't Deposit at Ottawa 50,000
Subscribed Capital................ 257,600
Paid-up Capital 64,400

The Dominion Life has made handsome gains in very essential feature during 1897.

It has gained in number of lives assured, 8.2 per cent.; in cash premiums, 8.5 per cent.; in number of policies, 8.6 per cent.; in amount assured, 10.5 per cent.; in interest receipts, 16.5 per cent.; in assets, 19.0 per cent.; in surplus over all liabilities, 42.2 per cent.

No Company anywhere is safer, sounder, more equitable or more favorable to the assured in all its arrangements than the Dominion Life. Call on its agent when thinking of putting on more life assurance.

James Innes, M.P., Pres. Chr. Kumpf, Esq., Vice-Pres
Thos. Hilliard, Managing Director

Extended Insurance

IS granted by the Unconditional Accumulative Policy of the Confederation Life Ass'n. Under this provision the full amount of the policy is, in the event of the non-payment of the third or any subsequent premium, extended as a term insurance, and the policyholder is held fully covered for the full face value of the policy for a term of years definitely stated therein.

Paid-up and Cash Values are also guaranteed.

Rates and full information sent on application to the Head Office, Toronto, or to any of the Association's Agents.

THE THREE GRACES.

A young woman employed in a big department store in New York was engaged to be married (she is yet) to a young man in the same store. For months the young couple had been buying odds and ends of furniture and house fixings against the happy day and stowing them in an unoccupied room in the house in which the young woman boarded. It was represented to her that if the things " went up," she would be that much out of pocket, and was advised to get them insured. Being a woman of sense, she did so. Exactly one week after receiving the policy the boarding-house was burned. The adjuster told her she was a sensible girl and reported a total loss. She has had "her money back." THAT'S FIRE INSURANCE.

A young and vigorous blacksmith applied for $1,000 to a life company and got it, the medical examiner rating him as an extra good risk. He paid a quarterly premium of $8 05 to the agent upon making the application, and within fourteen days thereafter was dead from pneumonia contracted in setting wagon tires. The full amount of the policy, less the balance of premium unpaid, was paid to his widow. THAT'S LIFE INSURANCE.

The two-year-old child of a business man was taken suddenly ill in the night (the time when two-year-old children always do take ill). With all of a parent's anxiety and solicitation, the father, softly calling it by name the while, sprang out of bed to light the gas, his shin coming violently in contact with the sharp end of the rocker of a rocking chair as he did so. The injury was a severe one, and may have not been properly attended to. Anyway, gangrene set in, amputation followed, and death resulted. The full amount of this business man's accident policy was paid to his widow. THAT'S ACCIDENT INSURANCE.—Insurance Press.

THE IMPORTANCE OF ACCOUNTING.

A proper system of books, coupled with intelligence and integrity of management, will to a large extent guide any enterprise past shoals and hidden dangers. To my mind every business enterprise of magnitude and prominence should employ a skilled accountant, whose sole province should be to establish and maintain a system of bookkeeping that cannot be manipulated, and that will at all times give to the managers a true and correct showing of the condition of the business. So says James G. Cannon, President of the National Association of Credit Men, before the New York State Society of Certified Public Accountants. He adds: I assign to accountancy still another mission. I believe the day will come when every city, county, town and school district in this State, and in fact, throughout the whole United States, will be compelled by law to have its books examined annually by competent public accountants, and to have its statements bearing the verification of such an expert published as a matter of public record. It seems to me that large sums could be saved annually by such a system of accounting.

THE OLDEST NEWSPAPER.

The oldest newspaper in the world is the Tsing-Pao or Peking News, founded in the year 710 A.D. Until quite recently it was supposed that the Kin-Pan, a Chinese journal published in Peking for the last thousand years, was the oldest newspaper in the world. In a very able work recently published, however, Imbault Huart, the French Consul at Canton, shows that this high honor belongs to the Tsing-Pao, which has been published continuously since the year 710, and is even said to have been founded some two hundred years before that date, or early in the sixth century, eight hundred years before a newspaper was known in Europe. —Keystone (Phila.).

THE CAPTAIN WHO LOSES A SHIP.

It is the custom with some shipowners never to give a new berth to a shipmaster who has lost a ship. It seems cold-blooded, but the rule is based on reason, as it is claimed that a shipmaster who has lost a vessel is liable to have his nerve affected ever after, and if such is the case he is unfit to exercise the promptness and decision required in moments of emergency. But it is indeed remarkable how luck, or fate, or chance, plays with the careers even of tried and experienced seamen.

Some years ago Capt. Jefferson Maury—who had grown gray in the service of the Pacific Mail Steamship Company, and who was the commodore of their fleet—lost his fine steamer, the " City of Tokio," when entering the harbor of Yokohama. He had sailed across the Pacific seas for a third of a century without an accident. He was making his last voyage preparatory to an honorable retirement. Yet on that last voyage he lost his ship.

Not long after, Capt. Dearborn, another Pacific Mail commander, was taking his ship, the " Peking," into the same harbor. She was under half speed and in charge of a pilot, the captain being on the bridge. Bearing down upon them was a Chinese junk, and near at hand lay the "Saghalien,' a large Messageries Maritimes steamship. As the junk approached, the Chinese crew, with their awkward seamanship, got into such a position that it was impossible to clear her. The " Peking' would not answer her helm quickly, being under half speed. The pilot was evidently about to run down the junk, but Capt. Dearborn, a most kind-hearted man, resumed charge of the ship, took her away from the pilot and attempted to clear the junk. As a result he ran his steamer into the "Saghalien," which was at anchor, knocked an enormous hole in her hull, and with tugs she was beached in a sinking condition. She was loaded with tea and silks, having a cargo worth over a million dollars, and the Pacific Mail Steamship Co., without a murmur, paid a bill of several hundred thousands of dollars to the Messageries Maritimes Co., and said nothing about it. Capt. Dearborn, having endangered his own steamer —which, with her cargo, was probably worth a million and a half—and another steamer of greater value, was relieved from his command by the Pacific Mail Steamship Co., and never got another ship It broke his heart and he died not long afterward.—San Francisco Argonaut.

DOMINION COAL COMPANY.

The report of the directors of the Dominion Coal Company, Limited, for the year ending February 28th, 1898, was issued last Friday, over the signature of Henry M. Whitney, president. It states that the output for 1897 of the company's mines in Cape Breton was 1,221,471 tons, which is larger by 51 686 tons than for the previous year. All the construction work has been charged to operating expenses and depreciation account. Since the close of the fiscal year, under the operation of the sinking fund, $53,000 of the bonds of the company have been purchased and cancelled, reducing the bonded indebtedness to the sum of $2,935,000. There still remains in the hands of The New England Trust Company the sum of $125,000, as a special deposit under the terms of the deed of trust. The company expects to begin the delivery of coal on its contract with the New England Gas and Coke Company by 1st of January. Requirements under the contract, if the works are run to their full capacity, will call for an increase in 1899 of about seventy-five per cent. of the present output of the company.

The common stock of the Dominion Coal Company is $15,000,000; the preferred stock $2,000,000, and on this 8 per cent. has been paid; the first mortgage bonds amount to $2,988,000, reduced from $3,000,000 by payment on sinking fund account. There are other liabilities of $600,000, besides a railway suspense account of $125,000. Assets consist of the property accounts amounting to $20,168,274; cash on hand or in banks, $46 341; cash in N.E. Trust Co.'s hands, $215,558, of which the bulk ($125.000) is sinking fund; supplies, $122,826. The total assets are $20,892,636, and the general surplus is $175,029. Net proceeds of the 1,221,471 tons coal raised, and net income from steamships, railways, barges, real estate, etc., amounted in all to $540,853, from which deduct interest on bonds, $179,280; other interest, paid and accrued, $27,576; and sinking fund, $54,680, and there remains $279,316. Paying out of this $160,000 dividend on preferred stock the balance is $119,316. From this sum is charged off $79,547 additions and improvements to the property, so that there is still $39,768 to carry to the general surplus. J. S. McLennan, treasurer, signs the statement.

A CANADIAN POLAR EXPEDITION.

The Royal Society of Canada, at its recent meeting at Ottawa, adopted resolutions indorsing the projected North Pole expedition of Captain J. Elsear Bernier, of Quebec. Steps are in progress to make the preliminary arrangements for the trip. It is proposed to raise $50,000 to cover the total cost of the expedition The Dominion and Provincial Governments, it is expected, will contribute $34,000, leaving a balance of $16,000 to be raised by private subscription among a large circle of admirers of the adventurous captain.

—A neighbor was trying to console a farmer whose son had enlisted. " Don't be worried," he said; " it's my opinion that boy'll be heard from!" " He's been heard from," was the disconsolate reply. " He's just drawed on me for $50."

—A man in Muskoka, who had some horses to sell, wrote to a friend in Ottawa, asking if they could be sold in that city. The friend replied: " The people of Ottawa ride bicycles, the wagons are pulled by mules, the street cars are run by electricity and the government is run by jackasses, so there is no demand for horses here."

—Four vagrants, headed for Chicago, boarded an Illinois Central train at Kankakee recently, and took passage in a refrigerator car, where they were locked in. When the train arrived in Chicago, a day later, the men were found badly chilled and unable to move.

—A special from Vancouver to the Montreal Star of June 1st says that the recent objections made by the Spanish Government to large quantities of British Columbia coal being sold to the United States Government has at last caused the Ottawa authorities to take action. They have sent special instructions to Nanaimo, where most of the coal comes from. The collector at that port, if he has any suspicion that cargoes are being sold directly to the United States, must wire Ottawa and hold the cargoes until he receives a reply. An Ottawa despatch states that supplies and coal in reasonable quantities may be taken on by vessels of each nation for immediate use.

—Respecting the three battleships authorized by the American naval appropriation bill recently passed, whereby provision is made for four coast defence monitors, sixteen torpedo boats, twelve torpedo boat destroyers and a gunboat to replace the U.S. S. " Michigan " on the great lakes. The limit of cost placed on the battleships is $3,000,000 each, exclusive of the expenditure necessary for armour and armament. Proposals have been invited under two classes, the first on the departmental plans and specifications, and the second upon designs to be furnished by the bidders, which must, however, fully cover certain limitations laid down by the board of construction. The new vessels will be in detail almost identical with the "Illinois," " Wisconsin " and " Alabama," now building at Newport News, San Francisco and Philadelphia respectively. The specifications provide for vessels of 11,500 tons displacement, with coal capacity of 1,200 tons, on a mean draught of 23 feet, a length of 368 feet, and 72 feet beam. The hull will be steel, with double bottoms. Speed 16 knots, double screw.

—On Thursday evening the house was in supply. Mr. Osler protested against the vote of $650,000 on construction account for the Trent Valley Canal, which he described as a six-foot ditch which would never pay the wages of the men who operate it. He hoped that the government would cease sinking money in that useless work. Mr. Bennett protested against Mr. Osler's hostility and asked the minister what the proposed expenditure was for. Mr. Blair stated that $300,000 of the amount was required to complete the work already under contract, and the remainder would be employed to construct a hydraulic lift lock on the model of some locks in Belgium which would cost no more to build and would be cheaper to operate than the other locks. This work is on the Peterboro and Lakefield division.

DECISIONS IN COMMERCIAL LAW.

McBRIDE v. HAMILTON PROVIDENT AND LOAN SOCIETY, ET AL.—This was an appeal by the company from judgment in favor of plaintiff upon the findings of the jury for the wrongful seizure of plaintiff's goods under color of distress. The company were mortgagees of a property, and by their warrant authorized a bailiff to distrain the goods of the mortgagor for arrears due under the mortgage. The mortgagor had been dead for some years, and the company, not knowing this, seized the goods of a stranger, the plaintiff. It was held that the bailiff was acting within the scope of his authority and the mortgagees were liable for his act. The court also held that there was evidence upon which the jury might properly find that a local appraiser of the mortgagees was their agent for the purpose, and interfered in and directed the seizure, after being informed that the goods were not those of the deceased mortgagor.

TEMPLE v ATTORNEY-GENERAL FOR NOVA SCOTIA.—By statute, a lessee of mining areas in Nova Scotia was obliged to perform a certain amount of work thereon each year on pain of forfeiture of his lease, which, however, could only be effected through certain formalities. By an amendment in 1889 the lessee is permitted to pay in advance an annual rental in lieu of work, and by s s. (c) the owner of any leased area may, by duplicate agreement in writing with the commissioner of mines, avail himself of the provisions for such annual payment and "such advance payments shall be construed to commence from the nearest recurring anniversary of the date of the lease." By s. 7 all leases were to contain the provisions of the Act respecting payment of rental, and its refund in certain cases, and s. 7 was to come into force in two months after the passing of the Act. Before the Act of 1889 was passed, a lease was issued to E., dated 10th June, 1889, for twenty years from 21st May, 1889. On 1st of June a rental agreement under the amending Act was executed, under which E. paid the rent for his mining areas for three years, the last payment being made in May, 1893. On 22nd May, 1894, the commissioner declared the lease forfeited for non-payment of rent for the following year, and issued a prospecting license to T for the same areas. E. tendered the year's rent on 29th June, 1894, and an action was afterwards brought by the Attorney-General, a relative of E., to set aside the license as having been illegally and improvidentially granted. Held by the Supreme Court of Canada affirming the judgment of the Supreme Court of Nova Scotia in such action, that the phrase, "nearest recurring anniversary of the date of the lease," in the Act of 1889, is equivalent to "next or next ensuing anniversary," and the lease being dated on 10th June, no rent for 1894 was due on 22nd May of that year, at which date the lease was declared forfeited, and E.'s tender on the 9th June was in time. Held further, that, though the amending Act provided for forfeiture, without prior formalities of a lease, in case of non-payment of rent, such provision did not apply to leases existing when the Act was passed in cases where the holders executed the agreement to pay rent thereunder in lieu of work. The forfeiture of E.'s lease was, therefore, void for want of the formalities prescribed by the original Act.

—In the will of the late George Russell, the sculptor, of Aberdeen, Scotland, there was a codicil bequeathing $75,000 for the benefit of policemen and scavengers.

Summer Dress

For business the sack suit keeps well in front and in favor. It suits old men and young men and is always presentable. Of course there is much in the designing and finishing, and one always finds from season to season variation enough in cut to make one feel there is change of style. Some drapers have the happy knack of introducing their own individuality in the designing. This you will find in garments made by HENRY A. TAYLOR, Rossin House Block, and this week he is showing some specially designed business sack suits. His stock of summer weight woolens is very superior.

Mercantile Summary.

In pursuance of the movement towards improved roads in the Province of Quebec, Magog has purchased a steam stone-crusher, and a Huntingdon man came over to Magog to help start it. The test was satisfactory.

An automatic sprinkler is being put into the Granby cigar factory. This town of Granby must be a live place, for we observe that it is to have a series of cricket matches with adjoining towns, also that it is to have the first provincial meet of the Canadian Wheelman's Association on the 1st and 2nd of July.

Among the expense borne by railway companies the ice bill figures quite prominently. On the Baltimore and Ohio road it is expected it will take over 50,000 tons of ice this year to meet the requirements of the service. The greater portion is used in connection with shipment of perishable goods, and the balance in the passenger train service.

Oxener & Duff, large general dealers at Bridgewater, N S., are asking indulgence from creditors. In January last year they became embarrassed and obtained twelve months' extension of liabilities of some $30,000. They obtained a further extension on the last quarterly payment when it became due, and now they ask creditors to accept 50 cents on the dollar of said payment.

In the appropriations of Government during the session just closed is an item of $7,000 for a marine biological station in the Gulf of St. Lawrence. There is also $180,000 for a new steamer to take the place of the "Stanley" between Prince Edward Island and the mainland of Nova Scotia. This vessel will be one-fourth larger than the "Stanley," and will be ready by December. This is the vessel for the winter service, and has to be specially built in order to contend with the ice.

A recent traveler over the Intercolonial Railway from Montreal to Halifax is loud in praise of the improvement of this route to the Maritime Provinces or the Lower St. Lawrence. He speaks of the excellent dining cars, the courtesy of attendants, and the speed and regularity with which the trains are now run. It is no little satisfaction to persons who may take occasion to use this route to the salt water in summer holidays to learn that they are sure of punctuality in arrival as well as comfort en route.

Upon the demand of the People's Bank of Halifax a curator has been appointed to the estate of Pelletier & Fils, general dealers, Fraserville, Que. The general liabilities are $3,200, but there are several thousand dollars of secured, or partially secured, indebtedness, and indirect liabilities to the amount of some $20,000, it is said. The business is an old established one, but has shown signs of retrogression for several years past, and in 1896 Mr. Pelletier made a heavy loss by the failure of a brother. J. T. S. Pelletier is now an absentee.

A bill is pending in the United States Congress, having been already reported out by the House committee on commerce, providing for a subsidy of $100,000 per year, for twenty years, to be paid to the company which shall lay a cable between the United States and Hawaii, and from there on to China and Japan, with a cable station at the midway point. The bill mentions the Pacific Cable Company, which now has cables in operation between the United States and Mexican points, and along the South American coast, as the ntended beneficiary.

Mercantile Summary.

The city debt of Boston has increased $14,500,136 in two and a third years, and now amounts to $80,166,910.

The director of the Ontario Bureau of Mines, Mr. Archibald Blue, went on Monday last to Thamesville to investigate an oil well which is said to produce 1,000 gallons per day.

The first issue of United States war bonds is intended as a popular loan. Two hundred millions will be offered, interest 3 per cent., and it is expected that the public instead of the banks will take them.

It is stated that under the authority of an Act of the New York legislature that State will establish a college of forestry. A conference has been held at Albany to decide upon the location of 30,000 acres of land to be purchased for the purpose, but the land is not yet bought

The failure of McMillan & Haynes, manufacturers of saws at St. Catharines, was announced on Tuesday last and caused much comment. An assignment has been made of the firm's affairs to Mr. J. M. Wallace, of St. Catharines, and a meeting of the creditors has been called for June 20th.

A bonus of $12,000 has been voted by the town of Waterloo as its share towards the $40,000 asked from Waterloo and Berlin by the Galt and Preston Electric Street Railway. The majority was 134. Total vote polled was 354. Berlin is expected to carry its by-law for the balance, $28,000.

It is stated by the Victoria Times that Mr. A. B. Erskine, having accepted the position of manager for Vancouver for the Ames-Holden Company, retires from active participation in his Victoria business. The Victoria Boot Company, recently organized, with a capital of $50,000, is to take over the Erskine business and also the footwear department of Messrs. Gilmore & McCandless. Mr. James Paterson is managing director of the new company.

It has been arranged, we are told, between the Ontario Government and the lessee of the binder twine plant at the Central Prison that the plant be added to at the lessee's expense, sufficiently to establish a rope walk, and rope will in future be made almost exclusively. The reason is the reduction in price of binder twine the American article now coming in at such low prices that the Canadian market is flooded.

The St. John Globe states that Mr. W. A. Anderson, lumberman and ice dealer, is in financial difficulties owing to the hanging up of his cut of about 2,000,000 of logs on the Oromocto River. He is offering to compromise at 35 per cent.——A St John grocer named W G. J. Cosman, has assigned.

ONLY WHOLESALE TRADE SUPPLIED

Mercantile Summary.

A SHERBROOKE man has been awarded the contract to supply the city of Quebec with 200 carloads of granite blocks, to be quarried at St. Cecile.

A WELL-KNOWN man in Cumberland county, N.S., and one of the pioneers in the coal development of that province, was R. B. Boggs, who died at Springhill on Friday last.

WHAT is described as the first flour shipment by schooner from St. John to the West Indies went last week to Barbadoes. A schooner took 150 barrels as part cargo.

MR. JAMES DREW, of Alfred street, London, has been appointed manager of the branch of the Gurney stove works, to be established in Winnipeg. Mr. Drew has long been on the road for the firm and is generally liked.

SOME contracts obtained by the Londonderry Iron Works Co. this month will give employment to a good number of their former hands. The machine shop is running regularly, and the foundry and pipe shop are also starting in on a good summer's work.

THE Toronto Board of Trade thinks Canadian canals should not be closed for the whole of Sunday. The Government is requested to return to the practice of closing down at six o'clock Sunday morning and opening up again at nine o'clock Sunday evening.

IT is stated that on D. Campbell's property at Sooke, Vancouver Island, there has been found a deposit of exceptionally good terra cotta clay, extending over a large part of 200 acres. This may some day prove valuable, when in connection with large ornate brick business premises in far-west Canada there arises a demand for ornamental terra cotta work. But as the Mining Critic says, it would not pay to work it now.

IT is pleasing to hear of an addition to the premises of the Ontario Malleable Iron Co. at Oshawa. Construction is begun of a building 150 feet long by 200 feet in width, to be used as annealing and moulding rooms. The extension is of brick with an eight foot stone foundation, The Vindicator is proud, as it may well be, that "instead of a pile of ruins, as was the case three years ago, it is a perfect hive of industry capable of vast possibilities, and under the control of gentlemen who have the energy and push to make it what it ought to be."

TENDERS for $36,000 common school debentures were received by a committee of the St. Thomas council on Monday night last. The tenders were: R. Wilson Smith, Montreal, 94.25 per cent., or $33,930; Æmilius Jarvis & Co., Toronto, 94.612 per cent., or $34,060.42; H. O'Hara, Toronto, 94.861 per cent., or $34,151. The treasurer suggested that none of the offers be accepted. Accordingly the matter was left in the hands of the mayor, chairman of committee, and the city treasurer to deal with. The debentures bear 3½ per cent.

ONTARIO letters patent incorporate Fred. T. Burgess, Fred. A. N. Powell, and H. W. Burgess, chemists, Mrs. Burgess and Charles Wellsman, as the Burgess-Powell Company of Toronto, limited, to make proprietary chemical preparations and to buy and sell surgical apparatus, etc, Also the Lyon Manufacturing Co. of Toronto, limited, to make, buy and sell novelties, etc. Capital stock, $10,000. The parties are George Anderson, Charles Theodore Lyon, James A. Meldrum, Francis G. Anderson, Frederick H. B. Lyon, and Frederick George Anderson, barrister, and they buy out the business of the Messrs. Lyon named above.

M. C. DICKSON, D.P.A., Toronto

Mercantile Summary.

At Port Elgin, M. L. McKinnon, of Tiverton, has bought the stock and goodwill of the furniture business of Mr. Wm. White; he rents the shop and dwelling from Mr. White for a term of years also.

Rat Portage waterworks are proceeding apace. Eighty men were employed on them last week. Two or three steam drills have been used on them. Over 4,000 feet of excavation has already been done and about 600 feet of pipe laid.

The Winnipeg Securities and Agencies Company has been incorporated under the laws of the Province with a capital stock of $50,000. The first directors are W. J. H. Murison, D. S. Curry, Colin Inkster, George Soames and J. Stanley Hough.

On Tuesday last, tenders for $147,000 of 4 per cent. forty-year city water bonds were opened in St. John. Among the tenders were R. Wilson Smith, Montreal, 1.03¼ per cent. and accrued interest; George A. Stimson & Co., Toronto, $154,601 and accrued interest; Andrew T. Drummond, Kingston; H. O'Hara & Co., Toronto, of 1.052 per cent.; Æmelius Jarvis & Co., Toronto, $150,351.60 and accrued interest, or 1.0228 per cent. The Bank of New Brunswick's offer of $158,030 and accrued interest was accepted.

The city of St. John is offering for sale four per cent. municipal bonds to the extent of $147,000.

Mr. Fowke, the mayor of Oshawa, and Mr. T. H. Everson have formed a joint stock company, to be known as the Oshawa Grain and Produce Company, capital of $25,000, to buy and sell grain, seeds, and farm produce, and to do warehousing and storeage. They will build an elevator.

A Winnipeg despatch says that the Farms Elevator Company, of Brandon, is in difficulties. It appears that one of the officials speculated in Chicago wheat and lost some $10,000. As a result many of the farmers who sold large quantities of wheat at the recent high prices have not yet received their money.

At Bracebridge, on Friday last, creditors of Alfred Hunt, private banker of that town, met to hear a statement made by Sheriff Bettes, of the financial position of Mr. Hunt. The liabilities are estimated at $54,000, and the assets "nominally," at $73,000, but the shrinkage in values will probably be heavy, especially on a lot of Toronto property. Sheriff Bettes was retained as assignee, and J. Pratt, H. J. Bird and W. H. Spencer were elected inspectors.

A man prominent in steam and sail forwarding on the great lakes, and long connected with the lake freighting lines of the Erie and the New York Central companies, Mr. S. D. Caldwell, died in Buffalo last week. His administrative capacity was great, and his energy remarkable. He was the first president of the old Lake Carriers' Association, whose consolidation with the Cleveland Vessel Owners' Association later resulted in the present Lake Carriers' Association

An application to appoint Mr. Hunter Cooper liquidator of the Commercial Bank of Manitoba, has been disposed of by Justice Bain, by consent. An order is made directing Mr. Hespeler to remain as managing liquidator of the estate; Mr. Cooper being appointed joint liquidator for his assistance. The economics recently proposed by Mr. Hespeler were maintained by Mr. Cooper's remuneration being fixed at $1,200 instead of $1,900 as heretofore, and Mr. Hespeler taking $1,000 instead of $1,200.

The sawmill owners on the Ottawa River are to have another year of grace. That is to say, the law compelling them to burn their sawdust and other refuse, or at least to prevent them dumping it into that noble stream, will not not be put in force just yet. A bill to extend the time until May 1, 1899, was introduced into the House last Monday by Sir Louis Davies. It appears that experiments are being made as to the conversion of sawdust into an article of commerce, and until these are completed the Government does not wish to be too hard on the sawmillers.

We have received from Montreal, Brockville, Hamilton and elsewhere letters commenting in terms of approval on our remarks recently concerning the Act recently passed by the legislature of Prince Edward Island dealing with the relations of creditor and debtor, and requiring the licensing of commercial travellers by that province. We now observe that the Dominion Commercial Travellers' Association has brought the matter to the attention of the Department of Justice at Ottawa, making request that the objectionable Act be disallowed. The Commercial Travellers' Association here, and also, we are told, the Halifax body of like character, will join in protesting against this unbusinesslike measure.

Why is the GENDRON the Best Wheel on Earth?

BECAUSE

It has good common-sense up-to-date talking points.
It has new, distinct and attractive features.
It is unexcelled in beauty, style and finish.
It has the best in material and workmanship.
It is the most perfect in its lines and bearings.
It is the easiest and smoothest running wheel in the world.

Gendron Bicycle

It has no discarded experiments.
It does not cause ridicule by having about it abandoned devices.
For utility, speed, safety and comfort the Gendron Bicycle is pre-eminent.
The capacity, long experience and methods of the manufacturers insure a product of the highest standard.
It is fitted with the fast, lively and durable Buckeye Tire that can be easily repaired if punctured and is fully guaranteed.
Secure the delightful feeling of confidence and safety by using the celebrated Waters Brake.

The GENDRON MFG. CO., Limited

JOSEPH GILLOTT'S
Of Highest Quality, and Having
Greatest Durability are Therefore
CHEAPEST.
PENS

THE firm of F. Carmichael & Co. has been in the grocery business at Tottenham about a year. It is said that the business did not receive proper attention from them; at any rate they have not been successful and have just assigned.

WE are informed that the executors of the estate of the late John Ferguson have retired from the firm of Ferguson & Pattinson, woolen manufacturers at Preston, Ont. The business will be continued under the name, style and firm of Geo. Pattinson & Co.

AN extension is being asked by E. W. Gosline, a shingle mill owner at Andover, N.B. He was formerly a harness maker, which trade he gave up about a year ago to buy a shingle mill, which was unfortunately burned a couple of weeks ago, and he is reported to be without insurance.

THE principal item of mercantile interest that we hear of this week in Toronto is that the MacWillie Bros., Limited, which was organized into a joint stock company less than a year ago have sold their grocery business to the Robert Simpson Co., Limited, and the stock is being moved across the street.

WE hear of the dissolution of the private banking firm of Mulholland & Roper at Peterboro. The business is to be closed up, and depositors are requested to present their savings bank pass-books and deposit receipts for payment. Mr. Mulholland, who is a public spirited man and popular in Peterboro, is said to intend residing in Toronto.

IN Quebec, on Monday last, 192 shares of the Banque Nationale (par value $30) were sold at auction, 112 at $29.25, and two lots of 30 and 50 shares respectively at $29.50

A HOTEL-KEEPER at Ottawa, Freeman I. Daniels, until recently of the firm of Secord & Freeman, is reported in difficulty, and a meeting of his creditors is called.——Milne & Milne, a laundry firm at Kingston, composed of father and son, have assigned, with small liabilities, mostly local.

MR. R. WILSON SMITH, of Montreal, has formed a partnership for stock exchange business purposes with Mr. G. H. Meldrum, who has been for years connected with the Canadian Bank of Commerce, but who is now leaving the service of the bank. The style of the new firm of stockbrokers will be R. Wilson-Smith, Meldrum & Co.

THE Master-in Ordinary at Osgoode Hall, Toronto, issued an order on Monday last, obliging the liquidators of the insolvent Farmers' Loan Company to produce particulars regarding their claims in the attempt to make the directors liable for the defalcations of Pinkney and Scott, the cashiers, and also to make them responsible for the dividends paid out of the capital.

SALE was made of the bankrupt stock of H. Dufour & Co., of Malbaie, by public auction, in Quebec city, on the 6th. The stock, valued at $1,233, was purchased by Alfred Laroche for 67 cents in the dollar; the book debts, amounting to $2,204, were sold for 25 cents to K. A. Mailloux, and the bons for $1,980, were purchased by Charles Angers for 87 cents in the dollar.

THE assignment is reported of T. R. Jolly & Co., dry goods merchants, Yarmouth, N.S. The business is quite an old established one, but trade seems to have been dropping off for several years past, several old clerks, who have established themselves in business, apparently taking a good deal of the old connection. The liabilities foot up some $25,000, it is said, the Bank of Yarmouth being interested for quite a large amount, partially secured; the stock and book debts are estimated at about $20,000, and the real estate is reported to be fully mortgaged.

SIX years ago or thereabout Jos. Mills opened a hat and cap store in Peterboro, but not succeeding he was obliged to assign in December, 1896, with liabilities of $2,500. The creditors received only one-fifth of their claims. Owing to strong competition Mr. Mills has this week again assigned.——J. B. Rumball succeeded to the jewelry business of R. W. Coates at Clinton in January, 1890, paying $1,000 cash on account of the purchase. In March last he gave a chattel mortgage to his father for $1,920, said to be to cover money advanced by the latter. Poor health is given as one of the reasons why he has just assigned.——It was only last November that James Ward came to Canada from Barbadoes, W.I., and settled in Elora, where he began manufacturing carpets. He could hardly have been well equipped with money, for within a month past three writs were issued against him by employees for wages, and this and other things has led to his assignment. His assets, amounting to $1,800, will be offered for sale next week.——Collins & Co., dealer in dry goods at Kincardine, have been unable to arrange a settlement with creditors, and another meeting will be held in one week.

THE SITUATION.

In the collapse of Leiter's wheat speculations is seen another proof that it is not in the power of anyone permanently to corner the bread supplies of the world. What Leiter did succeed in doing was to make smaller the loaf of the man who had the greatest difficulty in obtaining bread. For a while, he raised the price of wheat, by which the grower, in the exceptional cases in which he had not parted with it, benefited. Finally, he appears to have paid about $2,500,000 for the exhilarating amusement in which he engaged, on the wheat market. If the cause of his failure, as he sees it, be correctly reported, it is plain that he was wanting in ordinary sagacity. The prices of futures, he is reported as saying, went down more rapidly than present real prices, when, he perversely reasoned, they should logically have advanced. Precedent and probability, if he could only have seen the facts as they are recorded and discerned the truth in the outlook, should have taught him a different lesson. The price of wheat is generally highest in May, and the growing harvest is one of great promise. To sell in May was his only chance of salvation, but he lost his balance and fell, being buoyed up with hopes which had no rational basis. Other enthusiasts will walk in the path in which he met his fate, and it will be no cause for regret if their end be like his.

What may be called the renaissance of the Senate is the distinctive feature of the Parliamentary sessions just closed, at Ottawa. On those who believe that the Senate is not constituted in the best way, the change will not have any effect. The awakening being signalized by the rejection of the provisional Klondyke Railway contract, created exasperation in some quarters, and gave rise to threats against the life of the Senate; but it is quite clear that an issue so full of peril will never be seriously made, on grounds so little advantageous for an attacking party. Though this road will not at present be built, the large land subsidy which the Dominion would have given, if the provisional contract had been confirmed, is saved, and another road, but not an all-Canadian road, is being built without any subsidy at all. The second case in which the Senate took independent action was in rejecting a bill to transfer to the Government of Manitoba $300,000 of the School Fund of the province, for which the Dominion Government is trustee, to the Local Government, without the guarantee of an undertaking that the amount would be replaced to the credit of the School Fund. Two reasons for the transfer were urged: one was that the abstraction of $300,000 from a fund which will probably reach $5,000,000 would be scarcely a perceptible impairment; the other alleged a precedent for the transfer. This latter plea was answered by recalling the fact that the previous transfer took nothing permanently from the School Fund, since it was made under an obligation to re-transfer. Authority for the Drummond County Railway purchase by the Government, by which the Intercolonial would be continued to Montreal, blocked by the Senate in the session before the one just closed, was not completed last session, though it is intended to be in 1899. The Dominion Elective Franchise Act was repealed, and in future Dominion elections will be controlled by the local laws of the provinces, which are not uniform in their provisions, which, objectors point out, vary from one man one vote to one man and many votes, and some of which do not provide for appeals from the voters' lists to the courts. The Senate amended the bill so as to secure such appeal, but the House, on the initiative of the Government, refused concurrence, when the Senate withdrew its resolution and left the responsibility of the change where it belongs. The dominant feature of the session, apart from the renaissance of the Senate, was railway legislation.

On the Canada fisheries question, the Judicial Committee of the Privy Council decides that "the enactment of fishery regulations and restrictions is within the exclusive competence of the Dominion Legislature, and is not within the legislative powers of the Provincial Legislatures." Thus, all the fishery legislation of Ontario would seem to become null and void; but we must not accept this conclusion, for the words above quoted are immediately followed by the assurance that "it does not follow that the legislation of the Provinces is incompetent merely because it might have relation to fisheries." A broad distinction is drawn between the right of legislation and proprietary rights. Proprietary rights which were at the time of Confederation vested in the Provinces remained there, unless they were transferred to the Dominion by express enactment. No proprietary rights in the fisheries were conveyed to the Dominion. What rights individuals or Provinces had in fisheries, each retained after Confederation. Whatever grants of such rights could be made before could be made after Confederation. Such individual proprietary rights of fishery, as to times and seasons, etc., are subject to modification by Dominion legislation. But the legislative power cannot confer on others proprietary rights when it possesses none itself, though the Dominion may impose a license tax as a condition of the right to fish. The right which the Dominion has assumed to exercise of granting exclusive fishery leases, in property not belonging to it, is not recognized. The improvements of the rivers, not the beds of the rivers, were transferred from the Provinces to the Dominion. That public harbors became vested in the Dominion is a matter on which the Privy Council has no doubt.

To provide cheap money for farmers is the task which the Government of British Columbia has taken upon itself. The plan to be acted upon is described as one of co-operative credit. Farmers, traders and artizans are to combine and pool their assets, and lend to each other, according to their wants and the security they can give. Each partner will become liable for about two and a half times the amount of his shares. There will be a number of associations, with local boards of directors, in addition to a general committee of management. The Government, too, is to exercise some supervision, before it guarantees the debentures of an association. Different kinds of security will be taken from borrowers, personal security for small amounts, and real estate security for larger sums. Members of the Government represent the condition of the B.C. farmers as unenviable, most of the farms, owing to the shrinking in value, being mortgaged for all they are worth. One object of the measure is to provide the means of paying off existing mortgages, which bear high rates of interest, and substitute for them others bearing a low rate; another to improve the land by clearing and drainage. Care will be taken that the money is spent in useful, productive work. The Government will do well to move cautiously in this new road. The necessity for feeling the way is felt. The path is beset by dangers, mostly in the region of the unknown and the unforeseen.

British Columbia is within sight of a general election, and the speeches which public men are making have reference to that event. As usual the Opposition attacks and the Government defends the financial policy that has been pursued. In this discussion there is one item that interests the whole Dominion. According to the provincial premier, "there is a possibility that better terms might be secured from the Dominion and a larger contribution to the maintenance be obtained from the Federal Treasury." British Columbia, it is admitted, with her few votes in the Commons, could not hope to succeed alone, but by an union with other provinces something might be done. In the opinion of Mr. Turner, all the Dominion has to do, if it wants more revenue, is "to put a few additional cents tax on whiskey and the problem is solved." But the plebiscite may entirely sweep away this source of revenue. Yet he admits that the ordinary revenue of the province suffices not only to meet the ordinary expenses of the Government, but leaves "a substantial margin to turn into public works." The Dominion cannot make a better showing. Mr. Turner thinks the present "hitch" in the Lake Teslin railway scheme will be overcome, Mr. Sifton having "positively declared himself covinced of the necessity of the Dominion aiding the road," and Mr. Turner being likewise convinced that such aid ought to be given. On the 4th inst. he said "he hoped on his return to Victoria to find that the contract with Mackenzie and Mann had been signed," the document previously signed by these contractors being only an offer to do the work on certain terms. Did these terms include a Dominion subsidy? British Columbia is a province of magnificent distances, and a great extent of railways is necessary to open up the country. Already 550 miles have been or are being built and 1,000 miles provided for, including the Crow's Nest Pass Road, the latter, built largely at the cost of the Dominion, will be the property of a private company.

MR. TARTE ON MONTREAL HARBOR IMPROVEMENTS.

To Mr. Tarte, in his contest with certain interests in the harbor of Montreal, the meed of courage must be awarded. He is charged with sinister motives in advocating certain improvements, in the east end, and being vigorously attacked for his harbor policy, he turns at bay and deals heavy blows in return. He points out that plan No. 6, as it is called, is the one which the Harbor Board asked the Government in 1890, to authorize them to carry out; and that in 1894, in applying for additional aid, they "insisted that $1,000,000 should be spent in the eastern part of the city; but now that the famous windmill basin has been built, they do not want any more improvements." This basin, he charges, was made at an expenditure which will reach $1,000,000 in the interest of two firms, both of whom were, at the time of the authorization of the expenditure, members of the Harbor Board. Now, the charge proceeds, having got what they needed, their object is to block the way to rivals, and they are raising all sorts of objections to the proposed expenditure in the east. According to Mr. Tarte, these gentlemen wish to make a monopoly of the port for their special benefit. One of them, he alleges, owns out-of-date floating elevators, twenty years old, who does not want the competition of modern fixed elevators. From the descendant of a great shipping house, he deplores that the enterprising spirit of the founders has departed. Two or three concerns, he alleges, have monopolized two-thirds of the space of the port, and that three years ago, when the Elder-Dempster line brought their ships to Montreal, they had great difficulty in securing accommodation for them. He arraigns the management of the Harbor Board for alleged looseness, and says that reforms could be made by which $20,000 or $25,000 a year could be saved.

These are weighty charges to be made on the authority of a Minister of the Crown on the floor of Parliament. The strange anomaly is that the persons most interested in the success of the port are said to be those who of all others are most inclined to obstruct measures on which that success depends. It is quite possible, of course, for different persons to hold different opinions on the best mode of improving the harbor of Montreal, without assuming that the element of personal or party interest is their guiding star. The fight has assumed the shape of a contest between the friends of a local board and the Government of the Dominion. There can be no doubt that water carriage of the St. Lawrence basin needs in its service the best available facilities. In vain we dig canals as connecting links, in vain we make a sub-aqueous canal in Lake St. Peter, if the best modern facilities for carrying on the navigation are not utilized. There can be no doubt that a sufficiency of Government elevators is required at Montreal. That the St. Lawrence route has fallen behind in the race is not matter of surprise, when until now no permanent elevators have been built at Kingston. In Montreal, Mr. Tarte says, elevators can be built only in the east. They must be built somewhere, if Montreal is to hold the position of the chief port of the Dominion.

On the financial question Mr. Tarte takes the ground that the trade of the port, which is the trade of the valley of the St. Lawrence, should bear the cost. In general terms this position was not denied; but it was said, not without reason, that the Government builds dry docks elsewhere and it is not fair to treat Montreal exceptionally in this particular. We do not find that this criticism was satisfactorily disposed of. Mr. Tarte's reply was that it is the trade of Canada that pays. In our opinion it would have been better to build the dry dock out of the Dominion funds, and that probably this would cost the country less than it will be called upon to pay in the end. But this only as a matter of policy. By the Confederation Act, all the harbors of the country are vested in *plein propriete* in the Dominion and their control is placed under Parliament. The revenue of the harbors is not the less a part of the public revenue because a special destination is given to it. All this Mr. Tarte sees plainly enough, but it is not so certain that he sees that if there be, as he distinctly charges, abuses in the administration of the funds of the

Montreal Harbor Trust, he is, as Minister of Public Works, specially responsible for abatement of these abuses. Whether such abuses really exist we are not in a position either to affirm or deny, any more than we are to say whether the insinuations against Mr. Tarte in connection with the harbor expenditure in the east contain any just ground of complaint.

NEWFOUNDLAND.

For a long while, Newfoundland has suffered in the estimation of people outside her own borders, just as Canada used to suffer, because of prejudice or lack of knowledge. The great island colony was remote; it was isolated, and not easy to reach; besides it was thought rocky and barren, producing nothing to speak of but fish and of late years copper. The laying of Atlantic cables from its shores, however, brought it more into notice. Next, the idea of making it a railway bed in a novel rail and ocean short route from Canada to Europe. And now the island is found to possess, besides copper, great stores of iron, also of timber for making paper pulp, so that it must attract, and has already attracted the attention of scientists and capitalists.

A correspondent, in our issue of 3rd instant, told how the railway across the island and boat connection from Sydney had shortened the trip to Newfoundland. The Reid line of road from Placentia Junction to Port au Basque, which is 500 miles in length, pretty well bisects the Island, running first northerly then west to the Humber River, and finally, about south-west to the point near Cape Ray where connection is made by boat with Sydney, Cape Breton. There are likewise spurs or branches of the road; and, indeed, the extent of railway in Newfoundland now controlled by Mr. Reid, is something like 750 miles.

Respecting the wealth of the Island in timber and minerals, in the correspondence of the Montreal Gazette, dated 16th May, some particulars are given respecting the former, which are of immediate interest. There are, it appears, enormous areas covered with the best of timber for pulp making, and there exists a pulp factory on Black River, Placentia Bay, which is well managed and on a pretty extensive scale. But since the building of the railway was begun there have been found on the shores of Grand Lake, through which the railway passes, almost inexhaustible supplies of timber suited for pulp making. At that point it is intended to erect a pulp mill on such a large scale that a year will be required to complete it. There is a likelihood besides that extensive paper mills will be built thereabout, and so manufacture the pulp, instead of exporting it elsewhere.

It is some months since Newfoundland was visited by J. H. Collins, F.G.S., past president of the Institution of Mining and Metallurgy, a gentleman of experience and reputation, who has been years at the Rio Tinto mines of Spain. He lectured on Newfoundland in London during March this year, and his lecture has been published. There can hardly be a stronger proof of the impression he made than the fact that a company has since been formed in London to work a number of copper claims which Mr. Collins selected when upon his visit and has leased from the holders. These claims are expected to be worked during the summer and autumn of 1898. This gentleman characterizes Newfoundland as "one of the richest islands in the world; particularly so as regards copper, and perhaps iron. And he says of the Tilt Cove copper mine, first opened in 1864 and still working on a large scale: "Last year it produced over 70,000 tons of ore and at a profit £28,000 sterling. Its total production to date has been not less than 20,000 tons fine copper, worth a million sterling, besides some thousands of pounds worth of nickel ore."

Much nickel is associated with the copper, it appears. There are numerous deposits of chrome iron on the west coast; also sulphate of antimony and zinc blende. Furthermore, in the opinion of this gentleman, the island may yet prove to be rich in gold; indeed it has been stated by Mr. Howley of the Geological Department that "the ores of Tilt Cove have yielded as much as £10,000 worth of gold in a single year." This would mean, of course, in association with copper, but Mr. Collins mentions a number of places where gold has been found in quartz veins.

Perhaps the most convincing proof that Mr. Reid was well informed before he entered into his great contract with the Newfoundland Government is the revelation he has now made by opening up coal seams on Grand Lake. It is possible that the coal basin of St. George's Bay is the north-eastern extension of an important Nova Scotia coal measure. But the most important coal area on the island, is that situated at the north east end of the Grand Lake. Several good seams have been traced for miles. "One of them," Mr. Collins says, "shows six feet of excellent coal. The carboniferous area has been traced for eleven miles in length with an average width of four miles." Within the last few weeks Mr. Reid has opened the six feet seam and in a few days extracted 100 tons of coal of superior quality. He expects ere long to be able to supply the whole island.

As a copper-producing country, Newfoundland has great possibilities, since the demand for copper is increasing fast, the price of copper rising too, owing to the extension of the use of electricity as a motor power. Newfoundland will at last get its innings, for as a copper-producing country it stands high. It is stated that in addition to the company started in London with which Mr. Collins is connected—capital, £250,000—the "Tarsus Company," having its headquarters in Glasgow, is turning its attention to "Terra Nova." It has appointed an agent there, and sent out a mining expert with a staff of officials to test a number of copper locations which the company has leased. Some new iron mines are likely to be opened shortly too, on the north shore of Conception Bay. So that, on the whole, Newfoundland may be said to be "booming."

MERCHANTS BANK OF CANADA.

The present is the third year in succession that the annual reports of the Merchants Bank of Canada have referred to the pressure of banking competition in this country, and the effect it was having upon the profits of the business generally. It is only fair to say that this complaint was made just as freely when the bank's own net earnings were over 10 per cent. on the capital as when they were reduced to 7½ per cent. The reduction of earnings, it is to be remarked, is more pronounced in the year lately closed than in several previous years. Besides providing for bad and doubtful debts of the current year out of the year's earnings, however, something was deemed necessary to be done to provide for doubtful assets and securities, the accumulations of former years. For months the joint general manager and the inspectors have been revaluing the bank's assets. And the result of their enquiry is now found to be that the contingent fund of $74,695 and $400,000 of the Rest have been taken to meet these appropriations and adjustments, and the $44,372 written off bank premises and furniture. These writings-off are not pleasant operations, doubtless, but they are found to be necessary upon occasion. And it would seem from the free hand given Mr. Fyshe in the valuation of assets that the directors wished to have the opinion of a fresh mind, and this the mind of a trained banker, upon the value of securities which the former management had been accustomed to rate, and possibly still rates, somewhat higher. It is admitted that there may be considerable recoveries from this $474,605 written off; but if there are not, the bank has still a Rest equal to 43⅓ per cent. of the paid capital, and has earning power that ought to enable it to keep up its dividend—though it did not earn the dividend last year by $40,000.

There is nothing wonderful about the writing down of the Merchants Bank assets this year, which amount to twenty-five millions and more, by such a sum as $400,000. For twenty years this important bank has accumulated profits, until its Rest has grown from $400,000 at the time of the reorganization in 1877-8 to $3,000,000, or one-half the amount of the capital, last year. This showed wonderful earning power; and we repeat that no surprise need be occasioned if some writing off has been adjudged necessary. The position of the bank is strong, whether considered as regards earning power or with respect to readily available assets.

In his remarks upon the state of the country, the general manager agreed with his confrere of the Bank of Montreal that "business is good and the outlook promising." But he also desired it to be remembered that we are only emerging from a long-continued period of depression. While the good cereal crops have done wonders for the country, and while a change for the better in mercantile affairs has undoubtedly come, the decrease in insolvencies among traders has not been so marked as it should. Unsound business is still being done in Canada; the credit system is in some departments of trade very faulty still, and as Mr. Hague adds, with emphasis, "banks occasionally learn by bitter experience that their mercantile customers may fail, and fail badly, even when the country is generally prosperous." He referred with approval to the recent Nova Scotia enactment doing away with preferences in cases of insolvency, and to the reduction of interest by the Dominion Government on its savings bank deposits, and closed with a wise word of caution to all who give or deal in credit.

IMPERIAL BANK OF CANADA.

It is a dozen years, if not more, since the Imperial Bank of Canada began the investment of a considerable part of its assets in Government or municipal securities. To this policy the management has since adhered; and today this bank has, if we do not mistake, a larger sum thus invested than ever before. It is as if its authorities had proceeded upon the view that instead of bidding against other banks for current discounts, and making more or less concession in order to get them, just as much money was to be made by keeping a large share of their resources in easily available shape, so as to be able to take advantage of special transactions or states of the money market. And indeed, to judge by the profits shown to have been earned, this policy has "panned out" well, for the bank shows net earnings of 11.56 per cent., where at the date of the statement nearly half its assets (48.8 per cent.) were in cash or readily available shape. The Imperial's showing is a very strong one and well bears analysis. All the more credit to their skill as bankers if they can maintain so large a proportion of their resources well in hand, and at the same time earn for their shareholders dividends above the average.

BANK OF TORONTO.

Banks which divide ten per cent. yearly to their shareholders require, in these days when complaint is rife as to reduced profits, larger earning power than ones which are expected to divide only six per cent., or eight. Happily for the bank of Toronto, while not getting an exceptionally large proportion of deposits without interest, it can yet show deposit moneys in the proportion of ten millions to capital of two millions. Its rest has besides reached such figures—ninety per cent. of capital—as that additions to it are no longer a pressing consideration. Thus it has been able to devote the whole of its net earnings to payment of dividend and the maintenance of a fair sum at credit of profit and loss. While its proportion of cash assets is moderate—31 per cent.—the holding of debentures is not large, and it shows no call loans as such. Presumably its management is satisfied to keep its eleven millions in the shape of current loans, finding therein adequate sources of profit.

STANDARD BANK OF CANADA.

The declared net profits of the Standard Bank of Canada are larger than they have been in any year since 1893-4, reaching as they do the sum of $115,157, which is at the rate of more than 11½ per cent. on capital. This enables the directors, after dividing eight per cent. to shareholders, to devote $5,000 to writing down office safes and furniture; and even enough remains to increase the balance carried forward to the sum of $101,190. A steady and productive business is indicated by these figures, and the profits mentioned were earned, the report tells us, in spite of a large accumulation of money during a part of the year—the earlier part, we presume—for which profitable outlet could not be found. Deposits continue to increase, and the rise in circulation compared with the previous year is remarkable.

ONTARIO BANK.

To have been able to earn its dividend, properly under the circumstances not a large one, to place $20,000 to Rest, to put aside $5,000 for officers' guarantee fund, to write something off bank premises account, and yet carry forward a larger sum than in the previous year, is a result of twelve months' business which entitles the authorities of the Ontario Bank to congratulation. Circulation has advanced steadily during two years past, and the growth of deposits has enabled an increase of $700,000 in current discounts at the same time with a still greater relative increase in immediately available assets. We observe that Mr. John Hallam has been appointed to the board of management, in the room of the late Mr. George M. Rose.

INTERNATIONAL CONGRESS OF ACTUARIES.

On four days of May, from Monday 16th to Friday 20th, the second International Congress of Actuaries was in session in London, England, the first having been held, it will be remembered, in Brussels in 1895. The president of the Institute of Actuaries, Mr. T. E. Young, F.R.A.S., was elected chairman of the congress, and delivered a learned and interesting address. He welcomed the delegates to what he termed "the ancestral home of actuarial science." Many distinguished mathematicians were present at the congress. Not only were Belgium, France, Germany, Russia, represented by some of their most skilled actuaries, but the United States, Canada and the Australasian colonies had sent delegates or had scientific papers read. The impression made upon the press and upon English public men by these actuarial deliberations was unusual, and it was fairly earned.

It is high praise when we find the London Economist saying that the gathering may certainly be considered to have vindicated the claim of the congress to a permanent place among the scientific conferences of the world. That journal considers, and gives reasons for the belief, that Great Britain has been to a peculiar degree the parent, and is still the leader, of actuarial research. While the leading article of the Daily Telegraph upon the event is jocose, and rather disposed to have a fling at life assurance companies, that journal is compelled to admit that actuaries do perform onerous and useful duties.

As to the work of the Congress, it was sufficiently wide in scope. Besides dozens of papers on life-company administration of greater or less present interest, written by persons of varying nationalities, there was a group of papers on Friendly Societies in Europe, Britain and New Zealand, the Cape. There were papers on the workman's accident question and the laws regulating the same. And then papers on old Old Age Pensions in Belgium, Russia, Germany, France. Nor must we omit to mention the very important proposals made for simplifying the notation of technical matters between the actuaries of all countries. The Review well says that the papers submitted on Universal Notation by M. Begault and by Mr. George King, and also the proposal for an international actuarial dictionary, by M. Quiquet, are in the front rank as regards value amongst the propositions submitted to the Second International Congress. In the meantime it is a marked compliment to the British actuaries, that the notation of the Institute of Actuaries is to be employed in preference by the actuaries of all countries, and that that notation, as now approved, is to be printed in the transactions of the Congress.

It has been remarked that this tendency in modern years for actuaries from different countries to come together, making themselves known to one another and interchanging the results of their experience, is significant in its coincidence with that other tendency by which scientific finance is coming to be applied to problems of national magnitude. And indeed Mr. Courtney in his speech admitted that when statesmen strive to ameliorate the conditions of an old age of penury for the working man after years of ill-paid toil, "they cannot do it without the assistance of the actuary. Referring to the adoption of the British actuarial system of notation for common use, the Economist remarks: "It would be well if this establishment of a common scientific alphabet should prove an earnest of an attempt, upon common principles of financial soundness and stability, to help the modern world to deal with the economic problems by which it is confronted."

LABOR vs. CAPITAL.

The factory system of industry has resulted in certain developments affecting the relations of capital and labor which are only now being slowly recognized. While manufacturing industries are, on the whole, conducted in a much more complicated way than formerly, its different parts have become simplified through the division of labor. The technical skill of the few has increased, while that of the great body of workers has diminished simply because much of the work they formerly did is done by machinery. The functions of the *entrepreneur* or organizer of labor, have grown to an importance which completely overshadows the services rendered by ordinary wage-earners. Possession of adequate capital with which to purchase raw material and the most improved machinery; experience in the buying and purchasing markets, and a few competent overseers, render the manufacturer in most instances independent. Lessons to this end were taught by the recent great strike of mechanical engineers in Great Britain, and may be studied in our own Canadian labor troubles. Although some of the ex-employees of the J. D. King Company, of Toronto, for instance, still maintain that "a strike is on," the cause of the Boot and Shoe Workers' Union is now hopeless.

The essentials of successful shoe manufacturing are: Lasts that will suit the greatest number of feet, with good appearance of the shoe; plant that will make shoes quickly and well, and good honest leather. With competent superintendence, the manufacturer having these requisites, although he may be annoyed by striking workmen, cannot be beaten by them. There are in each factory certain central positions in the work of manufacture which require to be manned by experienced hands, but the subsidiary employments can be filled by any intelligent young men who take an interest in their work and are looking for advancement. The policy of intimidation having failed to prevent the J. D. King Company from securing practically a full staff of employees, the alleged strikers have attempted to secure a boycott of that firm's goods. We believe there is too much love of fair play and justice on the part of Canadian merchants and the public generally to allow the circulars issued by the Union in respect of this firm to carry any weight. This feature of the tactics employed in the labor trouble in question strikes at the very existence of trade unions. The Boot and Shoe Workers' Union have printed a circular letter in which they call into question the quality of the shoes made by this firm. The letter is vindictive in tone and quite uncalled for. In buying boots and shoes, as well as other articles, all competent merchants and the sensible public examine the wares closely. But what redress has the manufacturer for the damage sustained through the effect of a libellous circular upon thoughtless purchasers? A judgment in the courts is likely to be worthless, and a continuation of such tactics must make it necessary to amend the laws in regard to trade unions.

LONDON IN SPRING.

You may, perhaps, like to know how this enormous city, its inhabitants and their ways strike the average Canadian. We have much to learn, of course, from the inhabitants of the old world, so much longer than ourselves engaged in the race of life. And there are some things, I tell you, mighty hard to learn. Maybe I don't understand Old-country ways, but in the way of business, since I came here a few weeks ago, I find this London the hardest place in the world to get anything done. The labour unions stand in one's way; they are a curse to the community. No wonder the iron and other trades are hampered by them.

This is the month of May, when everything is bright and new, even the trees and the shrubs. London may be virtually called the painted city, whole armies of painters are at work, painting and decorating stores, dwellings, fences, railways and everything that can be painted. The stone, brick and iron structures, old and new, all come in for their several coats of paint, street lamps, letter boxes and iron posts. Derby day has come and gone, and what a sight it is! A sight to be remembered, with the thousands upon thousands of rigs, of every size, shape and color, pressed into service. Fakirs, gypsies, loafers, children, "swells," and the demi-monde, costermongers and their "best girls"—the merriest crowd of people on earth—are off to the race. Such funny, well meaning chaff, no fights or quarrels. Our driver had a very ruddy complexion, as is not unusual; one of the wags called to him to know if he could give him one of his pinks. The driver asked "Is it Pink Pills you want?" and the wag says "I don't know, honly I wanted to himprove my complexion and thought as 'ow you might 'ave been using them."

The police here are simply admirable, so kind and obliging they are, and so little dictatorial. They seem to be well posted, their system is superb, and you never see anyone argue with them. They are autocrats, but very forbearing and always willing to give information.

The fire department of London is not up to ours in various Canadian or American cities. There is too much red tape, it is like most English institutions—too ponderous. The firemen are very slow to reach a fire and slower still to act, they investigate everything carefully and thoroughly, out comes the note book and everything is taken down, the condition of the building when they arrive, etc.; in the meanwhile the fire is burning on. After they have gone as far as possible in regard to ascertaining the cause, they try and counteract the effect. I witnessed a fire in the city not many days ago, and one of your Canadian fire insurance managers was over here at the same time, looking on at the fire.

I have had nothing but the most courteous and satisfactory attention from the business men and bankers I met here. Some of them were people "high up" in the financial world, but you would never know it from their manner—so simple and friendly. The tip-toppers anywhere are apt to be the most civil in the bunch, but I never found that more so than here. If I had been a lord's son or a Yankee millionaire, I could not have been treated with more confidence and perfect civility. There is a good deal of curiosity here about Canada, and I could not answer more than half the questions some London bankers asked me about it. Outsiders talk about Klondyke, and sometimes chaff you about it; but the well-informed merchant or broker does not waste his mind on that. A banker asked me if I thought the favored treatment of British goods coming into Canada by progressive reduction of taxation would continue if the present Canadian Government should be displaced. And like the Caradoc school-boy, I "gave it up." The same man, I think it was, read to me out of the "Economist" something about American exports to Canada being doubled in thirty years, while English sales to us had fallen off in comparison. I could only take his word for this.

That was an important gathering of Insurance Actuaries held here a week or two ago. There has been a lot about it in the financial papers. I met some of the American and foreign delegates; nice chaps for the most part, some of them a little school-masterish. Canada was represented, I was glad to see. In fact there are not many directions now in which Canada is not heard of. Sir Donald Smith is doing a lot of work and good work for Canada, not only among the upper classes, but lecturing among the people here and there. Canadian bacon, Canadian cheese, Canadian apples, all have a good name on this side, and our Western wheat goes without saying. I was surprised at the excellent quality of the London milk, only a penny a glass. It is better than Toronto city milk, I can tell you. Meats are expensive over here, but then the beef and mutton you do get is excelled by no place on earth. Vegetables are very reasonable, and the strawberries for size and flavor cannot be beaten, they are simply delicious.

I could tell you lots more of things that struck me, but this will have to do for this time. One thing I noticed, and that is this: servants are servants here and must be treated as such. If you try to be civil and affable with them, that is your undoing, they take advantage instantly and become impudent. The only way is to treat them just as the Englishman does, and boss them about; they are menials only and it is their fault that they are so.

This may not be any information for financial readers, but I mention it as a thing that strikes me. Cab drivers here as a rule are robbers; but it seems that this class of people, no matter from what country they hail, are nearly all candidates for the prison. If you show the slightest weakness you will invariably pay double. Then they are so sarcastic; after paying one his exact fare such expressions are heard as "Are you sure you can afford it, sir?" or "You must 'ave been a savin' of it hup.

WILL. CALLAGAIN.

Piccadilly, London, 31st May, 1898.

THE INTERNATIONAL CONGRESS OF ACTUARIES.

The amount of attention given to the meeting of the International Congress of Actuaries in London last week, by the daily papers of the city, and also by the financial press, to say nothing of the insurance journals, was quite remarkable. While I did not set out to ascertain all that the different papers had said on the subject, I did see editorials in the Daily Telegraph and in one of the big Scotch dailies about the actuaries, especially the International Congress; also an admirable, and as it seems to me, very clever article of two columns in the London Economist, that financial "thunderer," which never wastes powder on anything unworthy of praise or blame.

If I try to sum up the Congress, and do not succeed, you must remember that I am not entirely at home in the subject. Mathematics is not my stronghold, and I have something like awe of the algebraic symbols that are so much used in actuarial work. In fact it is with me, as a London man put it the other day: "Most people know as much about an actuary as they do about a beef-eater. He is as great a mystery as a 'chartered accountant.' The actuary is a prop and pillar in the life and fire insurance systems of the country. He can prove to a hair's breadth exactly what amount of money you ought to receive until the last day of your approximate life, provided a lump sum be paid down, and so on."

I am not aware whether you have taken notice of the jubilee dinner of the Institute of Actuaries, which was held some time in the third week of May. But it was a memorable gathering. At least seven European countries outside of England were represented at it. Delegates were there from the United States, Canada, and Japan, and among the guests present were Hon. Leonard Courtney, M.P., Sir Henry Harben, Dr. Sprague, Mr. Emory McClintock, of New York, and some French and Dutch gentlemen whose names are less familiar.

The speaking was uncommonly good. One could learn that for one's self by reading reports of the speeches. But I was told by a person who was present that "the speeches were even better than they read," if such a thing can be. I forward you by this mail a copy of the Insurance Record of May 27th, in which you will find an adequate report of the gathering.

The chairman's address (Dr. Young), is packed with wisdom of an uncommon kind, it seems to me; it is not merely a learned address, it is earnest, practical, generously unselfish. And his successor in the presidency, Mr. Manly, said some sensible things. He referred to the names which had gone to make the 34 years' records of the Institute's transactions so valuable—the names of Finlaison, Jellicoe, Peter Hardy, Samuel Brown, Hodge, Tucker, Orchard, John Higham, Peter Gray, Sheppard Homans, who have all gone; and those great mathematicians, such as Gompertz, Woolhouse, and Makeham, and the retired but still living Baily, Day, Sprague, Meikle and Hendricks. When two Belgian and Russian members had been toasted, M. Savitch showed warmth and courtesy in his response, speaking of the charm of personal sympathy and friendship they had experienced in England, when added to the respect compelled by the ability and technical skill of the English actuaries. But my friend (who was present), tells me that extraordinary enthusiasm was created when Mr. Deuchar, president of the Faculty of Actuaries, proposed "Our Guests," winding up a short address by reciting those lines of Robert Burns':

"For a' that and a' that,
Its coming yet for a' that—
When men to men the world o'er
Shall brothers be for a' that."

And most assuredly it was something for Scotchmen to remember that "Auld Lang Syne" was sung by the whole gathering at the close of the dinner. The chairman's speech, at the opening of the congress, good as it was, does not seem to me to compare in general interest and value with that of the same functionary at the jubilee dinner. Mr. King, who spoke later, put it well, however, when in proposing the toast of the Congress he said: "After all, actuaries are really many-sided. It has been stated in the paper that actuaries are men of figures, and technicalities—but these are only their tools. They have far wider work to do. Some people might think it strange that actuaries should deal with legislation, but the legislator cannot frame wise and useful laws for insurance companies, friendly societies and kindred organizations, without the help of an actuary. It is to the study of the actuaries that any use such laws could serve will be due." This is decidedly a better tribute than any I can frame to the services that insurance actuaries, or any other kind of actuaries, have rendered to the commonwealth. If it be said that they praised themselves, they were surely entitled to do so.

HORACE.

London, 31st May, 1898.

P.S.—I find in an insurance journal, classified as matters of immediate interest, the papers in the following list:

"The Mortality in the British Army and Navy," by Mr. J. J. McLauchlan; on "The Rates of Mortality in Australia and New Zealand," by Mr. David Carment; Mr. Hankers' paper on "Life Assurance by the Caisse Generale d'Epargne et des Retraite in Belgium;" various papers on legislation in Australasia, by Mr. Richard Teece; New Zealand, Mr. Richardson; Cape Colony, Mr. J. McGowan; France, by M. Masse; Germany, Dr. Samwer; Holland, Mr. Blakenberg; the United Kingdom, Mr. Arthur Barrand; and Russia, by Mr. Ostrogradski; and on "The International view of Laws relating to Life Assurance Contract," by Mr. Adan.

Among the subjects of future interest may be placed, on the same authority, those of "Graduation," by Dr. Karuj, of Germany; on "The Limitations of the System of Net Valuations," by Mr. Nichols; and an exceedingly valuable paper by Mr. H. W. Manly on "The Solution of Problems which frequently arise out of the Rules of Pension Funds and Friendly Societies;" also a paper on "The Theory of Limits to be held by Life Offices," by M. Landre. Further might be added that "Arguments on the Calculations of Surrender Values," by Mr. De Savitch, of Russia, were of future interest, as well as the paper dealing with "The Effect on Life Offices of Various Systems of Valuations which consider the Expenses of Management," by Mr. E. W. Scott.

FRUIT BUSINESS EXPANDING.

We have previously referred to the marked expansion of the fruit trade, both domestic and foreign, within recent years. In Toronto, the conditions of the trade have not been altered to meet this larger turnover. A market has been established at Toronto—the only satisfactory method of disposing of fruit to the trade — but the premises are too small for the business doing. A dozen or more, of wholesale merchants are crowded in the Scott street building, where there is scarcely sufficient accommodation for more than the stocks of three or four. Fruit is a commodity that must be well displayed in order to sell, and overcrowded premises are not likely to lead to the most satisfactory results. A building which, situated in the centre of railway and navigation facilities, would contain under one roof sufficient room for the sale of fresh Canadian fruits and the auction of imported fruits, such as oranges, lemons, pineapples and the like, is necessary if the trade is to continue its development.

But the trade in fruit has even greater needs than an adequate market building. There are serious defects in the present mode of forwarding highly perishable fruit to the market. Successful shipment of small fruits such as strawberries, for instance, includes shipment by the grower at night, carriage in cold storage and arrival at the market before seven o'clock in the morning. To give an accommodation of this description the boats and the railway companies would probably be obliged to charge higher freight rates, but these would eventually be paid by the consumer, who is, in fruits at least, only too willing to pay a fair price for a good article, rather than a small price for an inferior one. The retailer would, under these circumstances, be able to do his marketing before the day's work in the store had commenced, and would have a whole day, instead of an afternoon in which to sell his supplies.

Toronto may be made the centre of fruit distribution for a considerable part of the Province. Merchants from a number of towns find it now to their advantage to purchase supplies in this city. The consumption of fruit in the household is capable of increase. But until better arrangements are made to bring grower and consumer together, we are afraid that the present unremunerative prices must deter growers from extending the area of land under cultivation and prevent new capital and labor from entering the industry.

—The United States Congress has agreed to pay the Behring Sea award, $474,151.

A REVIEW OF THE WHEAT SITUATION.

The sensational end of the Leiter "corner" of the wheat market adds another instance to the already long list of examples which go to prove that profitable speculation of this kind is impossible. The critics blame Mr. Leiter for not "letting well enough alone" and dropping out of the market when it reached its maximum point. But it must be remembered that speculators in grain have only a limited time in which to carry on their operations. The market is world wide, and the harvesting of new crops forms a barrier in the way of the speculator's plans. To keep the price going up it is necessary to buy constantly and in this way enormous stocks are necessarily accumulated. If the speculator had a considerable period of time in which to manipulate the market, as on the stock exchange, he might dispose of his supplies in small quantities and throw the burden upon others. In the wheat trade, however, when within six or eight weeks of harvest, there is little chance for the plunger who has accumulated large stocks to sell them without causing a collapse of the market.

Mr. Leiter's cash wheat is placed at 6,000,000 bushels in all positions, and with the exception of 1,250,000 bushels held by Prening, this has been turned over by the banks to Mr. Armour, and will be marketed by him. It is understood that the Lohrke attachment will be dissolved under the arrangement made for marketing. The placing of this quantity of wheat on the market is, of course, a serious matter and an element of weakness in the situation. When the bubbles have been pricked and the normal position of affairs revealed, there is yet considerable strength in the market. The visible supply in Canada on June 4th, 1898, is 22,587,000 bushels, as against 24,450,000 bushels at the same period last year and 50,147,000 bushels on June 6th, 1896 America is generally regarded as the key to the situation.

Crop prospects for the coming autumn are the principal element of weakness. In Scotland they are said to be not at all bright, and warm forcing weather is needed. The area under cultivation in England is reported to be 30 per cent. more than last year, but rust has appeared, and not more than an average crop is expected. In the south and southwest the plant is lanky. Hot weather is necessary for crops on the continent, especially in France. St. Petersburg cables report that winter wheat is satisfactory, except in five provinces, while spring wheat in only two provinces is in bad condition. In northern Italy excessive rains have injured the plant. The final report of the wheat crop in Bengal shows the area sown to have been 1,573,400 acres against 1,341,700 acres last year, and the yield to be 594,700 tons, against 387,000 tons last year.

In the United States and Canada the wheat plant is, on the whole, reported to be in excellent condition. Wheat is in shock in the Southwestern States, and the wet weather, which is said to have led to sprouting, is one of the few bull influences left in the market. The United States, as a whole, however, may be expected to make a phenomenal showing next autumn in the wheat trade. There, as in Canada, the acreage has been increased as a result of the recent high prices. The acreage under wheat in Manitoba in 1896 was 999,598 acres, 1,290,882 acres in 1897, and 1,448,232 acres the present year.

TOBACCO GROWING IN ESSEX.

A reader of THE MONETARY TIMES, John A. Auld, M.P.P., for South Essex, who had seen in a recent issue a letter from "Malden," on the subject of tobacco-growing in Western Ontario, sends us an interesting pamphlet on the subject, dated 1824, adding: "I notice that you seem to be interested in the cultivation of tobacco. Here is a bulletin of old days that will tell you all about it." This pamphlet of fifteen pages, each 5 inches by 3, is entitled "Some Useful Hints on the Cultivation of Tobacco," and was compiled by one of a series of Committees appointed at a meeting held in Sandwich to consider the best means of encouraging the growth of the plant in the peninsula between Lakes St. Clair and Erie. Upon that committee, and in the list of subscribers to the pamphlet, were a number of gentlemen whose names it will be of more than local interest to recall.

Charles Berczy, who, we presume, was the son of Wm. Berczy, Esq., of Markham, in later years removed to Toronto, where he became postmaster in the thirties. Robert Reynolds, usually called "Squire" Reynolds, was Commissary at Fort Malden, near Amherstburg, then garrisoned by British troops. Hon. James Gordon is the same kindly gentleman who lived afterwards on the corner of Church street and Wilton avenue, Toronto. Francis Caldwell bore an honorable part in the 1837-1838 rebellion and has left many descendants in Essex. J. B. Macon [or Masson], is apparently of French descent; Charles Fortier, D. Pastorius, Fox, Innes, Young, McGregor, are half-a-dozen other names in the list, which marks the enterprise and public spirit of the men of the "Western District" in those days.

The quaintness and precision of the language used is noticeable. In the introduction, the compilers of the pamphlet say that "they wish t to be known that the observations now published are partly extracted from a work written by a person who, during a residence of twenty years in Virginia, made it his study to gain information on this subject; and the remainder, which forms the quoted portion of this pamphlet, is taken from a document communicated to the American Museum, by Judge Parker, an experienced cultivator of this article." The pamphlet severely condemns second crops of tobacco, which apparently were then common in Essex, and cites a Virginia law which positively forbids the raising of them, by reason of their being, we presume, too exhaustive of the soil. "Surely," say the compilers, "we cannot err in taking those for our guides who have made the culture of tobacco their sole business for such a length of time."

Attention is given in this somewhat ancient pamphlet to such subjects as the preparation of the plant bed; the choice of seed; the topping and cutting of the plant; gathering, shipping and curing the leaf. We have only room for a short extract concerning the choice of seed: "Great care should be taken as to the kind of seed planted; the sweet-scented is considered the best. The Long Green tobacco, generally cultivated in Virginia, is considered by the most experienced planters as the next in value; the Large Frederick is also esteemed a good sort, and well suited to the cooler climates. But the value of all the varieties must depend much on the soil, the climate and the degree of care taken in the cultivation and management." The instructions given correspond so nearly with what we understand the Government is suggesting to tobacco-growers in Ontario to-day, that Mr. Auld would seem to be justified in what he says at the conclusion of his letter: "Just the same old way now as then." At any rate the pamphlet is an interesting curiosity relating to persons and things of seventy-five years ago.

FOR GROCERS AND PROVISION DEALERS.

By last accounts but little business had been done in future California fruits in New York this week, prices so far made seeming to be above the views of buyers. Sellers, however, do not seem to be anxious, as in view of the short crops of many descriptions they look for still higher prices.

The consolidation of the eight brewing companies of Cleveland, Ohio, and two breweries of Sandusky, Ohio, under the title of the Cleveland and Sandusky Brewing Company, has been completed. The capitalization of the new company is $6,000,000 first mortgage 6 per cent. 50-year gold bonds, $3,000,000 6 per cent. non-cumulative preferred stock and $3,000,000 common stock.

A steamer reached New York on Tuesday, 14th, from Mediterranean ports with 30,000 boxes of Palermo lemons. In their review of the lemon market for the week ending June 11th, the Hills Bros. Co. say: "Two cargoes have been sold during the past week, viz., Peconic and Styria, with a total of some 64,000 boxes. We note a sharp advance in our market owing to the warm weather, which appears to be general throughout the country; our present prices being from 50 to 75c. a box above former quotations. Our prediction that we were liable to have some good lemon weather the next few weeks will probably be fulfilled, and the present market, although it now looks rather high, will no doubt be fully sustained during the present month."

The following lines, which are stated to be in imitation of James Whitcomb Riley, and intended to encourage the discouraged retail grocer, appear in the St. Louis Grocer:

"When bizness is dull, an' you ain't sellin' nothin',
Don't stop a-tryin' fer a minute,
What if you are forced close to the wall,
Remember there are others up agin' it.

"There comes a time in every feller's life,
When luck, it seems, ain't found you;
That's when you want to hustle, push your goods and advertise,
And bizness will pick up—it's bound to."

A rate concession has been made to the operators of the various canneries in the Puget Sound district which will tend to increase the shipment of canned salmon to Eastern points. A Seattle paper says: "Heretofore the marine insurance on salmon in carload lots was paid by the shippers at the rate of 2½ cents per 100 pounds, but under the new arrangements the insurance on all shipments which may have to pass over waters in reaching their destination is guaranteed whenever the shippers specify the amount of the shipment on the shipping receipt. A carload of salmon is usually valued at $2,500, and the marine insurance paid out by the shippers in the past has been no small item of expense. A straight rate of 70 cents per 100 pounds on salmon has just been authorized. This includes transportation on both rail and water, while last year the rate by rail was 75 cents and by water 70 cents."—"Seattle Post-Intelligencer."

The lack of Cuban leaf tobacco is putting American cigarmakers about. The large manufacturers in New York city have, it is claimed, sufficient Havana leaf to carry them through for the present, but probably very few have enough to last ten months, and none longer than a year. Some of the manufacturers are turning to Mexican, Florida and Connecticut leaf for the manufacture of cigars. Conservative tobacco men in New York say that there is not more than between 16,000 and 17,000 bales of Havana tobacco in that market, and, while the amount in Havana is known to be light, it is asserted that since May 16th, 1896, up to the present time, the imports of Havana into the United States have generally been of the poorer grades, and it is known that at the present time there is scarcely any "old fine" offering on this market. New York stocks are concentrated in few hands.

In eleven months the export of wheat from the United States including flour, has been 197,395,968 bushels. The sowing of 43,500,000 acres from last year's crop can hardly have taken less than 65,250,000 bushels. In the eleven months, says the N.Y. Bulletin, we also exported close to 190,000,000 bushels of corn, nearly 24,000,000 bushels more than in eleven months of last year. The barley exports of eleven months have fallen off over 7,000,000 bushels as compared with last year, but the export of oats has a little more than doubled, the export of oatmeal has increased 75 per cent., and the export of rye—not a large item—has doubled. Omitting flour and meal, the quantity of grain exported in eleven months is 189,000,000 bushels greater than it was in eleven months of last year, and the value of all breadstuffs exports is more than $116,000,000 greater.

The news that the war duty on tea would go into effect in the United States on the 14th inst., instead of the 1st of July as first expected, caused a big flurry among tea men in Montreal last week, and led to much manœuvering in order to get goods across the line before the new impost went into effect. As an example of how the business was rushed, it is reported that the local branch of a Japan house received a telegraphic order for two carloads of tea about three o'clock on Monday afternoon. They immediately had the required goods loaded on drays, at the same time getting the Grand Trunk Railway to set off two cars in a convenient siding in the Point St. Charles yards. They then wired Rouse's Point, N.Y., requesting that the customs office be kept open until the arrival of the New York express train from Montreal, having in the meantime secured permission to attach the cars to said train, and so got the goods across the same evening. In all, it is said, some ten to twelve cars were rushed across the border Saturday and Monday, but this afternoon there have been some rumors that there is a possibility that those goods which only got across after office hours may be subjected to the new duty. As may be imagined, this movement has left the market here pretty bare of stock, and holders are stiffer than ever in their demands.

IN THE DRY GOODS STORE.

Irish linen manufacturers say trade with Canada is going ahead and shows steady improvement over the results of a corresponding period last year.

Amongst the dry goods buyers who have arrived in the United Kingdom lately are Messrs, J. D. Ivey, Toronto; Wm. Waugh (Silverman & Boulter, Montreal), and P. C. Small (J. H. Pack & Co., Montreal and Winnipeg).

Amongst the changes in style spoken of for next spring is the supplanting of organdies and fancy muslins by zephyrs and ginghams. A Canadian manufacturer's agent, who is usually well informed, predicts a marked revival in the trade in these two latter fabrics. In fancy effects the samples show an excellent appearance. Solid checks, it is said, will be much in favor.

"Hats off the face!" is the cry from Paris, says the Economist, but there are no indications that this dictate is to be heeded immediately, at least, by milliners on this side of the Atlantic. Hats are worn, and will continue to be worn, down on the face, and it can't be too far down to suit the tastes of some who are looked upon as style authorities. Of course, in the natural swing of things, hats will tilt the other way, but it will not be to-day nor to-morrow.

The Manchester correspondent of the Drapers' Record writes:—"The new steamship line between Manchester and Canada has now got to work, the "Parkmore," which came up the canal on Saturday from the Dominion, having already booked over 1,000 tons of cargo from Manchester for her first trip to Montreal. It has already been explained in the Record that as far as piece goods are concerned the volume of traffic from Manchester for Canada is not likely to prove considerable. The trade in cotton goods with the Canadian houses is between two and three million yards a month, and this does not mean much cargo for a regular line of steamers. The great hope of the new service is in the miscellaneous traffic, inwards and outwards. The "Parkmore's" inward cargo included 388 head of cattle, a trade which may be cultivated with very satisfactory results in this large consuming district. It should be remembered that Glasgow houses have developed the Canadian trade with great energy and success, and that a considerable percentage of dry goods shipments to the Dominion will continue to go from the Clyde. It is, I believe, generally admitted that the Glasgow houses have cultivated the colonial trade with greater success than Manchester firms."

THE CHEESE BOARDS.

Twenty cheese boards offered 29,794 boxes of cheese this week, some 6,000 less than the same number of boards reported a week ago. The same week a year ago 30,794 boxes were boarded by seventeen boards. There is little doubt that the present low prices of cheese are influencing farmers to turn their milk into butter rather than cheese. Messrs. Cunningham and Lemessurier report shipments for the week ending June 11 at 22,394 as against 60,211 the similar week last year. Shipments to date are 113,354, against 186,003 boxes to date last year.

INSURANCE MATTERS.

A change has been made in the management of the Sun Life Insurance Company's branch at Winnipeg, Messrs. T. Gilroy and E. S. Baker having been made joint managers for Manitoba and the Northwest Territories. Mr. Baker has been cashier of the company for several years.

The plate glass underwriters of the United States met on Tuesday last, and adjourned for a later conference. All companies in the old compact, except the Union Casualty of St. Louis, were present. It was thought inexpedient to proceed with the arranging of a new deal until the two prominent companies, now at odds, have harmonized their differences.

It was well observed by Mr. Henry W. Eaton, in his presidential address to the National Board of Fire Underwriters of the United States, at New York, last month, that the percentage of profit on the fire insurance business for the past seven years is 2 16-100—these figures indicate a margin so narrow as to make it certain that a slight reduction, or increase in losses or expenses will inevitably throw the result on the other side of the ledger.

Mr. William Hendry, who has been so many years in the post, having resigned the management of the Ontario Life Assurance Company, that position was offered to Mr. Geo. A. Somerville, manager of the Huron and Erie Loan and Savings Society, London. We now learn from the London Advertiser that the board of directors of the Huron and Erie have declined to release Mr. Somerville from the position which he now so ably fills. He will, however, remain a director of the Ontario Mutual, and continue to devote some attention to the affairs of that company.

Not much is to be expected from the estate of the Massachusetts Benefit Life Association which went into liquidation about a year ago. It was stated on Wednesday before the Master-in-Ordinary at Osgoode Hall that the surrender value of the paid-up policies amounted to $9,000. Upon all policies not fully paid-up the Master-in-Ordinary granted Mr. Fitzgerald, Dominion Government Superintendent of Insurance Companies in Canada, the right to appraise, from whose decision the holders can appeal if dissatisfied. A legal gentleman stated in answer to this decision that the lapsed policies were not worth fighting for, as if their claims were allowed, sufficient returns could not be realized to pay the law costs.

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, June 16th, 1898, compared with those of the previous week :

CLEARINGS.	June 16th, 1898.	June 9th, 1898.
Montreal	$13,758,925	$14,883,184
Toronto	8,316,272	9,631,522
Winnipeg	1,799,172	1,912,608
Halifax	1,172,729	1,246,688
Hamilton	676,912	847,950
St. John	574,428	751,027
	$26,298,438	$29,272,979

Aggregate balances this week, $3,989,671 ; last week, $4,474,109.

—An apppropriation has been made by the Dominion Government of the sum of $75,000 for building an elevator at the port of Halifax. This amount is to be supplemented, we understand, by the City of Halifax to the extent of $50,000, though we have not seen any definite intimation that they have actually opened their hearts to the extent of passing a by-law to this effect. There are some live people in Halifax, however, with modern notions; and very probably they have been hammering into the old fogies of that rich city the idea that the way to get business is not to sit down and wait for it, but to hustle after it, and prepare to handle it when it comes. The Government at Ottawa has also voted $250,000 for increased accommodation of the Intercolonial Railway, at St. John, N.B., and $75,000 to build an elevator at the same place, to hold 750,000 bushels.

—A correspondent writes from the city of Mexico with respect to the development of that Republic : "This country is undoubtedly an advancing one, and will show great progress during the next five years. Foreign capital is coming in rapidly, as also a far better class of foreign settlers. Ways of living are, of course, very different from those of the north, and the different foreign elements of the population keep very much to themselves, so that the country can hardly be said to be an agreeable one from a social standpoint. The climate is the main redeeming feature. I doubt if it is much surpassed anywhere. From a business standpoint, Mexico offers great opportunities for the investment of capital, with, I should say, surer and better returns than anywhere on the continent. If I do not mistake, some of your relatives have traveled here, and you will therefore have received much information on the country generally."

—In the course of an address in Parliament last week, the Minister of Trade and Commerce referred to the export trade of Canada as increasing by leaps and bounds. It was desirable to make experiments for the purpose of opening new markets. Hence the Government had placed in the supplementary estimates an item of $5,000 for the encouragement of trade with British South Africa. The Government has appointed Mr. Moffatt, a commercial agent at Cape Town, and this vote, which was adopted, is to cover the expense of an experimental trip. Canada had been invited by the Government of Cape Colony to take part in the exhibition to be held during the coming autumn at Grahamstown. If a vessel sailed direct, it was likely that many Canadian manufacturers and merchants would avail themselves of exhibiting their goods there.

—The activity of trade in the United States and Canada is reflected in the clearing house returns in both countries. Bank clearings at eighty-nine American cities for the week ending June 9, showed total clearances $1,324 766,412, an increase of 31.2 per cent , as compared with the corresponding week last year. Outside of New York city the clearances were $526,225,069, an increase of 23.4 per cent. The bank clearances for the Dominion of Canada were: at Montreal, $14,883,184, increase 8.8 per cent. ; at Toronto, $9,631,522, increase 18.7 per cent. ; at Winnipeg, $1,112,608 ; at Halifax, $1,246,688, increase 5.9 per cent.; at Hamilton, $847,950, increase 26.2 per cent. ; at St. John, $751,021, increase 12.5 per cent. Total clearings $29,272,979, as against $25,554,644, equal to a gain last week of 16.27 per cent.

—At the annual meeting of the Winnipeg Sub-section of the Bankers' Association held in that city on June 7th, the officers elected for the ensuing year were :—F, H. Mathewson, president ; F L. Patton secretary.

Meetings.

MERCHANTS BANK OF CANADA.

The annual meeting of the Merchants Bank of Canada was held in Montreal at noon on Wednesday, 15th June. It was one of the best attended of recent years, the shareholders being naturally desirous to hear more fully the reasons that made it necessary to reduce the Rest to meet appropriations and adjustments.

Among those present were: Messrs. Andrew Allan, president; Montagu Allan, James Alexander, John Burke, W. H. Benyon, Senator James O'Brien, Henry Barbeau, John Crawford, James Crathern, John Cassils, J. P. Cleghorn, A. C. Cummings, Henry Dobell, T. A. Dawes, M. S. Foley, Jonathan Hodgson, A T. Higginson, G. M. Kinghorn, Thomas Long (Toronto), Robert Mackay, W. R. Miller, John Morrison, Hector Mackenzie, J. L. Marler, A. F. Riddell, G. W. Robinson, Richard White, James Williamson, George Hague, general manager; Thomas Fyshe, joint general manager, and others.

It was moved by Mr. A. Allan (in the chair), and seconded by Mr. Hector Mackenzie, vice-president, that the report be taken as read, and this was agreed to.

REPORT.

The directors beg to report to the stockholders the result of the year's operations, and also of the special examination of doubtful assets, securities, and properties made by the joint general manager.

The ordinary profits of the bank have been diminished by pressure of competition, but the losses arising from failures of customers during the year have been small, with, however, one exception, arising from a very heavy shrinkage in value of the security held for an important account necessitating a large appropriation out of profits of the year to meet it.

The working of the business of the year has, therefore, been as follows:

Net profits, after payment of interest and charges and providing for bad and doubtful debts, accruing during the year, including the above named, were		$440,437 96
Balance from last year		141,717 22
		$582,155 18
Out of which the usual dividends were paid of 8 per cent.		$480,000 00
Leaving a balance of		$102,155 18
The special examination resulted in appropriations and adjustments at head office and branches (after deducting contingent account)	$408,941 30	
And bank premises and furniture were reduced	44,372 00	
	$453,313 30	
This was met by a transfer from rest account of		400,000 00
Leaving a balance to be carried forward to next year of	48,841 88	
	$502,155 18	$502,155 18

STATEMENT OF LIABILITIES AND ASSETS AT 31ST MAY, 1898.

Liabilities.

			Last Year.
1.—To the Public.

Bank premises and furniture		532,045 01	550,848 70
Other assets		27,662 11	14,038 42
		$25,425,413 65	$24,259,340 58

The directors trust that there may be considerable recoveries from these appropriations, but it has been deemed most desirable to make large allowances for contingencies.

The volume of business of the bank has been well maintained, so far as deposits and circulation are concerned, but the diminished demand for mercantile loans and discounts is reflected in the balance sheet. A corresponding increase will be found in the investments of the bank in bonds, debentures and call loans.

The large developments of business in the North-West have led to the consideration of favorable opportunities for business there, and branches have been opened at Portage la Prairie, Neepawa and Souris in Manitoba, at Medicine Hat in Assiniboia and Edmonton in Alberta.

The expenses connected with the opening of these branches have been considerable, and have added to the charges for the year. The directors trust that hereafter they may prove a steady source of profit to the bank.

PENSION FUND.

The bank already possesses the nucleus of a pension fund, but there has hitherto been difficulty in organizing it on a proper basis. It is, however, the intention of the board to give attention to the matter during the coming year, and it is hoped that a carefully considered scheme may be presented for adoption at a future meeting.

Meantime the annual cost of the pensions allowed to various former officers forms a part of the annual charges of the bank.

The various officers of the bank have discharged their duties to the satisfaction of the board.

All respectfully submitted.

ANDREW ALLAN,
President.

Montreal, June 9, 1898.

In addition to the liabilities shown in this statement, the bank is under obligation to pay $12,031 yearly in pensions to retired officers, for which there is no special provision in the assets.

G. HAGUE,
General Manager.
THOS. FYSHE,
Joint General Manager.

MR. HAGUE'S ADDRESS.

Mr. President and Gentlemen.—The statement presented to you to-day is one of a kind that has not been put before you for the last twenty-one years. The circumstances of that time are, I dare say, fresh in the memory of some here present, and I only recall them to remind you that since the reorganization of 1877 a fairly uninterrupted course of prosperity has attended the bank. During this time the Rest increased from $400,000 to the figure at which it stood last year, viz., $3,000,000. Another element of calculation has now been introduced into the bank, in the shape of a coadjutor to the general manager, whose conclusions are somewhat different from those that prevailed up to last year, and have resulted in the appropriations such as have been laid before you, necessitating, I regret to say, a cutting down of the Rest to $2,600,000.

This reduction and the appropriations have arisen from a review of the bank's business, extending back for a number of years. Now, when adverse conditions are operating, year after year, as has been the case for four or five years past, over such an immense area as that in which the business of the bank is carried on, it can easily be seen that a difference of a few hundred thousand dollars may arise in the judgment formed by one person, or by another, in reviewing it. This is precisely what has taken place.

I am not sure, personally, if the contingencies of the future have not been too liberally discounted. At any rate, I should not be willing that my record as a banker, or that of our managers (for they are equally concerned in it) should be finally judged by these appropriations. But whatever my private opinion may have been I have acquiesced in the general desire felt by the board, to rather err—if they did err at all—in the direction of making large allowances and taking the benefit of doubts.

The directors have expressed a hope that there may be recoveries. Time only will show whether this is a well founded hope or not.

One thing is clearly evident from the balance sheet, viz., that the bank is financially in a very strong position, having immediately available assets, equal to nearly 50% of its whole liabilities—and being in a position to largely increase its commercial business whenever sound and reliable accounts are offered to us. Its strength also will enable it to support its customers in a time of difficulty, if they need support and are worthy of it. This has always been the policy of the bank, and doubtless always will be.

Having said this much with regard to our own position, I will add only a word or two as to the business of the country generally. It is not my intention to add anything to what has been so well said in another place as to the general appearance of prosperity in the country at present. Everything that was then said we all heartily concur in.

But I specially call your attention to what was emphasized so wisely by the vice-president of the Bank of Montreal, viz., that we are only just emerging from a long continued period of depression. This is most true, and it is in the light of this that I would ask a candid judgment on some of the appropriations made. But a change for the better has undoubtedly set in.

The Province of Manitoba and the adjacent territories have been exceptionally favored this year, having a most abundant crop, which has been realized at prices much beyond anything known during the last few years. In not a few cases farmers have realized nearly the whole value of their property by this single crop, a condition of things which has enabled many debts to be discharged, both current and overdue, and giving the province and adjacent Territories such an uplifting as has not been known for some time. A most satisfactory feature of the position is, that settlers are coming in from the adjacent North Western States.

I have long held that it is to this overflow of population into our country that we must look for a larger filling up of the vacant lands than has before been known. We have just as free institutions as our neighbors, every advantage of civilization, a better soil and climate, all educational and religious privileges—in fact, everything to attract a well conducted and industrious population.

It is satisfactory to note that the area placed under crop this year is 20 per cent. larger than before.

Some districts of Ontario are remarkably prosperous under the influence of diversified culture.

But banks occasionally learn by bitter experience that their mercantile customers may fail—and fail badly—even when the country is generally prosperous.

The decrease in insolvencies has not been nearly so marked as might have been expected. There is doubtless a large amount of unsound business still being done in the country, and the credit system is, in some departments of trade, a very bad one still.

In this connection I must say that it is not an unmixed evil that no Insolvency Bill has been passed during this session. With such a discharge clause as it was proposed to introduce, it would, I am convinced, have resulted in a vast increase in insolvencies in every part of the Dominion.

It is satisfactory to note that Nova Scotia is getting rid of one of the greatest blots in our legislative system, and that after 1st July no more of those iniquitous preferences will be allowed, that have been such a detriment to the merchants of other provinces.

I have little more to say except this—that the time when money is plentiful and business is generally prosperous is always a time when the seeds of future trouble are sown. It is timely to recall past experiences, both for our own guidance and that of others. I will, therefore, repeat what has been said before, but is so constantly forgotten—that insolvencies are not matters of chance, but result from well known causes; the principal of which are trading beyond means, speculating in commodities not ordinarily dealt in, and want of care in taking and giving credit.

A time of high prices for grain, or any other article, though beneficial to the producer and the country at large, is a time of great danger to those who are dealing in it.

A safe condition of trade would be to come as near as possible to the rule of buying and selling almost simultaneously. Grain must, of course, be held by somebody, but the more widely the risk is diffused the safer for the individual trader.

The reduction of interest by the Government on its savings bank deposits is a measure in the interests of the country generally.

It is not reasonable that the Government should pay as high a rate of interest on money which may be withdrawn at short notice, as for moneys of which repayment cannot be demanded for twenty or thirty years. The former calls for the holding of reserves; the latter does not.

As to the bank generally, you will bear in mind that we have a large and valuable connection amongst the mercantile community, the fruit of many years of watchful endeavor on the part of the directors, the general manager, and the managers of branches.

I think you may rely on the best being made of it. It is with a view of extending our mercantile connections that the new branches have been opened of which you have heard.

THE DISCUSSION.

It was moved by the president, and seconded by the vice-president, that the report of the directors, as submitted, be, and the same is hereby adopted, and ordered to be printed for distribution among the stockholders.

Mr. John Morrison offered some criticisms of the financial statement, and objected to the establishment of a pension fund.

Mr. John Crawford expressed his regret that so large an amount had been written off on appropriations. He looked upon the bank as one of the staunchest in the Dominion of Canada, and thought it had been watched by a careful Board of Directors and by a general manager reputed to be one of the ablest bankers in the Dominion, a veteran certainly in everything connected with banking and financial interests. He had always looked upon Mr. Hague as exceptionally able and most conservative. He had been told that the appropriation of $400,000,000 from the rest was with view of giving increased prestige to the incoming general manager, that this apparent loss would be recouped in a short time, and that the Board of Directors hoped that a very large sum would be realized in the future out of the appropriations now made. This was the usual case when new general managers appeared. But he submitted that in the present instance there was no need to employ this expedient. Mr. Fyshe had quite sufficient prestige in the reputation with which he came to the bank. He had heard Mr. Fyshe's praises sounded, not only by ordinary people, but by experts in the banking business. Nothing out of the ordinary course was needed to increase his prestige or his hold on the community. (Applause). With reference to the valuation of bank premises, he would like to know whether these assets were worth $532,945, as stated, or were worth more.

The General Manager,—I have no objection to answer that, with the permission of the president. Those of you who met here a long time ago are aware that we wrote off $67,000 from the valuation of our buildings in 1877. Since then we have written off a very large amount of money at various times to bring the premises down to a practical and business-like value, and this building stands in our books at a great deal less than it has been recently valued at. None of the premises are put at fancy values; they are put at what they are worth for business purposes. They are all in good repair, and would be worth that amount to any bank carrying on business.

Mr. Crawford,—How many bank buildings do we own?

The General Manager,—I will read the names out. We own about half of our buildings and rent the other half. From the rents we have to pay we are able to judge pretty well as to the value of the buildings we own. We have bank premises of our own at Montreal, Toronto, London, Winnipeg, Kingston, Chatham, Belleville, Brandon, Ingersoll, Kincardine, Owen Sound, Perth, Stratford, St. Jerome, St. John's, St. Thomas, Walkerton, Portage la Prairie and Neepawa. Some of them are very handsome buildings.

Mr. Crawford,—Are they all paid for?

The General Manager,—Oh, yes, we don't acquire buildings on credit.

Mr. Crawford,—I think the conclusion of my colleagues, as of myself, will be that they are worth more than they are set down for in the assets.

The General Manager,—Some of them are as handsome buildings as this, though they are not so large. They are just as good for the places they are in.

The motion for the adoption of the directors' report was then carried unanimously.

Mr. Crawford then moved a vote of thanks of the shareholders to the president, vice-president and directors for their conduct of the business of the bank during the past year, and in seconding the motion,

Mr. James Crathern said that no doubt the affairs of the bank had been submitted to the severest possible scrutiny and that some of the anticipated losses and shrinkages might never occur. The motion was adopted unanimously.

The old board of directors was elected, as follows: Mr. Andrew Allan (of H. & A. Allan), president; Mr. Hector Mackenzie (of J. G. Mackenzie & Co.), vice-president; Mr. Jonathan Hodgson (of Hodgson, Sumner & Co.), Mr. H. Montagu Allan (of H. & A. Allan), Mr. John Cassils (of Shaw Bros. & Cassils), Mr. J. P. Dawes (of Dawes & Co., Lachine), Mr. T. H. Dunn (Quebec), Mr. Robert Mackay (Montreal), Mr. Thomas Long (Toronto).

BANK OF TORONTO.

The forty-second annual meeting of the stockholders of the Bank of Toronto was held on 15th inst.

On motion George Gooderham, Esq., was called to the chair, and Mr. Coulson was requested to act as secretary.

Messrs. Walter S. Lee and Alfred Gooderham were appointed scrutineers.

By request of the chairman the secretary read the following report:

REPORT.

The directors of the Bank of Toronto beg to present to the stockholders a statement of the result of the operations of the past year, together with a copy of the balance sheet of 31st May last,

The net profits for the year, after making full provision for all bad and doubtful debts of the bank and deducting expenses, interest accrued on deposits and rebate on current discounts, amounted to the sum of		210,659 61
Carried forward from last year		$ 89,687 40
		$300,347 01
This sum has been appropriated as follows:		
Dividend No. 83, 5 per cent	$100,000 00	
Dividend No. 84, 5 per cent	100,000 00	
		$200,000 00
Carried forward to next year		$100,347 01
		$300,347 01

There has recently been an improvement in many departments of trade, and the present prospects seem favorable for a season of increasing activity in business.

The various officers of the bank have fulfilled their duties to the satisfaction of the board.

The whole respectfully submitted.

(Signed.) George Gooderham,
President.

(Signed.) D. Coulson,
General Manager.

The report was adopted and the thanks of the stockholders were tendered to the president, vice-president and directors for their careful attention to the interests of the bank.

The following named gentlemen were elected directors: George Gooderham, William H. Beatty, Henry Cawthra, Robert Reford, Charles Stuart, William G. Gooderham and Geo. J. Cook.

At a meeting of the new board Geo. Gooderham, Esq., was unanimously re-elected president, and William H. Beatty, Esq., vice-president.

IMPERIAL BANK OF CANADA.

The twenty-third annual general meeting of the Imperial Bank of Canada was held in pursuance of the terms of the charter at the banking-house of the institution in Toronto, June 15, 1898.

There were present: H. S. Howland, T. R. Merritt, St. Catharines; William Ramsay, of Bowland; T. Sutherland Stayner, Robert Jaffray, Elias Rogers, Hugh Ryan, L. Ogden, W. Gibson Cassels, William Gordon, I. J. Gould, Uxbridge; Nehemiah Merritt, R. L. Benson, O. F. Rice, Anson Jones, Rev. E. B. Lawler, Thomas Walmsley, J. G. Ramsay, Dr. L. S. Oille, St. Catharines; Dr. G. Sterling Ryerson, A. E. Webb, E. B. Osler, William Hendrie, Hamilton; Thomas E. McCracken, Robert Thompson, R. W. Thompson, William B. Hamilton, H. C. Boomer, Prof. Andrew Smith, John H. Paterson, R. N. Gooch, William Spry, John Stewart, W. H. Cawthra, Charles Forrest, Fergus; W. T. Jennings, David Kidd, Hamilton; Henry Sintzel, G. B. Smith, D. R. Wilkie, etc.

The chair was taken by the president, Mr. H. S. Howland, and the general manager, Mr. D. R. Wilkie, was requested to act as secretary.

The general manager, at the request of the chairman, read the report of the directors and the statement of affairs.

REPORT.

The directors have pleasure in meeting the shareholders at the twenty-third annual general meeting and in laying before them the statement of affairs of the bank at the close of the last financial year.

The unsubscribed portion of the capital stock of the bank, amounting to 364 shares, has been disposed of in accordance with the provisions of the Bank Act, and the premium realized therefrom, $32,760, has been passed to the credit of the Rest account.

The net profits of the year, after making full provisions for bad and doubtful debts, and for interest on unmatured bills under discount, have enabled your directors to pay the usual dividends at the rate of 9 per cent. per annum, to add sufficient to the Rest account to bring that amount up to $1,200,000, to apply the sum of $16,257.23 in reduction of bank premises account, and to carry forward at the credit of Profit and Loss account, $24,696.69 in excess of the amount brought forward from the previous year.

A branch of the bank has been opened in South Edmonton.

The widening area of the bank's business and the recognized importance of Montreal as a financial centre induced your directors to open a branch in that city, which they have every reason to believe will tend to maintain and strengthen the bank's standing and business facilities throughout the Dominion.

Your directors take this opportunity to express their appreciation of the faithful and efficient manner in which its interests in Montreal and elsewhere have been attended to by the Bank of Montreal for the past twenty-three years.

The building in occupation by the branch at Winnipeg for some years past has been purchased by the bank. Alterations are now in progress to adapt it to the growing requirements of the bank.

A by-law will be submitted for your approval authorizing the formation of an Employees' Pension Fund, and providing for an annual contribution thereto from the funds of the bank.

Arrangements have been made with the Alaska Commercial company and the Hudson's Bay Company, which afford the bank excellent facilities for transacting business wherever those companies are reresented throughout Alaska and the North-West Territories of Canada.

The branches of the bank have all been carefully inspected during the year.

The officers of the bank continue to perform their respective duties to the satisfaction of the directors.

All of which is respectfully submitted.

H. S. Howland,
President.

Twenty-third Annual Balance Sheet, 31st May, 1898.

PROFIT AND LOSS ACCOUNT.

Dividend No. 45, 4 per cent. (paid 1st December, 1897)		$ 80,000 00

D. R. Wilkie,
General Manager.

The usual motions were passed.

The scrutineers subsequently reported the following shareholders elected directors for the ensuing year: Messrs. H. S. Howland, T. R. Merritt, William Ramsay, of Bowland; Robert Jaffray, Hugh Ryan, T. Sutherland Stayner, Elias Rogers.

At a subsequent meeting of the directors Mr. H. S. Howland was re-elected president, and Mr. T. R. Merritt, vice-president for the ensuing year.

By order of the board.

D. R. Wilkie,
General Manager.

Toronto, June 15, 1898.

STANDARD BANK OF CANADA.

The twenty-third annual meeting of the shareholders of the Standard Bank of Canada was held at the head office of the bank on Wednesday, 15th June, 1898.

REPORT.

The directors submit herewith the balance sheet and Profit and Loss account of the bank as at 31st May, 1898, and have pleasure in stating that the business of the year has shown some improvement, notwithstanding the large accumulation of funds during part of the year, for which there was no safe outlet.

The net earnings have enabled them to pay the usual half-yearly dividends of 4 per cent. each and apply to the reduction of office safes and furniture account $5,000, and carry forward to Profit and Loss account $30,157.95, which account now amounts to $101,199.05.

The head office and agencies have been inspected during the year, and the officers continue to discharge their duties to the satisfaction of the board of directors.

All which is respectfully submitted.

W. F. Cowan,
President.

Geo. P. Reid,
General Manager.

Toronto, 31st May, 1898.

The chair was taken by the president, W. F. Cowan, Esq., and George P. Reid, general manager, was appointed secretary to the meeting.

The minutes of the last annual meeting were taken as read.

The President, after reading the report and statements and making a few remarks thereon, moved, seconded by the vice-president, "That the report and statements now read be adopted and printed for distribution among the shareholders."—Carried.

Moved by Mr. Wm. Glenny, and seconded by Mr. Thos. Gilmour, "That the thanks of the shareholders are due and are hereby tendered to the president and vice-president, and the other directors for their valuable services during the year."—Carried.

Moved by Mr. David Smith, and seconded by Mr. W. Francis, "That the thanks of the meeting be tendered to the general manager and assistant general manager and inspector, agents and other officers of the bank for the zeal with which they have discharged their respective duties during the year."—Carried.

Moved by Mr. Wm. Spry and seconded by Mr. W. Francis, "That the polling for the election of directors do now commence and continue until 2 o'clock, unless five minutes shall have elapsed without a vote having been tendered, in which case the poll to be closed at once; and that Messrs. J. K. Niven and C. C. Baines do act as scrutineers."—Carried.

The scrutineers declared the following gentlemen unanimously elected directors for the ensuing year, viz.: Messrs. W. F. Cowan, John Burns, W., F. Allen, Frederick Wyld, A. J. Somerville, T. R. Wood and James Scott.

The directors at a subsequent meeting re-elected W. F. Cowan, Esq., president, and John Burns, Esq., vice-president.

George P. Reid,
General Manager.

Toronto, 15th June, 1898.

THE ONTARIO BANK.

The annual meeting of the shareholders of the Ontario Bank was held at the banking house, Toronto, on Tuesday, 14th June, 1898.

Among those present were: G. R. R. Cockburn, Donald Mackay, Hon. J. C. Aikins, J. K. Macdonald, A. S. Irving. Dr. J. Carlyle, Wm. Spry, John Hallam, R. D. Perry, John Flett, R. S. Williams, David Smith, A. P. Choate, D. Ullyot, (Peterboro'), H. S. Scott, F. B. Polson, Joshua Ingham, F. M. Purdy and others.

On motion Mr. G. R. R. Cockburn was called to the chair, and Mr. McGill was requested to act as secretary.

Messrs. J. K. Macdonald and F. M. Purdy were appointed scrutineers.

At the request of the chairman, the secretary read the following report:

REPORT.

The directors beg to present to the shareholders the 41st annual report for the year ending 31st May, 1898, together with the usual statement of assets and liabilities:

The net profits, after deducting charges of management, interest accrued upon deposits, and making provision for all bad and doubtful debts, were.		$ 84,648 49
Profit and loss (brought forward from 31st May, 1897)..		17,595 00
		$102,243 49
Which have been appropriated as follows:		
Dividend, 2½ per cent., paid 1st December, 1897	$25,000 00	
Dividend, 2½ per cent., payable 1st June, 1898	25,000 00	
Added to Rest....	20,000 00	
Reserved for officers' guarantee fund....	5,000 00	
Written off bank premises	5,000 00	
		80,000 00
Balance of profits carried forward		$22,243 49

Your directors desire to place on record their regret at the loss sustained by the bank in the death of their late colleague, Mr. George Maclean Rose, who was for so many years a director of this institution.

During the year a branch of the bank has been opened at Alliston, Ont.

The Rest account has been increased to $85,000, and the Profit and Loss account to $22,243.49.

The bank premises and furniture account has been reduced by $5,000.

All the offices of the bank have been inspected during the year.

The bank has had a fairly profitable year and both the deposits and circulation show a considerable increase.

All of which is respectfully submitted.

George R. R. Cockburn,
President.

SURETYSHIP AS OLD AS THE RECORDS OF CIVILIZATION.

Repeated efforts have been made to trace insurance to its beginnings. Evidences of contracts allied to those of marine insurance have been claimed to exist as early as the reign of Claudius Caesar. But marine insurance, hitherto assumed to be the oldest, must apparently yield precedence to what has been supposed the most modern application of the insurance principle. The Law Students' Helper thus summarizes some of the latest discoveries in Mesopotamia:

"Prof. Hilprecht recently made some most interesting discoveries of legal documents in Babylonia. One find is a guaranty for twenty years that an emerald is so well set that it will not fall out during that time. It is signed by the three guarantors with seven witnesses and an official who is described as the 'scribe of the Concordance of Proper Names.' The document is concluded with the 'thumbnail mark of Bel-ahiddina, Bel-shuna and Hatin instead of their seal.' Another document shows how a Babylonian subject becomes surety for the release of his nephew from prison on condition that he will not leave Nippur without permission. Another is where the head of a family complains that the servants of another have robbed him, and the document witnesses that the property having been restored, neither he nor those under him will institute legal proceedings for the theft. There are leases of various kinds, and contracts for the sale of sun-dried bricks and other merchandise, for the loan of seed corn and oxen for ploughing, and a variety of other documents of ordinary business life, which show very evidently that human life and human operations were very much alike, and yet in other respects widely different from what they are now, and above all, that the inhabitants of this recently unearthed city had great capacity for business and had made greater progress in the development of what are often considered as modern commercial usages than has yet been believed."

Nippur is the oldest city whose ruins have yet been explored in Babylonia. It was old before Nineveh was founded. Its ancient glory was departing when Babylon was in its prime. When Prof. Peters, a few years ago, chose its mounds as a site in which to dig for ancient records in the interest of American Archaeologists, the richness of the find was not suspected. It proved to be the chief city of lower Mesopotamia, long antedating Babylon, with a history stretching back far beyond any previous records of civilization.

Yet here in these buried monuments of the past we read a story of business methods which might have been written of today. Customs which we have been taught to look on as modern are found familiar to the merchants of six thousand years ago. Ur of the Chaldees, from which Abraham emigrated, was a younger neighbor of Nippur and through its customs this founder of the Jewish race might have learned the practice of suretyship.

The eighth annual convention of the Canadian Electrical Association is to be held in Montreal, on the 28th, 29th and 30th instants. We observe that the Canadian Electrical News has issued a specially interesting number for June, illustrating the rapid development of electricity in Canada. It contains illustrations and particulars of the electrical features of Montreal. Other articles worthy of mention are: "The Mooted Wireless Telegraphs," by D. H. Keely, superintendent Dominion Telegraph System; "The Cataract Power Company's Works," in course of construction (illustrated); description of C.P.R. Copper Wire from Montreal to Vancouver, B.C., with portraits of officials and superintendents of construction; map showing long distance lines and offices of the Bell Telephone Company.

AMERICAN FINANCIAL AFFAIRS.

The New York circular of Henry Clews & Co., dated June 11, 1898, says: Stock exchange interests are in a transitional state. As indicated in our advices of a week ago, the larger operators have lately been doing considerable in the way of realizing of profits on the standard stocks; and that process seems to have now reached its results in a generally lower range of prices for that grade of securities. The fancy and lower grade of stocks, however, which have received little attention and stood at relatively low prices during the manipulation of the better class, are now coming in for their turn in the game and are being actively dealt in, with some considerable advances. This is a common routine in Wall street campaigns, and the only question in this instance is—how long this movement in the cheap list may continue and how far their prices will be further advanced? * * *

The high-priced stocks which for some time past have led the upward movement have risen beyond a range to make them inviting to buy for an additional up-turn. There is no disguising the fact that many of the large operators through whose efforts prices have recently been advanced, have sold out and are now more interested in making lower prices than higher ones, to enable them to load up again. The incentive for selling was mainly the revival of the silver question. It is regarded as a menace to the business situation, and is being used as a pretext to mark down the prices of stocks. Appearances indicate wavering prices before the market again gets into a position which will form a basis for another upward whirl. The increase of silver money or its equivalent to the extent of $42,000,000 at a time when money is being required to so great an extent for war purposes, is a matter in itself of no very serious moment excepting for the ridiculous feature in connection therewith—the idea of calling it so much profit for the Treasury, when as a matter of fact the Government stands as having made a loss of over $80,000,000 in the depreciation from the average price at which the silver was bought and the present market price of silver bullion; still, Congress is legislating on the basis that the Government will realize a profit of $42,000,000.

The prospect of an early issue of War Bonds does not escape the attention of operators; but it excites no misgivings as to the course of the Stock market. With such an extraordinary accumulation of money in the banks, the payments for the bonds are not likely to perceptibly affect the ease in the loan market. The Treasury may be trusted not to lock up the proceeds of its borrowings; but, as usual under like negotiations, it will deposit the receipts in the National banks, until they need to be drawn against in the ordinary course of the Government's disbursements; and thus the currency will maintain its normal activity of movement.

CANADIAN WOOD IN BRITAIN.

Less Canadian wood went to Britain during May, according to Farnworth & Jardine's wood circular of June 2nd. The arrivals at Liverpool from Canada in May have been 18,361 tons register, against 24,273 tons register, during the corresponding month last year, and the aggregate tonnage to this date from all places during the years 1896, 1897 and 1898 has been 120,996, 122,388 and 105,994 tons respectively Business during the month has continued quiet; imports have generally been moderate, and stocks, although ample, are now reduced to a more healthy position, but there is no improvement in values to report; ocean freights have had a downward tendency throughout the month.

Canadian Woods.—Pine Timber.—Of Waney and Square there is little change in the market to report. The first of the season's shipment has just arrived, by steamer, and no doubt will go direct from the quay into consumption; the stock, however, is sufficient, and there is no change in value. Red Pine continues neglected; there is little enquiry, and prices are low. Oak.—The import consists of one parcel just arrived but not yet landed; there is no change in value, and the stock, which consists chiefly of States wood, is much too heavy. Elm.—The import has consisted of round wood from the United States; of square wood there is a fair enquiry, and the stock is light. Pine Deals, Boards, etc.—The import has been much in excess of the previous two years, and although a fair quantity has gone direct from the quay into consumption the stock is most excessive, and sales are difficult to effect.

New Brunswick and Nova Scotia Spruce and Pine Deals.—The import has been on a very limited scale, and although the deliveries have been fair and the stock now reduced to a moderate compass, there is little improvement in values to report. Owing to the high freight still ruling shippers are asking advanced prices.

Birch.—The import of logs has been moderate; the stock is light, and recent sales show a considerable improvement in value. Planks have also been imported moderately, and with a fair demand prospects are better.

United States Oak.—From Mobile there has been an import of about 71,000 cubic feet, chiefly on consignment. The demand continues dull and deliveries unsatisfactory; prices rule low and stocks are ample. Oak Planks have been imported more moderately, and values have slightly improved, owing to advance in freights. The deliveries have been fairly satisfactory, but the stock is large, and moderate imports only are advisable. The total stock amounts to 337,000 cubic feet.

Pitch Pine.—The arrivals during the past month have been 10 vessels, 8,418 tons, against 8 vessels, 9,472 tons, during a like period last year. During the latter part of the month there has been a decline in c.i.f. values, and the market is weaker, buyers anticipating a decline in freights. Of hewn the import has been about 70,000 cubic feet; there has again been a good consumption, and stocks are moderate. Of sawn the import has been about 384,000 cubic feet; the consumption has been satisfactory, and the stock continues moderate. Deals and boards have come forward freely; there has been a good consumption, but the stock is too heavy.

Oregon and British Columbian Pine.—There have been no arrivals; the consumption has been fair, and values are steady. Stocks are heavy.

PROMISING OUTLOOK FOR COPPER.

The strong statistical position of copper has been called attention to frequently of late. To the causes hitherto accounting for the recent advance, however, there has been added the further stimulus of heavy calls both from our own and other governments, for military and naval purposes. "This is true," says The Age of Steel, "of such leading nations as Germany, France, Russia, Japan and Great Britain. The war with Spain has quickened American demand to a degree far above the normal. In torpedo tubing, cartridge shells, and other military purposes the government is a heavy buyer. This will doubtless have an effect on the export of copper, for with home consumption of an unprecedented character there will be less of a surplusage to fill foreign orders. This means a paucity of supply for other than home-markets. This depletion of stocks on foreign orders may be emphasized in the minimizing of Spanish products. Military conscription will reduce the number of miners, while abnormal taxation may seriously interfere with the cost of production. It is also reasonable to suppose that shipments of copper, though not in the text of contraband of war, will be more or less attenuated by the hazards involved even under neutral flags. Other sources of supply will be affected by the same conditions, and the situation would seem to strongly favor an enhancement of values. There may be shrewd market manipulators that will interfere with what seems to be a logical sequence to the conditions previously named, but for the time being it is not likely that they can materially change the situation."

FAST TRAINS IN BRITAIN.

With regard to fastest timings between stations, the Caledonian, according to The Engineer, is still easily first. During the last month or two the 8 p. m. express from Aberdeen has been accelerated to make the run from Forfar to Perth, 32 miles 40 chains, in thirty-three minutes, start to stop, or at the rate of 59.1 miles an hour. This is, of course, by far the fastest timing now in existence. The Northern Railway of France comes next to it with Paris-Amiens, 81¾ miles in eighty-five minutes, equal to 57.7 miles an hour. But the Caledonian again comes in ahead of all British lines now and takes third, fourth and fifth places with Stirling-Perth, 33 miles 2 chains, in thirty-five minutes, equal to 58.5 miles an hour; Perth-Aberdeen, 89¾ miles in ninety-seven minutes, 55.6 miles an hour; and Perth-Forfar in thirty-five minutes, equal to 55.5 miles an hour. After these come the Great Northern, Peterborough to Finsbury Park, 73¾ miles, in eighty minutes, equal to 55.3 miles an hour, with a shorter run at the same speed; and the Great Central, Grantham-Retford, 33 miles in thirty-six minutes, equal to 55 miles an hour.

—The silver in the United States treasury at Washington is to be coined into cheap dollars at the rate of $1,500,000 a month, and circulation notes to that amount are to be issued. The process is to go on for five years. This is the price paid to the silver men in Congress for allowing the war revenue measure to pass. The nation's necessity was their opportunity.

—A good provision in the new Revenue Bill imposes a tax of four cents a barrel on adulterated flour. The amendment provides that packages containing mixed flour shall be labelel as such and that the tax shall be collected by means of coupon stamps, as in the case of tobacco taxes. A great deal of adulteration is practised on wheat flour by mixing corn meal and other cheap materials with it, both for export and home consumption. The only objection to this tax, says an American paper, is that it is too low.

—A country school teacher in New South Wales recently gave a boy a problem for home work which happened to include the circumstance of "men working ten hours a day" in order to complete a certain work. On the next day the pupil presented the following note from his father: "Sur: I refuse to let Jim do his sum you give him last nite has it looks to me to be a slur at 8-hour sistum enny sum not more than 8 hours he is welcom to do but not more. Yours truely, Abram Blank, Senr."

—The fruit trade of British Columbia has now reached considerable importance and fruit growers are learning how to select desirable varieties for shipment east and the methods of packing. To encourage this trade the express company has reduced its rate from $4 to $2.40 per 100 pounds from Vancouver to Winnipeg. The rate for 1,000 pound lots will be still further reduced to the rate of $2.25 a hundred.

—"They tell me Mike's a bondholder." "Is that so?" "Yes; he went bail for a man that skipped."—Philadelphia Call.

COTTON ESTIMATES.

An article compiled from the detailed reports of correspondents all over the Southern states appears in The New York Chronicle. The tabulated statement shows a net decrease compared with 1897 of 0.45 per cent., making the total 21,956,840 acres in 1898, against 22,056,792 acres in 1897. Its conclusions are as follows:

"Acreage has decreased. Less land in cotton is clearly in evidence in sections where the land is poor, and also where diversification of crops is possible; from this extreme the tendency grades down to nil or further than that, to an inclination in the opposite direction (that is to an increase) in the sections where the soil is richer. For illustration, along the Atlantic States we find both poor land and other crops interfering with cotton production. Corn, wheat, tobacco have all received added attention. Likewise, to a small extent, the cold, backward rainy spring which has been experienced this year in sections of those States has interfered with seeding. But when we turn to the Gulf States and to the rich delta of the Mississippi and its tributaries, or when we examine the returns from Texas, where wheat and corn equally with cotton, as may suit the occasion, can be raised to so great advantage, we find not a large increase but a small increase in cotton planting. The truth is, that although there was the past season, a margin of profit to the many in cotton sold on the plantation at 5c. a pound, it was a narrow one, a margin inclining one not to be reckless but conservative. As a consequence of this variation in influences working in different sections, we have additions in some States and reductions in others so nearly offsetting one another that the net decrease is very small—less than 1 per cent. As to maturity the crop is unquestionably a late one. Cultivation has been attended to all through the season. Condition of the plant in the Atlantic States is spotted. In some districts it appears to be very promising, while in others the reports are not favorable."

NEW ROADS AND PROJECTS.

Foley Bros., the St. Paul railroad contractors, have secured a contract from the Canadian Pacific Railway to build another strip of the Crow's Nest Pass line between Robson and Midway, British Columbia, a distance of 105 miles. The contract amounts to $3,000,000. The new branch in the West Kootenay country will make a complete line from Lethbridge, Alberta territory, to Midway. The line now ends at Kootenay lake, which is navigable a large part of the year. From Nelson on the west end of the lake is a completed line to Robson. The company will after the completion of the new branch have to build only from Midway to Penticton and thence to Hope on the main line to complete another grand transcontinental route, considerably shorter and more valuable than the present main line route. Locally the new branch will be invaluable as it penetrates a rich mining country, including the most important sections of the Boundary creek and Kettle river. This contract closed by the St. Paul contractors in connection with Peter Larson, of Helena, Mont., includes the grading, bridging, laying of ties and tracks and surfacing of the entire line, and will require twelve months of hard work. The estimated cost of $3,000,000 includes the bridging of a branch of the Columbia river at Grand Forks at the foot of Christian lake and the junction of Kettle river, a difficult and expensive piece of engineering. The Kettle river will also be bridged at Midway.—St. Paul Pioneer Press.

The Dominion government has decided to grant to Mackenzie & Mann a fiat to test in the Exchequer Court their claim for damages in connection with their provisional contract to build a railway to the Yukon, the bill for which was killed by the Senate. Vancouver advices state that Mackenzie & Mann have notified the Provincial legislature that, owing to the action of the Federal government, they will not accept the offer of $4,000 a mile for the Yukon Railway, as proposed by the British Columbia legislature.—Railway & Engineering Journal.

BICYCLE INSURANCE A FAILURE.

From all appearances the bicycle insurance company, which was so numerous about two years ago, is a thing of the past, and has gone to join the ranks of the insurance organizations long since dead which undertook to protect against burglaries, loss of situation and other peculiar ills to which the human race is liable. All of the above mentioned have passed out of existence, not from the common cause, the lack of patronage, but because of positive carelessness and oftentimes absolute dishonesty of those whom they intended to protect. Several years ago, when the first insurance company was organized to protect bicycles against loss by theft, offering to duplicate the stolen wheel at the expiration of a certain time, and in the meantime loan the loser a wheel, all for the sum of $2, the riders of this country were rather skeptical, but it soon became apparent that the concern was honest in its intentions, and a thriving business was worked up. Other concerns started up, and the bicycle insurance business became a factor in the industry. Then the spirit of dishonesty crept in and losses became alarmingly frequent. Unscrupulous riders had their wheels insured and then either hired some one to steal them or else allowed them to remain for hours at a time in public places, where they would present a ready chance for anyone who felt inclined to secure a wheel free of charge. The natural result was that the insurance companies which were not over honest made a practice of dodging their obligations at every possible chance, while those officials who valued their reputations were obliged to pay up and look pleasant. The failure of one or two of the largest concerns about a year ago gave a black eye to the business, but it was not until very recently that the last of the bicycle insurance companies passed out of existence by reason of a rigid enforcement of the insurance laws requiring companies to make large deposits with their home state governments.—Cleveland Cycling Gazette.

TORONTO SEEN FROM A DISTANCE.

Among the evidence of Toronto's recovered prosperity mentioned in the city treasurer's report for 1897, are the prompt payment of taxes, a distinct revival in the building trade, a decrease in the number of vacant houses and shops, an increase in the water services, and a falling off in the quantity of land sold for non-payment of assessments. The building permits for 1898 issued up to the beginning of this month were in excess of the whole issued in 1896. Toronto had a boom of the most aggravated kind, beginning ten years ago and it has taken a long time and some courage to get over its effects. Three and three-quarter millions were cut off the assessment values last year, and that was only the finishing of a process. It seems to have brought things to a rock bottom, though, and probably increases will henceforward be the rule, and the sign of renewed healthy growth.—Montreal Gazette.

—The total deal shipments to Europe from St. John in 1897 were 244,169,459 sup. ft., in 192 vessels; and to the United States and other foreign countries 96,752,000 sup. ft.—a grand total of lumber shipments for the year of 340,921,459 ft., valued at $3,938,401.

A GOOD CUSTOMER.

Japan is a splendid customer in United States markets. The little Japs have bought of us in the last twelve months 12,000 tons of steel rails; also 90 locomotives and 180,000 bales of cotton. This importation of American cotton broke all previous records in this line. Japan also buys large quantities of American lumber. Owing to the frequent occurrence of earthquakes in the land of Geisha, stone and brick houses are uncommon, and there is a growing demand for building lumber, which is being largely supplied by the United States. Those in the west, of course, have the larger share of this trade. Japan has 55,000,000 people, who are every day copying more and more closely European and American ideas of building.

HIS ADVERTISEMENT.

There was a man in our town,
  Who wasn't overwise;
He started into business,
  But didn't advertise.
Of course there is a moral
  Connected with the tale;
He runs an advertisement now—
  It's headed "Sheriff's Sale."

—The amendment which imposes a tax of 10 cents a pound on tea coming into the United States was passed against the votes of nearly all the Protectionists of the Senate. But why, asks The Record, should not a duty be imposed on coffee as well as on tea. A tax of three cents a pound on coffee would yield a revenue of nearly if not quite $20,000,000—almost as much as is obtained from the protective schedules of duties on textile fabrics in the Dingley tariff.

—The annual meeting of the Canada Eastern Railway took place last week at Fredericton, N.B. The following directors were elected: Alex. Gibson, H. H. McLean, F. E. Winslow, Alex. Gibson, jr., Alfred Rowley, James Gibson and Chas. Hatt. At a subsequent meeting of the directors Mr. Gibson was re-elected president and G. F. Gregory, Q.C., secretary.

—Mr. D. D. Mann, of Mackenzie & Mann, railway contractors, admits, according to a Vancouver despatch, that his firm has obtained the contract for building the railway from Robson to Penticton. The exact date for commencing operations, however, is not fixed

Commercial.

TORONTO MARKETS.

TORONTO, June 16th, 1898.

BOOTS AND SHOES.—Manufacturers and jobbers are busy completing their order lists for the autumn of 1898. Trade prospects are reported bright. The probability of an advance in leather on account of the continued strength of the hide market is not looked forward to with satisfaction.

DAIRY PRODUCTS.—The market is quiet and without special change. The recent rains have had a beneficial effect upon the pastures, and they are now in excellent condition. Together with the low price of cheese an abundance of grass has resulted in a considerable increase in the deliveries of dairy butter. Creamery remains as reported last week. Cheese is weaker, and quotations show a decline as against those of last week. Eggs are a fraction higher, at 10 to 10½c. per doz. The season's work with picklers is almost over, and with the exception of the few vats that each pickler has left unfilled in case of emergency, may be considered closed.

DRY GOODS.—There is no great activity on the part of the wholesale houses. Some woolen manufacturers are very busy, while others are inactive. In all lines of knitted goods business is brisk, and many of the mills are working overtime, but manufacturers of blankets are, we understand, none too well employed. For next spring trade prospects are considered good. Retailers the country over say that customers are asking for a better quality of fabrics, the importance of which, if true, can scarcely be exaggerated.

GRAIN.—The course of the wheat market the past week, as all the world knows on account of the publicity given the trade by the Leiter failure, is best described as a phenomenal slump. Several months ago, we were reporting advances of 10c. per bushel during a week, but now the tables are turned and downward fluctuations are as frequent and as marked as were the advances. Ontario winter and spring wheat is quoted 75 to 84c., and Manitoba hard, $1 to 1.16 per bushel. Oats are dull at a decline of 1c. per bushel, being quoted at 29 to 30c. Peas are quiet and unchanged. Rye, corn and buckwheat remain nominal.

GROCERIES.—There is not a very active movement in the trade. Staple supplies are moving very slowly. Coffee shows no change in spite of the interference in some primary markets by the war. Sugars are dull and at a decline of ⅛c. per lb. find only a moderate movement. The canning season, so far as small fruits are concerned, is now on and the consumption is being increased in this way. It is reasonable to expect that retailers' stocks will soon need to be replenished. The tea market is very excited, and as a consequence of the threatened imposition of an increased duty on tea in the United States, large quantities of tea are going forward from this market to that country. We are told of one shipment of five cars made from Toronto to parties in Chicago. The market is being cleared up and will start the new season on a firmer basis. California fruits are scarce and in some instances quite out of the market.

HIDES AND SKINS.—There is no change in the hide trade. Values remain very firm, and for No. 1 Toronto inspected green hides butchers are obtaining 8½c. and 9c. for steers. Cured are in small supply, and the small stocks in the hands of dealers are firmly held. It is reported that a number of them are sold ahead for some time. Pelts in the local market are quoted at 20c., and lambskins 25 to 30c. each. From Chicago, June 14th, only a limited volume of business was transacted in the market for packer hides, as buyers generally were holding back. A sale was reported of 1,200 native steers, June take-off, at 12½c., closing at 12¼ to 12½c. for native steers, 11¾ to 12¼c. for Texas, 10¾ to 11c. for butt brands, 10 to 10¼c. for Colorados, 10½c. for branded cows, 11½ to 11¾c. for heavy native cows, and 11¾ to 12c. for light ditto.

HOG PRODUCTS.—Values in all lines are firm, but in smoked meats there is special strength. Lard has advanced ¼c. per lb. and is in good demand. In the United States supplies are large, as the stocks of cutmeats at the four principal packing centres are reported at 311,000,000 pounds, against 270,000,000 the same time last year.

LEATHER.—Only a hand-to-mouth trade is being done. Orders are received in such a way as indicates that manufacturers are following a conservative policy and are disposed to buy no more than enough to satisfy present wants. With hide values at a basis of 9 to 9½c. per lb. ever tanner should attempt to secure an advance in the price of finished material. United effort to this end appears impossible and the trade interests remain in the hands of the few who are always looked to to lead in any movement.

WOOL.—Canadian fleece wool is coming into the market slowly, but in as large quantities as can be expected at the present range of prices. Merchants here are quoting 16c. per lb., and we have seen sales made at this figure. In certain country districts we are told of local competition leading to 17c., and even 18c. having been paid. Upon what the purchasers base their ideas for such prices as these we cannot say. It is possible the market may take a turn for the better, and these buyers may get their own out of the trade, but it is a chance. The arrivals for the fourth series of London wool sales, which closed 11th inst., are as follows:—New South Wales, 58,459; Queensland, 23.691; Victoria, 35,813; South Australia, 6,721; West Australia, 3,465; Tasmania, 8,944; New Zealand, 119,575; Cape of Good Hope and Natal, 51,420. Deducting 42,000 bales Australasian and 38,500 Cape of Good Hope and Natal, and adding 38,000 old stock leaves the available amount of wool for the fourth series 265,588 bales.

MONTREAL MARKETS.

Montreal, June 15th, 1898.

ASHES.—The market is still characterized by an entire absence of English demand, and values are more or less nominal owing to the lack of transactions. Receipts are also very limited. We quote first quality of pots $3.60 to $3.65, seconds $3.35 to $3.40; pearls $4.75 per hundred pounds.

CEMENTS AND FIREBRICKS.—For cement there is a steady, good demand at firm prices. Receipts since last writing have been 8,226 barrels of Belgian, and 600 barrels of British; of firebricks, 66,000. We quote: British cement $2.20 to $2.30, Belgian $1.80 to $1.90, firebricks $16 to $22 per thousand, according to brand.

DAIRY PRODUCTS.—Cheese exports do not as yet show much sign of catching up with last year's figures. Last week the shipments were 26,926 boxes, as against 59,126 boxes for the same week last year, and the shortage in the season thus far is 59,500 boxes. The cable quoted sixpence lower Monday, and sales of Quebec cheese this week have ranged about 6½c., Western quotes at 7¼ to 7⅜c. The exports of butter continue to show a gratifying increase over last year's figures, last week's shipments being 2,118 pckgs., as compared with 841 pckgs. the same week of 1897, and the total increase for the season so far is some 9,000 pckgs. Prices still tend to easiness and 16 to 16½c. per lb. is the outside figure for fine creamery.

DRY GOODS.—The changeable weather somewhat affects retail trade, but city dealers report business a good deal ahead of last year, and say it is easier to sell goods now at a profit, which may be taken as a fair indication of the generally better feeling prevailing. Travelers are pretty well all out with full lines of autumn samples, and report satisfactory business. Fall goods are arriving in considerable quantity, but most of the wholesale houses are putting them into bond in the meantime, so as to be able to avail themselves of the reduced duties which come into effect July 1st. Payments continue to be favorably reported upon.

FURS.—At the moment of writing the only cable report received regarding the London sales, which began yesterday, was to the effect that red fox, coon and mink were selling the same as March, and beaver same as January. Fuller advices will be available next week. We quote: Mink, large dark, $1.50; small, do., $1 to $1.25; marten, $1.75 to $2.25; fisher, $4.50 to $7; lynx, $1 to $2; otter, $1 to $12 for dark; pale, $5 to $7; red fox, large, $1.30 to $1.50; small, $1; cross fox, $3 to $6; bear, cubs, $3 to $7; medium, $7 to $10; large, $12 to $15; skunk, 15 to 70c., as to color and stripe; coon, 20 to 75c.; rats, fall, 7 to 10c.; kits, 2 to 5c. Beaver, not quoted, killing being forbidden by law.

Buckwheat	56,066	54,313

GROCERIES.—After our report of last week was written and it became known that the American duty on tea was operative on the 14th June instead of 1st July, the market grew excited and there was a rush to get goods across the line. On Saturday, 11th, and Monday 13th, probably a dozen cars were hurried "over the border." The market has been left bare by these transactions and holders are stiffer than ever in their views. The demand for sugar at the factory has not yet become very active, but it is held cannot be much longer delayed. Some invoices of Scotch refined sugar in bags have been brought into this market by a Boston firm, and to shut off further imports, the local companies have reduced prices a sixteenth of a cent, making granulated now 4 7-16c. at factory, and the inside figure in yellows 3½c. Two steamships now in port are unloading some 75,000 bags of raw beet sugars for the St. Lawrence company. Molasses is reported a little easier at the island, but local figures are firm, jobbers quoting 30 to 31c. per gal. for Barbadoes in small lots. Some orders for new pack of clover leaf salmon are reported as booked at $3.50 on Coast. In other lines we learn of nothing new.

HIDES.—The strong advance of last week in beef hides is still held, the war between the local association and outside buyers

OLD BUILDINGS
MADE ● ●
HANDSOME

At little expense if you
use our

Sheet Metal Fronts,
Metallic Cornices,
&c , &c.

They give a very fine appearance, and durable, economical, fire-proof satisfaction.

These goods are very popular for new buildings, or for fixing up old ones.

being still on; dealers are buying on the basis of 11c. per lb. for No. 1. and quote 11½ to 12c. to tanners. Receipts show a little increase, but all coming in are readily absorbed. There is no change whatever in calf skins and lamb skins.

LEATHER.—The market holds all the strength last noted. There is not a great deal doing in black leathers on spot, but receipts are small, and Western tanners are understood to be shipping directly to England in a good many instances. Sole is moving out steadily, and manufacturers are talking of stiffer prices. We quote: Spanish sole, B.A., No 1, 24 to 25c.; do., No. 2, 22½ to 23½c.; No. 1 ordinary Spanish, 23 to 24c.; No. 2, 20 to 21c.; No. 1. slaughter. 26 to 28c.; No. 2, do., 24 to 25c.; common, 20 to 21c.; waxed upper, light and medium, 30 to 35c; do., heavy, 27 to 30c.; grained, 32 to 35c.; Scotch grained, 30 to 35c.; Western splits, 22 to 25c.; Quebec do., 18 to 20c.; juniors, 18 to 20c.; calf-splits, 30 to 35c.; calfskins, (35 to 40 lbs.), 60 to 65c.; imitation French calfskins, 65 to 75c.; colored calf, American, 25 to 28c.; Canadian, 20 to 24c.; colored pebble cow, 13 to 15c.: russet sheepskins linings, 30 to 40c.: colored 6 to 7½c.; harness, 24 to 27c.; buffed cow, 13 to 15c.; extra heavy buff, 15c.: pebble cow, 13 to 13½c.; polished buff, 12 to 13c.: glove-grain, 12 to 13c.; rough, 22 to 23c.: russet and bridle, 35 to 45c.

METALS, ETC.—Business in iron is reported quiet, but in other lines of heavy metals there is a fair movement. Warrants are cabled easier at 45s. 9d., but local prices of domestic pig are steady. The strike in Wales is still on, and an order for 1,000 boxes of tin plates, also orders for Canada plates at a shade under quotations were refused. Ingot tin continues to stiffen and 16¾c. is quoted as lowest figure for round lots of L. & F. Lead keeps very firm, and spelter is dearer. We quote: Summerlee pig iron, $17.50 to $18; Carron, No. 1, $18; No. 3, $17.25; Ayresome, No. 1, $17.50; No. 3, $16.50; Shotts, $17.25 to $17.50; Carnbroe, $16, ex-store; Feronna, No. 1, $15; Hamilton, No. 1, $15 to $15.50; No. 2, ditto, $14 to $14.50; machinery scrap, $14 to $15; common ditto, $12 to $13; bar iron, Canadian, $1.40 to $1.50; British, $2 to $2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.15; 52 sheets to box; 60 sheets, $2.25; 75 sheets, $2.35; all polished Canadas, $2.40: Terne roofing plate, 20 x 28, $5.75 to $5.90; Black sheet iron, No. 28. $2.25: No. 26. $2.15: No. 24. $2.05: No. 17. $2; No. 16 and heavier, $2.15; tin plates—Bradiey charcoal. $5.60 to $5.70; charcoal, I.C., Alloway, $3.15 to $3.25; do., I.X., $3.90 to $4: P.D., Crown, I.C., $3.60 to $3.75; do., I.X., $450; Coke, I.C., $2.90 to 2.95; do., standard, $2.75 to $2.80 for 100 lbs.; coke, wasters, $2.70: galvanized sheets, No. 28. ordinary brands, $4: No. 26, $3.75: No. 24, $3.50 in case lots; Morewood, $5 to $5.10; tinned sheets, coke, No. 24, 5½c.; No. 26, etc., the usual extra for large sizes. Canadian bands, per 100 lbs., $1.65 to $1.75; English hoops, $2 to $2.15. Steel boiler plate, ¼-inch and upwards, $1.85 to $1.90 for Dalzell, and equal: do., three-sixteenths inch, $2.50; tank iron, ¼-inch, $1.50; three-sixteenths do., $2; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to $2.50; Russian sheet iron, 9c.; lead, per 100 lbs., $3.85 to $3.90: sheet, $4 to $4.25: shot, $6 to $6.50; best cast-steel, 8 to 10c.; toe calk, $2.25: spring, $2.50; sleigh shoe, $1.85: tire, $1.90; round machinery steel, $2.25: ingot tin, 16¾ to 17c. for L. & F.; Straits, 16¼ to 16½c.; bar tin, 17 to 18c.; ingot copper, 13 to 13½c.; sheet zinc, $5 to $5.25; Silesian spelter, $4.75; Veille Montagne spelter $5 to $5.25; American spelter, $4.75 to $5; antimony, 9½ to 10c.

OILS, PAINTS AND GLASS.—With the advancing summer business in these lines is quieting down, but the spring activity has been longer prolonged than usual. Turpentine shows the usual weekly decline, and is now down to 45c. the single brl.; this is said to be due as much to competition, as to any statistical weakness. Glass stocks are now well filled up, but prices continue very firm, with manufacturers in Belgium and Germany reported maintaining quotations very stiffly. Other lines are all steady. We quote: Turpentine, one to four barrels, 45c.; five to nine barrels, 44c.; net 30 days. Linseed oil, raw, one to four barrels, 49c.; five to nine barrels, 48c.: boiled, one to four barrels, 52c.; five to nine barrels, 51c., net 30 days; olive oil, machinery, 90c.; Nfld. cod. 37 to 40c. per gal.; Gaspe oil, 33 to 35c. per gal.; steam refined seal, 45 to 47½c. per gal. in small lots. Castor oil, 9 to 9½c. as to quantity. Leads (chemically pure and first-class brands only), $5.62½; No. 1, $5.25; No. 2, $4.92½; No. 3, $4.50; No. 4. $4.12½; dry white lead 5c.; genuine red do., 4¼c. to 4½c.; No. 1 red lead, 4c. to 4¼c.; Putty in bulk, bbls., $1.65; kegs, $1.80; bladder putty, in bbls., $1.80; smaller quantities, $1.95; 25 lb. tins, $2.05; 12½ lb. tins, $2.30. London washed whiting, 40 to 45c.; Paris white, 85 to 90c; Venetian red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2. Paris green, 50 and 100 lbs., drums 17c.; 25 lb. drums, 17½c.; 1 lb. cartoons, 18c.; pound tins, 18½c.: window glass, $1.40 per 50 feet for first break; $1.50 for second break; third break, $3.10.

WOOL.—A wool saleman just returned from an extended Western trip reports finding the mills all busy, but he did not put through nearly as much business as would be expected. Most of the mills of moderate capacity are reported to be employed on low-priced goods, and are using large quantities of shoddy. Some of the larger mills are devoting more attention to a better grade of goods, and though not having any great supply of wool on hand, were not inclined to buy largely, hoping for lower prices. Imported wools are, however, firmly held at 14½ to 16½c. for Cape, Natal, 17 to 18½c., B. A., 27 to 35c. Domestic fleece is quoted at 16½ to 17c., and pulled 21 to 22c. per pound.

ESTABLISHED 1885.

HEAD OFFICE:
Queen City Chambers, Church St., Toronto.
DIRECTORS:
JAS. GOLDIE, Pres. J. L. SPINK, Vice-Pres.
THOS. WALMSLEY, Treas. HUGH SCOTT, Mgr. and Sec.
Adam Austin, Inspector.

This Company was organized in 1885, specially for the purpose of insuring manufacturing industries, warehouses and contents.

The primary object being to give protection against loss by fire at a minimum cost consistent with absolute security.

The system adopted has been to inspect all risk before acceptance and fix the rate to be exacted equitably in accordance with the hazard assumed.

Assurers with this company have made a saving, upwards of $108,000.00 on the current rates charged, in addition to which, on the rates exacted by us, dividends have been declared to policy-holders amounting to over $24,000.00, together, making the very substantial sum of over $132,000.00 that our policy-holders have saved during the eleven years we have been in operation.

As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please address

Millers' and Manufacturers' Insurance Co.,
32 Church Street, Toronto, Ont.

The DOMINION Life
ASSURANCE COMPANY
HEAD OFFICE, ... WATERLOO, ONT

Authorized Capital **$1,000,000**
Gov't Deposit at Ottawa **50,000**
Subscribed Capital **257,600**
Paid-up Capital **64,400**

The Dominion Life has made handsome gains in very essential feature during 1897.

It has gained in number of lives assured, 8.2 per cent.; in cash premiums, 8.5 per cent.; in number of policies, 8.6 per cent.; in amount assured, 10.5 per cent.; in interest receipts, 16.5 per cent.; in assets, 19.0 per cent.; in surplus over all liabilities, 42.2 per cent.

No Company anywhere is safer, sounder, more equitable or more favorable to the assured in all its arrangements than the Dominion Life. Call on its agent when thinking of putting on more life assurance.

JAMES INNES, M.P., Pres. CHR. KUMPF, Esq., Vice-Pres
THOS. HILLIARD, Managing Director

Extended Insurance

IS granted by the Unconditional Accumulative Policy of the Confederation Life Ass'n. Under this provision the full amount of the policy is, in the event of the non-payment of the third or any subsequent premium, extended as a term insurance, and the policyholder is held fully covered for the full face value of the policy for a term of years definitely stated therein.

Paid-up and Cash Values are also guaranteed.

"SHYSTER" LAWYERS AND LIBEL SUITS.

It has long been known, especially among journalists, that there is a class of irresponsible persons who are ever on the lookout for a chance to consider themselves slandered by newspapers, and who make it their business to take out actions of damages against the offending or rather the usually unoffending journalists in the hope of obtaining some judgment for damages, though never with the slightest intention of paying even their own share of the costs if defeated, as they usually are. Thus they daily rob respectable and responsible publishers until they succeed in tying the hands of those conscientious journals who try to serve the public by exposing their frauds, for even a newspaper cannot afford to ruin itself in the public interest. Against this class of individuals The Chronicle and many other journals have long waged war, and it was to protect legitimate newspaper men against these sharks that the "Newspaper Libel Bill" was some three or our years ago introduced into the Local Legislature, by the Hon. T. Chase Casgrain, but was unfortunately defeated in the Upper House. There is, however, another class of people who make a living by similar means, viz., the "shyster" lawyers, who usually take this class of lawsuits in hand, and who often, indeed, stir up people to undertake vexatious suits, of which they would never otherwise entertain a thought. However, Canada is evidently not the only country in which this genus of leeches flourishes, if we may judge by the following extract from The Critic, of London, whose fearless editor rises to remark: "I am at one with Mr. Atherley-Jones when he suggests that solicitors be employed on the principle of 'no verdict, no pay.' Indeed, I go a step further, and beg to move as an amendment that in every case the solicitors of the losing side shall be made to pay the costs of the successful litigant. If Mr. Atherley-Jones would bring his suggestion to fruition, and make it retrospective, I should be able to present a formidable array of bills of costs to certain shady solicitors, who have induced their equally shady clients to bring bogus libel actions against me, with absolutely no means or intention of paying any costs when defeated. The bills of costs are ready for delivery at any moment. By-the-way, how about counsel's fees under such circumstances?" We are afraid that our confrere's amendment is of rather too sweeping a nature for general approval. There are lawyers and lawyers.—Quebec Chronicle.

ASSESSMENT AND FRATERNAL.

In an assessment company a policyholder died and upon suit being brought for $7,000 under the contract, the company held that the member was two years in arrears, not having paid anything during that time. In answer a very fine technical point was set up, that in one instance the association had sent out its notices of assessment with but twenty-nine days in which to make payment, instead of thirty days, as required by the law. The California Court of Appeals sustained this position and ordered judgment for the plaintiff.

Failure to pay a mortuary premium in an assessment company within the time specified, although an expense assessment was paid beyond the date of death, did not hold the policy good.

The Supreme Court of Wisconsin holds that in the assessment or fraternal companies the member is clearly liable for any assessments which may be necessary to pay losses accruing during the life of his certificate, even although these may not have been determined and levied until after he has ceased to be a member.

Where in a society no one was to be admitted to membership above the age of 55, and an applicant gave his age as 54, it was held that if, in fact, he was above 55 the corporation was thereby led into a contract which it otherwise would not have made, and that this was a sufficient bar to recovery.

The provision in a beneficiary association constitution that a member may at any time change the beneficiary, is sustained, and the first beneficiary named acquired thereby no legal rights in the contract, notwithstanding such beneficiary may have paid the assessments.

In an assessment company a mortuary call for payment of a bi-monthly premium is not void for including in its list the death claims of a number that might have been included in the preceding call.

In Illinois in a suit against the Catholic Order of Foresters, it was held that where a member was too poor to pay the dues, the assessments should be paid by the order, and that the member in such circumstances should not be suspended for non-payment.—Insurance News, Boston.

THE COURSE OF WHEAT PRICES.

The significance of the estimates of the coming wheat crop given out by the Department of Agriculture can only be appreciated by comparing the figures with former years, and making ample allowance also for chronic underestimation by the correspondents upon whose reports the department makes up its estimates. No estimate of the amount of the crop, it should also be noted, is made by the department until the crop is harvested. The Department manifests great impatience at crop figures attributed to it earlier in the season, and we therefore relieve it of direct responsibility for them; but the Department makes its estimate of acreage and its estimate of condition referred to a normal scale of 100. Of course if you have anything like a reliable estimate of the acreage, together with an estimate of the condition as compared with the condition in a previous year, the production of which is known, you have the materials for estimating the coming crop; but the department disclaims all responsibility for figures of bushels, while giving figures of acres and the figures of relative condition.

The area is admitted by the department to be much larger than it was last year. A few weeks ago the department announced an increased acreage of 7 or 8 per cent., but explained that this was an increase over its own preliminary figures of last year's acreage, and not an increase over its reports last winter of the area actually harvested in 1897; after the harvest the department raised its area figures 5,000,000 acres, and it informed the public that it was upon the original figures the increase was computed. We expressed at the time the opinion that if the estimated increase were reckoned on the original area the result would be to show a lower area this year than last; that the department acknowledged large increases in area in the States that produce largely and that the high prices of the past year must have set every farmer who could do so to sowing more wheat; we ventured the opinion that the increase of 8 per cent. or thereabouts would be found to be an increase over the department's area report of last winter, which, though 5,000,000 more than the estimates earlier in the year, might still be presumed to be lower than the facts. These surmises are confirmed by the department's present estimate that the wheat area is about 43,500,000 acres, or more than 3,500,000 acres in excess of the area actually reaped last year according to the Department's figures published last winter after threshing was completed.

This greater area would call for nearly 50,000,000 bushels of wheat this year more than last. But the condition at the beginning of this month was something phenomenal. Winter wheat was ranked at 90.8 as against 78.5 last year, and the spring wheat condition was ranked at 100.9 as against 89.6 last year. This is an improvement over last year, when we had the largest crop in our history except one; the gain is nearly 16 per cent. in winter and more than 12 per cent. in spring wheat. The improvement of condition would call for an increase of sixty or seventy million bushels over last year, and when we allow for the greater area, as well as the better condition of the wheat, we find that on the basis of last year's official crop the crop this year would be nearly or quite 640,000,000 bushels. This is twenty-five or thirty millions more than the crop of 1891, the largest we ever gathered.

But the official statement of last year's crop is 530,000,000 bushels. The known statistics of consumption prove that the crop must have been nearly or quite 600,000,000 bushels. The value of the comparative estimates of this year's crop lies in the fact that they point to a wheat crop 20 per cent. greater than that of last year, and such a crop would be not less than 700,000,000, and would probably come close to 720,000,000 bushels. This is much in excess of the largest crop we ever had. The official estimate of the crop of 1891 was 611,000,000 bushels; the trade estimate was 680,000,000. That enormous quantity will be well exceeded this year if the harvest realizes the promise of the condition on the first of this month.

Of course the prospect of so large a crop has had a decided effect on prices. And still the bins of Europe are so empty that there is every prospect of our being able to market this crop at remunerative prices, but not at such prices as those of the past spring when European destitution and the war scare and a huge speculation combined to send them up till they turned men's heads, cash grain bringing nearly $2, and there being wild predictions of $1.50 for wheat in July. Leiter's May deal went out with a heavy fall in prices, which the absence of speculation and the fine prospects in this country have continued. At the reduced prices the foreign demand remains good, though much of the enormous shipment now being effected is on old orders. The decline that has been going on lately led to the withholding of foreign orders to some extent, waiting for prices here to reach a settled basis, but prices got down low enough this week to satisfy Europe, and orders for export came in freely.—N. Y. Journal of Commerce and Commercial Bulletin.

—"A friend of mine," says Robert C. Ogden, who is a partner of John Wanamaker, "called on Gladstone when in England and noticed that he kept American issues of magazines which are also published in England. Upon asking him the reason for this, the Grand Old Man replied: 'Oh, I keep the English editions, too, but they are for Mrs. Gladstone. I like to read the advertisements in the American editions. They are in themselves literature, and I can gauge the prosperity of the country by their very appearance.'"

—Homesteading goes on in a very gratifying way both in Manitoba and the Territories. The Winnipeg Free Press says that the homestead entries for last month were quite numerous at Edmonton, Dauphin and Qu'Appelle. At Edmonton there were 189 entries during May; for the first three weeks of the month there were 75 at Dauphin and during the same period there were 62 in the Qu'Appelle district, principally around Regina. The Winnipeg district recorded 49 entries and Prince Albert 24. The remaining land offices averaged from 20 to 25 entries.

—Municipal hall insurance and debenture by-laws, voted on by the ratepayers of Arthur municipality last Monday, were both defeated.

DECISIONS IN COMMERCIAL LAW.

Queen v. Hammond.—On a charge of wife murder the Crown sought to prove that the prisoner, Hammond, had been with evil design accumulating insurance on his wife's life. It was held that evidence of various applications for insurance, though in some cases resulting in rejection of the risk, was admissible, all being made practically at the same time and forming a part of one transaction.

Cincinnati, New Orleans and Texas Pacific R. R. Co. v. Webb.—The Kentucky Court of Appeals held that where a railroad company by its agent contracted to receive cattle for shipment at a given time, but by reason of delay in forwarding the cattle were damaged to the definite loss of the shipper and owner, the company could not plead a drouth existing at the time and long prior to the making of such contract, resulting in a diminution of its water supply for the running of its engines, as an act of God in the sense of being sufficient to bar recovery.

Ewing v. the Corporation of the City of Toronto.—The plaintiff sued to recover damages for injuries sustained through alleged negligence of the defendants in allowing a sidewalk to be so out of repair as to be unsafe for the use of pedestrians. The case is of special importance to merchants and manufacturers, in that the complaint was that the hinges of an iron trap over eight feet in length were so affixed as to rise from an inch to an inch and one-sixteenth above the level of the sidewalk. The door was a double one, and used for the purpose of access to the cellar of abutting premises. The plaintiff, who was well aware of the existence of the hinges, stumbled against them and injured himself. It was held that the facts did not render the corporation liable for damages.

DUN'S BULLETIN IS A NEWSPAPER.

A point worthy of note with respect to actions for libel against newspapers was last Friday decided by Mr. Justice Rose, in the suit of Slattery & Lawrence vs. R. G. Dun & Co. In that matter action was brought by Slattery against the proprietors of Dun's Bulletin for libel, based upon an item which appeared in the Record Items of the "Daily Bulletin" in February last. R. G. Dun & Co. defended the action on several grounds, claiming also in defence that notice of action had not been served upon them before the suit was begun, as required by the Libel Act in the case of newspapers. And they moved for security for costs. This motion was argued before the local Master, who refused the security, holding that the "Daily Bulletin" was not a newspaper within the meaning of the Libel Act. From this decision the defendants appealed, with the result that Mr. Justice Rose gave judgment, reversing the decision of the Master at Ottawa, holding that the "Bulletin" is a newspaper, and thus entitled to notice of action before a suit for libel could be brought against it, and ordering security for costs.

WHAT IS PEDDLING?

Queen v. Phillips—The defendant, one Phillips, was convicted at Sackville, N.B., for peddling without a license. He opened a place of business for the sale of sewing machines and then drove around the town with a machine in his wagon. It was given in evidence that he had sold or offered to sell at least one machine. The Supreme Court of the province held that this action did not constitute peddling within the meaning of the Act. A peddler was held to be one who goes about selling small wares, and further held that the Act did not apply to this kind of business.

Fashion

And Comfort

With so many events, social and otherwise, during June month the question of correct dress demands more than ordinary attention. This may particularly be said of gentlemen's garments. To those at the point of deciding it is just in place to mention that the frock coat is, and may always expect to be, popular. This season's plates are putting forward the three button shape which make up very handsomely in nice soft Vicunas. To complete the suit one will wear a double-breasted vest of same goods, or of fancy linen, and for trousers neat worsted pattern of just sufficiently lighter shade than the coating to make a pleasing contrast. ☘ ☘

HENRY A. TAYLOR, the Rossin Block, is showing a great range of Fine Woolens for such suits, and has also a splendid assortment of the Fancy Linen Vestings, and there's that individuality about his designs that at once stamps them as gentlemen's garments. ☘ ☘ ☘ ☘

GEORGE F. JEWELL, F.C.A., Public Accountant and Auditor. Office, No. 193 Queen's Avenne, London, Ont.

Mercantile Summary.

THE Hudson Bay Company has declared a dividend for the year ending the 31st May last of thirteen shillings per share, or 5 per cent.

THE C.P.R. has contracted to carry 8,000 barrels of salt from Port Arthur to West Selkirk. The salt comes from Syracuse by way of Duluth.

THE copper wire of the Canadian Pacific Telegraph Co., intended to reach from coast to coast, has been completed between Montreal and Winnipeg.

THE electric street railway in St. Thomas, commenced on March 24th, was open for public travel on June 18th. The road is six miles in length and cost $80,000.

IN St. Catharines, last week, the proprietor of the Watson knitting factory was fined $10 by the provincial inspector for employing labor more than sixty hours a week.

CALEB TANNER, of Halifax, has been ill and cannot pay his debts. He therefore offers 20 per cent., unsecured, in twelve months, having assets of $1,300 and liabilities of $1,900.

THE steamer "Louisiana," of Glasgow, sailed last week from the port of Chicoutimi with 2,200 tons of pulp from the Chicoutimi Pulp Co.'s mills, which is the first full cargo of pulp ever exported from Canada.

CANADA is to have two more Atlantic liners. The "Prince George," one of the new steamers for the Dominion Atlantic Railway Co., will reach this side some time this week, while the "Prince Arthur" will come a fortnight later.

ONE of the northern lake monsters, the steel steamer "Superior City," left Chicago last week for Midland, Ont., with 267,000 bushels (nearly 7,500 tons) of Indian corn for export via Montreal. She had arrived in 56 hours. Her draft of water was 18 feet; length, 464 feet; breadth, 48 feet.

THE Master-in-Ordinary, Mr. Thomas Hodgins, last week delivered judgment upon the claim of priority of the debenture-holders in the Farmers' Loan and Savings Company over the depositors. He holds that debenture-holders and depositors are entitled to rank equally on the assets of the company.

STRAWBERRIES are being sent eastward from the county of Essex by the carload. Up to June 17th nine carloads had been shipped by express over the Lake Erie and Detroit Railway. On Saturday night twelve tons of strawberries were shipped direct to Montreal. The express car, modern and ventilated, arrived in Montreal at 5 o'clock on Monday morning with its contents in excellent condition.

So many objections have been made by employees of the Grand Trunk Railway to the proposed new regulations governing their men that Mr. Blair, the Dominion Minister of Railways, has asked Mr. Hays not to put the new regulations in force till Mr. Blair's return at end of August. To this request Mr. Hays will of course accede, because his regulations need the assent of the Governor-in-Council.

ACCORDING to the Amherstburg Echo, tobacco plants are a very scarce article in Essex county. John McNutt & Son had several hundred thousand, but are unable to promise any more until they fill orders booked early. They are besieged daily with persons after plants. They have refused orders for 100,000. J. S. Patton was lucky enough to secure 40,000 to set out on eight acres on the Elliott farm, which is at the extreme southern point in Malden township, just at the mouth of Detroit River.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for completion of Goderich Works," will be received at this office until Friday, 15th July next, inclusively, for completing the harbor and river works in course of reconstruction at Goderich, Huron County, Ontario, according to a plan and specification to be seen at the office of the Town Clerk, Goderich, at the office of Mr. H. A. Gray, Resident Engineer, Confederation Life Building, Toronto, and at the Department of Public Works, Ottawa.

Tenders will not be considered unless made on the form supplied and signed with the actual signature of tenderers.

An accepted bank cheque, payable to the order of the Minister of Public Works, for the sum of five thousand dollars ($5,000) must accompany each tender. This cheque will be forfeited if the party decline the contract or fail to complete the work contracted for, and will be returned in case of non-acceptance of tender.

The Department does not bind itself to accept the lowest or any tender

By order,
E. F. E. ROY, Secretary.

ACCOUNTICS : n.
The science treating of accounts and the art of keeping, verifying, examining and classifying them.

Accountics

A monthly magazine. Publishes each issue ESSAYS ON ACCOUNTING PRACTICE IN LEADING ESTABLISHMENTS in various industries; SHORT ARTICLES ESPECIALLY ADAPTED to the wants of BEGINNERS in office work; REVIEWS AND CRITICISMS of books on accounting and business subjects, written in a way to correctly describe the works; LETTERS OF EXPERIENCE from ACCOUNTANTS AND OFFICE MEN; QUESTIONS AND ANSWERS of interest to subscribers; NOTICES OF MEETINGS and BRIEF REPORTS OF PROCEEDINGS of leading ACCOUNTANTS' AND BUSINESS MEN'S ASSOCIATIONS; ILLUSTRATED DESCRIPTIONS of the BEST and NEWEST devices for OFFICE EQUIPMENT; brief EDITORIAL LEADERS ON TOPICS OF THE MONTH of interest in accounting and office circles; PORTRAITS OF EMINENT ACCOUNTANTS, with BIOGRAPHICAL SKETCHES; ACCOUNTING MISCELLANY, etc.

Monthly. $1 a year. Ten cents a copy.
ACCOUNTICS ASSOCIATION, Publishers,
262 West Broadway, New York.

Mercantile Summary.

A SEIZURE was made in Montreal on Saturday of $5,000 worth of corks made in Europe or the States, for undervaluation.

A SOAP manufacturer, St. John, N.B., J. T. Logan, who suspended several weeks ago, with liabilities of some $15,000, has been able to complete a settlement at ten cents in the dollar, cash.

WORD has come from Halifax of the death in London, Eng., of William Miller, of London, head of the wholesale dry goods firm of Murdoch's Nephews, of London, New York and Halifax. Mr. Miller was reputed to be worth several millions of dollars. The business was started by the late William Murdoch, uncle of the deceased. It is understood the business will be continued under the present management.

CONTINUED evidence of the increased demand for lands in our North-West is afforded by the statement for May of the Canada Northwest Land Company. Sales of land that month were 15,315 acres for $82,502, as compared with 3,327 acres in May last year, for which $19,227 were received. From the first of January to May 31st sales were 29,260 acres for $156,065, as against 12,751 acres for $69,855 the corresponding period of last year.

HERE following we note a little group of Nova Scotia failures: W. C. Harper, doing a moderate grocery trade at Amherst for nearly twenty years, has been obliged to assign.——Caleb Tanner, a Halifax builder, has been obliged to succumb, and at a recent meeting of creditors he offered 25 cents in the dollar, unsecured. He owes about $2,000 of general liabilities and $2,400 on mortgage.——John Smith has assigned. It would be well to state that this particular John Smith is a liveryman at Kentville, in the lovely Annapolis valley, and his liabilities are small and local.

IN London, Ont., tenders are asked for a new factory for Fraser & Stirton, cigar manufacturers. The Canadian Tobacco Journal says: Mr. Adam Beck, the London box factory, has bought the business of the late Wm. Beck, of Montreal, and has opened a cigar box factory there. His London factory will handle the trade west to the coast, and the Toronto and Montreal factories the rest.

THE late Sir Adolphe Chapleau was a director in both the City and District Saving's Bank, and the Credit Foncier. He has not yet been replaced on the Board of the former, but it is understood by the Montreal Gazette that the successor of Sir Adolphe, in the presidency of the Credit Foncier, is to be Mr. Justice Wurtele.

LUDGER ROBERT, a fuel dealer in the St Henry suburbs, Montreal, has assigned, with the considerable liabilities of $16,390, a good part being on mortgage.——H. M. Lafontaine, dry goods, St. Antoine suburbs, has assigned; his liabilities are $2,300.——Schleifer & Herman, a small firm of traders in clothing and second-hand goods, have assigned to the court. They owe $950.

Mercantile Summary.

ON Sunday last the steamer "Cynthiana," of the Manchester Line, sailed from Montreal. She took a good cargo, which included 43,000 bushels of corn, 400 standards of deals, a car-load of lumber, 2,200 bags of sugar and starch, 50 tons of straw boards, 400 packages of butter, 400 head of cattle, and 151 sheep.

THE Midland Railway, with which Ontario people are familiar as a portion of the Grand Trunk System, is not the only road of the name in Canada. There is, or rather there is to be, a Midland Railway in Nova Scotia, a road sixty miles in length, extending from Windsor to Truro, N.S., across the counties of Hants and Colchester. Mr. W. G. Reid, the contractor, says that some forty miles of the line are already under way, over seven hundred men being engaged in the work.

QUANTITIES of potatoes are being shipped from Halifax to the Bermudas and other West India islands. The "Beta" and the "Duart Castle" steamers which left quite recently, took a lot. They are put up in barrels that hold almost three bushels, and cost for the article itself something over $2 a barrel. These barrels, says the Acadian Recorder, for the most part are those in which oranges are brought in—they are perforated to allow egress and ingress of ventilation; often the same barrels come and go half-a-dozen times.

THE importance of choosing suitable varieties of trees and a proper situation for their planting is illustrated in the success of a grower in the Annapolis Valley, of Nova Scotia. Although last winter was the coldest known in that province for thirty years, the temperature reaching 20 below zero, there were yet 500 peach trees in bloom, says the Acadian Orchardist, in the orchard of Ralph S. Eaton last week. Out of 1,100 peach trees, there was scarcely one injured by the winter-killing of the wood or fruit's buds. In the same orchard were 700 of the Japan plums in full bloom, a large number of apricot, and about 1,000 cherry trees.

IT is very pleasing to find that Windsor, Nova Scotia, which was so terribly devastated by fire in October last, is being steadily rebuilt. Not only have many residences been erected, but factories and shops are giving the place a look of activity to replace the bareness. Years will be needed, however, to recover the beauty of lawn and shade tree that used to characterize Windsor. The Windsor Furniture Manufacturing Company's structure is up; its machinery, we understand, was furnished by The Goldie & McCulloch Co., Ltd., of Galt, Ont., and the McGregor, Gourlay Co., of the same place. The shafting and pulleys came from the Dodge Manufacturing Co., of Boston. The new court house of Hants County is a fine brick building, said to be, indeed, the handsomest in Nova Scotia. The contractors for it were mainly Halifax and Windsor men or firms, but the brass door fittings are from the Peterboro Hardware Co., and it is roofed with metal shingles from the Metallic Roofing Co., of Ontario.

M. C. DICKSON, D.P.A., Toronto

Mercantile Summary.

A DECLARATION in insolvency has been applied for in the case of George Gushue, a dealer in stoves, tinware, etc., at St. Johns, Newfoundland.——T. J. Hayes, a trader, of Bay St. George, on the same island, is offering a compromise. In both cases the liabilities are light.

ON Saturday night last a storm of wind and rain did much damage in North Essex. A house was unroofed in Comber, another struck by lightning, telegraph wires were flattened, trees uprooted and wheat fields beaten down. The storm passed over into Michigan, leaving devastating traces at Corunna, Owasso, and as far west as Escanaba.

MORE than usual interest was manifested in the launch from the Bertram shipyard in Toronto on Tuesday last of the new steel steamer "Toronto," for the Richelieu and Ontario Navigation Company. Many came from Kingston, Montreal, and even Quebec, to see the launch, which was successful, amid the plaudits of many spectators. Madame Forget, wife of the president, broke the accustomed bottle of wine over the bows of the handsome boat. The "Toronto" is a paddle steamer, 278 feet long, 36 feet beam and 14 feet depth. She has triple cylinders, and is expected to make fast time over the route she is to cover, viz,, between Toronto and Kingston.

A VOLUNTARY assignment has been made by C. Rousseau, a small general dealer at Cedar Hall, Que. He was formerly a farmer at Ste. Luce, and did not understand business. He owes about $2,000.——A demand of assignment has been made upon Dominique Beaulieu, a Quebec plumber, by a Montreal plumber's supply house.——Boulard & Co., hardware dealers, have consented to assign; liabilities small.

THE Charlottetown, Prince Edward Island, Light and Power Company, Limited, held its first general meeting last week. Mr. L. L. Beer was chosen president; Mr. W. A. Weeks, vice-president, and A. E. Ings, secretary; the other directors being Benjamin Heartz and W. C. Pitfield. The appointment of engineer and manager was conferred upon Henry R. Lordly, C.E., and after he has completed the surveys and the remodelling of the gas plant he will be sent to England to consult with parties who control a new electric motor, to be used for street cars.

THERE is a disagreement between the Parry Sound Railway, known as J. R. Booth's road, and the Ottawa and New York Railway, which wishes to get into Ottawa over tracks which the former road has laid. At one meeting of the railway committee of the Privy Council the Government said that Mr. Booth was "primary tenant" of the canal bank and central station, and that the C.P.R. and the O. & N.Y. road must rent rights from him over his tracks. But there was an application to the committee last week, where the O. & N.Y. road demanded to get to the property they bought last year, in front of which Mr. Booth has installed a big freight shed. Many prominent lawyers were present. The Minister of Railways promised an early decision.

THE chief commissioner of the Hudson Bay Company, Mr. C. C. Chipman, while on a trip to the Pacific coast in the ordinary official course, told the News-Advertiser, of Vancouver, that in addition to the steamers recently built in Vancouver for the company, to be used on the Skeena and Stikine Rivers, it is proposed to build a large store at Nelson for the company. A warehouse is also in course of construction at Vernon. In the north, a general store building and a warehouse at Glenora, are nearly ready, and a building has been put up at Teslin Lake. Extensive improvements have also been made to the company's wharf at Port Simpson. Mr. Chipman says that the company's Klondyke outfitting trade has been very active and generally satisfactory. While on his visit to Vancouver Mr. Chipman christened the company's river steamer, "Strathcona," which had her trial trip.

THE very sudden death of Mr. Charles G. Hope, for some years past the senior partner in the old established wine house of John Hope & Co., Montreal, has created a profound impression in that city. Mr. Hope had gone on his usual yearly salmon fishing trip to the Moisie River, down the Gulf, in company with a party of friends, and catching cold, an aggravated case of pneumonia developed, which resulted in death in two days. He was away from all medical help, but an autopsy showed that the chances were very much against his recovery, even had he had the most skilled attendance. Mr. Hope was quite a young man, being only 38 years of age. It is understood there will be no change in the business, which will be continued as usual by the surviving partner, Mr. Stanway, and the executors. It is just a year ago that the body of Mr. Law, junr., of Messrs. Law, Young & Co., also in the wine trade, was brought home from the same neighborhood.

Why is the GENDRON the Best Wheel on Earth?

BECAUSE

It has good common-sense up-to-date talking points.
It has new, distinct and attractive features.
It is unexcelled in beauty, style and finish.
It has the best in material and workmanship.
It is the most perfect in its lines and bearings.
It is the easiest and smoothest running wheel in the world.

Gendron Bicycle

It has no discarded experiments.
It does not cause ridicule by having about it abandoned devices.
For utility, speed, safety and comfort the Gendron Bicycle is pre-eminent.
The capacity, long experience and methods of the manufacturers insure a product of the highest standard.
It is fitted with the fast, lively and durable Buckeye Tire that can be easily repaired if punctured and is fully guaranteed.
Secure the delightful feeling of confidence and safety by using the celebrated Waters Brake.

The GENDRON MFG. CO., Limited
TORONTO

Gold Medals, Paris, 1878 : 1889.

JOSEPH GILLOTT'S PENS

Of Highest Quality, and Having Greatest Durability are Therefore CHEAPEST.

Dartmouth, or at least some Dartmouth people, have been talking of the claims of that place to the Government elevator. But it is pretty sure to be built in Halifax.

A wholesale drug establishment is being opened in Winnipeg by Mr. D. W. Bole. The temporary premises are on Princess street in that city, and the name of the house is the Bole Drug Co.

In Oct. 1890, W. T. Slavin succeeded the firm of Wells, Bently & Co. as stationers in Kamloops, B.C. He evidently made no money and in February last negotiated a sale of his business; but as the sale was never completed he makes an assignment.

The result of the debate upon Hamilton's fire appliances by the Canadian Fire Underwriters' Association last week in Montreal is that the proposed increase of rates is deferred. But to prevent an increase in the rates steps must be taken "to remedy the existing defects, and to place the pumps in a condition to keep up the pressure requisite to maintain an overflow of the stand-pipe."

Several hundred hands, employees of Edwards' sawmills at Rockland, Ont., struck last week. On Tuesday word came that Mr. Edwards has agreed to the men's requests. The working day in future is to consist of ten hours. Wages are to be paid twice a month instead of monthly as heretofore, and in cash. No more orders on the company's store are to be given instead of cash. So the strike is over.

England is to have a supply of oysters all the year round. The latest development of the British Empire is a colonial oyster industry. New Zealand is sending 5,000 dozen frozen oysters, of native production, as an experiment. They are for cooking purposes, soups, sauces, stews, patties, and the like. The first cargo will be put on the London market at 8s. a hundred. It is intended to send consignments once a month.

This is the week of the Credit Men's Convention at Detroit. It began on the 22nd and is continued over to-day. A letter from Detroit dated Wednesday says that there is a good attendance, and that it promises to be an interesting and profitable occasion. We shall have some particulars about it by next issue. Meantime we have received from the Lawyer and Credit Man a pamphlet souvenir of the gathering. It contains portraits of J. G. Cannon, president; F. R. Boocock, the secretary; J. B. Forgan, of Chicago; Mr. McMechen, of Toledo, and other members of the board of administration.

Wholesale Trade.

THE
Real Estate Loan Co. of Canada
(LIMITED.)

Dividend No. 23.

Notice is hereby given that a Dividend at the rate of four per cent. per annum, has been declared for the half-year ending 30th June, 1898, and that the same will be payable on and after Saturday, 2nd July, 1898. The transfer books will be closed from 20th to 30th June, both days inclusive.

By order of the Board,

B. MORTON, Manager.

Chief Justice Tuck, of New Brunswick, has appointed George F. Baird and E. B. Ketchum liquidators of the estate of the Portland, N.B., Rolling Mills, which are to be kept running until further notice.

An offer of compromise is made by Ephraim Becker, livery stableman at Tilsonburg. This was something of a surprise to his neighbors. Now it has become known that his real estate is mortgaged for about all its worth. Unsecured creditors will have to be content with a small dividend.——Two years ago the Toronto Brass Co., Limited, was incorporated to do business in Toronto, with $25,000 authorized capital, one-tenth of which was subscribed and only $2,000 paid thereon. Now the concern assigns, with liabilities of $4,400. They have nominal assets of $5,000.

About one year ago, George R. Leask, a carpenter by trade, opened a furniture store at Massey, Ont., with a nominal surplus of $1,000. Last month a fire occurred in his premises and as he suffered a loss of $800 without any insurance it was a natural result that an assignment became necessary.——Mrs. B Woodhouse opened a millinery store in Sarnia about Christmas in 1894. She had but little capital and has already been obliged to assign. ——Another assignment is that of William McFarland, a lumber jobber in the township of Airy.

The Windsor Board of Trade held a meeting the other day, the president, Mr. George Bartlet, in the chair, when several matters of importance to the city were discussed. Mr. McGregor submitted a letter from the C.S.R replying to one of his, remonstrating against the condition of the Windsor station of that road. It said the company could not afford to build a new station. A resolution of the board of trade on the subject will next be sent the railway authorities. Mr. McGregor also reported his negotiations with Tuckett & Sons, of Hamilton, towards getting them to build a tobacco factory in Windsor.

Yesterday, at Osgoode Hall, the question was argued before the Master-in-Ordinary whether certain directors of the Farmers' Loan Company—including the representatives of two deceased directors—should be released of their liability for a lump sum of $16,500. The directors making the offer are: John Aikens, J. D. Laidlaw, Mr. Justice Moss, D. B. Dick, the executors of the late Aaron Ross and the executors of the late Joseph Cawthra. These parties, or most of them, contend that they have done no wrong and are not legally liable, but they make this offer to avoid litigation. The liquidator, Mr. Langmuir, recommends the acceptance of the offer, so does Sir Frank Smith, and the advisory committee approves it. But a shareholder, Mrs. Mary Toogood, does not like it and wishes judgment on the point. The Master reserved judgment.

Freight rates to the Pacific coast are advanced. A decision has been reached by mutual consent that they should be raised. A new tariff has been issued from the freight department of the C.P.R., and we understand the G.T.R and trans-continental lines all agree. As an instance of the increase it may be stated that the freight on nails will hereafter be 75 cents per hundred pounds, instead of 66 cents. Bar iron will be the same. That rate refers to commodities. The class rate is somewhat different. In the Canadian Joint Classification the numbers run from one to ten and in the Western classification it runs from one to five and then from A to E or six to ten. In class one the increase is from $2.40 to $3 per one hundred pounds; class two from $2 15 to $2 60; class three, from $2 to $2.20; class four, from $1.70 to $1.90, and class seven from $1.10 to $1.25.

Debentures.

Municipal Debentures bought and sold, also Government and Railway Bonds. Securities suitable for Investment by Trustees and Insurance Companies and for Deposit with the Government, always on hand.

THE SITUATION.

Australian federation is coming, though its progress is not rapid. If a mere majority vote would secure it, the decision in its favor would already have been made. Victoria, New South Wales, South Australia and Tasmania, on appeal to the electorate, have all given majorities for federation. But the legislature of New South Wales required that the majority to be decisive should be 80,000, while the majority secured was only the difference between 70,990 and 65,619. The Australian provinces, having in view the experience of Canada, did well to require the consent of the several provinces to federation, in advance of the change going into effect. But when the required majority is put at 80,000, it looks as if that limit were intended to act as an oblique veto. Western Australia has yet to vote; one province, Queensland, remains untouched by the present movement. Between Victoria and New South Wales there has has long been rivalry for pre-eminence; the latter province, with greater natural resources, has been gaining in the race of riches. A few years ago a majority vote in favor of federation could not have been obtained in the provinces which have now given decisive majorities. The province on which the hope of federation for some time seemed to depend, and which still leads in the race, Victoria, gave 93,473 votes for and only 20,570 against. Times makes for federation. The Japan-Chinese war, the colonial activity of France in Madagascar and elsewhere, the attitude of Russia, and even the late movements of Germany and France in China, all point to the necessity of Australian federation, the cause of which has been advanced by some or all of these things. When Australia sees that the time may come in which her existence will depend on union, federation will be assured. With the experience of the world before her, Australia does well to cling to the sheet anchor of a second Chamber, the constitution of which is, however, one of the difficulties of the arrangement. When, a generation ago, Australia had the choice of one or two Chambers, she wisely clung to the dual form, and seeing the benefit of what she then did, she is not willing to sacrifice it now.

Just before the close of the late session at Ottawa the Government was asked, in Parliament, whether it had any confirmation of the rumor that the contract for a fast line of Atlantic steamers had failed to obtain public support. The reply was in the negative. From the first the arrangement which the Government made with Petersen, Tate & Co. has been criticized with a vehemence which would have suggested interested opposition, even if the names of the critics had not been guarantee for the fact. From the first failure was predicted and definite failure has been announced time and again. What it all meant was not easy to decide. Once more the same story is told. And still we are in the dark as to the real facts, certain successes in promotion having been announced to Parliament, more than once, and confident assurances given of things to come. For months the engineers' strike served to explain delay, not in building the vessels, which the critics now tell us were not under contract, but as the strike caused a rise of prices it may well have delayed contracts being made. The alleged cause of the failure, then, as now, was the inadequacy of the mail subsidy. At the same time it was clear that the firms opposing the Petersen contract were less enterprising than their rivals and were demanding a larger subsidy for an inferior service. The opposition to the Petersen contract was carried to the utmost extent of allowable limits, if not beyond; injury may in this way have been done to an enterprise which deserved to succeed, and which in the absence of the excessive hostility actually displayed, might have succeeded. This contract was used as a leverage by at least one company which had had dealings with the Government of a different kind, to try to extort terms to which it was not entitled, by unwarranted insinuations of bad faith, when its own shortcoming was the cause of all the difficulty it was suffering under. Something definite as the fate of the Petersen contract must soon come, and the sooner the better.

The terms of the Washington protocol for the reference to arbitration have been sanctioned by the British Gov't. In the forthcoming negotiations between Canada and the United States for a settlement of all outstanding difficulties, as well as a reasonable agreement on the trade question, convenience would seem to point to the desirability of two treaties, one political, the other commercial, in that respect following the line of the negotiations of Utrecht in the time of Queen Anne. In any case, special commissioners, with expert knowledge, will have to take the different branches of negotiation in hand. A published letter from Washington states that, in consideration of the attitude understood to be taken by Great Britain in the case of the Philippines, even extreme American protectionists will be willing to make liberal concessions. Here in Canada the Government has been warned, on the floor of the House by a supporter, not to exchange substantial things for sentiment. The remark was made in the interest of protection, and the Premier seemed to agree that this was the right policy to pursue. In matters of tariff a policy of give and take is intelligible. It ought to be possible to preserve the bonding system, in which both countries are interested, from a repetition of the threats of reprisal which have of late years been common. Mutual concessions in privileges of navigation ought, where they would be beneficial, to be attainable. In territorial boundaries the removal of all cause of anxiety is to be found in the ascertainment and mutual recognition of the true limits. In all these lines experts are required. Much will depend upon the spirit in which they enter on their work; and fortunately the disposition to come to a better understanding on all matters which concern Britons and Americans makes the present a favorable time for the contemplated action. Protectionism being a dominant force at Washington will be likely to demand representation on the commission to regulate affairs with Canada. At Ottawa, where protectionism has not a dominant party force at its back, it is not in a position seriously to hamper the Government majority. In international negotiations for a commercial treaty no useful result can be expected without mutual concessions. If the commission realizes this we may hope for a satisfactory result.

In accepting the harbor plans of the Minister of Public Works the Harbor Commissioners of Montreal have apparently done a politic thing. There is no doubt that the port is not equipped for doing the business which in future may reasonably be expected if the best facilities for doing it be offered. The internal water carrying trade of the country has suffered in the past from the lethargic policy of some of those engaged in it, and if a little awakening at the port of Montreal was necessary we may congratulate all concerned that this has happened. It was quite time that something was done. The Montreal Herald mentions the fact that an "exporting firm were recently obliged to take 20,000 bushels of grain out of elevator in Montreal and send it to Boston for shipment to Bristol because they could not secure ship space from this port." Of grain alone the increase last year was over 8,000,000 bushels. And other traffic is similarly congested. Part of the opposition to the improvements, in the form prescribed, arose from the making the dry dock a charge on the business of the port. So far as the apparent departure from a different rule is real, the complaint was well founded. But, even here, there may be a distinction. The dry dock on the Pacific coast, as well as that at Halifax, was intended primarily for naval vessels, while that at Montreal is for the commercial marine. Mr. Tarte does not appear to have taken this distinction, but he did say: "Why should we ask the people of Canada to take the burden of carrying out this plan at the public expense?" When Mr. Tarte remarked that the harbor does not belong to the locality, but to the Dominion, there were people who, quite without warrant, assumed his meaning to be that ultimately the whole expense should fall on the public treasury. Quebec is the natural ocean port of the St. Lawrence; Montreal the artificial ocean port. The whole basin of the St. Lawrence above Montreal is interested in adding nearly 200 miles to the ocean navigation by enabling ships to come up to that city. For this purpose the country bore the cost of deepening Lake St. Peter. At first the interest on the cost of this work was borne by dues collected at the port of Montreal, and there are now people who suggest in no muffled tones that the same thing will happen, not only in the case of the dry dock, but in that of all the other harbor improvements. Some people, not entirely free from responsibility, have thrown out wild hints about future repudiation of the harbor bonds by the Harbor Trust, leaving the Government to shoulder the interest it had guaranteed. Such suggestions, however loosely thrown out, have a grave look on paper, and can bring no honor to those by whom they are uttered. This year the war in which our neighbors are engaged may cause an abnormal increase in the trade of Montreal; and when this happens it will be necessary not to mistake the fortuitous incident for a permanent condition of things.

Till October is postponed the time for the going into effect of the reduction of interest on post-office savings deposits, and even then is not to be made "unless the condition of the money market warrant the change." Is it expected that there will be a corresponding reduction in the interest which banks pay on deposits, or in the rate they charge for discounts, or both? Or is it the state of the money market exterior to Canada that is meant? When the change was first decided upon the state of the money market abroad could not have influenced the action of the Government. Why should it do so now? But if the reduction should take place, depositors of $1,000 are to be given the option of converting their savings bank certificates into Dominion stock, bearing three per cent. and drawn at five years date. The putting of a premium of one half of one per cent. on conversion, for five years, 2½ per cent. in the whole, shows a desire to secure a limited conversion at that cost. Is this movement tentative, having in view the possible conversion of the whole of these deposits at some future time, the rate having first been established by an appeal to the limited number of depositors whose deposits reached $1,000 each? If not, why pay more interest on bonds than on deposits?

FINANCIAL REVIEW.

Now that the bank meetings are over and another year has been entered upon, the banks are somewhat in the position of the captain of a ship which has arrived home after a long voyage, discharged cargo, rendered up accounts to the owners, and is about to sail on another voyage, which will last twelve months. Any captain under such circumstances who realizes the responsibility of his position will look out upon the coming voyage with a certain degree of apprehension, not unmingled with confidence arising from experience. He has been that way, or the greater part of that way, before; he knows something of the dangerous places to be guarded against, and the reefs, and shoals, and hidden rocks that have to be steered clear of; he knows also which are safe ports to put into and where he can take refuge in a storm. All this is of course well understood, but the primary factor of all is the ship itself, whether she is staunch and tight, and well found and in good condition. Another factor, also of importance, is the weather that will be encountered. Of the weather no one knows anything in particular, although the general laws that govern it may be understood to some extent. But storms may arise unexpectedly, and currents may reveal themselves that are not laid down accurately on the map. So that, what with looking after the weather and what with looking after the ship, the captain can never afford to relax his vigilance for a day.

Applying this simile to the condition of the banks we may consider that they themselves, at this moment, are in a sound and satisfactory condition, having recently undergone—all of them—a process of examination and expurgation more or less severe, which would leave them in a clean and healthy condition, ready to enter upon the business of another year with some confidence and reasonable hopefulness.

The last Bank Statement makes it evident that the banks as a whole have ample resources wherewith to meet any demands upon them by their depositing customers, as well as for the accommodation of the mercantile community. During the month ending 31st May these available resources increased to the extent of $5,000,000, which would indicate that the amount by which the resources of the banks have been depleted during the last six months is on the way to be made good again. The earning powers of the banks, as a whole, are considerable, though the amount employed in mercantile operations is not so large as it might be, and probably will be when the full effect of revived business has manifested itself. But this is the region in which, while the best of the profits of the banks are made from it, the risks are also in proportion. And no one can foresee what the coming year may bring forth, and how the risks may develop into failures and losses. With all the foresight of the most judicious bankers amongst us, it comes about often enough that unexpected events and embarrassments ensue, and unexpected cases of deceit or absolute dishonesty transpire. In the case of the majority of failures it is true that premonitory symptoms will show themselves just as a coming storm can be scented at sea, and sail may be taken in accordingly. But there are cases almost every year in which men of the highest reputed probity turn out deceivers; or firms with a satisfactory amount of capital enter upon disastrous ventures. These are the things that try the patience and courage of the ablest men in banking circles, and it is usually from cases like this that the losses of banks arise. It is very easy to say that all transactions offered to a banker are either good or bad; if good they should be accepted, if bad they should be rejected; a plain and simple formula as easy to understand as that "two and two make four." But in that word good, and in the other word bad, there are a thousand possibilities hidden; a hundred degrees of goodness or doubtfulness of which a banker has to judge, and in judging to bring all his experience and knowledge into play. No man, not even the most inexperienced banker, would take up a transaction that he knew to be bad. But the wisest may occasionally make mistakes in estimating the value of securities. The securities offered to banks are of a multifarious description and of infinitely diverse quality. And the peculiarity of a banker's business is this, that the value and condition of his securities is as variable as the seasons. An endorser may be abundantly good to-day and worth a mere nothing six months hence.

Merchandise, which when advanced on was amply sufficient for the loan, may so fall in value that the margin is lost. Of the thousands and tens of thousands of traders whose bills are discounted by the banks, some are going up and some are going down day by day, the conclusion of the whole matter being that nothing but constant watchfulness, well applied, and the acquiring of constant information, will enable the rocks and shoals of banking waters to be avoided.

All this is perfectly well known to the parties concerned, and no doubt they are well able to apply the lessons of the past in conducting the diversified operations of the coming year. They will be helped to some extent, as a whole, by the wise action of the Nova Scotia Legislature in amending the law and abolishing preferences in case of insolvency. But they will hardly be helped by an unwise law of Prince Edward Island, making a debt irrecoverable unless it can be proved that the goods were sold by a person having a license. Such an enactment, as against banks who have discounted notes of Prince Edward Island traders would undoubtedly be ruled out on appeal, as it so clearly trenches on the powers of the Dominion Legislature. That legislature alone has jurisdiction in banking and commerce. While a provincial legislature has undoubted powers in the matter of granting licenses, it cannot, we believe, impose such a penalty as is attempted by the recent Act.

It is probable, too, that the banks will get through the present year better in the absence of an insolvency law making discharge simple and easy. It may safely be said that there are numbers of people who will go through the year paying their obligations as fast as they arise (although it may be in some cases with difficulty) who would, had such a law passed as we have described, have taken advantage of it to pay their notes only to the extent of fifty cents on the dollar.

With regard to the business of the year before us, we know very well how it is affected by the character of the harvest. If the harvest is good and prices as at present the country will advance in prosperity. But then under the word harvest we are entitled to include all sorts of production, not only the products of the farm but the products of the forest, the mine, the factory, and the sea.

ABSTRACT OF BANK RETURNS.

31st May, 1897. [In thousands.]

Description.	Banks in Quebec.	Banks in Ontario.	Banks in the other Prov's.	Total.
Capital paid up	35,006	17,292	9,645	61,943
Circulation	15,280	10,601	5,939	31,820
Deposits	102,490	76,136	30,919	209,545
Loans, Discounts and Investments	121,375	83,744	38,553	243,672
Cash, Foreign Balances (Net), and Call Loans	39,996	27,543	9,458	76.997
Legals	7,400	5,566	2,971	15,937
Specie	4,149	2,800	1,708	8,657
Call Loans	4,667	7,933	1,656	14,256
Investments	9,052	13,452	5,147	27,651

31st May, 1898. [In thousands.]

Description.	Banks in Quebec.	Banks in Ontario.	Banks in other Prov's.	Total.

GOVERNMENT CIRCULATION.

Small	$ 7,926,534
Large	14,089,550
	$22,016,084

Gold held, $10,651,630 = 48.38 per cent.

CANADIAN BANK OF COMMERCE.

With the use of deposits increased during the year to twenty-three millions of dollars, and shareholders' capital exceeding seven millions, besides a circulation of three millions, it must have been rather disappointing than otherwise to the authorities of the Canadian Bank of Commerce that the net earnings of this institution for the twelve months ended with May did not exceed $477,456. Still that sum represents almost 8 per cent. on the large paid capital of $6,000,000 in a generally unfavorable year, and is a distinct improvement on the earnings of any of three years preceding. After paying seven per cent. dividend the pension fund received an addition of $10,000, and there was written off bank premises and furniture account $25,000, a considerable sum being carried forward. Almost half the assets of the bank are in cash or readily available shape; and while this is satisfactory, as showing the strength of the bank's position, it is not a condition most favorable to large earnings. The report contains a reference to the appointment of the bank as sole agent of the Dominion Government for certain purposes in the Yukon country.

The authorities of the bank are of opinion that the revival of business which set in during earlier months of

1898 will continue, and that the demand for ordinary commercial loans will be larger henceforward. And we believe they are justified in such a forecast. The impulse towards activity is felt to-day in many directions. Not only are farmers extending their cereal acreage, but cheese and butter are receiving more attention among them than ever before now that the possibilities of our export of dairy produce are becoming more evident. Our dead meat trade abroad must grow as a consequence of the extension of the cold storage system, and the like may be said of fruit. Mining of coal and metals is a steadily growing industry among us, both east and west, and this means a great increase of demand for a variety of products, grown or manufactured. Railroad building in the north and west of the Dominion is likely to proceed with renewed vigor; and the lines which the near future will bring into existence will not only assist settlement of the land but foster, as our growing ocean marine will foster, foreign export trade. Senator Cox foresees the need of a railway to Cariboo and Cassiar; and it is agreeable to have the statement from a man in his influential position, that "there can be little doubt that before long a railroad system will serve these."

In noting the evidences of improved business in the twelvemonth the general manager begins at home, and cites the improvement in dwelling-house property in Toronto. This improvement is real and has been going on for months, so that the number of vacant houses has been very markedly reduced. But it is well pointed out that there is no sign of past losses by the "boom" being retrieved by sharp advances in real estate values, and the return of speculative building on borrowed money is a danger to be strenuously avoided. After a somewhat lengthy reference to the Canadian farmers, their success of late, and the effect of their forehandedness upon general business, Mr. Walker remarks upon the peculiar condition of our lumber trade. Peculiar in this, that while shippers to British markets as a rule did well, those who depended upon the American market first received a blow from the Dingley tariff, and, when that was partly recovered from, received another in the outbreak of the Spanish-American war. It remains to be seen whether the gusts of pro-English enthusiasm among Americans just now and their recent interchange of civilities with Canadian ministers mean anything—anything, that is, that will induce them as a nation to treat Canada with reasonable fairness. Mr. Walker is recognized as being well-informed as to the financial conditions existing in the United States. His seventh paragraph, which deals mainly with our neighbors and their currency, is interesting reading.

What then follows with respect to the actualities of production and export and the possibilities of both in this country ought to set Canadians thinking. We quote a sentence or two upon this topic: "It is a comfortable state of affairs for this young country to have exports in excess of imports, and at present the excess runs into very handsome figures. Our exports for the ten months of the year which ends 30th June, amount in value to $119,000,000 against $114,000,000 for the same period last year, and $87,000,000 for 1896. The excess over imports for the ten months is $17,760,000, as against $6,647,000 for the same period last year, and a small excess of imports in 1896. In only one previous year since Confederation has there been an excess of exports over imports." But large as these figures may seem, and creditable as they are, the fact remains, as a stimulus to both producer and exporter, that of last year's imports of foodstuffs by the United Kingdom, Canada supplied but seven per cent.

BANK OF HAMILTON.

Quite remarkable earnings are shown during the last twelve months by the Bank of Hamilton; the ratio has been mounting up every year since 1895 until now it reaches 12.86 per cent. It is possible that some part of these earnings have resulted from the bank's opening in Manitoba; at any rate it is significant that much of the bank's report is devoted to the favorable business conditions in that province, its steady development and the arrangements made by the management for further participating in the increasing prosperity of our smiling North-West country. After paying 8 per cent. to shareholders and taking the usual sum off bank premises account, the same amount as in the previous year, $50,000, has been added to the Reserve Fund of the bank and a somewhat larger sum carried forward. Of the increased funds placed at their disposal by a decided growth in deposits during the year the directors have invested a large proportion in readily available shape, the current discounts not showing so great a relative advance. Circulation shows a marked growth. Altogether the statement is a very satisfactory one.

UNION BANK OF CANADA.

The additional capital of this bank required to bring its paid capital up to $1,500,000 having been all subscribed and paid in full during the year, and an increase of $800,000 in deposits having taken place, the business of the bank shows a much larger volume for the twelve months ended with May last. There is an increase of $790,000 in current discounts and a still greater relative increase in cash assets, such as the purchase of bonds, debentures and advances on call loans. A very pleasing decrease of overdue debts is shown. The net earnings of the year, $134,541, were very satisfactory, amounting to about nine per cent. upon the capital, or say, 7.27 per cent. on capital and rest. Apparently encouraged by this agreeable result, Hon. Mr. Sharples moved and Mr. James King seconded a motion to further increase the capital of the bank to $2,000,000. This appears to have met the approval of the shareholders, though the report does not state that it was carried. The former board of directors were re-elected.

BANK OF HOCHELAGA.

With a paid capital of a million dollars, and a reserve of $450,000; deposits of $4,689.000 (more than a fourth of them without interest) and a circulation of $900,000, the Bank of Hochelaga is in very fair case to earn its seven per cent. dividend. As a matter of fact it earned 11½ per cent. net last year and was able to place $50,000 to reserve. This is very encouraging; and indeed we observe that the prospects of the bank are deemed so good that a motion to double the capital was carried at the meeting of shareholders on Wednesday of last week. Such a resolve shows confident enterprise. It is not unkind to suggest, however, that it may not be so easy to earn dividend on two millions of capital as upon one. We remark the much greater increase of readily available assets in this year's statement than last in proportion to the increase of current discounts. What was said by the general manager upon the troublesome question of speculation deserves to be repeated. After deploring the rage for speculation which exists in the United States, Mr. Prendergast goes on to distinguish between that wise foresight, which, upon the faith of reasonable data, tries to judiciously and profitably put out money. "But," he adds, "I wish to condemn here those imprudent transactions in which one risks all he owns in the hands of parties unknown to him, and upon alleged values still more unknown." Sensible words, and by no means unnecessary.

TRADERS BANK OF CANADA.

Apparently the sum written off to contingent account a year ago by the Traders Bank was needed to cover the doubtful or bad debts of that time. At any rate no recoveries from it are mentioned in this year's return. The year just closed shows much improved earnings. Instead of less than 6 per cent. net, as in the previous year, they have been almost 8 per cent.—results of which are that after dividing six per cent. an addition of $10,000 is made to Rest account and $10,586 carried forward, very fair results indeed. The assets of the bank are now swelled to $6,824,000, and almost half of them are readily available. A further increase having taken place in deposits, they have been invested in call or short loans, or in bonds or debentures, the current discounts not being increased, but lessened. The former directors were re-elected.

LA BANQUE JACQUES CARTIER.

The net earnings of La Banque Jacques Cartier for the year ended with May were $45,397, which is more than the previous year, and indeed exceeds nine per cent. on capital. But the management resolved to divide only five per cent. to shareholders, using part of the remainder for increasing the reserve as well as for making an appropriation towards overdue and doubtful debts. This proceeding is in the prudent direction in which, according to the addresses of the authorities, it is intended to continue the bank's affairs. A branch of the institution was opened in Ottawa during the year. Increases are shown in both deposits and circulation and a continuance of the present careful policy is likely to result in the still further improvement of the bank's business.

AN AMERICAN ON RECIPROCITY WITH CANADA.

While it is quite generally recognized over here that it will be prudent for Canadians, as well of course as Britishers anywhere, to be a trifle cautious in accepting as genuine or lasting the friendly gush towards Great Britain that pervades many of the United States papers of late, we nevertheless feel glad to find the Manufacturer, of Philadelphia, a rank protectionist journal and the organ of American manufacturers, speaking so sensibly, and perhaps we should say so kindly, as in the following paragraph:—

> A time must soon come, if it is not already at hand, when the two Governments will be in a mood to make some terms with each other in respect to tariff rates on important lines of goods passing back and forth over the frontier. If the Commission is not to deal with this subject, the manufacturers of the United States will look to Mr. Kasson soon to give it the special treatment which it deserves. The preferential rate of 25 per cent. in favor of British goods and against our own comes into force on August 1 next, when we will be brought forcibly to realize the mistake we have made. We have never thought that Sir Wilfrid Laurier was in earnest with his preferential British tariff. He and his Liberal party have long stood for reciprocity with the United States, but they were not going to get down on their knees to Dingley last year. The best way to gain ends sometimes is to go toward them backward, and the Canadian Prime Minister probably knows this as well as the next man. All New England and much of Pennsylvania, Ohio and New York will be in favor of reciprocity with Canada inside of a few months, and when this is the case our battle will be won.

Commenting on this utterance as one that cannot be otherwise than welcome, the Philadelphia Record, a staunch free trade journal, says: "Articles like that published in the organ of the manufacturers of Philadelphia make the editor of 'The Record' feel that he has not lived in vain. The sentiments expressed have our cordial indorsement." Here is another sensible journal which perceives how much advantageous trade the United States lose by stiff-necked antagonism to reciprocity with Canada.

CAPE BRETON VERSUS PICTOU COAL.

It appears that the manufacturers of New Glasgow, Nova Scotia, can obtain Cape Breton coal more cheaply than that which is mined almost at their very doors, or else they prefer the quality of the Cape Breton coal. At any rate, we are told that fifty thousand tons of coal will be hauled over the Intercolonial during the next twelve months from the Dominion Coal Company's mines in Cape Breton for the Nova Scotia Steel Co. at New Glasgow. The rate of carriage is 75 cents a ton. This, it seems to us, says the New Glasgow Chronicle, will be a serious matter for our mines here. "Two or three shipments have arrived here recently from Cape Breton. Not only culm, but coarse coal as well, for the steel works at Trenton." Of course it will be a serious thing for Pictou county or any mining district to find itself undersold or outbidden for business by a rival coal county 100 or 150 miles away from its own borders. We should like to know more of the why and wherefore of this. Are the more modern appliances or the enormous output of the Dominion Coal Co. proving too strong in competition for the Pictou and Cumberland mines?

ONE PRICE, AND THAT MADE PUBLIC.

You might as well attempt to make one suit of clothes that will fit all sorts of people as attempt to form rules of conduct that will regulate all kinds of business. Although merchants in the country must conduct their trade in a different manner from their city competitors there are many practices which a country dealer might well adopt. One of these is the marking of selling prices in plain figures on goods. It is true, not all merchants can follow this plan. A writer in the Iron Age giving his experience says: "We have a price for the men who pay cash and buy many goods, which price, it is needless to say, is very low. We also have a price for the people who get trusted. But the people we are especially laying for are those who make life miserable by always beating you down. You would rather not see them at all, but you have to be pleasant and agreeable, and you discount this thing 10 per cent. and raise that 15 per cent. Your customer is pleased, you make your profit and everybody is satisfied. We shall never return to plain figures again in the general marking of goods in this section and business." This merchant, whose experience with "one price plainly marked" was so unfortunate that he gave up in despair, carried on trade in a small country place and found that while his competitors lived up to the practice of "all things to all men" he must do likewise.

We believe, however, that where a merchant has a standing such as allows him to be a trade leader, rather than a follower, he can stand alone or compel his competitors with him to adopt this system. Any merchant whose goods are right and whose prices are in keeping with modern merchandising can make his advertising more effective by publishing prices. Price is a part of the description and a very important part. After a person has decided that an article is such as he wants the price alone remains as a question of doubt. It is the price that every one wants to know after other points have been impressed.

ONTARIO MUTUAL FIRE UNDERWRITERS.

At London, Ont., on Friday last, was held a meeting of the Ontario Mutual Underwriters' Association, and a fair representation of the membership were present. The principal subjects of discussion were amendments to the insurance act, and to the necessity for fire inspection in Ontario, similar to the fire marshal system of Massachusetts. The Executive Committee were instructed to communicate with the fire insurance companies, learn their views on the fire marshal question, and prepare the matter for submission to the next general annual meeting, to be held in Toronto before the Legislature re-assembles. The association proposes to urge the measure upon the Provincial Government. A report of the association made known that the companies paid out $583,168 in claims for the year 1897, on 21,066 fires. The following will show the character of the losses: For fires caused by lamps and lanterns there was paid $37,953; by defective chimneys, $124,827; by children with matches, $20,054; electric wires, $6,150; threshers, $7,578; incendiarism, $35,628; suspected incendiarism, $20,126; lightning, $53,393; spontaneous combustion, $18,333; unknown, $166,810. The "unknown" causes still form too large a portion of the whole.

INSTITUTE OF ACTUARIES.

We acknowledge the courtesy of the assistant-secretary of the Institute of Actuaries in sending us the report of the Institute for 1897—8. Some of the matters with which it deals were referred to in last week's issue, in the letter of our correspondent "Horace," or in the editorial on the International Congress. The membership of this great body, which ten years ago was under 600, has now reached 860; consisting of 189 fellows, 242 associates, 416 students, 12 corresponding members and one honorary member. Reference is made to the death, during the year, of one fellow, Mr. David Chisholm; also of two corresponding members, Sheppard Homans, of New York, and M. Martin-Dupray, of Paris. The latter was one of a committee of four actuaries who undertook to collate the mortality experience of four great French life officers. Mention is made of the following papers, submitted at the sessional meetings of the year: "On the Treatment of Endowment Assurance Policies in Periodical Valuations"—Mr. H. Archer Thomson, in Dec., 1897; "The Valuation of Endowment Assurances in Groups"—Mr. G. J. Lidstone; "The Relation of the Actuarial Profession to the State," being the essay by Mr. J. Nicoll, to which a prize was awarded from the Chisholm Prize Fund; "Some Observations on Industrial Assurance"—Mr. C. H. E. Rea; "On the Mortality in the British Navy and Army, as shown by the Official Reports"—Mr. J. J. McLauchlan, F.F.A., at different dates in 1898.

For the home examinations held in April, 163 candidates presented themselves, of whom 63 were successful. In the colonies there were 59 examination entries, and the results are yet to be made known.

The new Mortality Experience investigation, which is being carried out jointly by the Institute of Actuaries and the Faculty of Actuaries, is progressing satisfactorily, under the superintendence of Mr. T. G. Ackland, who now has a staff of 30 clerks constantly at work upon the large body of cards constituting the Assurance Experience.

Upon being requested to do so, the life assurance offices have undertaken to contribute towards the cost of the investigation, which will necessarily be very heavy. The contributions of the companies at present promised or received amount to £10,953, which sum, it is hoped, will cover the larger portion of the expense of this important work.

The following officers were unanimously chosen at the annual meeting on 6th June: President, Henry William Manly; vice-presidents, Henry Cockburn, William Hughes, Gerald Hemmington Ryan, Frank Bertrand Wyatt; treasurer, Charles Daniel Higham; honorary secretaries, Arthur Francis Burridge, Ernest Woods, and a council numbering thirty.

—La Chambre de Commerce, the French commercial body of Montreal, met on Friday afternoon last, and elected a number of new members. The chamber then adjourned over the summer months, to reassemble on September 21st.

BRITISH EMPIRE MUTUAL INSURANCE COMPANY.

The statement for 1897, submitted by the British Empire Mutual Life Assurance Company, presented some noteworthy features. Not so much in the way of rapid increase of business, for the aggregate of premiums, $1,354,000, while larger than in the previous year, was not greatly so. But the mortality was low; the expenses of management were reduced; the invested funds showed an increase from $12,745,000 to $13,355,000—all points of favorable interest to the policy-holder, who wants his security to increase and his profits to swell. Furthermore, the large sum of $135,709 was paid in cash to policy-holders as a bonus for the year. These circumstances point to the cheerful conclusion that the British Empire Company is a good one to insure in. We further note as interesting, the fact of the election of Mr. G. H. Ryan, actuary and general manager of the company, as one of the vice-presidents of the Institute of Actuaries of Great Britain.

METALS AND MINING.

The Brandon Machine Works Co., Ltd., is applying for a charter of incorporation under the provincial laws. The capital stock is stated to be $40,000.

An International Mining Congress will be held at Salt Lake City, Utah, on July 6th, 7th, 8th and 9th. It is the permanent outcome of the mining congress at Denver last year.

A transaction negotiated recently by a Philadelphia firm is the sale, by the Nova Scotia Steel Co., of about 70,000 tons of iron ore from Newfoundland to a German furnace company. The Iron Trade Review says: "The ore carries about 52 to 53 per cent. of iron and 0.7 to 0.8 per cent. of phosphorus."

A proper function of the government aid is recognized by the British Columbia authorities, who propose, as part of the work of their laboratory, the indentification and naming of minerals for prospectors free of charge, and the finding out if the mineral submitted has any commercial value—and if so, how best to develop it. The department will do this free of charge, recognizing the fact that many a poor prospector, who discovers a valuable mineral, either may not have known it or may have been deterred by want of means from getting its value determined.

Business-like enterprise is shown by the British Columbia department of mines in fitting up a museum of minerals worthy of the undoubted mineral richness of the province. There will be a well-equipped laboratory for the chemical work, also a second laboratory specially devoted to students, in which they will be able to obtain a practical knowledge of chemistry, mineralogy, blow-piping, and other kindred subjects. Geological charts are provided, showing how valuable veins and ore bodies have occurred. These will be a practical aid to many a prospector in tracing or following an ore body he may have discovered on the surface. The departmnt will also try to have accessible the latest known methods of working and treating ores, running stamp mills, ventilating mines, pumping, etc.

SHOE AND LEATHER SCRAPS.

A Boston despatch, of Saturday last, announces the failure, on the previous day, of the Boston Woven Hose and Rubber Co., one of the largest concerns of the kind in the United States. The company's liabilities are stated at $1,200,000, but it has assets somewhat exceeding $2,000,000.

It is stated that the Queen of Italy is an enthusiastic collector of old boots and shoes worn by notable personages. She has the shoes of Marie Antionette, of Mary Stuart, the Empress Josephine, Queen Anne, and the Empress Catherine of Russia. Carmen Sylva and Lady Ermyntrude Malet, wife of the British ambassador at Berlin, are said to be afflicted with the same strange fad.

The golf girl has her low shoes with a rubber disc on the sole; there are hob nails put in for her if she prefers them. She doesn't if she is not going to be out of doors all the time, for hob nails and polished club-house floors do not agree, and the club rules prohibit their coming together. The regulation high golf shoe has heavy brass eyelets—no hooks—and are extra high in the back.

English or Scotch authorities on the proper costume for golf are likely to be the most correct, at all events they are the elder, but on cycling costume we prefer to listen to American oracles. These say that properly the sole of the bicycle boot is of ox hide, is corrugated, or else it is a soft little turned sole, beautifully flexible, but without the grip for holding the pedal. The ox hide is flexible and soft, but it has the disadvantage of being easily wet through, and if by chance the botanist bicyclist steps into a marshy place for a coveted flower, it will act as a sponge. Black and a dark chocolate tan the girls are wearing rather than the lower shoe in the lighter shades, which are seldom to be seen. There is a boot 10 inches high that has been worn on the wheel, but when a girl goes in for high boots she wants the full height, and takes the 15-inch usually. Happily there is a little more room at the toe of the boot than there was a year ago.

FOR GROCERS AND PROVISION DEALERS.

Pineapples are plentiful in United States markets. The Bahama Islands have sent them in great quantity.

An Eastern paper states that failures among New England grocers have been unusually numerous this month. Not only retailers have failed, but several wholesalers.

An English expert on the situation of stores holds that the selection of the right side of the road, that, viz., which is taken by the majority of pedestrians, is all-important for success.

The peach crop of Maryland and Delaware will be small, owing to frost in early June, but the South and North-west will have exceptional yields, and Michigan's crop is good. Georgia reports an exceptionally large yield, and Alabama expects to have them to ship.

Exports of cheese from Montreal this month, while large, are by no means up to those of twelve months ago. Last week's shipments were 64,102 boxes, as compared with 75,610 boxes same week 1897. Butter shipments on the other hand are increasing steadily, last week's being 9,942 packages as against 4,860 packages in same period 1897.

Since the imposition of the war taxes in the States, the American Tobacco Co. advanced their prices on manufactured tobaccos 10 per cent., and on cigarettes 15 cents per 1,000, to cover the increase in taxes. Leaf tobaccos have also advanced in price. It now appears that the surtax is only collectible on tobaccos, cigars and cigarettes that have been stamped since April 14th.

Incorporation by Ontario letters patent is granted for The Brockville Packing & Provision Company, Limited, to deal in and store farm and dairy produce, to buy and slaughter cattle and swine. Capital, $150,000; parties, James Pakenham, of Dublin, Ireland; W. H. Comstock, W. A. Gilmour, O. K. Fraser, R. A. McClelland, banker, and E. W. McCrea, farmer, all of Brockville.

At the special meeting in Toronto a week ago of the Ontario Packers' Association, to arrange for the season's business and to discuss the general situation with regard to canned goods, a minimum price of 75 cents per dozen was fixed for canned peas, corn, and tomatoes, and it was stated that, owing to the increased cost of raw material, higher prices must be got than were paid last season. It was also reported that almost all of last season's pack of goods has been exhausted.

According to the returns from more than half of the American internal revenue districts, there was an increased production in May in these districts over May, 1897, of 5,907,858 lbs. of tobacco; 16,483,927 cigars; 44,500,920 cigarettes; and 118,762 lbs. of snuff. The most striking increase in the districts tabulated so far appears in the first, Missouri; Maryland shows an increase of 3,600,000 cigarettes. In cigars the most notable increases are in the 9th, Pennsylvania (50 millions against 41 millions in May, 1897), and in 3rd, New York, an increase of 2½ millions over the 40 millions of the previous May.

The Winnipeg fire, water and light committee asks tenders for the putting down of wells and plant sufficient to supply 11,000,000 gallons of water to that city.

BOOKS RECEIVED.

Stratford, Ontario.—The firm of W. Mowat & Son, private bankers, have issued a neat publication describing, in picture and letter-press, the city of Stratford, appending to it a number of selections and anecdotes to illustrate the antiquity of banking, etc.

Consular Reports.—From the Government Printing Office, at Washington, we receive the Consular Reports of the United States, dated June, 1898, being No. 213 of volume 57. The Commerce and Industry of British Columbia; Lead Mining in Canada; the Intercolonial Railway report, etc., form part of its contents. We shall refer more fully later to this valuable compendium.

Manitoba Farm Lands.—The Board of Trade of Virden, Manitoba, has issued an illustrated pamphlet, with map, showing homesteads and other lands open for settlement in the districts of Virden, Griswold, Oak Lake, Routledge, Pipestone, etc. A feature of the pamphlet is a number of letters from actual settlers, after the fashion of Mr. Sifton's excellent publication, entitled "A Few Facts."

School of Mining, Kingston.—The calendar of the school for 1898—99 has been issued. It contains exterior and interior views of the mining laboratory of Queen's University—with which the School of Mining is affiliated—and the John Carruthers Science Hall; sketches of the course of a mining prospectors' class; a precis of the course which mining students take, etc. This school is a branch of the Ontario School of Mining and Agriculture.

Reports of the Accounts of the Corporation of St. John, N.B., for 1897. This somewhat bulky volume (440 pages) contains reports of St. John City officials, also sundry accounts of the municipal corporation. Facing the title page is a broad sheet, showing the debenture indebtedness of St. John, the total being $2,766,902, maturing up to the year 1937; to which must be added a sterling loan at four per cent., $527,546. The chamberlain's accounts are most minute.

The Indicator's Canadian Chart.—For the small sum of fifty cents this handy pocket compilation (60 pages) offers to the agent figures of the condition and amount of business done by the Canadian life insurance companies, and the foreign life companies transacting life underwriting in Canada during the calendar year 1897. Besides individual reports of thirty companies, their income and disbursements, assets and liabilities, there are tables showing the aggregate of insurance written and claims paid. The F. H. Leavenworth Publishing Co., Detroit, Michigan.

INSURANCE MATTERS.

Richard H. Scott has been appointed agent at Carberry, Man., for the Ontario Mutual Life Assurance Company.

The inspector of the Standard Life Assurance Company, Mr. Ferguson, has appointed J. E. Young local agent for the Standard at Rat Portage.

It is estimated that the national tax on insurance companies will yield an annual income of $1,250,000 from companies doing business in New York State alone.

Life insurance men are considering the advisability of seeking an improvement in the quality of drinking water in Chicago. There were 408 deaths in that city during the week ended May 29th, of which 41 were due to drinking impure water. During the corresponding week of 1897, there were only 25 deaths attributed to this cause.

The annual election of trustees of the Mutual Life Insurance Company, held this month, resulted in the selection of the following: Richard A. McCurdy, James C. Holden, Hermann C. Von Post, Robert Olyphant, J. Hobart Herrick, Charles E. Miller, Walter R. Gillette, William C. Whitney, William J. Sewell. The trustees will serve for a term of four years.

"I just happened to be in the neighborhood and thought I would stop in," is an excuse frequently employed by life insurance agents, which is as injurious as it is uncalled for. The life insurance business needs no apology. And the solicitor who impresses men with the fact that he made it his business to call to talk life insurance will get more applications in the long run.—U. S. Review.

At several points in Western Ontario the superintendent of agencies for the Merchants' Life Assurance Co., has been interviewing policy-holders in the Colonial Life, which is amalgamating with the Merchants. The policy-holders in the former holding endowment policies are not pleased, says the Guelph Mercury, because they can only transfer for a straight life policy, and some of them are throwing the whole business up.

The requisite legislation having been obtained, and all formalities being duly complied with, the secreatry of the Toronto Board of Trade has been for some days distributing to its members the accumulated funds of the Gratuity Fund, in the shape of a cheque for $125 to each member who has paid all calls, this being the sum to which each surviving member was found entitled. This distribution takes out of existence a scheme of assessment assurance which has long been a source of discord and annoyance to the Board. And it is safe to say that the Council of the Board are not likely ever again to promote or permit among themselves such a plan of hat-passing insurance.

The trial of Thomas K. Scoville, of Portland, near Brockville, has taken place. Scoville was charged with having knowledge of the fire by which his house and barns were consumed in November, 1896. The crown alleged that Scoville hired Harry Johnston to do the job in order that he might get the insurance, some $3,600, from the British America and Caledonian companies. William Laing was the principal witness. He stuck to his original story that Harry Johnston told him that Scoville paid him for burning the buildings, and that Scoville gave him (Laing) $40 to leave the country. The defence set up was that of blackmail. Scoville is declared not guilty. His civil actions against the companies, which have been held over pending the disposition of the criminal issues, will now be prosecuted.

ANSWERS TO ENQUIRERS.

S. C., Brantford.—Not so far as we have heard. The circular issued by the United States Treasury Department last week, gives the denominations of the $200,000,000 United States three per cent. bonds. They are issued in sizes of $20, $100. $500 and $1,000, with coupons attached. There are registered bonds also issued of the denomination of $20. $100, $500, $1,000. $5,000 and $10,000. It is a condition that subscriptions for the lowest amounts will be first accepted. This, doubtless, to popularize the loan.

THE CHEESE BOARDS.

There has been somewhat of a flurry in the cheese market during the past week, and prices at country points have advanced ¼ to ½ cent per pound. Some dealers say that there is a Leiter in the market, and that supplies are being brought under the control of a single firm. Of course the question is, will this cheese Leiter meet the fate of the Chicago wheat manipulator? We have received reports from 15 boards, at which 31,819 boxes of cheese were offered. This shows a large increase over last week's figures of 30,794 boxes from 20 boards. In the corresponding week a year ago 13 boards offered 33,191 boxes. Shipments abroad for the week ending June 18th, as reported by Messrs. Cunningham & Lemessurier, were 64,988 boxes, as against 105,159 the similar week last year. Shipments to date are 178,342, against 291,162 to the same date last year.

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, June 23rd, 1898, compared with those of the previous week:

CLEARINGS.	June 23rd, 1898.	June 16th, 1898.
Montreal	$13,876,035	$13,758,925
Toronto	8,276,672	8,316,272
Winnipeg	1,616,163	1,799,172
Halifax	1,065,547	1,172,729
Hamilton	627,421	676,912
St. John	517,416	574,428
	$25,979,254	$26,298,438

Aggregate balances this week, $3,562,127; last week, $3,989,671.

—The St. John Board of Trade appears awake to every circumstance that may affect the trade of the city. Having regard to the Spanish-American war, it sent a circular to leading New York and Boston shipping houses, and to the press, setting forth that in case the present state of war, or any turn of events arising therefrom, should necessitate the changing by transatlantic lines of their terminal port on this side of the Atlantic, St. John offers a good harbor with 28 feet water, wharves to accommodate big steamers, also elevators and warehouses. The Board also backed up the claim of the Montreal Board of Government assistance to her harbor outlay, that "as the public works contemplated are for the advantage of the Dominion in general they should be assisted by the Federal Government to such an extent as will prevent any additional taxation of the trade of the port." It having been stated that Pickford & Black have advanced their rates of freight to the West Indies, because rates from United States ports had advanced, it was resolved to write to the Government about the advance.

—It may be recalled that some months ago the People's Bank, Philadelphia, was compelled to close its doors as a consequence of the suicide of its cashier, John S. Hopkins, and that investigation showed that its resources had been impaired by $800,000, through loans made to Richard F. Loper and the Guarantors' Finance Company, of which Loper was manager. The receiver of the bank, Mr. Thos. W. Barlow, was enabled one day last week, as a result of receiving a cheque for over $400,000 from James McManes, president of the bank, to make the very gratifying announcement to the depositors and other creditors, that he was in a position to pay them a dividend of 90 per cent., and that the remaining 10 per cent. will follow in three months. President McManes, to whom Hopkins' doings came as a terrible shock, heroically announced that he would personally guarantee that no depositor or creditor would lose a dollar by the bank's failure, and he has made his word good to the very letter. James McManes is another of the men of whom Philadelphia should be proud.

—It has been decided by the government of France, that nickel shall be introduced into the coinage of the Republic. It is not intended, however, that nickel shall entirely supersede bronze, as it has done in Belgium and Switzerland. The idea is to secure a piece of intermediate value between the half-franc and the 10 centime piece, which correspond more or less roughly with the British sixpence and penny. The French Mint is busy now issuing the new pennies and halfpennies with the designs of M. Daniel Dupuis. The same artist is engaged upon the new nickel piece, which will be of the value of two-pence.

—The Toronto Stock Exchange held its annual meeting on Tuesday last, 21st June, when the following officers were elected: President, G. Tower Fergusson; vice-president, J. Lorne Campbell; secretary, R. A. Smith; treasurer, R. H. Temple; managing committee, A. E. Ames, H. M. Pellatt and A. P. Burritt; auditors, H. F. Wyatt and W. G. Mitchell.

—An article in our last issue, on the Montreal harbor improvements, contained the word "government" for "stationary" elevators; the mistake was corrected when about half the edition had been printed.

GAMBLING.

Bishop Hall, Episcopal, of Vermont, has endeavored to make a reasonable statement of the arguments against gambling. He says that the objections are:

First.—Its danger on account of the excitement that belongs to it.

Second.—The fact that it tends to discourage honest, sober, hard work, people thinking that by its means they can attain to wealth more easily and quickly.

Third.—That it lowers and degrades what should be manly sports.

Fourth.—That it ignores the responsibility for the trust of money committed to one.

Fifth.—That it is a violation in selfishness of the law of brotherly love.

CONVENTIONS THIS SUMMER.

The Railway and Engineering News has a list of conventions. We append part of it: June 20.—American Railway Master Mechanics' Association, Saratoga, N.Y.

July 6.—National Association of Railway Surgeons, Toronto, Ont.

July 13.—American Society of Railroad Superintendents, Alexandria Bay (Thousand Islands), N.Y.

July 20.—American Association of General Baggage Agents, Detroit, Mich; secretary, J. E. Quick, G. T. Ry., Toronto, Ont.

August 17.—New England Roadmasters' Association, Boston, Mass.

September 6.—American Street Railway Association and National Railroad Master Blacksmiths' Association, Boston, Mass.

September 13.—Traveling Engineers' Association, Buffalo, N.Y.

October 18.—Association of Railway Superintendents of Bridges and Buildings, Richmond, Va.

INVESTIGATE FIRES.

Investigation into the causes of fires is as much a public duty as fire extinguishing. Naturally the insurance offices shrink from habitually disputing payment for loss. The elements of prudence and safety have to be considered, and in practice questions are only raised in glaring cases. There is no organized system for dealing with the origin of fires, and the danger of detection of wilful fire raising is so slight that it is only in a limited degree preventative. An isolated enquiry has little influence beyond its own case. Anything short of an investigation into the cause of all fires, without exception, will fail to reduce, in any appreciable degree the percentage of wilful fires. If it were known that every outbreak of fire would be examined into by the coroner, could the deterrent effect be doubted? There is no want of agreement, indeed, that such investigations are a public duty, but public feeling does not seem to be sufficiently strong to give the impulse requisite for legislation. Nor will sympathy be easily aroused, since the immediate sufferers are generally wealthy insurance companies. It is not creditable to the insurance offices that they submit to be defrauded from year to year by dishonest insurers, and it is deplorable that the Government should allow the crime of arson to be committed almost with impunity, when by a simple process such as an investigation into the origin of every fire, a fairly efficient remedy could be provided—Scottish Critic.

—Philip D. Armour has presented the Armour Institute of Technology, Chicago, with an additional $500,000 to maintain the school on the largely increased scale to which its operations have come of late. There are now 1,100 students in attendance, a much larger number than was planned for originally.

Meetings.

CANADIAN BANK OF COMMERCE.

The annual meeting of the shareholders of the Canadian Bank of Commerce was held in the banking-house, Toronto, on Tuesday last, 21st inst., at 12 o'clock. There were present: Hon. Geo. A. Cox, Messrs. N. Merritt, Wm. Spry, Robert Kilgour, C. S. Gzowski, jr., John Scott, John Taylor, W. B. Hamilton, John Hoskin, Q.C., LL.D., A. E. Ames, W. M. Flavelle, R. K. Connell, Thomas Kilgour, C. D. Massey, A. V. DeLaporte, Matthew Leggat, Rev. A. B. Lawler, J. W. Flavelle, Walter S. Lee, Thomas E. Fraser, A. T. Wood, M.P., Hamilton: Philip Browne, Aemilius Jarvis, F. J. Roche, H. M. Ferguson, Wm. Cook, B. M. Britton, Q.C., Kingston; Henry Beatty, Rev. E. H. Dewart, A. H. Ireland, R. H. Temple, W. H. McCaw, Port Perry; Z. A. Lash, Q.C., Wm. McCabe, John L. Blaikie, Hon. A. M. Ross, J. W. Langmuir, N. Silverthorn, Robert Somerville, Robert Thompson, A. I. Hubbard, W. R. Riddell, Q.C., J. K. Niven, J. Kerr Osborne, A. E. Plummer, W. J. Gage, Thomas Sanderson, David Smith, Dr. Ryerson, and others.

On motion, the president, Hon. Geo. A. Cox, was requested to take the chair, and Mr. J. H. Plummer, the assistant-general manager, was appointed to act as secretary.

It was moved by Dr. Hoskin, seconded by Mr. W. B. Hamilton, that Messrs. Philip Browne, J. Lorne Campbell, and R. H. Temple act as scrutineers. Carried.

The president called upon the secretary to read the annual report of the directors, as follows:

REPORT.

The directors beg to present to the shareholders the thirty-first annual report, covering the year ending 31st May, 1898, together with the usual statement of assets and liabilities:

The balance at credit of Profit and Loss account brought forward from last year is...	$ 20,479 27
The net profits for the year ending 31st May, after providing for all bad and doubtful debts, amounted to.. ..	477,456 30
	$497,935 57

Which has been appropriated as follows:

Dividends Nos. 61 and 62, at 7 per cent. per annum..	$420,000 00
Transferred to Pension Fund.	10,000 00
Written off bank premises and furniture....	25,000 00
Balance carried forward	42,935 57
	$497,935 57

The usual careful revaluation of the entire assets of the bank has been made, and all bad and doubtful debts have been amply provided for.

In presenting the statement at the close of the last fiscal year, the directors drew attention to the large resources of the bank which they were obliged to invest in loans and securities yielding a low rate of interest. This condition continued throughout the year, which has just closed, until the marked revival in all channels of business two or three months ago.

The bank has been appointed the sole agent of the Dominion Government for the collection of the royalty to be imposed on gold mined in the Yukon district. It has also been appointed the banker for all the ordinary business of the Government in that district. In consequence of this, and of influential business connections in the Alaskan and Yukon countries, a branch of the bank has been established at Dawson City. A branch has also been opened at Dresden, Ont., and the sub-branch at Chaboillez Square, Montreal, has been closed.

The directors have again pleasure in recording their appreciation of the efficiency and zeal with which their respective duties have been performed by the officers of the bank.

GEO. A. COX,
President.

GENERAL STATEMENT.

Liabilities.

Notes of the bank in circulation..		$ 3,030,428 00
Deposits not bearing interest	$ 3,490,953 75

		$34,256,103 59

B. E. WALKER,
General Manager.

The President:—The report is now before you, gentlemen. We shall be glad to answer any enquiries you may make.

Mr. B. M. Britton, Q.C., (Kingston); Is the large balance shown in the statement as due by agents in the United States a normal state of things, or exceptional for this year?

The General Manager:—Not very abnormal. We have large business interests in New York, Chicago, and New Orleans. The bank makes large loans in the United States at all times.

Mr. Britton:—The amount then represents investments there?

The General Manager:—It represents money invested by our own agents chiefly in call and short time loans. I might say in this connection, as I think it will be of interest to our shareholders, that in 1893 we were able in consequence of the large resources which we had, in the United States to bring in some $3,000,000 to use in our Canadian business. I think I am right in saying that the Bank of Montreal and ourselves together brought back to Canada, from May to September, about eight million dollars. This was the result of having money invested in the United States that could be readily available in time of trouble, and is of course one of the chief reasons for our keeping moneys invested outside of Canada.

The President then delivered his annual address, as follows:—

PRESIDENT'S ADDRESS.

A year ago I had occasion to remark upon two very prominent features in the statement of the bank then laid before you. These were the rapid increase of our resources, and the difficulty we were experiencing in employing them profitably. Although the outlook is now changing for the better, at the close of our year our position was even more pronounced than the year previous. Our deposits have now reached $23,000,000, an increase over last year of almost $4,000,000, and there is no special feature to note regarding this large increase. It is almost entirely due to the ordinary deposits of the many thousands who deal with the bank. It will be seen that as against this growth in deposits we have increased our investments in bonds over $3,000,000, our total holding of Government and municipal securities and other bonds being now nearly $7,500,000. It will also be remembered that out of total assets of $34,000,000, about $17,000,000, or one-half, are either immediately or nearly available. These are much larger figures than we have been accustomed to, and exhibit in a most forcible manner the strength of the bank, and the high estimation in which it is held. But while this is a matter for congratulation, the difficulty of caring for this large amount of money, and of earning a profit over and above the interest paid on deposits, and the cost of administration, is very great indeed. We, however, fully expect that the revival which has set in will make the demand for ordinary commercial loans much larger than it has been for the past few years.

During the year an issue of Dominion Government bonds was placed upon the market at a price yielding to the investor only about 2¾ per cent. per annum, and over one-half of the issue was taken by Canadian banks. These bonds will, no doubt, move steadily towards par, or a yield to the investor of only 2½ per cent. per annum. In view of the fact that the administration of the post-office and other Government savings banks cost about one-quarter of one per cent. per annum, there was clearly no excuse for continuing to pay for such deposits 3 per cent. per annum, and we have to compliment the Finance Minister upon giving notice that after the 1st of October the rate will be reduced to 2½ per cent. Politicians have tried to show that this is a step specially favored by the banks, as opposed to the rest of the people. But this has been a very fruitless effort, not calculated to deceive any who have given the matter serious consideration. In a new country the majority are borrowers, and the real interest is in lower rates, and not higher. If the Government rate is kept the least fraction above the true value of the depositor's money, the business community must suffer by the artificial rate thus maintained.

We are very glad to learn that there is some prospect of a settlement of the various questions at issue between the United States and Canada. The commercial importance of good relations between the two countries, of a reasonable tariff, and as little friction as possible in the routine connected with the international exchange of commodities, is not only very great to Canada, but also to the United States. It is evident, from the space devoted to the subject in prominent journals, that during the past year or two the people of the United States have become more intelligent than heretofore, as to the value of trade with Canada. We should not, and need not, make any material concessions to the United States, which are not fairly an exchange for concessions made to us. To know that we can prosper whether they are friendly or not is the best basis for a satisfactory adjustment. Nevertheless, we can afford to frankly admit that the present measure of our prosperity would be enhanced by greater freedom in our trade relations with them.

It is evident that we have entered upon an era of railroad building, and of great increase in our ocean carrying trade. After the building of the Intercolonial and the Canadian Pacific railways, it was but natural that a young country like Canada should pause, a little exhausted by its effort; and there were those who therefore thought that we had ended our day of railroad building on a large scale; whereas we have but commenced. Many things have happened lately which should cause us to take stock of our country afresh, and estimate from a wider point of view its future possibilities and its immediate wants. In Manitoba the branch roads and local systems feeding the main lines are prospering, and new communities of settlers are being created, the people are awakening to the great value of new districts which were not discussed a few years ago, and the feeling that the railroad must be the pioneer—must go in advance of settlement, is greatly strengthened by the success of some recent efforts in railroad building of that kind. Gradually we are making it possible for pioneers in farming to get into that more northerly country in the North-West, which so attracted the early travellers that they called it the "fertile belt," at a time when the prairie country west of the Red River valley was accounted worthless. Further west, along the foothills, it is clear that railroads must be built northward, and when built we will wonder at the possibilities of cattle ranching thus opened to the world. In British Columbia the need of railroads is even more evident to the most careless observer. In the southern part, where mining is being developed, much has been done, and much remains to do. But, looking northward, everything is yet to do. We have all been discussing freely the needs of the Yukon district, partly because it has become a political question, and partly because it has been so suddenly thrust upon our attention. But the Cassiar and the Cariboo districts require aid also, and there can be little doubt that before long a railroad system will serve all these, touching at some Canadian port on the Pacific, and eventually reaching down to the main line of the Canadian Pacific. On the Pacific a great ocean traffic is being created, and while much of it is merely coast-wise, and carried on mainly by United States vessels, when the first rush of the mining excitement is over we feel sure that of the steady trade that remains we shall have a considerable share. In the traffic with Asia there is a great increase, of which we get a fair share. On the Atlantic our traffic is rapidly increasing, and whether the proposed fast line service is carried out by the present projectors or not, the need of it is more evident than ever before.

During the year the bank has made a somewhat important venture in opening a branch at Dawson City, in the Yukon district. We had been urged to establish an agency in that country before Dawson City existed, but we were naturally deterred from doing so by the absence of sufficient police protection, and the fact that there was no mail service, and no immediate prospect of railway or telegraph services. Since then, the conditions have changed considerably, and the bank having been appointed agent for the Dominion Government for the collection of the royalty imposed on gold mined in the Yukon Territory, and bankers for the ordinary business of the Government, we decided to send an expedition into that country to open a branch of the bank. The main body of the staff of the new branch, with an outfit sufficient to commence business, went through the White Pass some weeks ago, and is now doubtless doing business at Dawson City. The bank controls an office and safe there until our own offices and vaults are built. The remainder of the staff, with safes and other permanent supplies, left Seattle on the 13th June, and will arrive in Dawson City some time in July. They, of course, go all the way by water, leaving the ocean steamer in the Behring Sea, at the mouth of the Yukon River, and travelling from that point, St. Michael's, up the Yukon in a river steamer to Dawson City. The establishment of a bank in such a remote part of the country, and the necessary arrangements for the shipment thence of gold dust, have been attended with innumerable difficulties of detail and great expense, and we naturally hope that the venture may be a source of considerable profit to the bank. This of course time alone can determine.

I have now pleasure in moving the adoption of the report, which will be seconded by the vice-president, but before submitting it for your approval, I will ask the general manager to address you.

The Vice-President:—In seconding the adoption of the report, I would like especially to call the attention of the shareholders to the remark in the report that ample provision has been made for all bad and doubtful debts, and to express the opinion of the board that this statement is most fully justified. I am glad also to express the appreciation felt by the board of the ability and prudence with which the affairs of the bank have been administered during the past few years of financial depression, and I think I can say of the very conservative policy which has been followed. I think this is fully shown in the statement of the assets presented to you to-day.

There are good prospects of the return of prosperity, and you may rely on the management of the bank being ready, as they are fully provided with the means, to take every advantage of the increase in business and to exercise the same care with regard to the investments of the future.

The General Manager then spoke as follows:—

GENERAL MANAGER'S ADDRESS.

In addressing you a year ago, the belief was expressed with some confidence that we were nearing the end of a long period of depression. Such hopes have been entertained before only to be deferred, but this time the turn in the tide of business was so decided that even the most pessimistic must have felt its influence. We have only to walk about the streets of this city to notice the improvement. The vacant houses are fast filling, and probably do not now exceed the natural number in a city of over 200,000 people; good houses of moderate rent are being enquired for, and are evidently becoming scarce; and the building operations of the city, which have been so severely restricted for some years, have increased for the first half of this year to the largest figures since 1891, being more than twice as much as in 1897. Clearly we are in the way of surmounting the very bad effects of the collapse in real estate speculation. We are told that houses taken over from defaulting borrowers in Toronto are now being sold in quite satisfactory numbers. Rents are, of course, low, and taxes high, and we see no sign of the losses of the past being retrieved by sharp advances in real estate values, but a healthy condition as to occupancy and ownership is the first requirement. The great danger to be avoided seems to be the return of speculative building on borrowed money, of which there is some sign already. The owners of rented residential properties, who are also lenders, and those lenders who have large sums of money depending on the value of residential property, have only themselves to blame if they help others to increase the supply, and thus tend to permanently keep down both values and returns. We are told that the number of farms held under foreclosure or default is lower, both in Ontario and Manitoba, than for many years past, many loan companies having practically no properties of this class on their hands.

AGRICULTURE.

As we all know, the substratum of our commercial well-being is agriculture, and this has truly been the farmers' year. Indeed, I believe that many of the farmers of Canada are willing to admit that they have had a good year, and such an unusual admission is significant of a great deal. Wheat has not been sown freely in Ontario for many years, but with a steadily advancing market ending with phenomenal prices, it is not surprising that in sweeping up the floors of the granaries such an extraordinary quantity turned out to be in the farmers' hands. Many have held their wheat two and three and even four seasons under the charm of "dollar wheat," actually realized in some cases this time. In Manitoba the yield per acre was disappointing, being about fourteen bushels, but the quality was so good that 92½ per cent. of the crop graded equal to No. 1 and 2 hard, while the price was so high that that province has added another year to its recent history of uniform progress. The railways claim to have moved 19,000,000 bushels, which would mean in money to the farmers of the North-West over $14,000,000. It is no longer a province to which the East finds it necessary to extend its sympathy as well as its financial indulgence. It has instead become the object of our admiration, and sometimes of our envy. Emigrants are now rapidly settling in Manitoba, while at the same time farming operations are being extended in Ontario. Indeed, the high price for all kinds of farm products has done much to arrest the withdrawal of men from agriculture to mining and other more precarious pursuits. A greatly increased acreage of wheat has naturally resulted, but with empty granaries in America, and low-stocked mills throughout the world, it would seem that we may hope with some confidence for a reasonable price for wheat during the ensuing season. Until the world's stock of wheat again reaches the normal quantity we seem entitled to a price larger than the average of recent years. As far as mere prospect of growth is concerned, the season thus far has been most favorable to grain, hay and fruit, and everything promises well for a most bountiful harvest.

The farmers during the past winter were in an unusually good position to fatten cattle, the supply of coarse grains and other food being very large, but as we intimated a year ago, the demand which sprang up so suddenly, both in the United States and Canada, for young cattle to feed put up the price to a figure which in some cases left little or no profit to the feeder. For the same reason, the number of cattle being fed or grazed is in some parts not as large as it should be. But as a whole the condition of the cattle business is much improved from the recent years of low prices. The trade in special types of horses for shipment to Europe continues to grow, and to be profitable to those who undertake it intelligently. There has been a large and satisfactory business done in Canada in all kinds of hog products, with a healthy increase in volume over last year. The farmer has received a price for this product which must pay him quite as well, if not better, than the other products of his farm. There are strong complaints in some quarters as to the use of corn in feeding, although other packers think the warning uttered a year ago by those interested has had its effect. Still, it can do no harm to say again that the high reputation of our bacon, however much due to superior methods of curing, is mainly based upon the methods of feeding which have prevailed in the past, and this reputation may be ruined in a very short time by the use of corn. We may as well understand that we cannot both force the feeding and the early marketing of the hog on the one hand and continue to obtain the high price on the other.

The season closing 31st March last has been another banner year for cheese. It was felt that the excellent pasturage of 1897 would result in a larger yield, but we were hardly prepared for an output of nearly 200,000,000 pounds. The precise figures are 198,250,000 pounds, against 162,844,000 for the previous year. The price too, has been very satisfactory, nearly 1 cent per pound higher on the average than the previous year. The result in money was $17,900,000, against $14,318,000, a gain of about 25 per cent. Cheese is being produced in new districts in Canada every year, and the promise for pasturage in 1898 could hardly be better. It is, however, questionable if another great increase for the coming season will be an unmixed blessing. The Canadian farmers did well last year, but we are told that the English dealers lost money, and we may not find a market this year quite so willing to consume all that we may make. We are improving our exports of butter, although we are far from taking the important position in this trade which seems within our power. We apparently send Great Britain more than 60 per cent. of the cheese she imports, but only about $2,000,000 worth of butter out of imports amounting to $85,000,000 or thereabouts, a trifling proportion of less than 2½ per cent.

On the whole, it is impossible to resist the conclusion that the farmers throughout Canada have had one of the best years for a long time, and have a prospect ahead of them for the next year which has perhaps never been better. They have been paying remarkably well for all debts such as store accounts, implement notes, and interest on mortgages. They have in numerous cases either paid mortgages off entirely, or have made large reductions, in many of the latter cases demanding a reduction in the rate of interest in consequence. Those who were not in debt have largely increased their savings, much of which is reflected in the increased deposits in banks. They have certainly become good buyers again from the implement companies, but whether from the shopkeepers is not so clear. With another prosperous season, however, we cannot doubt that the farmers generally will be able to spend money more freely than for some years.

LUMBER.

This has been another year in which while in certain aspects the lumber trade has been quite satisfactory, in others it has continued unsatisfactory. The British buyers, as in several recent years, purchased last autumn the cut of deals for the ensuing summer from the leading manufacturers in Ottawa and adjacent points. In consequence of these ready sales the range in quality of deals now embraces grades low enough to make further movement in that direction of doubtful wisdom for the present. The British market has lately had perhaps a less strong tone than is desirable, but as the cut this year will be considerably smaller than was expected, this may ensure the maintenance of good prices. The prominent manufacturers, who have enjoyed for some years a good market in deals and thin lumber, are gradually widening the proportion of their entire cut intended for Great Britain and seem determined to make a market for some of their product in a less raw state than sawn lumber. From every point of view this is desirable, and particularly so as long as we have to look to the United States for a market for such a large percentage of the cut of each mill. But whether our lumbermen look to the United States for the disposal of only a portion or of practically all of their manufacture, their disappointment may be understood when the Dingley tariff bill announced that logs were to enter the United States free, but that lumber must pay $2 per thousand feet board measure. Subject to this duty there would doubtless have been a large business done in Canadian lumber, both in the Eastern and Western States, together with the considerable improvement which we have had in the home market, owing to the general revival in business. But the war has sadly marred the outlook by seriously diminishing the volume of trade in the Eastern States, and doubtless somewhat in the West, although the business there is still much better than in recent years. It is to be hoped that the action of the Ontario Government in enforcing the manufacture into lumber in Canada of logs cut from Crown lands will cause our friends in the United States to see that there is an effective answer to their selfish policy of free logs and high-tariff lumber. With the better feeling between the two countries and the improved state of the lumber industry in the United States, may we not hope for the removal of all restrictions in this particular trade, in which there is no room for real difference, if the true interest of each country, taken as a whole, is to govern, instead of the interests of a few individuals ?

STATE OF TRADE.

The past year was evidently the last of the series of lean years through which we have been called upon to pass. At the beginning of it there were features sufficiently bright to enable one to foresee an improvement, but there were also many unsatisfactory elements, especially in the United States. The passage of the Dingley tariff bill with certain sections not only most illiberal, but unfriendly to this country, was keenly felt, and although, with the rising tide of general prosperity, we have for the moment almost lost sight of these points; they still remain a serious menace to our lumber and pulp industries. It has also been a very unsatisfactory year to those who are interested, and most of us are, whether we realize it or not, in the financial condition of the United States. The President, in a message, tried once more to arouse the people to the fact that currency reform was the most grave and pressing question before the nation. The monetary conference established at Indianapolis brought in a set of recommendations which have at least the merit of being the best that have thus far been made. The Secretary of the Treasury has laid plans of currency reform before the public, and the Committee on Banking and Currency have also, through Mr. McCleary, given birth to a plan. Nothing has, however, been actually accomplished. Except in the face of a panic, or in a campaign against a political party whose platform is national ruin, the people do not rise to such a question of national morals, but are more interested in the woes of other countries. It is an old axiom that in time of peace nations should repair their fortifications and replenish their war chests. In other words, repair the breaches made by war in both the system of defence and the financial system. For a third of a century the United States has been at peace, and even the possibility of war with Spain distinctly before them did not spur them into action. The war is now a miserable reality, certain to cost many hundreds of millions of dollars, and even if the half-dead free-silver party is not stirred into dangerous activity, reform will surely not be as easy as it would have been a year or two ago. Russia has achieved the gold basis. The feeble South American republics one after the other, are getting upon a gold basis. No great nation is now upon a silver basis. Why has not the United States the moral strength to say that it will no longer pander either to silver miners or to idolators of the sacred greenback, but that it will declare for gold alone, and, abandoning forever the business of banking, make it possible for the banks of that great country to adequately serve the long suffering manufacturers, merchants, and dealers in raw products?

Canadian bankers, having large interests in the United States, as well as the bankers in that country, naturally feared somewhat the effect of a war with Spain, but thus far values of all kinds have not been adversely affected in any considerable degree. The very great prosperity owing to high prices for all farm products, the enormous increase in exports, and consequent large balances coming to the United States, have obscured, and to some extent prevented, the natural results of war on commerce. There is no doubt, however, that in the East many fine opportunities for business, which were just opening out, were closed by the war, and the scope of other operations seriously lessened. The timidity of capital in the first few weeks of the war was very marked indeed. The effect of the war in this respect touches Canada more in the matter of lumber than in anything else, but this has been referred to already. In Canada almost all manufacturers are increasing the output and are doing well. Among those who enjoy a good export trade the increase in some cases is so great as to suggest possibility in volume beyond anything which has thus far seemed within the reach of this country. The increase in the quantity and value of our exports is, however, mainly caused, of course, by our raw products with the added factor of good prices. It is a comfortable state of affairs for this young country to have exports in excess of imports, and at present the excess runs into very handsome figures. Our exports for the ten months of the year which ends 30th June amount in value to $119,000,000, against $114,000,000 for the same period last year, and $87,000,000 for 1896. The excess over imports for the ten months is $17,760,000, as against $6,647,000 for the same period last year, and a small excess of imports in 1896. In only one previous year since Confederation has there been an excess of exports over imports.

We are frequently told that if Great Britain were at odds with the rest of the world she would be at their mercy in the matter of food supply. We need not waste time over such remote possibilities, but when we consider how England is fed, what our share is in the feeding, and what our share might be, there is, indeed, much reason for thinking by practical people. From a reliable journal we learn that the total imports of food into Great Britain in 1895 were £115,539,862, and of this Canada supplied £8,020,262, or about 7 per cent. Indeed, of cereals we only supplied 3 per cent., our large proportion of cheese (60 per cent.) helping to increase the general average. During the recent years of agricultural depression, when men were not turning to farming, we could not do much to increase this percentage. Many countries were supplying the best of food to Great Britain at very low prices, and all were finding it not very profitable. But we have evidently passed one of the great adjusting periods. The laboring men of the world are per man steadily increasing the quantity of meat and of wheat flour they consume. In Belgium the eating of meat by workingmen has increased threefold in thirty years, and the annual consumption of bread has increased about 117 pounds per head in that time. One writer estimates—I have no idea on what basis of facts—that there was last year a deficiency of land devoted to the cultivation of wheat and rye, as compared with the wants of man, of fifty million acres. Who has this wheat land, and, for that matter, who has land in abundance suitable for rye, and not for wheat? Canada certainly has both. We need not grow rye, however, while we can supply wheat as good as any in the world at as low a price as any other country. To enable us always to do this we want two things above all else. We want land in the best localities so cheap that every agriculturist in the world who thinks of emigrating will consider our North-West. And we want transportation facilities not excelled in any similarly situated country. We are building railroads, we are increasing our settlers, but do we offer inducements enough in cheap lands?

There has been during the past year a renewal of discussion regarding an Insolvency Act, and in this connection we are sorry to notice the statement repeated in varying forms, that the banks are opposed to the passage of insolvency legislation. It is also sometimes stated that should any legislation be passed the banks desire special advantages, and this has been reduced to the more specific statements that banks desire the privilege of "double ranking" in some cases, and are unwilling in some cases to "value their securities." Both of these statements are quite misleading. I do not believe that the banks, as a whole, are averse to an insolvency law, if we can obtain one which is even reasonably near what it should be. Many bankers as well as other business men, do not want an insolvency law if it will tend to make settlements by fraudulent debtors easy to obtain and thus help to debauch the business morals of the community, as has been the case with some insolvency laws. But the best proof of the attitude of the bankers was given when, during the life of the late Government, an insolvency measure was introduced in the Senate. An agreement was arrived at between those representing the Boards of Trade and those representing the banks regarding the entire bill, with the exception of one section, which section had been introduced by the Government, based on the existing legislation in England, and to conform with the ordinary contract rights of parties. This, the representatives of the Boards of Trade succeeded in changing in the committee of the Senate, to which the bill was referred, in such a manner as to materially alter the security on which rests the larger part of the bills discounted by a bank. The measure in this shape was not introduced in the House of Commons, and the reasonable insolvency law which the country might at that time have had was not passed, but its non-passage was not caused by the banks.

The motion for the adoption of the report was then put and carried.

Mr. A. T. Wood, M.P.: I have been delighted to be present and to hear the very able addresses of the president and of the general manager. I am quite sure that all present will feel that gentlemen who have such a grasp of the business of this country, and can present it in such a clear manner, are the right men in the right place in the management of this large institution. With that in view, sir, I wish to move a resolution which I am quite sure will meet with the approval of all present. The resolution is:

"That the thanks of the meeting are due and are hereby tendered to the president, vice-president, and other directors for their careful attention to the interests of the bank during the past year."

The statement in our hands is an evidence that the directors have given earnest and careful attention to the interests of the bank during the year that has passed. I know a little of the anxieties of a bank director, and know that with the large amount of capital to be managed there must be entailed a great deal of anxiety and care on the part of the directors of this bank, and the statement that we have to-day shows that they have discharged their duties with great benefit to the shareholders.

Rev. Dr. Dewart: I have much pleasure in seconding the resolution. I believe it is well deserved, as an expression of the confidence of the shareholders in the fidelity and intelligence with which the directors have conducted the affairs of the bank.

The motion was then put and carried unanimously.

The President: On my own behalf, as well as on behalf of my co-directors, I desire to acknowledge with gratitude the resolution that you have kindly passed.

Mr. C. D. Massey: I have listened with great pleasure to the able address of the general manager, and I think I voice the sentiment of all present in moving the adoption of the following resolution:

"That the thanks of the meeting be tendered to the general manager, assistant general manager, and other officers of the bank, for the satisfactory discharge of their respective duties during the past year."

Mr. W. S. Lee: I have pleasure in seconding the resolution and endorsing what Mr. Massey has said in relation to it.

The President: I have always pleasure in submitting this resolution. I know it is the desire of all the officers of this bank to do everything possible for the promotion of the interests of the shareholders.

The resolution was carried unanimously.

The General Manager: I have to thank you very much for this resolution. Of course it is submitted every year, but at the same time it is well that we should remember that it goes out to a very large staff, nearly 400 now, who get, perhaps, not as much appreciation, individually at all events, as the way in which they discharge their particular duties might warrant. As far as the general management is concerned, we have had a good year in some respects, and not a very satisfactory one perhaps in others. It is a source of anxiety and labor to take care of the deposits which have come to us so largely in late years. But we must find some employment for them, and in years when business is restricted it is not possible to find this employment altogether in mercantile business—not at any rate without doing harm. If the money is to be well lent it must be lent naturally, and not forced out.

Mr. Plummer also thanked the meeting for the vote.

Moved by Mr. Flavelle, seconded by Mr. Kilgour, and carried, that the meeting do now proceed to elect directors for the coming year, and that for this purpose the ballot box be opened, and remain open until 3 o'clock this day, the poll to be closed, however, whenever five minutes shall have elapsed without a vote being tendered, the result of the election to be reported by the scrutineers to the general manager.

The meeting then adjourned.

The scrutineers subsequently reported the following gentlemen to be elected directors for the ensuing year: Hon. George A. Cox, Messrs. James Crathern, William B. Hamilton, John Hoskin, Q.C., LL.D., Robert Kilgour, Matthew Leggat, and Joseph W. Flavelle.

At a meeting of the newly-elected board of directors held subsequently, Hon. George A. Cox was re-elected president, and Robert Kilgour, Esq., vice-president.

BANK OF HAMILTON.

The annual general meeting of the shareholders of the Bank of Hamilton was held on Monday in the board-room of the head office, Hamilton.

There was a large attendance.

On motion, Mr. John Stuart was called to the chair, and Mr. J. Turnbull was appointed secretary.

Mr. Stuart, the president, submitted the annual report, as follows:

REPORT.

The directors beg to submit their annual report to the shareholders for the year ended 31st May, 1898:

The balance at credit of Profit and Loss account, 30th May, 1897, was		$ 21,029 02
The profits for the year ended 31st May, 1898, after deducting charges of management and making provisions for bad and doubtful debts, are		160,804 37
		$181,833 39
From which have been declared:		
Dividend 4 per cent., paid 1st Dec., 1897	$50,000 00	
Dividend 4 per cent., payable June 1, 1898	50,000 00	
Carried to Reserve fund	50,000 00	
Written off bank premises account	5,000 00	
		$155,000 00
Balance of Profit and Loss carried forward		$ 26,833 39

The report for 1897 noted the beginning of the bank's operations in the Province of Manitoba. The experience of the past year's business has encouraged the directors to sanction a policy of gradual expansion and widening of the bank's influence and connections in that country.

Manitoba and the whole North-West appear to be entering on an era of great development, and your directors consider the future prospects so inviting as to fully warrant the participation of this bank in the beneficial results that appear to be so promising.

One of the best and most prominent positions in Winnipeg for a banking office was secured, and the building is now being prepared for occupation. Three offices in the interior of Manitoba have been opened.

In Ontario agencies have been opened at Niagara Falls, Delhi, and Southampton, whilst that at Alliston has been closed.

JOHN STUART, President.

Hamilton, 9th June, 1898.

GENERAL STATEMENT.

Liabilities.

To the Public:

		$11,199,144 33

J. TURNBULL, Cashier.

Bank of Hamilton,
Hamilton, May 31st, 1898.

The adoption of the report was moved by the president, seconded by Mr. A. T. Wood, M.P., and carried.

Mr. William Hendrie and Mr. Samuel Barker moved the usual vote of thanks to the directors, and Mr. F. W. Gates, seconded by Mr. F. W. Fearman, the customary acknowledgments of the shareholders to the staff.

Messrs. F. H. Lamb and George E. Gates were appointed scrutineers, and reported the re-election of Messrs. John Stuart, A. G. Ramsay, John Proctor, George Roach, A. T. Wood, M.P., A. B. Lee and Wm. Gibson, M.P., as directors.

At a subsequent meeting of the directors, Mr. John Stuart was re-elected president and Mr. A. G. Ramsay vice-president.

UNION BANK OF CANADA.

The thirty-third annual general meeting of shareholders of this institution was held at the banking house, in Quebec, on Wednesday, June 15th, 1898.

The following gentlemen were present: A. Thomson, Hon. E. J. Price, D. C. Thomson, Edmond Giroux, James King, E. J. Hale, W. H. Carter, John Shaw, Wm. Brodie, E. F. Wurtele, G. H. Thomson, C. P. Champion, Hon. John Sharples, Heber Budden, J. H. Simmons, T. C. Aylwin, David Smith, Francis Gunn, Robt. Brodie, Lt.-Col. J. F. Turnbull, P. C. Casgrain, Gaspard Lemoine, John Laird, jr., A. E. Scott and Charles McKenzie.

The president, A. Thomson, Esq., took the chair, and requested Mr. Fred. W. Smith to act as secretary, and Messrs. David Smith and John Shaw as scrutineers, which was agreed to.

The chairman read the report of the directors, which was as follows:

REPORT.

The directors beg to submit a statement of the liabilities and assets of the bank at the close of the financial year, ending 31st of May last. Also the following statement of the result of the business for the past year:

PROFIT AND LOSS ACCOUNT, MAY 31ST, 1898.

Balance at credit of Profit and Loss account on May 31st, 1897	$ 5,680 09
The net profits for the year, after deducting expenses of management, reserving for interest and exchange, and making appropriations for bad and doubtful debts, have amounted to	$134,541 58
	$140,221 67
Which has been appropriated as follows:	
Written off bank premises	$ 4,858 00
Dividend No. 62, 3 per cent.	39,421 50
Dividend No. 63, 3 per cent.	44,886 24
Transferred to Rest account	25,000 00
Balance carried forward	26,055 93
	$140,221 67

The additional capital of three hundred thousand dollars ($300,000), authorized at the last annual meeting of the shareholders, was all subscribed and paid up in full during the year, making the capital of the bank $1,500,000.

The increased capital has proved advantageous to the business of the bank, and although the benefit was necessarily limited to a portion only of the year, the result shows that a net profit of fully 9½ per cent. on the capital has been obtained.

An Act of Parliament has been obtained authorizing the conversion of the denomination of shares from $60 to $100, and so soon as the requirements of the Act have been duly complied with the shares of the bank will for the future be of the denomination of $100 each. In accordance with the terms of the statute, the fractional shares will he offered for sale to the public by tender.

It has been found desirable and necessary to open additional branches of the bank in Manitoba and the North-West Territories.

The new business so obtained has proved to be satisfactory, but it is evident to your directors that the extended business would be greatly benefited by a further addition to the capital, and they recommend that the board be authorized to offer for subscription to the shareholders new stock not exceeding $500,000.

The additional capital can be safely and profitably employed and with material advantage to the general working of the bank's business.

The capital of the bank would then be $2,000,000, and at that amount your directors believe it may remain without further increase in the near future. A resolution for this purpose will be submitted for your consideration and adoption.

The usual inspection of the head office and branches of the bank has been made during the year.

A. THOMSON,
President.

Quebec, June 15th, 1898.

The adoption of the report was then moved by the president, seconded by Hon. E. J. Price, and carried.

Moved by Hon. John Sharples, seconded by Mr. James King: "That the capital stock of the Union Bank of Canada shall be increased from the sum of one million five hundred thousand dollars to the sum of two million dollars by the issue of five thousand new shares of one hundred dollars each, and the new shares shall be issued at such time and at such price and in such manner as the directors may determine and as provided in "The Bank Act." 2. That application be made by the directors of the bank to the Treasury Board of the Government of Canada, for a certificate approving of this by-law pursuant to the provisions of 'The Bank Act.'"

On motion of Lt.-Col. J. F. Turnbull, seconded by Mr. Wm. Brodie, "That the thanks of the meeting are due and are hereby tendered to the general manager, managers and other officers of the bank, for their careful attention to its affairs."

Moved by Mr. Robt. Brodie, seconded by T. C. Aylwin, "That the meeting now proceed to the election of directors for the ensuing year, and that the ballot-box for the receipt of votes be kept open until 1 o'clock, or until five minutes have elapsed without a vote being offered, during which time proceedings be suspended."—Carried.

The scrutineers appointed at the meeting reported that the following gentlemen were elected directors of the bank for the ensuing year: Messrs. James King, Hon. E. J. Price, Hon. John Sharples, A. Thomson, D. C. Thomson, E. Giroux and E. J. Hale.

Votes of thanks to the chairman for presiding and to the scrutineers terminated the proceedings.

FRED. W. SMITH,
Secretary.

At a subsequent meeting of the new board of directors, A. Thomson, Esq., was re-elected president, and Hon. E. J. Price, vice-president.

GENERAL STATEMENT.

E. E. WEBB,
General Manager.

Quebec, May 31st. 1898.

HOCHELAGA BANK.

Mr. F. X. St. Charles occupied the chair and Mr. J. A. Prendergast acted as secretary, at the 24th annual meeting of the Hochelaga bank in Montreal on Wednesday, 15th June.

Messrs. J. E. Beaudry and Ferreol Dubreuil were appointed scrutineers upon a motion of Mr. J. A. Vaillancourt, seconded by Mr. James Price.

The twenty-fourth annual report was as follows:

REPORT.

"Gentlemen,—In giving you an account of their administration during the financial year 1897-98, your directors beg you will notice the progress of your bank, by comparing the actual state of affairs with that of the 31st of May, 1897.

"If your circulation and your deposits have increased ($663,127), your cash, Dominion bank notes, debentures and other values readily realizable, have increased ($593,304), in a greater proportion; for they represent about 46½ per cent. of your circulation and deposits together, against 40¾ last year.

"Your capital, now at $1,000,000, has realized net profits of $115,067.95, that is, a little more than 11½ per cent., which state of affairs has permitted us to increase by $50,000 the reserve fund, after the ordinary dividends on the increased capital had been paid.

"In December last, to comply with the solicitations of a number of business men of the city of Sherbrooke, we opened a branch in that place. The importance of Sherbrooke, as far as industry and trade are concerned, is growing greater and greater every day, and marks the development of the Eastern Townships. We hope to derive from that source our share of prosperity and so far our expectations have been realized.

"Having for many years past a certain amount of business in the way of collections, etc., with the capital of our Province, we thought that the time had come to open a branch which would allow us to extend those relations, so much so, that, thanks to the energy of its citizens, Quebec, after having gone through the obstacles which shackled its advancement, has just inaugurated an era of progress and activity which promises a brilliant future.

"The Quebec branch was opened on the 1st of June, and we can say that the result so far has been most satisfactory.

"The assets in the treasury have been duly verified by your directors, and regular inspections have been made during the year at the head office, as well as at branch offices.

"The account of profit and loss, and the general statement of affairs of the bank will give you the details of what we have just pointed out.

PROFIT AND LOSS ACCOUNT.

Credit.

Balance at credit Profit and Loss account, 31st May, 1897	$5,496 33
Net profits for the year, after deducting costs of management, interest accrued on deposits, and provision for bad and doubtful debts	115,067 95
Premium on new stock	2,890 00

M. J. A. PRENDERGAST,
General Manager.

THE GENERAL MANAGER.

The general manager said:

Mr. President and Gentlemen,—You have had the opportunity of reading lately the very interesting and complete reports of those who direct our great financial institutions, and to-day I would not venture to give my own opinions, had I not been invited by the president, I will content myself with endeavoring to draw a practical lesson from our too frequent experience on one point.

"Last year I had the honor to say to you a few words upon the situation, and we noticed together certain signs of a return to prosperity. Moreover, the following harvest was generally abundant, and the prices of grain and other products of the soil have also been remunerative. However, some uneasiness still exists, and public confidence has not yet been regained.

Could we not in a certain measure, find the cause of this uneasiness in the fact that during the last few years, a new source of trouble in business has arisen. In the United States, especially, the rage for speculation possesses every one. The great speculators more than ever keep secret their plans and operations. This is enough to attract the people who follow them, ensnared as they are by the bait of uncertainty. This accounts for speculation upon all that exists, or can possibly come into existence upon war, its chances, and even upon the least probable possibilities.

"I would like to tell you that in our country we are not exposed to those dangers which deeply trouble the stability of business; but too often we come into contact with people, sometimes brilliantly gifted, who, after having succeeded in their legitimate trade, are blinded by the phantom of a speculation which has led them to their ruin.

"Let us hope that the hard lesson they have received will be of more profit to them, and also to those who have been less imprudent.

"Certainly, and I wish to be well understood, senseless speculation must not be confounded with that wise foresight, which, upon the faith of reasonable data, tries to judiciously and profitably put out money, were it even for a limited time. But I wish to condemn here those imprudent transactions in which one risks all he owns in the hands of parties unknown to him, and upon alleged values still more unknown.

"As we were saying in the beginning, the harvest and the products of the farm during these last few years have seemingly improved the situation. Let us endeavor to consolidate it, by our work, economy and prudence, which alone can form the basis of a durable prosperity in commerce and industry, and let us not forget that the most prosperous peoples are not those amongst whom speculations are most in honor."

MOTIONS ADOPTED.

It was proposed by Mr. F. X. St. Charles, seconded by Mr. R. Bickerdike, and carried, that the above report be adopted.

Proposed by Mr. H. Beaugrand, seconded by Mr. G. Lamothe, that the thanks of the shareholders are owed to the president, the vice-president and the directors for their good administration of the affairs of the bank during the financial year just ended. Carried.

Proposed by Mr. Em. St. Louis, seconded by Mr. Alph. David, that thanks be also voted to the general manager and to the assistant-manager and other officers of the bank for the zeal they have shown in the fulfilment of their respective duties. Carried.

Proposed by Mr. J. P. Lebel, seconded by Mr. J. C. Lacoste, that the meeting proceed to the election of directors of this bank, for the current year; that to this effect a single ballot be filled, and that this ballot be considered as expressing the final decision of the meeting. Carried.

The following was the report: "We, the undersigned scrutineers, duly appointed at the annual meeting of the shareholders of the Hochelaga Bank, this day declare the following gentlemen elected directors of this bank for the current year, viz.: Messrs. F. X. St. Charles, R. Bickerdike, C. Chaput, J. D. Rolland, J. A. Vaillancourt.

"(Signed)
"J. E. Beaudry,
"F. Dubreuil.
"Scrutineers.

"Montreal, 15th June, 1898."

It was also proposed by Mr. Charles Chaput, seconded by Hon. L. J. Forget, that considering the gradual and constant extension of the affairs of the Hochelaga Bank, it is in the interest of the shareholders that the capital of the bank be increased, and that the following by-law be adopted: "The capital stock of the Hochelaga Bank is increased to the amount of two million dollars." Carried.

Proposed by Mr. James Price, seconded by Mr. Elzear Dastous, that the board of directors be authorized to take the necessary proceedings in order to obtain from the Treasury Board the certificate required by law approving said regulation and putting it in force. Carried.

Proposed by Mr. J. E. Beaudry, seconded by Mr. J. P. Lebel, that the report of this meeting be printed and distributed to the shareholders for their information. Carried.

At a subsequent meeting of the directors Mr. F. X. St. Charles was re-elected president, and Mr. R. Bickerdike was re-elected vice-president for the current year.

TRADERS' BANK OF CANADA.

Proceedings of the 13th annual general meeting of shareholders held at its banking house, Toronto, on Tuesday, 21st June, 1898:

The chair was taken by the president, Mr. C. D. Warren, and Mr. H. S. Strathy was requested to act as secretary, when the following statement was read:

REPORT.

Net profits for the year, after making provision for bad and doubtful debts and reserving accrued interest, amounted to	$54,891 32
Balance at credit of profit and loss last year	7,695 00
	$62,586 32
Appropriated as follows, viz.:	
Dividend No. 24, 3 per cent., payable 1st December, 1897	$21,000 00
Dividend No. 25, 3 per cent., payable 1st June, 1898	21,000 00
Transferred to Rest account	10,000 00
Balance at credit of profit and loss carried forward	10,586 32
	$62,586 32

In comparing the statement with that of a year ago, the chief changes are, an increase of about $700,000 in deposits and a corresponding increase in loans upon bonds, stocks, etc. The demand for money was light during the first half of the year, rates ruling firmer for the latter portion of it.

The action of the Dominion Government in determining to reduce the rate of interest paid by them on deposits to 2½ per cent. will prove beneficial to the country, and will tend to build up and stimulate the trade of the Dominion.

The cash reserves of the bank and immediately available securities have been maintained at a high standard.

The different branches of the bank, including the head office, have received their usual careful inspections.

The officers of the bank continue to perform their respective duties to the satisfaction of the board.

C. D. Warren, President.

General Statement, 31st May, 1898.

		$6,824,855 13

H. S. Strathy,
General Manager.

Toronto, 31st May, 1898.

The following gentlemen were duly elected directors for the ensuing year:

Messrs. C. D. Warren, John Drynan, Robert Thomson (Hamilton), W. J. Thomas, C. Kloepfer, M.P. (Guelph), and J. H. Beatty (Thorold).

Mr. C. D. Warren was re-elected president, and Mr. Robert Thomson vice-president.

JACQUES CARTIER BANK.

At the annual meeting of the shareholders of the Jacques Cartier Bank, held in Montreal last week, there were present: Hon. Alph. Desjardins, Messrs. A. S. Hamelin, Dumont Laviolette, G. N. Ducharme, L. J. O. Beauchemin, Alderman Laporte, D. O. Bourbeau, Achille Gagnon, Odilon David, J. P. Lebel, P. Garon, Hubert Desjardins, A. Larose, J. Duclos, S. A. Larose, O. Martineau, Urgel Pauze, Dr. A. A. Bernard, and others.

Hon. Alph. Desjardins acted as chairman of the meeting, and Mr. Tancrede Bienvenu, as secretary. Messrs. D. O. Bourbeau and Odilon David were appointed scrutineers.

The directors' report presented to the shareholders at the annual meeting on the 15th of June, 1898, was as follows:

REPORT.

"The board of directors have the honor to present their report upon the operations of the bank during the past year, up to the 21st of May, 1898:

Balance at the credit of the account "Profit and Loss," at the 31st of May, 1897	$11,292 79
Net profits during the past year, up to the 31st of May, 1898, managing expenses, interest on deposits and losses being deducted	$45,397 45
	$56,690 24

"That amount has been distributed as follows:

Dividend 2½ per cent. paid on the 1st of December, 1897	$12,500 00
Dividend 2½ per cent. paid on the 1st of June, 1898	12,500 00
Added to the Reserve fund	15,000 00
Balance at the credit of the account "Profit and Loss"	16,690 24
	$56,690 24

"The above figures, as well as those contained in your general manager's report, show a most satisfactory state of affairs as a result of the financial year just ended. Anxious to close the liquidation which the present manager had undertaken, we have thought it our duty to ask your co-operation in reducing for this year the dividend to 5 per cent., but this sacrifice will only be temporary and we can already foresee that it will not be imposed upon you in the future.

"The success of our work during the past year has been such that after attending to our overdue debts, not guaranteed, which in the last statement of affairs amounted to $65,131.80, and paying a 5 per cent. dividend, we have been able to increase the reserve fund by $15,000, which sum raises that fund to 50 per cent. of the capital, and makes our contingent $16,000.

"The increase of nearly a million dollars in the amount of deposits during the past year shows that the public has given us in a large measure, a share of the business which has been transacted during the past year. The circulation of our notes, limited by the amount of our capital, has been the highest, though we have been obliged to keep in our safes a considerable amount of assets in order to be able to meet any emergency.

"Your directors wish to express their satisfaction with the work which has been done, and it is but fair to say that your general manager, aided by the acting officers of the different branches, has realized every advantage possible, under the state of affairs.

"Answering to reiterated solicitations, we have opened a branch in Ottawa, situated near the French-Canadian commercial centre of the capital, and destined to render important services to our French-speaking countrymen. The first operations of the branch show that the public appreciates its usefulness, and we have reason to hope for the best results for the bank as well as for the public.

"The head office and the different branches have been regularly inspected and we can congratulate ourselves on the zeal and intelligence with which your manager and other officers of the bank have fulfilled their respective duties.

"Respectfully submitted,

"(Signed) ALPHONSE DESJARDINS,
"President."

After reading the report, the president made a few remarks upon the prosperous situation of the bank, and invited Mr. Bienvenu, the manager, to read his report, which follows:

General statement of the affairs of the Jacques Cartier Bank, up to the 31st of May, 1898.

Liabilities.

Notes of the bank in circulation	$ 446,665 00

(Signed) TANCREDE BIENVENU,
General Manager.

Mr. Bienvenu made in substance the following remarks to the shareholders:

Gentlemen,—The progress realized during the past year rises above that of the preceding year. On the 31st May, 1897, the assets of your bank were summed up in the following figures, $3,902,000, and on the 31st May, this year, they were $4,929,000, i.e., an increase of over a million.

Circumstances, however, have been more favorable this year, especially during the last six months. Excessive competition has not ceased to reduce the profits of daily transactions, for all the banks are every day making new concessions to their patrons.

We have successfully passed through those difficulties, and our profits have been $12,000 more than those of last year. We must add that our reserve fund of profits is more than $291,000, i.e., nearly 60 per cent. of the paid capital. This is certainly a fact of a nature to give you confidence in the future.

The situation of the bank is actually such that we are able to derive benefit from any improvement in the general state of affairs.

We have perfected the branch service and, like more important institutions, we propose to suit our operations in the different offices according to the situation in the localities, extending advances to the trade in places favored by a special activity, and all the branch offices becoming exclusively "saving banks." Our agents must be led by those principles, and after a time, we will obtain satisfactory results.

During the past financial year, we have competed with important commercial institutions in the tendering for Federal Government 2½ per cent. bonds, and have had for our share £25,000 worth of those bonds on remunerative conditions. That kind of operation has become necessary, as our business is increasing, and on account of the considerable reserve fund we always keep in hand.

Repairs in the bank building have become necessary, and will cost from $10,000 to $15,000. An elevator will be installed in the building, and the top floor, which has never been used, will be put into good condition. Our tenants desire those improvements, and they are willing to pay a higher rent.

Such has been, gentlemen, our situation during the past year, and we have had the advantage of zealous and persevering officers.

It was proposed by Hon. Mr. Desjardins, seconded by Mr. A. S. Hamelin, that the preceding report be adopted and published for the information of the shareholders. Carried.

Proposed by Mr. H. Laporte, seconded by Mr. H. Larose, that thanks be voted to the president, vice-president and directors for the services they have rendered to the bank during the past year. Carried.

Thanks were also voted to the general manager, to the inspector, and other officers of the bank for the zeal which they have shown in the fulfilment of their respective duties.

The following gentlemen were elected directors of the bank for the ensuing year: Hon. Alph. Desjardins, Messrs. A. S. Hamelin, Dumont Laviolette, G. N. Ducharme and L. J. O. Beauchemin.

Thanks were voted to the scrutineers and the meeting was adjourned.

Commercial.

TORONTO MARKETS.

Toronto, June 23rd, 1898.

DAIRY PRODUCTS.—Receipts of dairy butter have been more liberal, and in the face of lack in the local consumptive demand, the bulk of this butter has been placed by the merchants in cold storage. For dairy butter there is at present positively no outlet in the export markets unless at a considerable loss in value. Business is speculative and dealers who purchase heavily must shoulder responsibilities. Receipts of May creamery butter continue fairly liberal. The market seems to be a little bit firmer, and exporters are apparently more anxious buyers than they were some weeks ago. We are at a loss to understand the reason for this, as our mail advices of June 10th indicated a slow market abroad. We append the following from a letter of June 10th: "In the markets of the United Kingdom, business in imported butters has been very sluggish for weeks, mainly owing to three causes. Firstly, the large crops of winter fodder last season, which enabled dairy farmers and cottagers to keep great numbers of in-calved heifers and cows through the winter, which would otherwise have been sent to the fat stock market, and this increase in the milking herd of the United Kingdom is now being felt in the country markets where very large supplies of home produced butter are on offer. Secondly, the prices which home-made cheese brought last season were mostly unremunerative, consequently many who last season produced cheese are this year making butter instead. Thirdly, the high price of bread—a penny to three halfpence per quartern loaf higher than last year—is having a minimizing effect on the demand, for bread is a necessity, while butter, unfortunately for the masses, is still very largely in the category of luxuries." A large portion of the butter purchased, however, it is said, is being stored. On the whole, shipments to date are larger than they were a year ago, amounting to 21,248 packages from Montreal up to 18th June, against 6,926 for the same period last season. There has been somewhat of a flurry in the cheese market as we elsewhere note, and prices have advanced ¼ to ½c. per pound

FLOUR.—The market is sick. Buyers are conspicuous by their absence. Not only is there no opportunity to make new contracts but contracts made some weeks ago are being violated. There are few dealers we think who stop to carefully consider the immorality in the repudiation of a contract which has been partially performed. Merchants who purchased goods upon order some weeks ago, when prices were high, and having made prompt delivery, now in many cases find the goods refused on trivial grounds which are the barest subterfuges to conceal the fact that the buyers wish to drop out of the bargain and leave the flour in the hands of the seller. All prices are lower. We quote: Manitoba Patents, $5.20; Manitoba Strong Bakers', $5.90; Patents, $4.10; Straight Rollers, $3.90 per barrel.

GRAIN.—So far as Ontario wheat is concerned, although the feeling has been weak and the market contains few conditions of strength, prices remain as last quoted. Manitoba wheat is, however, much under last week's prices, ranging from 95c. to $1.05. Barley is low and unchanged. Oats have declined to 27 to 28c. outside. Peas are down 2c. per bushel, as against last week's quotation. Corn is dull and quotations nominal.

HARDWARE AND METALS.—While trade is not quite as good as it has been, yet there is a considerable demand for harvest tools and other seasonable goods, values of which remain steady and unchanged. In rope, phenomenal advances continue to be reported daily, as a result of the immense crops which are certain to be harvested in America and other grain-producing countries, for which a considerable quantity of tools will be required, and the critical situation at Manilla and primary producing points. Manilla is now quoted on the basis of 13⅛c. while Sisal is at 11⅞c. Lath yarn too has advanced to 10¼c. basis. Zinc spelter is firm, and dealers quote 5 to 5¼c., while zinc sheet has advanced to 5¾ to 6c. Reports from retailers throughout the country indicate a healthy condition of trade and lead the wholesale trade to expect a good autumn business.

HIDES AND SKINS.—Competition in the hide market is more keen. Purchasers during the past month or so have agreed to limit their prices for green hides to a point which would admit of a moderate margin to the handler, but this week in the advance of fifty cents per cwt., which has taken place, bringing green cow hides up to a quotation of 9c. and steers 9½c., it is very small indeed. However, there are no large stocks of hides on hand, and some of the dealers are well sold ahead. Calf skins are competed for at 10c. with rumors that more has been paid in order to secure the trade of certain butchers. From Chicago, June 21st.—The demand for packer hides was quiet, neither tanners nor dealers being anxious, buyers preferring to operate on a hand-to-mouth basis; packers, however, were not anxious to make sales, and values were well maintained, closing at 12 to 12½c. for native steers. 11¾ to 12c. for Texas; 10¾ to 11c. for butt brands; 10 to 10¼c. for Colorados; 10½c. for branded cows; 11½c. for heavy native cows, and 11¾ for light do.

HOG PRODUCTS.—There is not as much buying this week as has taken place in the market during the past several months. No doubt the hot weather has contributed to this end, while the cheapness of fruit has acted as a substitute for provisions and meats. However, for the season of the year, the demand is fairly good, and although orders are not large, they are regular. Prices remain steady with no advances.

WOOL.—As we predicted early in the season, the clip is moving very slowly. The farmers have snown more disposition to sell in certain districts than merchants who have bought from first hands. In certain districts, around Perth for instance, 17 and 18c. per pound has been paid for fleece wool. The standard quotation in Toronto is 16c. per pound, and even this offers no great temptation to exporters. It is little wonder then that buyers in the country are not disposed to sell on this market, while merchants here are not unwilling that the extravagant purchaser should carry the wool, and, as they think, pay the penalty of his folly.

MONTREAL MARKETS.

Montreal, 22nd June, 1898.

ASHES.—The market may be called somewhat firmer, not from any improvement in the demand, which is of the poorest, but from actual scarcity. There is reported to be only about 20 brls. in store, and receipts show no signs of increasing. We quote first quality of pots, $3.65 to $3.75; seconds, $3.40 to $3.45; pearls, $4.75 per cental.

CEMENTS AND FIREBRICKS.—There is some slackening off in the hitherto brisk demand for cements, but prices are steadily held at $2.20 to $2.30 for British, and $1.80 to $1.90 for Belgian; firebricks $16 to $22 per thousand. Receipts since last report have been small, namely 1,500 brls. of Belgian, and 46,000 bricks.

DAIRY PRODUCTS.—Cheese exports for the past week are again behind those of a year ago, being 64,102, which, though fairly large figures, are some 31,000 boxes less than the same week of 1897. The total shortage for the season thus far is about 114,000 boxes. The cable shows a little gain in the Liverpool market of sixpence a cwt., and the local tone is rather stronger. Quebec cheese is selling this week at 6¾ to 7c., and a fair quotation for Western would probably be 7¼ to 7½c. Butter shipments last week were the largest yet, being 9,942 packages, which is some 5,000 more than the same week last year, and the total gain this season to date is some 15,000 packages. The market continues practically on about the same basis as last week, creamery quoting at 16 to 16¾c. per pound.

DRY GOODS.—Wholesale business in general dry goods continues of satisfactory character, and city retailers speak in a more cheerful strain regarding current sales than they have done for several years. The recent advances in the raw wool market are now making themselves felt in the prices of certain lines of dress goods, and makers' prices of French plain dress goods have been advanced ten per cent. Bradford goods are also reported very firm. Linens are strong, and it is expected that an advance is probable whenever the Americans begin any free buying.

FURS.—Full telegraphic advices regarding the London raw fur sales of last week are now to hand, and are as follows: Coon, red fox, lynx, wolf, mink and black bear sold at the same figures as last March; brown bear sold 20 per cent. lower than March, grizzly bear 12½ per cent. lower, otter, 7½ per cent. lower, badger 20 per cent. lower, skunk 7½ per cent. lower, spring rats, 15 per cent., lower than January, fall ditto, 5 per cent. lower than January, beaver same as January, marten, 10. per cent. higher than March, and possum 15 per cent. higher than March. Some fair lots of pelts are reported this week from Manitoba and Upper Ottawa points. We quote: Mink, large dark, $1.50; small, do., $1 to $1.25; marten, $1.75 to $2.25; fisher, $4.50 to $7; lynx, $1 to $2; otter, $1 to $12 for dark; pale, $5 to $7; red fox, large, $1.30 to $1.50; small, $1; cross fox, $3 to $6; bear, cubs, $3 to $7; medium, $7 to $10; large, $12 to $15; skunk, 15 to 70c., as to color and stripe; coon, 20 to 75c.; rats, fall, 7 to 10c.; kits, 2 to 5c. Beaver, not quoted, killing being forbidden by law.

GROCERIES.—Sugar prices have again been shaded a sixteenth since last writing, making standard granulated at factory now 4⅜c., and yellows from 3½ to 4c. per lb. The demand from the country is reported brisk, and jobbers are buying more freely. The lower prices have apparently checked business in foreign refined, and little business is reported in these lines the past week or so. Molasses continues very firm on spot at 30 to 31c. for Barbadoes in jobbing lots; the last quotation of first cost at the island is eleven cents. Some fair amount of business is reported between packers and jobbers in new canned strawberries, at $1.25 to $1.35, but the leading Western packers are withholding quotations of vegetable until the state of the crop is more assured. The tea market rules very strong on spot, and advices from Japan indicate great firmness there, with the cost of desirable goods from 2 to 3c. higher than a year ago. The steamer, which arrived at Vancouver on the 7th inst., is said to have some 700 or 800 packages of high-priced goods for this market, but it is said that comparatively few goods of medium grade have yet been secured for Canada, and some scarcity is predicted of these sorts. Ceylons coming forward are showing good value.

Hides and Tallow.—The situation is totally unchanged from that of a week ago. The competition from outside hide buyers is not so active, but the strong advance in price of a fortnight ago is fully sustained, dealers buying beef hides on the basis of 11c. per lb. for No. 1; calfskins, 10 and 8c.; lambskins, 20c. each. The receipts of hides are showing a little increase, but all supplies are well absorbed. Tallow continues in the usual dull state, and we quote 1 to 1½c. per lb. for rough, and 3 to 3½c. for rendered.

Hops.—Transactions reported are few in number, and very moderate in extent. We quote choice Canadians at 13 to 15c., yearlings 8 to 10c. per lb. The growing crop is said to promise well.

Leather.—Shoe manufacturers in this city do not seem to have got well into the cutting of fall stock yet, and no very large parcels of leather are being bought by them thus far. Quebec manufacturers also report some delay in the placing of shoe jobbers' orders. The export trade in leather is, however, well maintained, and letters from tanners generally complain of the disparity in the prices of hides and of leather, and hint at stiffer prices. We quote: Spanish sole, B.A., No. 1, 24 to 25c.; do., No. 2, 22½ to 23½c.; No. 1 ordinary Spanish, 23 to 24c.; No. 2, 20 to 21c.; No. 1, slaughter, 26 to 28c.; No. 2, do., 24 to 25c.; common, 20 to 21c.; waxed upper, light and medium, 30 to 35c; do., heavy, 27 to 30c.; grained, 32 to 35c.; Scotch grained, 30 to 35c.; Western splits, 22 to 25c.; Quebec do., 18 to 20c.; juniors, 18 to 20c.; calf-splits, 30 to 35c.; calfskins, (35 to 40 lbs.), 60 to 65c.; imitation French calfskins, 65 to 75c.; colored calf, American, 25 to 28c.; Canadian, 20 to 24c.; colored pebble cow, 13 to 15c.; russet sheepskins linings, 30 to 40c.; colored 6 to 7½c.; harness, 24 to 27c.; buffed cow, 13 to 15c.; extra heavy buff, 15c.; pebble cow, 13 to 13½c.; polished buff, 12 to 13c.: glove-grain, 12 to 13c.; rough, 22 to 23c.; russet and bridle, 35 to 45c.

Metals, Etc.—Since last report we hear of the sale of a 300-ton lot of No. 3 Hamilton pig iron at $14.50, but no notable transactions have transpired in other brands of either domestic or Scotch. Somewhat contradictory reports are heard regarding Canada plates, one buyer claiming he could get 52's at $2.07½, but the general asking price is $2.15, and $2.30 for 60's. Charcoal tins are quiet, but there is pretty steady request for cokes. English quotations for these lines are very firm, and there seems some expectation that the colliers' strike in Wales will extend, in the near future, to the plate makers. We quote: Summerlee pig iron, $17.50 to $18; Carron, No. 1, $18; No. 3, $17.25; Ayresome, No. 1, $17.50; No. 3, $16.50; Shotts, $17.25 to $17.50; Carnbroe, $16, ex-store; Feronna, No. 1, $15; Hamilton, No. 1, $15 to $15.50; No. 2, ditto, $14 to $14.50; machinery scrap, $14 to $15; common ditto, $12 to $13; bar iron, Canadian, $1.40 to $1.50; British, $2 to $2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.15, 52 sheets to box; 60 sheets, $2.25 to $2.30; 75 sheets, $2.35 to $2.40; all polished Canadas, $2.40 to $2.45; Terne roofing plate, 20 x 28, $5.75 to $5.90; Black sheet iron, No. 28, $2.25; No. 26, $2.15; No. 24, $2.05; No. 17, $2; No. 16 and heavier, $2.15; tin plates—Bradley charcoal, $5.60 to $5.70; charcoal, I.C., Alloway, $3.15 to $3.25; do., I.X., $3.90 to $4; P.D., Crown, I.C., $3.60 to $3.75; do., I.X., $450; Coke, I.C., $2.90 to 2.95; do., standard, $2.75 to $2.80 for 100 lbs.; coke, wasters, $2.70; galvanized sheets, No. 28, ordinary brands, $4; No. 26, $3.75; No. 24, $3.50 in case lots; Morewood, $5 to $5.10; tinned sheets, coke, No. 24, 5½c.; No. 26, etc., the usual extra for large sizes. Canadian bands, per 100 lbs., $1.65 to $1.75; English hoops, $2 to $2.15. Steel boiler plate, ¼-inch and upwards, $1.85 to $1.90 for Dalzell, and equal; do., three-sixteenths inch, $2.50; tank iron, ¼-inch, $1.50; three-sixteenths do., $2; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to $2.50; Russian sheet iron, 9c.; lead, per 100 lbs., $3.85 to $3.90; sheet, $4 to $4.25; shot, $6 to $6.50; best cast-steel, 8 to 10c.; toe calk, $2.25; spring, $2.50; sleigh shoe, $1.85; tire, $1.90; round machinery steel, $2.25; ingot tin, 16¾ to 17c. for L. & F.; Straits, 16¼ to 16½c.; bar tin, 17 to 18c.; ingot copper, 13 to 13½c.; sheet zinc, $5 to $5.25; Silesian spelter, $4.75; Veille Montagne spelter $5 to $5.25; American spelter, $4.75 to $5; antimony, 9½ to 10c.

Oils, Paints and Glass. — Rather more enquiry is reported for Paris green, which has been somewhat quiet, and for which quotations are very firm, at the recent advance. Dry leads are, if anything, firmer abroad. A fair volume of business is reported for the season, with values generally very steadily held. We quote: Turpentine, one to four barrels, 45c.; five to nine barrels, 44c.; net 30 days. Linseed oil, raw, one to four barrels, 49c.; five to nine barrels, 48c.: boiled, one to four barrels, 52c.; five to nine barrels, 51c., net 30 days; olive oil, machinery, 90c.; Nfld. cod, 37 to 40c. per gal.; Gaspe oil, 33 to 35c. per gal.; steam refined seal, 45 to 47½c. per gal. in small lots. Castor oil, 9 to 9½c. as to quantity. Leads (chemically pure and first-class brands only), $5.62½; No. 1, $5.25; No. 2, $4.92½; No. 3, $4.50; No. 4, $4.12½; dry white lead 5c.; genuine red do., 4¾ to 5c.; No. 1 red lead, 4½ to 4¾c.; Putty in bulk, bbls., $1.65; kegs, $1.80; bladder putty, in bbls., $1.80; smaller quantities, $1.95; 25 lb. tins, $2.05; 12½ lb. tins, $2.30. London washed whiting, 40 to 45c.; Paris white, 85 to 90c; Venetian red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2. Paris green, 50 and 100 lbs., drums 17c.; 25 lb. drums, 17½c.; 1 lb. cartoons, 18c.; pound tins, 18½c.; window glass, $1.40 per 50 feet for first break; $1.50 for second break; third break, $3.10.

Millers' & Manuf'rs Ins. Co

Established 1885

HEAD OFFICE:
Queen City Chambers, Church St., Toronto.

DIRECTORS:
JAS. GOLDIE, Pres. J. L. SPINK, Vice-Pres.
Thos. Walmsley, Treas. Hugh Scott, Mgr. and Sec.
Adam Austin, Inspector.

This Company was organized in 1885, specially for the purpose of insuring manufacturing industries, warehouses and contents.

The primary object being to give protection against loss by fire at a minimum cost consistent with absolute security.

The system adopted has been to inspect all risk before acceptance and fix the rate to be exacted equitably in accordance with the hazard assumed.

Assurers with this company have made a saving, upwards of $108,000.00 on the current rates charged, in addition to which, on the rates exacted by us, dividends have been declared to policy-holders amounting to over $24,000.00, together, making the very substantial sum of over $132,000.00 that our policy-holders have saved during the eleven years we have been in operation.

As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please address

Millers' and Manufacturers' Insurance Co.,
32 Church Street, Toronto, Ont.

The DOMINION Life
ASSURANCE COMPANY

HEAD OFFICE, ... WATERLOO, ONT

Authorized Capital..................$1,000,000
Gov't Deposit at Ottawa 50,000
Subscribed Capital.................. 257,600
Paid-up Capital 64,400

The Dominion Life has made handsome gains in very essential feature during 1897.

It has gained in number of lives assured, 8.2 per cent.; in cash premiums, 8.5 per cent.; in number of policies, 8 6 per cent.; in amount assured, 10.5 per cent.; in interest receipts, 16.5 per cent.; in assets, 19.0 per cent.; in surplus over all liabilities, 42.2 per cent.

No Company anywhere is safer, sounder, more equitable or more favorable to the assured in all its arrangements than the Dominion Life. Call on its agent when thinking of putting on more life assurance.

James Innes, M.P., Pres. Chr. Kumpf, Esq., Vice-Pres
Thos. Hilliard, Managing Director

MR. LEITER'S "LITTLE GAME."

Some years ago when Mr. Hutchinson was a power in the Chicago "pit" the collapse of one of his extended operations was recorded by a local correspondent of one of the New York dailies in the following words: "'Old Hutch' bit off more than he could chew, and the cyclone burst with redoubled fury about his devoted head." This is very much what happened to young Mr. Leiter of the same enterprising town. The public will doubtless never know the details of his experience during the past year or so, but business men who are in a position to know its general course, and some who have had a good deal to do with shaping it at the close, declare that if he had contented himself with actual buying and selling wheat up to the time it touched say $1.40, he would have realized a very handsome profit, and that he exposed himself to disaster when he undertook to control future deliveries at prices up to $1.85. That was a species of gambling unquestionably, and he bet more than his hand would justify.

We should be glad to use this gigantic but very simple scheme to draw a moral that would be agreeable to those of our readers who abhor speculation, and one which would prevent those of them who are prone to speculation from incurring on a large or small scale the inconvenience from which Mr. Leiter is now suffering. But so far as the latter class are concerned they would pay no attention to our teaching, though it were made of wisdom pure and simple. Experience is the only teacher men of this disposition will listen to, and it must be their own, not others', experience, And as for the condemnation of all speculation, it seems to us as unreasonable as it is futile. The desire of men for larger profits than are promised by the ordinary transactions of business life is an enormous power for the development of the resources of the human race and the advance of civilization. It has existed and expanded ever since the Phoenicians crept through the Pillars of Hercules and made the first daring experiment in the trade that now circles the globe. The line at which this desire becomes dangerous is always indeterminate, and varies with time and circumstance, and especially with the mental force of those inspired by it. If the danger line is passed the adventurer promptly meets a check from the operation on other minds of precisely the motive that impels his own course. When Mr. Leiter sought to get for his wheat a higher price than the relation of general demand to supply warranted, multitudes of men with wheat to sell saw the chance for unusual profit for themselves and took it. The motive that made them hold their wheat until that point was reached was substantially the same as that of Mr. Leiter in trying to get that price for his.

The essential fact in the story is that if the general conditions had not warranted an advance very nearly as great as that by which Mr. Leiter made his gains, he could not have made them, and that when he undertook to force a price not justified by those conditions, he broke down. From this it ought to be clear that any attempt to check such operations as this by law will be needless, since the laws of human nature check them when they become excessive, and such an attempt may be exceedingly mischievous since it is by such operations, freely undertaken, that the true relations of supply and demand and the "fair" price of any stable commodity are fixed.

RAILWAY ACCIDENTS IN 1897.

The annual returns are published giving the accidents and casualties reported to the Board of Trade by the railway companies of the United Kingdom, during the year ending December 31st last. They show a serious increase in the fatalities to passengers. It appears that, during the period under notice, accidents of different kinds caused the death of no less than 34 persons, and injury to 476 as against only 8 persons killed and 549 injured during the previous year. The thing of course that at once strikes one here, is the marked augmentation in the deaths, for the injured are actually less than when the killed were more than four times as numerous.

But this is not by any means all, for if we turn to the dismal roll of deaths and casualties due to other causes than actual railway accidents pure and simple, we find that the number of fatal cases is really dreadful, for it amounts to 630, and of these 115 were passengers, while the number of those who met with accidents, at all events not immediately fatal, was 1,637, of whom 1,315 were passengers. It appears, on a further analysis of the report that 34 passengers were killed by falling between the train and the platform, and 120 were injured from this prolific cause of railway accident. No less than 234 were injured by the closing of carriage doors, and 18 lives were sacrificed through falling out of carriages while trains were on their journey.

We also glean from these exhaustive returns that as many as 80 persons were killed and 25 injured while passing over those level crossings, which are such constant sources of deplorable fatalities. Further, it is stated that 255 persons were killed and 142 injured while actually trespassing on railways. The number of suicides—railways seem to fascinate some morbid minds in this direction—was 132. Besides all these fatalities occurring to the general public, it also appears that during the year in question, there was a terrible increase in the loss of life among railway employees. The number of killed was 510, against 447 in the previous year, while those injured are returned at 4,129, against 2,986 in the previous year.

This is altogether a very dismal record, and it seems to indicate that there has been a retrogressive movement in regard to the various endeavors that have been so long making, with a view of rendering railway traveling, and also the general work of railway employees, less dangerous than hitherto. It is certainly extremely disappointing to find that this is so, and the more so, considering how much has been done in the way of so-called improved signaling, and in better equipment of the rolling stock, to say nothing of a thousand and one things that have been done for the express purpose of introducing a generally greater degree of safety into everything connected with our railway service. One very obvious outcome, of even a very cursory glance over these melancholy returns, is the conclusion that the reasons for insuring against railway accidents are stronger and more convincing now than ever.—London Spectator.

SURPRISING RECORD OF MANUFACTURED EXPORTS.

The manufacturers of the United States are making in the fiscal year closing with the present June their greatest record in competing for the markets of the world. Not only will the exports of manufactured articles for the fiscal year exceed those of any previous year, but for the first time in the history of the country they will exceed the imports of manufactures. In the ten months of the fiscal year ending with April, whose detailed record the Bureau of Statistics has just completed, the exports of manufactures exceed by over $40,000,000 the value of the manufactures imported, and it is probable for the full year's record this excess will reach $50,000,000.

In no preceding year in the history of the country have the exports of our manufactures equaled in value the imports of manufactured articles. In the fiscal year 1897, the imports of manufactured articles exceeded the value of exports of manufactures by the sum of $27,362,217; in 1896 by $104,759,734, and in 1895 by $121,413,783.

Nearly every branch of our manufacturing industries has shared in this growth of our sales to other parts of the world. The exports of agricultural implements, for instance, will in the year 1898, be in round numbers, $6,000,000. Locomotive engines, whose exportation in 1888 were less than $500,000 in value, will in 1898 reach probably $4,000,000. The total value of the exports of manufactures of iron and steel, which in 1888, amounted to $17,763,034, will in 1898 exceed $65,000,000.—Iron Trade.

CIGARS AND "STOGIES."

Few people ever give a thought as to how many cigars and stogies are consumed in the United States in a year. What is a "stogie?" some of our readers will naturally enquire, who have never heard the word except as applied to boots, although we find it in the Standard Dictionary of Funk & Wagnalls, described as "a coarse cigar." The stogy or stoga of the tobacco order originated some quarter century ago, when in Wheeling, Virginia, ordinary coarse leaf, used generally for plug chewing or smoking, was rolled into the shape of a cigar, the price at retail being about 10 cents the dozen. These "cheap and nasty" products are, or were known as "Wheelings." By a recent fiscal return, the district in which Wheeling, W. Va., is situated, produced 70,161,285 "Wheelings" during the fiscal year, to be smoked by the men who have graduated from the stogie class.

But the great centre now-a-days for the production of stogies is Pittsburg. The men employed in the metal works, and other laborers there smoke them, thinking perhaps that it is rather more genteel than smoking a pipe. The figures for the fiscal year ending March 31 last show that during the twelve months the total produce was 2,259,596,607. During the same period there were manufactured in the Twenty-third district of Pennsylvania, in which the city of Pittsburg is situated, 310,089,720 stogies, or one-seventh of the total output of cigars and stogies in the United States, which is something of a proof that the stogie is becoming popular, for even the Pittsburg millionaire and workingman could not have consumed that enormous number. The cheapness of the stogy is in part accounted for by the use of cheap child labor. There is one factory in Pittsburg which gives employment to 300 men and girls the year around in the sole manufacture of stogies.

DEVELOPMENT ON THE PACIFIC.

An American, who has resided for the best part of a year in Japan, Colonel W. H. H. Stowell, has returned to Duluth, where he is in business. "I think," says Colonel Stowell, "the future development of our country lying on the Pacific Ocean is going to be very great. For centuries the Mediterranean Sea was the centre of the commerce of the world. During the past 400 years the Atlantic Ocean has been the great commercial centre. The time is rapidly approaching, I think, when the Pacific ocean will be the scene of the greatest activity of the world's commerce. The Pacific coast is a vast empire of itself, 350 miles wide and 800 miles long, producing in abundance almost everything that is grown in the way of agricultural products and fruit."

—A recent despatch from Shanghai says: These are trying times in China. The Imperial Government is passing through a crisis. The intrigues and cross intrigues of the Court, together with the constant friction between the Manchus and the Chinese in the Imperial councils, are complicating matters.
